FOUR STARS IN F. F. A. . . . Highest honors in the Future Farmers of America, as announced at the American Royal Livestock show, went to these four youths: Top left, Marvin Krull of Lake Mills, Wis., Star Farmer of Central region; top right, Ray Cinnamon of Garber, Okla., Star Farmer of America; lower left, Wayne Stull of Yakima, Wash., Star Farmer of Pacific region, and lower right, Hoopes Yarnell of Cochranville, Pa., Star Farmer in North Atlantic region.

FAITH BORN OF DEEDS

Four Rural Youths Receive F.F.A. Star Farmer Awards

By W. J. DRYDEN
WNU Farm Editor

"I believe in the future of farming, with a faith born not of words but of deeds . . ."

Deeds like these bear out that excerpt from the Future Farmers of America creed:

In his first year out of high school, a 19-year-old Oklahoma boy netted more than $5,000 from his varied farming enterprises.

At the age of nine a Washington boy launched his first farm project. Before he entered high school his bank account totaled $2,000. Now, only 19, he figures his net worth at $41,500.

Deeds like these are repeated in countless number by farm youth throughout the nation, and once each year the outstanding achievements are rewarded when the Future Farmers of America presents its coveted Star Farmer awards.

As usual, the awards were presented at the organization's annual national convention, held at Kansas City, Mo., in connection with the American Royal Livestock show. Chapter delegates and local leaders from every state in the union converged on Kansas City to witness the show and to see the Star Farmer selected.

The highest honor, that of the coveted Star Farmer of America, went to Ray Gene Cinnamon, 19, of Garber, Okla. Cinnamon shared the spotlight with three other young farmers, Marvin Krull, 19, of Lake Mills, Wis.; Wayne Francis Stull, 19, of Yakima, Wash., and Hoopes T. Yarnell, 20, of Cochranville, Pa. These three were named Star Farmers of the Central, Pacific and North Atlantic regions, respectively.

Wins Major Award.

Cinnamon, the Star Farmer of America for 1947, netted $2,454 from 120 acres of wheat last year. In addition, he had a herd of 100 Aberdeen Angus cattle, which boosted his income by $1,400. Other farming interests, including hogs, sheep and oats, combined with the cattle and wheat to give him a net income of more than $5,000, his first season out of high school. His income for 1947 is expected to pass the $7,000 or $8,000 mark.

When he was only nine years old, Stull, Star Farmer of the Pacific region, started his first farm enterprise. By the time he entered high school he had $2,000 in the bank. Now considered one of the best apple growers in the district, he netted more than $18,000 last year. He figures his current net worth at $41,500.

Krull, choice of the F.F.A. for Star Farmer of the Central region, is in partnership with his father in a 300-acre general crop and livestock farm. During his four years of high school he netted about $1,500. His income from personally-owned farming ventures in the two years he has been out of high school has approximated $4,200.

A poultry project while attending high school was the first major F.F.A. activity for Yarnell, who was adjudged Star Farmer of the North Atlantic region. In 1946 Yarnell bought an interest in his father's general 121-acre farm. Their major attention is centered on 54 dairy cattle and several hundred laying hens.

The Future Farmers of America is the national organization of farm boys studying vocational agriculture in public secondary schools which operate under provisions of the national vocational education act. Since its inception the organization has grown rapidly in number of chapters and membership. Now active throughout the United States, Hawaii and Puerto Rico, it is recognized as the largest farm boy organization in the world.

Major purposes of the F.F.A. are to develop agricultural leadership, co-operation, citizenship, improved agriculture and patriotism.

The national organization includes chartered state associations composed of local chapters formed only in public high schools having departments of vocational agriculture. The F F A foundation also has been established to provide business, industry, organizations and individuals with an opportunity to co-operate in promoting the F.F A. program and to assist students and former students of vocational agriculture to become established in a farming occupation

Award for Achievement.

Included in the F F.A. program are four degrees of active membership Green Hand, Chapter Farmer, State Farmer and American Farmer Advancement through these grades of membership is based on achievement in vocational agriculture and progressive establishment in farming Only one boy in a thousand among F F A. members may receive the American Farmer degree in any one year The Star Farmers are selected from this group

F F A. members receive instruction in all phases of farming. Teachers of vocational agriculture visit the boys frequently on their home farms to assist them with their farming activities and to encourage them in their work.

Many former F.F.A. members now teach agriculture in high schools and colleges, others serve as farm advisors, but the majority are operating their own farm projects successfully.

Note in Trousers Leads to Friendship

SIBLEY, IOWA. — A note tucked in a pair of trousers returned to a mail order house has led to an unusual friendship between two farm boys.

Back in 1939 when Mrs. Grover Jones, Greensburg, Ky., farm wife, returned the trousers, she tucked a note in one of the pockets of the garment, seeking a pen pal for her six-year-old son, Wydell, for whom the trousers had been ordered.

A few weeks later Mrs. Kenneth Stevens, Sibley farm wife, ordered a pair of trousers for her six-year-old son, Dicky, and found the note. For the past eight years the two boys have kept up a correspondence.

The friendship was culminated this summer when the Stevens family made a 1,000-mile trip to Kentucky to visit the Jones family. The Jones family will visit the Stevens family in Iowa next summer

The Controversy on Tax Reduction

IF A special session is called in December will the GOP leadership be content with passing enabling legislation to provide for stop-gap relief for Europe or will they insist on taking up other legislation? Taxes, for instance. Everyone believes in tax reduction, Democrats as well as Republicans, but here's the argument at this time:

Republicans say there is no justification for wartime taxes in peacetime and that present taxes are an unreasonable burden; that present revenue is high enough that taxes can be cut and leave enough over to pay some on the national debt; that present level of taxes is inflationary encouraging farmers and business to hold goods off the market in anticipation of tax cuts to allow them to retain a bigger margin of profits.

Democrats argue it is more important now to create a surplus to apply on the national debt; that unpredictable foreign obligations may require a substantial increase in governmental expenditures and that a tax reduction would be inflationary in that it would increase spending power and add to the demand for scarce goods by leaving more money in people's pockets.

Whether or not the issue comes before a special session, tax reduction definitely will be one of the major controversial issues before the second session of the 80th congress when it reconvenes in January.

H. I. PHILLIPS

All Out in Food Campaign

Charley Luckman, whirlwind head of a soap manufacturing firm, has been named chief of the President's committee charged with directing the drive to get Americans to be a little more careful about food. This is not, of course, to imply that there is any danger of a cry "Let them eat CAKES!"

—•—

If Luckman wants a few slogans, how about "when you refuse a second helping you give a hungry child a FIRST helping."

—•—

"Eight per cent more meat is being consumed per person today than in 1941 and 20 per cent more than in 1939." — Washington announcement.

—•—

Trying to convince a housewife of that as she totters around town trying to dig up something—for dinner is going to be difficult.

• • •

That robot or pushbutton plane that crossed the Atlantic is a wonderful thing, but what we need is some development of the idea so it can be affixed to a man trying to cross a street in traffic.

• • •

PLIGHT OF AN AMERICAN IN A WORLD CRISIS
He wanted to help,
His heart lacked no pity;
He asked what to do
And got a COMMITTEE!

• • •

We know a wife bound for Reno who rushed to the station and demanded "What time does the Freedom Train leave?"

PAUL MALLON

Unions Control Labor Board

THE UNIONS are railing the new National Labor Relations board as a tyrannical oppressor, designing to enslave them—but actually they have control of the board.

A fair summation of the setup there would list three of the five members likely to be very pro-labor on a showdown. Union margin would be three to two. Leaning on the labor side in basic background are Paul Herzog, the old chairman; John Houston of the old board, and Abe Murdock. Another holdover, James J. Reynold, and a new man, J. Copeland Gray, are classified as likely to be the minority of two.

The Republicans are suspicious of the kind of enforcement into which their new reform law might trend. They are saying little or nothing about this, being quite satisfied with initial steps taken, but their fear is well grounded and real. It is merely in abeyance to ascertain if it is justified.

Yet if anything is done to enslave any unions, it will be done by a facially apparent pro-union board.

A tighter question, however, is how well the legally well-endowed new general counsel, Robert Denham, performs. He has enough law behind him apparently, has supervision directly over district offices of the board, and will initiate and follow through on all the prosecuting of cases.

WALTER WINCHELL

Notes of a Bystander

The Aristocrats: Gabe Heatter's arithmetic made sense when he pointed out that "One and One now makes One." (Since the U. S. dollar now is worth only 50 cents). But Gabe went out on a pink cloud and predicted peace for the next 50 years. . . . Some of us who shudder at the grim facts (instead of rainbow-hued crystal balls) would hesitate to predict peace for the next 50 hours

Quotation Marksmanship: A. Maurois: A successful marriage is an edifice that must be rebuilt every day. . . . Elaine Rost: The longer the hems the fewer the ahems. . . . I. Elinson: A candidate is a guy who throws his hat in the ring and puts on a halo. . . . L. Martin: Let others form your opinion of yourself. . . . Mary Wilfred: Rain typing on the floor.

Man About Town: WACapt. Kathleen Nash Durant (released on bail in that huge gem theft abroad) is dwelling here so she can be near her colonel-bridegroom, now jailed on Governor's island. . . . It must be ironic for Russians to see Vishinsky losing his head. He was responsible for so many Russians losing theirs to the executioner.

The Stage Door: The Sardi's set hears that at least one of the many plans of the Freres Shubert (a new "Ziegfeld Follies") will have to materialize this year. Because if they don't, their right to that title lapses after this season. . . . The 52nd street spots did capacity biz the other night for the first time since New Year's.

★ ★ ★ ★

DREW PEARSON

Making Democracy Live

STANLEY BOJENS, an ex-G.I. of San Diego, Calif., has developed a peace program called "Peace by Postage," a sort of "personalized foreign policy." Plan consists of sending personal parcels to families in foreign countries who befriended G.I.s during the war. "If veterans themselves can win individual friends," says Bojens, "it will be difficult for governments to go to war."

Harold Hermanson has inspired the alumni of the Bethesda-Chevy Chase senior high school in the suburbs of the nation's capital to give the children of war dead as good an education as the children of fathers who lived. When Hermanson saw some of his buddies killed, he determined to do something for their children. With the help of many patriotic alumni of his old school, Hermanson, a bachelor, has made good that promise.

AMVETS (Ray Sawyer, national commander)-was the only veterans organization to appear before the senate to champion the O'Mahoney-Langer anti-monopoly bill; also was first to support the Marshall plan. . . . Senator Bridges of New Hampshire has made it a flat rule that all senators who went to Europe this summer on his appropriations committee must pay their wives' expenses.

WRIGHT PATTERSON

Consumer Is Forgotten Man

BECAUSE of the votes those groups represent, congress has demonstrated its willingness to build a floor under the income of minority groups on their demand. But congress has not been willing to provide a ceiling for that far greater number, the American consumer, as protection for all of us from the devastation of inflation. Wages are regulated so they will not drop below the floor, but there is no ceiling to stop their upward climb. What is true of wages is also true of food prices. The consumer is the forgotten man, but he, too, votes. Congress might well bear that warning in mind.

Boy Helped Solve Problem Of Bridging Niagara Falls

When the first bridge over Niagara Falls was planned in 1848, the problem of getting a cable from the American to the Canadian side was solved by offering $5 to the first person who could make a kite carry a string across the 800-foot chasm.

After this had been accomplished by a boy, the string was used to pull over a small steel cable which, for several years, enabled persons to go back and forth, two at a time, in a little wire basket.

The original steel suspension bridge thrown across the river just below the American falls had a span of 820 feet, and was long considered to be a feat of engineering.

HOT FLASHES?

Women in your "40's"! Does this functional 'middle-age' period peculiar to women cause you to suffer hot flashes, nervous, highstrung, weak, tired feelings? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. It's famous for this purpose!

Taken regularly—Pinkham's Compound helps build up resistance against such distress. Thousands have reported benefit! Also a very effective stomachic tonic. Worth trying!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

with Swedish Steel Blades

HANCOCK COUNTY BOARD PROCEEDINGS

3RD ADJOURNED SEPTEMBER MEETING

Garner, Iowa
October 3, 1947

The Hancock County, Iowa, Board of Supervisors, met in session on above captioned date, pursuant to adjournment, with F. J Schoun, John Chambers and George Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

Supervisor George Th. Gerdes is appointed a committee to investigate and cause repairs to be made in D. D. No. 48.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 34.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 5 and D. D. No. 3 and 4, lateral 2.

On motion and second the bond of William Henschen, Engineer, on D. D. No. 147 is approved.

On motion and second the bond of William Henschen, Construction Engineer, on D. D. No. 146 is approved.

On motion and second the bond of C. F. Merten, Construction Engineer, on D. D. No. 101, is approved.

On motion and second the bond of C. F. Merten, Construction Engineer, on D. D No. 122 is approved.

On motion and second the bond of the Clermont Brick and Sand Company is approved.

On motion and second the quarterly reports of Fern Peck Katter, Recorder, Ruth Hughes, Clerk, and Fred C. Missal, County Auditor, are approved.

On motion and second the contract for gravel crushing and hauling with the Clermont Brick and Sand Company is approved.

On motion and second the agreement with Wright County for the construction of a highway between sections 35 and 36 in township 94-26 and between sections 1 and 2 in township 93-26 as recommended by C. F. Merten, Hancock County, Engineer, is approved.

WHEREAS, C. F. Merten, Engineer, has to report that Joe Needles, has completed his contract for labor on D. D. No. 144 to his entire satisfaction and there is due a final estimate of $523.36 on said contrac .

RE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of D. D. No. 144 that the report of the Engineers be and the same is hereby tentatively approved and the 3rd of November, A. D., 1947, at the hour of 1:30 P. M. is hereby fixed as a time for hearing thereon.

Said hearing to be held at the Courthouse in Garner, Iowa.

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune, a newspaper published at Britt, Iowa, as by law directed

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby directed to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

For Parents Only . . .

A Timely Message

About The Future Of Your Child

You're pretty proud of those kids of yours, aren't you? Want them to have the best of everthing. Good food, good housing, an education, a chance to work and play, have friends, travel accasionally. Yes, you'll give them all of this.

BUT IF THEY'RE NOT MEMBERS of a 4-H club they're missing one of the best opportunities of their lives. Chances are they want to be members. If you encourage them they'll probably join.

You've seen enough of the work of 4-H members to know it will help boys and girls to grow. Of the pride they take in their projects, the fun they get from their club meetings, the training they get in good farm and home practices, the recreational opportunities they have, the rewards that come from a job well done.

We suggest you help your children become members of one the greatest youth organizations in the United States. Give them a chance to wear the symbol of the 4-H organization—the Four Leaf Clover with its 4-H's.

Enroll and Help 4-H To Grow!

An organization of 1,700.000 members—30,000 of whom are Iowa—255 in Hancock County— is fundamentally sound. We a proud to know many 4-H members. We know they have high idea that they hink straight and act decisively.

4-H members are builders. They build for themselves and for their community. The slogan "To Make the Best Better" means that all the good things today are better things tomorrow.

4-H members are cooperators. They work together to strengthen their clubs. Because leadership is voluntary the members cooperate to hold up their end of the club program.

4-H club members are friendl The bonds of friendship bring th members together. The spirit friendship holds them togethe Friendship prevails when compet tion is keen and when defeat bitter.

4-H club members develop spi itually, morally, physically an socially.

THE SPIRIT OF 4-H LIVES IN THE PLEDGE:

I Pledge
My head to clearer thinking
My heart to greater loyalty
My hands to larger service
and
My health to better living
For my club, my community, m country and my world.

In the same spirit we pledge our continued support to the 4-H clubs in Hancock County in the drive for more members.

5TH ADJOURNED SEPTEMBER MEETING

Garner, Iowa
October 13, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Geo. Th Gerdes, F J Schoun and John Chambers present

The minutes of the last meeting were read and approved as read

WHEREAS, Wm Henschen has to report that Clarence Stone, has completed his contract for the construction of Drainage District No. 138 to his entire satisfaction and there is due on said contract a final estimate in the sum of $1120.-26 as a final payment on said contract.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of DD No. 138, that the report of the engineer be and the same is hereby tentatively approved and a final hearing on the report of the engineer will be held at the Courthouse in Garner, Iowa, at 10 30 A M on the 10th day of November A D, 1947 at which time, taxpayers in the district may appear and show couse why the report of the engineer shall not be approved and project accepted.

The county auditor be and he is hereby ordered and authorized to publish notice of such hearing in the Garner Leader and Signal, a newspaper published in Garner Iowa, as directed by law

This being the 13th day of Oct A D., 1947, a date heretofore fixed for a letting on the construction of Drainage District No. 144, Extension, Drainage District No 122, Extension and DD No 101, reconstruction, all located in Hancock County, Iowa, the hour for said letting having arrived the proof of publication being on file and the board being fully advised said letting was held as scheduled

The Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file, the bid of Concrete Products Corporation of Humbolt on material and Schram Brothers of Titonka on labor are found to be the lowest and best bids on file on all three projects.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of DD No 144 extension DD No 122, extension and DD No 101 reconstruction, that the bids of Concrete Products Corporation of Humbolt on material and Schram Brothers of Titonka on labor, on DD No. 122 extension and DD No. 101, reconstruction are hereby accepted as the lowest and best bids and Chairman John Chambers is hereby authorized and ordered to execute a contract in behalf of Hancock County, Iowa, to each of the two firms, as directed by law. All other bids are here rejected.

BE IT FURTHER RESOLVED that the letting on DD No. 144, extension be and the same is hereby continued to 1:30 P M. on the 20th day of October 1947, at which time final action will be taken with relation to the construction of Drainage District No. 144, Extension.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption, was seconded by Supervisor Geo. Th. Gerdes, whereupon J A. Chambers, Chairman in the chair, placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Geo. Th. Gerdes and J A. Chambers, aye, Nays, None. Whereupon the chairman declared the resolution duly adopted.

Supplemental Minutes, Meeting Of May 5, 1947

On motion and second C F Merten, Engineer, Walter Kahl and William Boehnke are hereby appointed a commission to classify lands and assess benefits in Drainage District No. 145, Hancock County, Iowa, as commanded in Section 455 45, Code of Iowa, A. D 1946 and laws amendatory thereto. Said commission shall qualify as by law directed and proceed to view the lands in DD No. 145 and shall report their findings to this board on or before July 28th A. D., 1947

The forgoing motion was made by F J Schoun, and seconded by George Th Gerdes, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, J A Chambers and George Th Gerdes aye, Nays, None. Whereupon the chairman declared the motion duly adopted.

On motion and second the board adjourned to the 8th day of May A. D., 1947 at 9 o'clock A M.

4TH ADJOURNED SEPTEMBER MEETING

Garner, Iowa
October 6, 1947

The Hancock County, Iowa Board of Supervisors, met in session on above captioned date, pursuant to adjournment and a previous resolution of this board with F J Schoun, J A Chambers and Geo. Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

This being the 6th day of Oct. A. D., 1947, a date heretofore fixed by resolution of this board for a hearing on the report of the assessment commission, heretofore appointed to classify lands and assess benefits in Drainage District No. 147, Hancock County, Iowa, the hour for said hearing having arrived, the proof of publication of notice being on file and the board being fully advised, said hearing was held as scheduled.

The objections on file were read by the County Auditor and objectors were heard and after duly considering all objections to the proposed classification and assessment as submitted in the report of the commissioners, Wm. Henschen, Engineer, Walter Kahl and Wm. Boehnke, the board finds that the assessment shall be ammended as hereinafter set out to which amendment all parties concerned have agreed to change the assessment, to-wit

Reduce on NE¼ SE¼ Section 29-96-25 from 0966 to 0810 from $1382 40 to $1166.40, on SE¼ SE¼ Section 29-96-25 North of RR from 0790 to 0640 from $1137 60 to $92160 a total reduction of $432 00 and

Increase assessment on SE¼ SW¼ Section 20-96-25 from 0930 to 1130 per cent $1339 20 to $1627.-20

Hancock County Roads, Britt Township from 0309 to 0409 per cent, $444 96 to $588 96 a total increase of $432 00 All other assessments to remain as submitted in the report of the comissioners.

From where I sit ... by Joe Marsh

Sam's a Matrimony Expert

Sam Abernathy never intended to be a *matrimony expert*, but he hit the nail on the head the other day when he said:

"What marriage really needs is more *open minds* and a lot fewer open mouths."

Sam may not think much of his missus' choice of hats or her habit of serving *watercress and cream* cheese salad. But he keeps his mouth shut (I mean, he just uses it to eat the salad). And the missus never criticizes Sam's affection for that worn-out chair before the fire, and his mellow glass of beer and pipe at the end of a long day.

From where I sit, that prescription would apply to most human relationships. Criticism rarely rouses anything but resentment. But an open mind—whether it's applied to a woman's choice of *hats*, or a husband's preference for a pipe and a moderate glass of beer or two—leads to the conclusion that *there's right on both sides.*

BIBLE TODAY

International Uniform Sunday School Lesson

By LOUIE D. NEWTON, D.D.

SCRIPTURE James 3—5; Acts 4:1-10.
DEVOTIONAL READING: Proverbs 12:13-22.

Christian Conduct

Lesson for November 2, 1947

Dr. Newton

CHRISTIAN standards of conduct must be understood as Christ's standards, not man's standards. Our lesson makes this quite clear when James declares, "My brethren, be not many masters (judges), knowing that we shall receive the greater condemnation," James 3:1. James goes on in this third chapter to emphasize the truth that man is by nature inclined to "run away," even as the horse when he is not bridled, or the ship when it is not controlled.

Which brings the first practical lesson—that of the tongue. "The tongue is a little member," says James, "and boasteth great things. Behold, how great a matter a little fire kindleth!"

* * *

The Words I Say

IN PROVERBS 8:7, we read, "My mouth should utter truth." And again in Proverbs 25:11, we read, "a word fitly spoken is like apples of gold in pictures of silver."

Which adds up to this: The words we say have much to do with what people think of our standard of conduct. If we speak words of truth and kindness, we need not be concerned what people will think of us.

Boys and girls who guard their tongues will have friends. Boys and girls who speak words of envy, prejudice and falsehood will be shunned.

* * *

The Right Words

WHAT is in our hearts determines what we say and do. Therefore, if we are to speak the right words, our hearts must be right—right with God.

I have just come from a playground where a group of junior boys and girls were having a picnic. I got there at the moment when a baseball game was in the decisive ninth inning. One of the junior boys was umpire. He called a pitched ball a strike, and the batter objected. Words followed—not altogether pleasing words. They saw me standing on the sidelines, and asked me to settle the matter. I had not seen the pitched ball closely enough to express an opinion.

The boy who had spoken most sharply went to the boy who was umpire, took his hand, and said, "It's okay with me. I am sorry I said what I did." That boy had the right attitude. He turned wrong words into right words, because his heart was right.

* * *

The Power of Words

"SPEAK not one against another," writes James 4:11. Two teenage girls were walking home from school. One spoke bitterly to the other of a third girl. They parted at the corner, and the girl who had spoken the bitter words of her neighbor slipped and fell as she passed the home of the girl about whom she had been speaking. The neighbor girl rushed to her side, helped her into the house where her mother dressed the ankle Waiting for her father to come with the car, the girl who had spoken bitter words began to cry. Thinking that her neighbor was crying from the pain of the ankle, the girl who had been bitterly assailed spoke sympathetically to her neighbor.

"Will you forgive me?" cried out the distressed girl.

"Forgive you?"

"For the unkind words I spoke about you to Mary. O, I am sorry, sorry."

Forgiven, they became trusted friends.

* * *

Words Reflect Character

THIS lesson should summon every heart to utter the prayer of the Psalmist:

"Let the words of my mouth and the meditation of my heart be acceptable in thy sight, O Lord, my strength, and my Redeemer," Psalm 19:14.

Our words reflect our character Christ's standard of conduct calls for words wisely chosen. Longfellow put it well when he wrote:

I shot an arrow into the air,
It fell to earth, I knew not where;
For, so swiftly it flew, the sight
Could not follow it in its flight.

I breathed a song into the air,
It fell to earth, I knew not where;
For who has sight so keen and strong,
That it can follow the flight of song?

Long, long afterward, in an oak,
I found the arrow still unbroke;
And the song from beginning to end,
I found again in the heart of a friend.

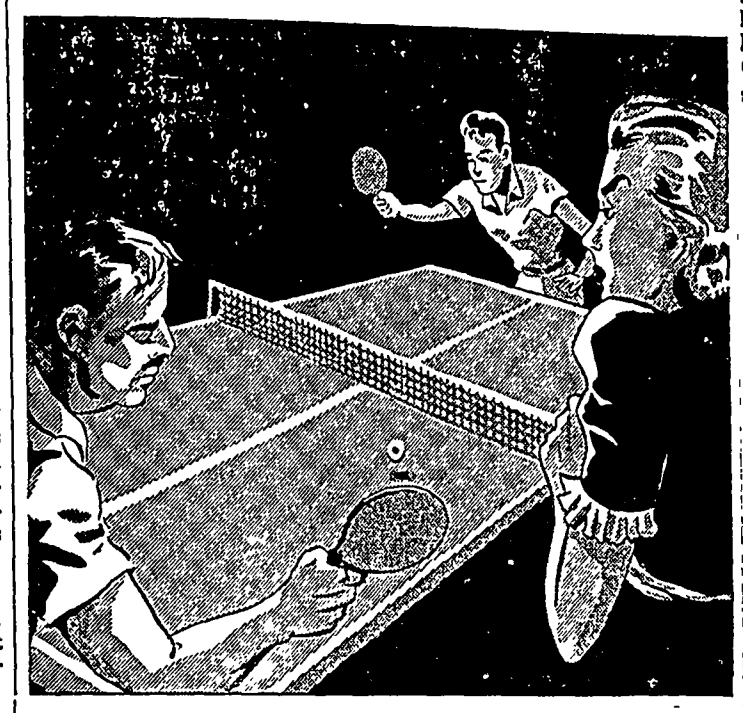
...wondered at herself, at ...t. Such a small, harm- ...this desire to win on ...t. Why should she want to have him defeated? It was silly. And yet—

They assembled in the playroom the next night. Calvin made a log fire and Cynthia arranged the chairs. Paula was umpire and, cross-legged, graced the top of the radio table. Her expression was serious as if with the heavy responsibility of her role. Lucy, her arm about Roger, who had been allowed to stay up an extra hour for the momentous struggle, sat on the corner divan—watching.

It was brilliant table tennis. Hard fought, clean, clever.

Twice Bill Junior seemed to have his father beaten. Twice his aggressive defensive appeared to bewilder



Lucy wondered why young Bill failed to press his advantage—and then glanced at her husband's grimly set face.

Bill. Lucy noticed that her husband's smile had faded—how grim his face was. And then, at each psychological moment, he rallied and evened the score Why, Lucy asked herself, did Junior's flashy, pressing play weaken? Why didn't he drive his advantage home when he had the game and set practically won?

THE heavy, significant silence broken only by the click of the bouncing celluloid ball and the gallery's strained, anxious breathing ended in a scream of sudden joy.

"Game and set!" Bill threw down the rubber-faced paddle and let out a shout of laughter.

The children swarmed enthusiastically over him. This, Lucy knew, was her husband's usual moment. Her smile was small and cryptic when she began rounding up her brood, sending them off to bed. Bill shook hands with his oldest son and switched the lights off.

"Guess the champ can't be beaten," young Bill said huskily.

Later, Lucy went from room to room making sure windows were not open too wide, that blankets were over small, hunched shoulders, doors properly closed. The dark lay thick in the room Bill Junior shared with Calvin. She heard someone move when she went in on quiet feet.

"That you, mother?"

She sat down on the edge of the bed. Her son's hand slipped into hers.

"A good game, Bill." She squeezed his fingers before she released them. "Well played. I'm sorry you didn't win."

He drew a deep, long breath. "So'm I. Pop's tough. Got to be awful good to take him."

"I suppose so." Her voice was low, flat. "Goodnight, dear."

After she quietly closed the door and her footsteps dwindled down the hall, Bill Junior raised himself on one arm.

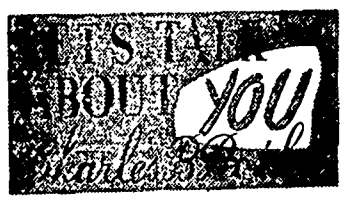
"Awake, Stinky?"

The springs in Calvin's bed twanged as he turned over. "Yeah, why?"

Bill Junior chuckled. "Got some news for you. It's a secret for the time being, but I'll let you in on it if you keep your mouth shut."

"I won't say a word," Calvin promised. "What is it?"

"Last night Dad told me he's getting me a brand new bike the first of the month!" Young Bill's whisper was excitedly vibrant. "I ought to double up on the subscriptions soon as I get it. Pretty swell, eh?"



JUST KEEP BUSY

When he started in business for himself, in a field which was overcrowded and harsh, a friend of mine ran into high stone walls of discouragement. Often he was ready to quit. Why keep on trying? he would ask himself. There didn't seem to be much ahead but failure.

"I would go home night after night perfectly willing to call it quits with life," he told me. "Three times I wondered if it wouldn't be better to end it all."

His wife advised him to see the family physician, and the physician recommended a psychiatrist. The examination lasted three days, but I can give you the gist of his recommendation in three words: "Just keep busy."

The psychiatrist's explanation ran like this: "The end of life is not thought. It is action. We are made for action. That we may move and act we have a marvelous system of muscles, nerves, senses; all designed for action, for doing something.

"The mind responds gleefully to the active life, and happiness consists, in the end, of action, action, action.

"Happiness depends upon what you do, not upon what you have, not upon what you think—but upon what you do."

I have observed many times that the most interesting personalities are not those of the lounge lizards or the do-nothings. They are the personalities which have been stamped definitely in the forge of action.

The minute this friend of mine began taking the advice literally, he began developing a happy outlook on life, began making good in his business.

I am glad to report that today he is in a thriving way, completely happy and well adjusted to his world. He has made good—because he kept busy.

My friend added some facets to the jewel the psychiatrist gave him. He began letting part of his action take the form of service to others—which further added to his happiness.

When black discouragement would come to him, he would think of something he could do for someone else.

A cripple in the block didn't get out much. He'd take him for a ride. He'd make kites for the kids who lived near by. He'd go on errands for his wife. Anything of action and service—that was his field.

There emerged from his discipline something fine in the way of a human personality and character, and I am not so sure but that this is one of the most vital personality lessons any one of us can possibly learn—"just keep busy."

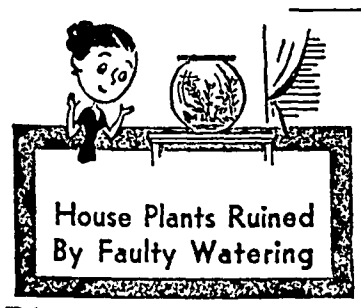
Series H-47

How to Successfully Grow and Care For Your House Plants and Flowers



POTTED chrysanthemums are a fall favorite that bloom until near Christmas. They must be kept cool, and flourish best in an unheated room or sunporch.

Water only enough to keep them alive and in the spring start new plants by pinching off slips from tops of growing stems or using the new shoots around the base for slips.

'Mums can be potted all year and planted outside in summer but during these winter months they need cool, moist air to survive.

You may want to know about preserving other indoor plants—cyclamen, primrose, cactus, geranium. Proper planting and watering for these and others are discussed in our booklet No. 29.

* * *

Send 25c in coin for "Success With House Plants and Flowers" to Weekly Newspaper Service, 243 West 17th Street, New York 11, New York. Print name, address with zone, booklet title and No. 29.

Jackson's Death

Stonewall Jackson did not die on the battlefield. The Confederate general was wounded by his own men on a reconnaissance during the battle of Chancellorsville on May 2, 1863. He died eight days later in a little frame house at Guinea Station, Va.

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over *Doan's* stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.

DOAN'S PILLS

Warm Stream Meets Cold

The cold Labrador Current and the warm Gulf Stream meet at the Grand Banks, off Newfoundland. This meeting of warm and cold water creates the dense fogs that so endanger shipping in that part of the Atlantic.

Junior Class Will Put On Play Thursday Evening

3-ACT PLAY ON BILL THIS WEEK

"Never Too Late" is a comedy in three acts, with nine characters, to be presented by the Junior class of Klemme High School on Thursday, November 6 at 8:00 p. m. in the High School gymnasium. This play is about Mr. Lee who doesn't know what his family is doing besides spending his money. While he is busy earning money his son Charles wants to play basketball, his daughter Virginia plans to get married, and his wife has lost all interest in her sweet but foolish husband. Mr. Lee's secretary, Miss Stanley, tells him what she thinks of him which brings about a complete change in our money-mad men. Everything starts to happen at once, Mr. Lee stays home to become a family man and does everything to initate his wife from building bird house in the living room to painting the ceilings black with white dots. The maid quits and his daughter's romance breaks up before Mr. Lee brings about happiness for his family and you. Won't you come?

Roger Ridder And Dean Roths Leave Washington For California

Roger Ridder and Dean Roths, who have been picking apples near Okanogan, Washington for seven weeks, visited relatives at Dean's at Kent, Washington the past week. The boys have been seeing a lot of the state and recently did a lot of sight seeing in and around Seattle, Tacoma and Olympia. Enroute to Okanogan they were in the Blue Hills a couple days and enjoyed the scenery in Yellowstone Park and the Big Horn mountains for a week. They spent some time in Spokane and at Coulee Dam and went into Canada for two days. After leaving Okanogan they drove through the Cascade mountains where the scenery was the prettiest they had ever seen.

Roger and Dean are leaving Washington this week and their destination is Los Angeles, California. The boys each took a box of apples home with them they had picked and the folks at home are enjoying them a lot.

Tuesday morning Mrs. A. G. Ridder sent a sample of the Grimes, Delicious and Jonathan apples to the Times office and they were sure beauties.

S. S. C. S. District Meeting Held At Algona

Mrs. R. A. Jorgenson, president of the Klemme Methodist W. S. C. S., accompanied by Mrs. C. A. Larsen and Mrs. Lauren Mace, attended an all day district meeting of the W. S. C. S. at Algona last Thursday. A nice dinner was served at noon, followed by the business meeting and talks.

Of interest to Klemme ladies will be the news that a former Klemme lady, Mrs. Jim Boyd, was in charge of the dinner and the Klemme ladies said she did a very good job of it. Also of interest is that Betty Boyd is married and has four children and Bob Reed is now a freshmore in the Iowa State Teachers College at Cedar Falls. Mr. and Mrs. Reed have recently purchased a nice home in Cedar Falls. Mr. Reed comes to Klemme frequently as he sells auto parts and supplies.

Roy Schaefer Named President Of Methodist Mens Group

At their regular meeting the Methodist Men of Klemme and vicinity named Roy Schaefer as president for the coming year and Roger Ridder as Vice President. Benn Coobs was named secretary.

Dairy Herd Improvement Association Monthly News Report

The DHIA reports for the month of October, 24 herds tested, 277 cows in milk, 91 cows dry and the total number of cows tested 368. The average production per cow, including dry cows was 620 lbs. milk and 23 lbs. of butterfat.

Some of the 305-day lactation records completed during the month were: a Registered Holstein owned by Fern Huling, Britt, in 305 days produced 16,009 lbs. of milk and 547 lbs. butterfat. A grade Holstein owned by Roy Jacobs, Klemme, in 305 days produced 15,038 lbs. milk and 519 lbs. of butterfat. A grade Holstein owned by Floyd Friedow & Sons, Kanawha, in 304 days produced 14,502 lbs. milk and 462 lbs of butterfat. A registered Holstein owned by Dethmers and Molander, Garner in 305 days produced 12,660 lbs. of milk and 418 lbs. of butterfat. A grade Holstein owned by Albert Abele and Son, Garner, in 288 days produced 10,856 lbs. milk and 407 lbs. of butterfat. A registered Holstein owned by Huling Bros., Britt, produced in 305 days 12,204 lbs. of milk and 402 lbs. of butterfat. A Grade Guernsey owned by C. J. Wille and Son, Klemme, produced in 295 days 8,742 lbs. of milk and 405 lbs. of butterfat. A grade Holstein owned by Harold Hall, Garner, produced in 280 days 10,221 lbs. of milk and 338 lbs. of butterfat. A registered Holstein owned by Everett Sheets, Britt, produced in 305 days 10,696 lbs. of milk and 323 lbs of butterfat.

SOME FIREARMS MUST BE REGISTERED

B. F. Wilson, Investigator in charge of the Alcohol Tax Unit, U. S. Treasury Department of Des Moines, has asked the Conservation Commission to help publish the fact that certain firearms must be registered with his department.

Under the National Firearms Act the following firearms must be registered: (1) All machine guns or machine gun pistols, that is, any weapon capable of firing more than one shot with a single pull of the trigger. (2) Rifles or shotguns, with a barrel less than 18 inches in length, except rifles of .22 caliber or smaller, if the barrel is 16 inches or more in length. (3) Pistol type weapons that are equipped with a shoulder stock attachment. (4) A silencer or muffler for any firearm.

Standard rifles, shotguns, or pistols do not require federal registration. Blanks for registration applications may be secured by writing Mr. B. F. Wilson, 202 Home Federal Building, Des Moines, Iowa.

Dorance Day Makes Good As Insurance Salesman For Metropolitan

D. S. Day of Mason City has made good with Metropolitan Insurance Co. During the past year Dorance sold the most insurance of any man in the district and to reward him the company is giving him a trip to Chicago, and will show him points of interest there in the city. Mr. Day will leave Friday morning and will return to Mason City on Sunday evening.

New Businessman Arrives

Harry Schuster arrived here Monday to help his partner, Wm. Fuss in conducting the new business of their Klemme Hardware Co., the former Jacobs Hardware. Mr. Schuster's family will remain with Mrs. Schuster's parents at Powersville, Mo. until they can find living quarters in Klemme.

Armistice Day

KLEMME BUSINESS PLACES WILL CLOSE ARMISTICE DAY, NOV. 11

Klemme business places will observe Armistice Day, on Tuesday, November 11, 1947, by remaining closed all day. The public is invited to attend the Armistice Day program, sponsored by the American Legion and Auxiliary, at the Klemme Community Hall, beginning at 10:45 a. m.

As this is a legal holiday there will be no mail service.

EMIL BARZ NAMED MANAGER OF THE INDEPENDENCE BRANCH BANK

E. M. Barz, formerly branch manager of the Dunkerton, Iowa Bank, has been named manager of the Independnce Farmers State Savings Bank office at Lamont, Iowa.

Mr. Barz began his newduties at the Lamont bank on Thursday, October 16th and succeeds Mr E. E Strait, who is retiring from the banking business.

Mr. Barz will be assisted in his new position by his wife, Lucille M. Barz, formerly of Waterloo. Mr Barz was born on a farm near Klemme and is a son of the late August Barz. He attended business college at Mason City For the past year and a half he managed the Dunkerton bank and his previous banking experience included Mason City, Garrison, Monticello and Waterloo

The Lamont Branch Bank was started on November 1, 1937 by the Farmers State Savings Bank of Independence. The bank is a member of the Federal Insurance Corporation and is under the supervision of the Iowa Banking Department.

Mrs. Elder Honored On Birthday

Mrs. C. A Larsen entertained Friday afternoon in honor of Mrs. R. W. Elder, who had a birthday on November 1st. Besides Mrs. Elder, others present were Mrs. Marvin Isvik and daughters; Mrs. Duane Katter and son; Mrs. Cecil Bridges and son, Mrs. Ben Katter and Mrs. John Waddingham and children.

The afternoon was spent informally after which Mrs. Larsen served a nice lunch. Mrs. Elder was remembered with gifts.

Kay Burk Has Birthday Party At School

Kay Burk was 9 years old Tuesday, and in honor of the event he entertained his teacher and schoolmates to a birthday party in the basement of his rural school, Avery Township. Games and stunts including a treasure hunt were enjoyed, after which his parents, Mr. and Mrs. Gerald Burk, served the group with lunch. Kay received some nice gifts.

County Health Meeting Held

Mr. and Mrs. J. A. Chambers and Mrs. R. A. Jorgenson attended a dinner at the Hull Cafe at Garner and a meeting of the Hancock County Health Association, Thursday evening.

Work accomplished during the past year was summarized by the County Nurse and plans were made for the coming year.

The Public Is Urged To Attend

Johnsons Celebrated Golden Wedding Last Thursday

MR. AND MRS. WILL JOHNSON LIVED HERE FOR THIRTY-ONE YEARS

Mr. and Mrs. Will Johnson celebrated their Golden Wedding Anniversary with a dinner at the Klemme Methodist Church on Thursday, October 30, 1947, which was attended by about 160 relatives and friends.

The dining room and the main table were decorated with white and yellow streamers and a large decorated wedding cake as the center piece on the table at which were seated the honored couple and their children.

After the dinner a program was given and two songs were sung by the quartette, one being "Silver Threads Among The Gold." Mrs. Henry Busse gave a history of the Johnsons and talks were given by Rev. H. E. Harvey and Art Wellemeyer.

The Johnsons then held open house at the church from 2:00 until 4:00 p. m. at which time a large number of people called to offer their congratulations. But the day was not ended, as in the evening neighbors and friends gathered at the Johnson home southeast of Klemme and gave the "newly weds of fifty years ago" a rousing charivari which produced the necessary treats.

Will Johnson and Sarah Elizabeth Terry were united in marriage at Verona, Illinois on October 30, 1897 with the Rev. Buckson officiating at the parsonage.

Mr. and Mrs. Johnson began house-keeping at Waponsa, Ill. where they lived for 1½ years when they moved to Morris, Ill. and lived on the Will McKinley place for 14 years. Will McKinley was a nephew of the President.

They then moved to Milan, Kansas where they farmed for 5 years before coming to this vicinity in 1916 when they moved to the Walt Bloom farm. Two years later they moved to the Yahnke farm where they lived 12 years and in 1930 they purchased the farm where they since have resided. They will leave this place soon and go south again for the winter.

Mr. and Mrs. Johnson are the parents of three children: Sylvan of St. Paul; Effie (Mrs. LeRoy Blunt) of Charles City, and Clarice (Mrs. Raymnod Rooks). They have 6 grandchildren and 2 great grandchildren.

Out of town relatives, besides the ones previously mentioned were Eddie Terry, a nephew of Morris, Ill.; Mrs. Leo Genzel, Chicago; Mrs. Ray Wadkins, Mr. and Mrs. Heenon Terry, Fred Cretto and Mrs. L. Murphy, all of Morris, Ill.

Mr. and Mrs. Virgil Auwater of Britton, South Dakota; Mr. and Mrs. W. Potter of Milan, Kansas, Mr. and Mrs. Martin Severson of Froster, Iowa; Mr. and Mrs. Larwence Bartz of Geneva, Minnesota.

Mrs. Will Cox of Gaston, Indiana; Mrs. A. L. Johnson of Columbus, Ohio; Mrs. George Johnson of Milfield, Ohio; Mrs. C O'Neil of Athens, Ohio; Ed. Sinclair of Mazon, Ill.; Mr. and Mrs. Archie Buck, Mazon, Ill.; Mr. and Mrs. Albert Fuller of Amboy, Minn.; Mr. and Mrs. Sidney Nelson, Morris, Ill.

Mr. and Mrs. Johnson received gifts, cards and letters from relatives and friends in sixteen states.

Mr and Mrs. Johnson are members of the Klemme Methodist Church. Mr. Johnson has been a member of the Modern Woodmen of America for 50 years. They have farmed all of their married life.

THOMPSON'S MOUSE TRAPS NOW HANDLED BY WOOLWORTH STORES

Mr. and Mrs. Ed. Thompson spent all of last week in Minneapolis at the Woolworth Store where they demonstrated their Run-Way Mouse Trap. Incidently, the Woolworth Store in Minneapolis is the second largest Woolworth store in the world.

This week Mr. and Mrs. Thompson will be in Des Moines Thursday, Friday and Saturday, putting on a demonstration at the Woolworth store in that city.

The Run-Way Mouse trap is proving to be very popular and sales are jumping every day.

HALLOWE'EN WAS QUIET AFFAIR IN KLEMME THIS YEAR

Hallowe'en is now past history and was a quiet affair in Klemme this year. A few windows were soaped and a few miscellaneous articles were scattered along Main Street. Rain poured down most of the evening which probably dampened the spirits of the Hallowe'eners.

Iowa Ringneck Season Will Open On Armistice Day

SELECT COUNTY REVIEW BOARD

Group Will Act Under New Assessor's Law

Hancock county supervisors issued a call for a conference of Hancock county school boards and mayors of the towns in the county to be held at the courthouse in Garner Monday afternoon, November 10th, for the purpose of selecting a county board of review in connection with the county assessor law passed by the 52nd general assembly of Iowa.

The new county board of review will replace the various local boards of review in towns and townships and must consist of at least three members and may include five members, 1, who must be a farmer, 1 who must be a licensed real estate agent, and 1 who is skilled in the building and contracting field.

Each group will vote as a unit and each group will have 1 vote in the conference. The deputy county assessor will act as clerk to the board of review.

KLEMME W. S. C. S. WILL HOLD ANNUAL ELECTION OF OFFICERS

The Klemme W. S. C. S. will meet on Thursday, November 6th at the church and will hold their annual election of officers for the coming year. All members of the society are requsted to be present for this meeting.

Mrs. Vivian Mace is Leader of Devotions; Mrs. Dwight Hummel is Leader of the Lesson and the Hostesses are Mrs. Kenneth Medir Mrs. Clifford Montgomery and Mrs. C. A. Bachman.

Katters Entertained Young People At Halloween Party

Mr. and Mrs. Cecil Katter entertained a group of young people at a party at their home east of Klemme on Halloween. The evening was spent playing "500" after which a nice lunch was served by the hostess.

High scores for the evening were won by Mr. and Mrs. Edmund K. Josten and the low scores by Mrs. Eugene Kluckhohn and John Waddingham.

Those present were Mr. and Mrs. John Waddingham, Mr. and Mrs. Eugene Kluckhohn, Mr. and Mrs. Louis Fjetland of Alexander, Mr. and Mrs. Edmund Josten, Mr. and Mrs. Duane Katter, Miss Gertrude Grosshuesch, Allan Barz, Mr. and Mrs. Leonard Kaduce.

A fine time was enjoyed by all.

Mr. And Mrs. Ben V. Greiman Attended Picnic Of Former AAA Fieldman

Mr. and Mrs. Ben. V. Greiman drove to Strafford Sunday where they attended a picnic at the Lester Vegors home. The group which met there are a sort of "alumni" of former Field workers of the Triple A. of which Mr. Greiman was one of the workers a few years ago.

Birthdays Celebrated With Dinner At Schulz Home

Mr. and Mrs. Frank Schulz entertained the following to a birthday dinner Sunday: Mr. and Mrs. Chester Geddes, brother of Mrs. Schulz from Hayfield; Mr. and Mrs. Orville Borg of Forest City; Mr. and Mrs. Lester Neuberger and family of Klemme and Robert Schulz and his girl friend from Garner. The dinner was in honor of Chester Geddes and Frank Schulz birfndays, both of which were on November 1st.

Read it first in The Times.

TWO MALE BIRDS IS DAILY BAG LIMIT

Only Two Cocks Possession Limit This Year

Ten Day Pheasant Season Opens November 11

The 1947 ten-day pheasant season opens November 11 at noon and closes at 4:00 p.m., November 20. Shooting hours are from noon each day until 4:00 p. m., with a daily bag limit of two cocks and no more than two cocks in possession at any time.

The season was opened by the Commission in the face of low populations estimated at 35 percent below the 1946 crop. Bag and possession limits are the most strict in the history of pheasant shooting in Iowa.

Stressing the fact that the ratio of rooster pheasants to hens may be cut to as much as one to ten without jeopardizing egg fertility and next year's production, the Conservation Commission has launched an educational campaign to cut accidental or deliberate hen shooting to the absolute minimum. Conservation officers have been instructed to enforce the "no hen" law strictly. It is believed that unlawful hen shooting during this year's open season will not measurably affect next year's production.

Top Boar On O. W. Friedow's Sale Sold For $700.00

O. W. Friedow had a very successful sale of purebred Poland China Boars with the top going at $700.00. The second highest boar sold for $540.00 and the first ten boars averaged $299.00. The average for the entire lot sold was $178.00.

Mr. Friedow's boars went to six states: Texas, Kansas, North Dakota, Minnesota, Illinois and Iowa. This was the best sale that Mr. Friedow has ever had.

Injured In Corn Elevator

Stanley, son of Mr. and Mrs. Frank Pringnitz was injured in an accident Tuesday while unloading corn into an elevator on the farm. As he lifted the endgate from the wagon the weight of the corn forced his right hand into the elevator with the result that two fingers on his right hand were badly cut.

THE BIBLE TODAY

International Uniform Sunday School Lesson

By Louie D. Newton, D.D.

SCRIPTURE I Peter; Daniel 1.
DEVOTIONAL READING. Psalm 24.

A Call to Right Living

Lesson for November 9, 1947

SUNDAY'S lesson is based on the First Epistle of Peter and the first chapter of Daniel. It is a temperance lesson. It is suggested that we read the 24th Psalm, in which we find this question, Who shall ascend into the hill of the Lord? And the answer, He that hath clean hands and a pure heart.

Dr. Newton

Peter gives us the spiritual basis of temperance. Daniel gives us a shining example of temperance. And the 24th Psalm gives us a dramatic concept of what it means to face God in the right attitude of life.

• • •

How to Grow Strong

OUR doctors tell us how to grow strong, sound bodies. We are to eat the right food, sleep regularly, breathe deeply, etc., etc. Daniel did all of these things, and something more—"Daniel purposed in his heart that he would not defile himself with the portion of the king's wine which he drank; therefore he requested of the prince of the eunuchs that he might not defile himself," Daniel 1:8.

Daniel was challenged by the prince of the eunuchs. He predicted that Daniel and his companions would become pale and weak if they refrained from eating the king's meat and drinking the king's wine.

Finally he agreed for them to refrain from meat and wine for ten days, and at the end of the ten days, behold, Daniel and his companions appeared fairer and fatter than those who had eaten intemperately.

• • •

Every Youth Must Choose

AS DANIEL chose to grow strong through temperate habits of eating and drinking, so must every youth choose between right living and lustful living. We have laws against drunkenness, for example, but legislation alone cannot produce a generation of temperate young men and women. Each boy and each girl must choose for himself and herself between temperance and intemperance.

And this lesson sets out the ways by which such choices can be made and sustained. I find a helpful word in I Corinthians 10: 31: "Whether, therefore, ye eat or drink or whatsoever you do, do all to the glory of God."

As we make the choice between drunkenness and sobriety, let us remember that we are choosing between God and Satan—between the example of honorable parents and the example of people who have desecrated every sanctity. This lesson is a call to right living.

• • •

Disciplined Lives

WHICH calls into mind a word that we have not always treated fairly. I am thinking of the word "discipline." Too often we have regarded this word as something very austere, when, as a matter of fact, it is one of the really fine words of our language. It means "one taught." It is the word which, with slight difference in spelling, gives us "disciple."

The immediate followers of Jesus were called disciples. They were young men, gathered up from the everyday pursuits of life. Most of them were fishermen—men who faced hardships every night as they confronted wind and wave. And yet these rough and tumble fishermen became "the taught" ones of Jesus. They yielded to his discipline. They were pupils in the school of Christ.

That is what this lesson is aiming at—to enlist many, many pupils in the school of Christ.

• • •

The Test of Time

MAKE this test in your community, whether you live in the city or in the country. Look at the lives of the men and women about you, and draw your own conclusions regarding the worth of temperate living. Study the lives of the drunkards against the lives of the men and women who have refrained from strong drink. Study the lives of the gamblers and see if they have really won.

I appeal to the verdict of history—the test of time. Not only in the case of Daniel, but in the lives of the men and women in every community in America is daily borne out the truth of Sunday's lesson—that God giveth us richly all things to enjoy, but we must use his gifts with disciplined minds.

...widened warily then ...r.

"Yes. I'm free this afternoon."

"Got a date then," Jimmy improvised. "Have to dictate at lunch. Mind going to Mike's place around the corner?"

He hoped she wouldn't cave in and have to be carried. But she made it and dropped in a chair with a sigh that sounded contented. Jimmy mumbled something about phoning and hunted up Mike himself. Jimmy knew the answers for too much food and drink. But how did they treat a gal all out of practice? And not let her know it? He told Mike all.

"You start her easy, Mr. Wheeler. Leave it to me."

Jimmy returned to their table as Mike brought cups of golden bouillon.

"Won't you try our new special on the house?" Mike invited. "Shall I fix up a nice little lunch as usual, Mr. Wheeler?"

Jimmy deferred to Miss Bond. She was already sipping her bouillon blissfully

"Aren't bumps fun to look back on!" she laughed.

She could laugh at bumps only one meal and a couple of bucks away! She'd walk out of his life and begin starving again. Jimmy almightily didn't want her to starve. Jimmy almightily didn't want her to walk out of his life. How could he help it? The query fuddled his bogus letters to theoretical publicity prospects as Betty pot-hooked them like a streak on paper Mike furnished. She had to tinker his sentences.

Suddenly a thought popped up like an unexpected check. Why not really mail those letters? He might land free lance work and keep on using Betty!

"Look here," he said. "How about a regular job, if we're satisfied after swapping references? My office is under my hat yet, but I'll find a cubby-hole."

Betty's former employer told him over the phone she was as good as Jimmy thought, lost her job only be-

"She swayed and would have fallen if Jimmy hadn't caught her."

"I've a feeling anything here'll be good," she agreed and set down her empty cup. "I'm a pig! Just couldn't help it," she added wistfully, with a blush.

Jimmy grinned. "Won't have stenographers who aren't good feeders."

She laughed. Jimmy heard silver bells. Her bouillon worked fast. Violet eyes stayed alive now. Jimmy would like to spend a week feeding this girl. He had learned she was called "Betty." Jimmy thought "Betty" was his favorite name. By the time Mike brought second aid, he had her talking. He liked it. No whining. She was alone and on her own like himself, flotsam and jetsam from small towns. Jimmy told job-hunting yarns, too; made them light, set them in a remotish past. She loved the one about the boss's secretary who balled up her letters which Jimmy corrected until a prize bull slipped by and the boss got wise. "And I was the one the boss bawled out," Jimmy added. "Called it my fault for coddling the girl and spoiling her."

That was while they sipped demitasses.

cause the company failed. Jimmy persuaded her to take expense money and a week's salary in advance, by pretending he'd be away on business most of the week. Betty had a feeling this was all the reference she needed from him. Jimmy didn't argue. Old Fletcher might say something sour if Jimmy referred her to his ex-boss.

But, at parting, qualms began to wriggle around in Jimmy.

"Look here," he said. "If you get a chance at a better job, take it!"

"I've a feeling you may back out if I don't run," said Betty.

AFTER Betty ran, everything went greyish. The impossible didn't seem as possible. It seemed plain impossible later, after long hours of hammering at his best prospects. The only spark he struck was "Come and see us after business picks up." By five Jimmy hit bottom. He started home deciding he'd just tear up those letters Betty had agreed to send over by messenger But the letters weren't there, the hall man reported. Jimmy thought that over, feeling as if somebody had kicked him. Stung again! Neat little game! That reference he called up, a plant, of course. He ought to have seen she came out of her dumps a little too fast! He was a fine judge of women!

Jimmy's phone was ringing as he stumbled into his apartment. "Mr. Wheeler?" a remote voice said. "This is Mr. A. B. Fletcher's secretary. Could you see Mr. Fletcher here tomorrow morning? He didn't tell me to call you but he spoke about you today. Said he'd hoped you'd be over your grouch and back on your old job before this. I'm just tipping you off."

"Well!" Jimmy exploded. "Uh—say—you're not Miss Moseley?"

"Mr. Fletcher's old secretary? No. She's left him. I got a feeling from things I heard at luncheon today there might be a vacancy where you said you used to work. And I got a feeling you'd be relieved if I found another job. I bought bargain clothes and tried it."

The voice trailed off in silver bells that could not be disguised. Jimmy was beyond speech.

"Please don't be mad, Mr. Wheeler. You saved my life. I'll pay back your money."

"The devil with the money!" Jimmy suddenly felt all right. "I'll be around if you think Fletcher will have the fatted calf ready—and you'll have luncheon with me."

"Maybe we'll have Mike cook the fatted calf," said Betty.

Poets and Their Garlic

Homer had a sincere respect for garlic, to which he attributed the estimable property of "dispelling enchantments." With us, the Roman poet and bishop, Sidonius Apollinaris, born at Lyon in 403 and known also as Caius Sullius, held garlic in such contempt that he wrote: "Happy the nose that is never exposed to the poisonous exhalations of this plant." By the same token, an order of chivalry, ignoring ribaldry, exacted in its regulations the agreement that each member should abstain from garlic and onions from January to December if he valued companionship. This strange order existed in Castile about the middle of the 14th century and the ban on garlic and onions was said to have been placed by the king.

Sportlight

by GRANTLAND RICE

WHILE watching a various assortment of pitchers and so-called pitchers give up 68 walks through the world series, one begins to wonder what has become of baseball's real pitchers.

Watching Burt Shotton vainly trying to find one pitcher who could go five innings — just one pitcher in seven games—one begins to wonder again if the art of pitching isn't really lost.

G. Alexander

From the stars we have known from the old days of real pitchers, we learned that a good pitcher needs just three things — a fast ball, a curve ball and control. Walter Johnson needed only a fast ball and control. Today, pitchers are looking to a slider, a knuckle ball, a screw ball, a sailer—almost everything except control.

Imagine a Dodger pitching staff that hasn't a pitcher who can travel five innings. The Yankees were only a little better off. They had a fellow named Shea and a relief pitcher named Page. These took care of three of the four games the Yankees won.

The only pitcher the Dodgers had was a big, husky fellow known as Hugh Casey. Casey was the Dodger pitching staff. The Dodgers needed him in only six of their seven games.

We'll name a few great pitchers for you, if you've forgotten their names — Cy Young, Walter Johnson, Christy Mathewson, Chief Bender, Eddie Plank, Grover Cleveland Alexander, Addie Joss, Ed Walsh, Smoky Joe Wood, Carl Hubbell, Lefty Grove, Dizzy Dean — these are just a few.

Walsh used a spitter and Hubbell used a screw ball. The others had the three ingredients we have mentioned. Matty picked up his fadeaway after he hurt his arm and lost part of his speed.

They Had Control

Most of these pitchers could work in 45 or 50 games. Ed Walsh worked in 66 games in 1908, winning 40 and saving 12 others. Jack Chesbro belongs in this list. He won 41 games for the Yankees in 1904.

Above everything else, they knew where the pitch was going—or at least within an inch or so of the spot. Alexander could pitch into a tin cup.

I was thinking of these old-timers while watching such pitchers as Branca, Barney, Gregg and others shut their eyes while trying to keep the ball in the same lot. Home plate? Home plate might as well have been in another city.

Bob Feller was a much better pitcher than he is today when he banked on a fast ball, a fair curve and control.

The two best pitchers we had starting this season were Feller and Newhouser. Together they won 37 games and dropped 28 during 1947. This is certainly no record to rave about.

Dizzy Dean was the best pitcher I've seen in many years. Diz depended on speed, a curve, change of pace and control. He won 58 games in two years—before his arm went bad, due largely to post-season exhibition games.

One of the best pitchers I ever saw is barely known or remembered today His name was Addie Joss of Cleveland. Joss was 6 feet 3. He had a fast ball, a curve ball and control. Addie pitched eight one-hit games.

He worked in the greatest pitching duel of all time—or at least it was close. This was against Ed Walsh, late in the season of 1908.

Aim Is Vague

In this game, Joss pitched nine perfect innings. No White Sox reached first base. Ed Walsh, the loser, struck out 15 Indians and allowed one hit, as I recall it. Joss might well have had five or six no-hit games.

Most of the pitchers that come along today haven't the slightest idea of what control means. They rear back and give you all they have, with no particular target in mind. When in trouble, they go to a slider, a sinker, a sailer, a knuckle ball or some other degenerate form of pitching that wears out the arm, and certainly doesn't help to get the ball over the plate.

"Every time I bat against Alexander," Johnny Evers told me years ago, "I want to throw my bat away. He never gives me a ball I can hit. He could drive a nail with a pitch. First it's low and inside—but over. I move back and it's low and outside. But still over a corner."

If you recall the details, Alexander won only 94 ball games from 1915 through 1917. He won 28 games as a rookie with the futile Phillies, and he started and finished practically every game.

Yet Shotton couldn't dig up a single pitcher who could finish five innings. Fortunately for Shotton, Bucky Harris was in about the same shape. The number of pitchers used in this last series was a disgrace to the art and science of pitching.

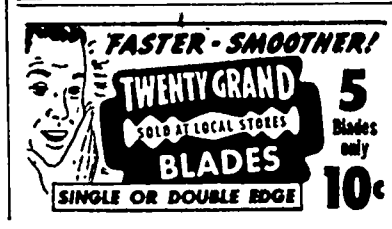
Learn to Meet Emergencies by Reading 'Practical Instructions for Home Nurse'

BEWARE of rusty nails. Particularly, if one has punctured the skin for it can be treacherous.

For emergency treatment, cleanse wound with soap and water and pour in peroxide to boil out particles of rust and dirt. Soak in hot, strong epsom salts solution. If you live some distance from a doctor, you should know how to meet home emergencies—burns, nosebleed, fainting, convulsions.

* * *

Send 25 cents in coin for "Practical Instruction for The Home Nurse" to Weekly Newspaper Service, 243 West 17th Street, New York 11, New York. Print name, address with zone, booklet title and No. 78.



Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

Champion Farmer McKINLEY Uses

Firestone

CHAMPION GROUND GRIPS

. . . AND HE GETS UP TO 100% MORE EFFECTIVE CLEANING
62% MORE DRAWBAR PULL · 91% LONGER WEAR

More than Seven Million Pounds of Produce! That is the production record Champion Farmer H. L. McKinley (on tractor), and sons Don, Phil, Hal and Keith (not shown) made last year on 1100 acres of rich farmland near St. Ansgar, Iowa. Their record includes 2¾ million pounds of potatoes from 135 acres, and a nearly equal poundage of choice cabbage from 100 acres. The McKinleys keep their soil highly fertile by a five-year rotation and the application of 170 tons of fertilizer annually. An extensive steer and hog feeding program turns corn and roughages into cash, and builds additional fertility in the soil. The farm is highly mechanized. All eight tractors roll on Firestone Tires.

ECONOMY-MINDED farmers like Champion Farmer H. L. McKinley find costs go down when they use Firestone Champion Ground Grips.

Tests show that Firestone Champion Ground Grips clean up to 100% more effectively, pull up to 62% more, last up to 91% longer, and roll smoother over highways.

The reasons are simple. The curved bars cut deeply into the soil. Mud falls easily and cleanly from the tapered openings between the bars. Because the traction bars are connected, they're stronger, they have more tread rubber to push into the ground and pull. This extra tread rubber also lengthens tire life . . . makes tires roll smoother.

Although judged best by leading farmers everywhere, Firestone Champion Ground Grips cost no more than ordinary tractor tires. Specify the "Champion" when you order your new tractor, or when you buy replacements for your tires. See your nearest Firestone Dealer or Store today.

Listen to the Voice of Firestone every Monday evening over NBC

KINDERGARTEN NEWS

Mrs. Carol Brager visited our room on Tuesday afternoon.

Thursday we were entertained by the Freshmen Home Economics girls and Mrs. Andreae to a Hallowe'en party in the gym.

Eldon Nuehring treated us to popcorn and candy on Friday. It was his birthday.

FIRST AND SECOND GRADE NEWS

—Teacher, Miss Halfwassen

The First and Second grade pupils enjoyed having a pet turtle in their room, Friday. The pet turtle was brought by Jerry Lee LaFavre.

We had a Hallowe'en Party in our room Friday afternoon. We were treated with Hallowe'en candy.

Gaylon Bridges had a birthday Wednesday. He treated the children with candy.

THIRD AND FOURTH GRADE NEWS

The fourth grade have been studying letter writing and addressing envelopes in Language.

In our Health class we have been studying about foods. We know which foods contain the starch, protein, minerals and fats. We are making food charts to show what we have learned.

The third grade health class is learning about teeth. We made posters showing good teeth.

We all had a very good time at the Hallowe'en party. Every one did a stunt and all bobbed for apples.

Our room collected $5.14 for the Salvation Army.

Bob Larson, Ray Jennings, and Ione Rosendahl have been absent because of sickness.

FIFTH AND SIXTH GRADE NEWS

The fifth and sixth grade did potato printing in History last Wednesday.

The fifth grade used colonial figures to print and the sixth grade used early Egyptian or Babeylonian figures.

A Hallowe'en costume party was held in the gymnasium on Wednesday evening. We played games and prizes were given to the winners. Thomas Waddingham was awarded first place in originality, Roger Terhufen for the comic, Graydon Barz best dressed, and Lois Boland for the most scary. Sandwiches, cookies and cocoa were served at the close of the party.

The fifth grade Geography class are studying about the New England and Middle Atlantic States. We drew pictures of the New England dairy farms.

Sixth grade are studying the ancient Chinese, Japanese and Indian art. Some are making pictures of early porcelain dishes and some are painting pictures of the early Chinese architecture.

For Hygiene class we are going to exhibit our old shoes and try to find out ways in which posture will help make us walk better. We are also collecting shoes of other countries and early colonial shoes.

Fifth grade are collecting Colonial pictures and articles used in Colonial times.

SEVENTH AND EIGHTH GRADE NEWS

We have been showing the various campaigns of the Revolutionary War on a wall map by means of colored chalk this week.

The seventh graders wrote a unit test in English on Friday.

We are making torn-paper pictures or drawings to illustrate our favorite book for our "Book Week" project.

SOPHOMORE CLASS NEWS

Reported by Darlene Etchen

Last Thursday evening the Sophomores had a party at the former Ace Tavern. We of course had lots of fun. We danced and played several different games. We were going to have a treasure hunt but because of rain we had to call it off. We all had to go through a spook house. I suppose most of the nearby nieghbors were awakened by the screams!.

The building was very nicely decorated for the occasion. For refreshments we had sandwiches and potato chips. We were going to also have pop, but the chairman of the refreshment committee forgot to get it.

We have also been studying extra hard so that we would be able to have the party.

JUNIOR CLASS NEWS

Reported by Donna Fjetland

The Junior class is humming with excitement over the class play which is to be given on Thursday evening, November 6th. Everyone is busy selling tickets, arranging postures etc. We hope it is a big success.

The studies have almost been forgotten in the excitement, but we have had classes. The teachers hope we have learned something.

In English, we are deep in the subject of verbs and we are trying our best to understand them, Mrs. Harvey almost runs out of patience but it isn't our fault. We are now studying rule 86, and there have been more exceptions than rules. No wonder we are dizzy.

Economics and Sociology under Mr. Patterson's supervision are going quite nicely.

Typing is also progressing since the typists know how to reduce their mistakes.

Oh, well, we will devote more time to our studies after the play. That's fair enough, isn't it?

FRESHMAN NEWS

"Breakfast" has been our study in Home Economics this week. This included a study of different types of breakfasts, what to have for breakfast, and the importance of eating your breakfast. On Wednesday we made apple sauce for laboratory work. Thursday we gave a Hallowe'en party for the Kindergarten children and their guests. We played games, read stories, and had lunch.

In Algebra we have been studying about positive and negative numbers. Some find them easy while others find them difficult.

We have been studying the different types of stories in our Literature class. We all thought the story "Strange Journey" was the most unreal story of any we have read. However, it was very amusing.

The topic in Science for this week is "Light". We have learned how it travels and the benefits derived from it. Every Friday we study the Popular Science magazine. From it we make reports.

In Manual Training the boys have been learning about the different kinds of wood. "We have been studying."

Reported by Nellie Grieman and Darlene Bachman.

MORE SCHOOL NEWS—LEFT OVER FROM LAST WEEK

THIRD AND FOURTH GRADE NEWS

—Teacher, Miss Tanner

Bob Larson, Paul Gilpin and Margaret Haefner have been absent for several days this week due to colds.

We have begun dictionary words in fourth grade. We enjoy looking up meanings of the words very much.

The fourth grade have finished their first reader "Fun and Frolic" and have started in "Times and Places".

The third grade have learned to measure inches, one half and one fourth inches in Arithmetic.

In our Art class Friday afternoon we worked Indian freizes.

Our room has collected $5.14 for the Salvation Army Drive.

The following had 100 in Spelling:

Third Grade
Martin Brinkman
Janice Stokesbary
Eva Theimann
Barbara Thompson
Ronald Trampel

Fourth Grade
Bob Arnold
Roger Bachman
Shirley Barz
Carol Bridges
Margaret Haefner
Lois Heginger
David Waddingham

FIFTH AND SIXTH GRADE NEWS

The fifth and sixth grade have contributed three dollars and twenty five cents to the Salvation Army. We are in hopes more will come in Monday.

In Art we drew squirrels and ducks on black paper with white colors. This week we drew flowers, colored them, and then painted the background.

Friday we were asked to attend a one act play put on by the high school speech class. We heard several band selectionions and 2 musical numbers by the kindergarten, first and second grades.

SEVENTH AND EIGHTH GRADE NEWS

As Reported by Iris Schaefer

In the eighth grade we have been studying of the Revolutionary War. We find that it is very interesting.

The seventh grade have been studying about the A - B - C countries of Latin or South America in Geography. They have learned the importance of these countries.

Friday in Art we made designs on stationary, many of the designs are very clever.

In Arithmetic the eighth grade have been studying about the percentage of numbers. It is hard for some of us but is easier for others.

The seventh grade has been studying about Roman Numerals. They have decided that it would be very hard to tdd, subtract, and multiply with this kind of numbers.

The eighth grade held their Science Club party on the evening of October 24, 1947. We enjoyed it very much.

FRSEHMAN NEWS

—By Margaret Buckley

We have been studying and learning how to solve equations in our Algebra class. On Monday we are starting on the chapter "Positive and Negative Numbers". Mr. Andreae said that we might have a little trouble at first, but we hope not.

In our Literature class we have started the study of a new unit "The Lure of the Unknown." It seems to be very interesting.

In Home Economics we are studying about foods. We are all glad.

In General Science we are also starting a new unit, "Our Use and Control of Light".

The class wishes to thank Mr. Kingery and the rest of the school for the fine party and entertainment last Friday evening. We all had a very nice time. Thank you.

SOPHOMORE NEWS

—By Marlene Roths

Our report cards are back, and we have decided we had better study harder.

Geometry has been a little easier for most of us. We have been studying construction and have been proving therums.

In Biology we have been studying about simple animals. Today we had an experiment, we looked through the microscope and saw the mold on a piece of bread, Mrs. Andreae did the experiment, it was very interesting. We also have been having tests every day in Biology, which keeps us very busy learning our lessons. We find we have to study or not get a good grade!

We have been studying Literature this six weeks instead of English. Some of us find it more interesting then English. We had a test in it, also We do not know what our grades are yet, as Mrs. Harvey doesn't have our papers corected yet.

In Home Economics we have been studying about "How To Get Along With Others". We find it very interesting.

JUNIOR CLASS NEWS

—Reported by Donna Greiman

The Junior Class play is finally getting under way, and we are trying to memorize our parts a little better. There are nine members in the play cast, the rest are working on posters, tickets, stage work and etc.

Getting to our studies now, we have learned all the letters, numbers and punctuation symbals on the typewriter. Typing is easy, so we say, but we do have to concentrate and learn the keys perfectly.

Monday we have two unit tests, one in English and one in Economics. We have already had one in Sociology the past week.

Friday afternoon the speech class presented a play, "The Medicine Show," for the grade and high school pupils.

PLAN 4-H GIRLS' CLUB ACTIVITIES

Plans for county 4-H events, goals for individual members and methods of strengthening the Hancock County 4-H girls' organization were maped at a meeting held at the C. D. of A. Hall in Garner, October 14 according to Elsie Mae VanWert, County Extension Home Economist.

Members of the county 4-H committee, local club leaders and the county officers attended the meeting. Mrs. Marjorie Lovestead of the State 4-H staff ot Iowa State College, led the discussion on activities for the coming year.

Stressing that the purpose of 4-H work is to give the rural girl training that will develop her personality, provide home economics information and help her to find her place as a citizen in the community, Mrs. Lovestead emphasized the importance of a well-balanced program

At a preliminary session the members of the county committee assigned responsibilities for the coming year, set goals and analyzed the results of the 1947 4-H program.

In the meeting of the entire group approval was given to activities which will strenghten the program next year. Plans were made to hold a county wide banquet, district camp, rally day, and achievement day.

Some of the individual goals established for the girls who will take part in the clothing project include: to maintain her own good health, to keep personal expense account books, to keep her clothing record book up-to-date, to start a long-time record book, each girl to give one talk, to give one individual demonstration, and to take part in a team demonstration. A few of the county and local club goals which were adopted were to organize sufficient clubs so as to make it possible for every girl to belong to a club, to conduct good county-wide meetings to encourage each girl to have an annual health examination and make corrections, each club to strive to be a standard club, each club to plan its program for the year with meetings at regular intervals.

Clothing is the 4-H girls project for 1948. The state program has been placed on a 3-year instead of the 7-year cycle which has been followed for a long period, Mrs. Lovestead explained.

In addition to the regular project work girls also may carry garden and poultry prejects. In addition to project activities all girls are encouraged to take part in one or more other 4-H activities. Music, health, recreation, demonstrations, personal accounts, camping and similar activities are a part of the 4-H program.

Home beautification, conservation of natural resorces and fire prevention are other fields into which girls may extend their interests. Persons who attended the organization meeting were: Committee members C. J. Wille, Chairman, Klemme; Mrs. Lyal Fox, Britt; Miss Ruby Schram, Garner; Mrs. Percy Bailey, Corwith, Mrs. Oscar Greiman, Garner. The leaders and assistant leaders: Mrs. C. J. Schutjar, Woden, Bingham Boosters; Mrs. Lewis Weiland, Garner, Ell Tip Toppers; Mrs. R. B. Halsne, Erin Eager; Mrs. Frank Brozik, Garner, Madison Live Wires, Mrs. Lewis Formanek, Garner, Madisoh Live Wires; Miss Bernice Weaver, Garner, Ell Tip Toppers; Mrs. Herbert Nickols, Garner, Concord; Mrs. Roy Arnold, Klemme, Avery Sunbeams, Mrs. Leonard Kaduce, Klemme, Avery Sunbeams; Mrs. Lester Bonnstetter, Corwith, Boone - Magor Pals; Mrs. Elmer Jante, Garner, Garfield Lively Workers; Mrs. Gordon Sonerholm, Britt, Britt Busy Beavers, Mrs. Aaron Stromer, Garner, Liberty Busy Bees.

Rules For The Hunter

The duck season opened in Iowa at noon Tuesday, Oct. 21. In order to help avoid accidents while hunting, reprinted below are the Ten Commandments for Safety. They are:

1—Treat every gun with the respect due a loaded gun. This is the cardinal rule of gun safety.

2—Carry only empty guns, taken down or with the action open, into your automobile, camp and home.

3—Always be sure that the barrel and action are clear of obstructions.

4—Always carry your gun so that you can control the direction of the muzzle, even if you should stumble.

5—Be sure of your target before you pull the trigger.

6—Never point a gun at anything you do not want to shoot.

7—Never leave your gun unattended unless you unload it first.

8—Never climb a tree or a fence with a loaded gun.

9—Never shoot at a flat, hard surface or the surface of water.

10—Do not mix gunpowder and alcohol.

BLUE COMB DISEASE IS POULTRY FLOCK THREAT

Abnormal comb color in poultry flocks this fall may indicate a new poultry disease called blue comb.

Although only scattered cases have been reported in Iowa, it may cause trouble this fall, C. D. Lee, extension veterinarian at Iowa State College, reports.

Laying flocks are most likely to be affected by blue comb in late summer and early fall. The illness seems to be due to digestive disorders, he says. A large part of the flock may become sick at the same time.

Early symptoms are listlessness of the birds and a sudden drop in egg production. Hens drink normal amounts of water for a few days but do not eat well. Combs and shanks turn an abnormal color of some shade of blue. Feed eaten by the hen may stay in the crop.

As soon as blue comb is detected, stop feeding grain, Dr. Lee advises. Mash should be offered to the hens.

Treatment suggested is 1 qt. of feeding molasses to each 10 pounds of mash. The feed mixture should be put in the feeders every other morning for a week. Use only an amount of mash that the birds will eat in 2 or 3 hours, Lee says.

Get matured onions out of the ground now so they will cure preperly.

HANCOCK COUNTY BOARD PROCEEDINGS

6TH ADJOURNED SEPTEMBER MEETING

Garner, Iowa
October 20, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F J Schoun, George Th. Gerdes and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the bond of Vander Brink Brothers, Contractors, is approved.

Supervisor F J Schoun is appointed a committee to investigate and cause repairs to be made in drainage District No. 7

On motion and second the bond of R J Fritsch, Justice of the Peace is approved

On motion and second the bonds of Schram Brothers, Titonka Contractors, on Drainage Districts No. 101 and 122 are approved

On motion and second the contract with Concrete Products Corporation of Humbolt on Drainage District No 122 is approved

This being the 20th day of Oct. A. D. 1947 a date heretofore set for a continuation of a lettion on DD No 144 Extension the hour for said letting having arrived, the proof of publication being on file and the board being fully advised, said letting was held as scheduled

The bids on file were considdeded and after duly considering all bids on file the board finds the bid of the Concrete Products Corporation of Humbolt on material and the Schram Brothers of Titonka on labor are found to be the lowest and best bids on the construction of Drainage District No. 144, Extension.

BE AND IT IS THEREFORE RESOLVED, by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of DD No. 144, Extension, that the bids of Concrete Products Corporation of Humbolt on material and Schram Brothers of Titonka on labor are hereby accepted as the lowest and best bids for the construction of Drainage District No. 144, Extension and they are hereby awarded contracts thereof. All other bids are hereby rejected. Chairman John Chambers is hereby authorized and ordered to execute said contracts in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Geo. Th Gerdes, whereupon John Chambers, Chairman in the Chair placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th Gerdes and John Chambers, aye Nays, None Whereupon the Chairman declared the resolution duly adopted.

On motion and second, C F Merten, Engineer, is appointed construction Engineer, on Drainage District No. 144, Extension, and his bond as such engineer is hereby fixed at $50.00

On motion and second, C F Merten, Engineer, William Boehnke and Walter Kahl are appointed a commission to classify lands and assess benefits in Drainage District No. 144, Extenion, all in accordance with Chapter 455 Code of Iowa, A D. 1946 and laws amendatory thereto. Said commission to file their report on or before the 10th day of November A D., 1947.

On motion and second the board adjourned to October 27th A D., 1947 at 1 00 p. m.

ATTEST

County Auditor
J A CHAMBERS,
Chairman

IN THE DISTRICT COURT OF IOWA IN AND FOR HANCOCK COUNTY

IN THE MATTER OF THE GUARDIANSHIP OF JOHN JOSTEN AN AGED PERSON, IN PROBATE NO 3063 NOTICE

TO WHOM IT MAY CONCERN

Pursuant to an Order of the District Court of Hancock County, Iowa entered on October 2, 1947, the undersigned guardian will sell at public auction at the premises as hereinafter described, the following described real property situated in Hancock County, Iowa, to-wit

The undivided 1-6 interest of John Josten in Lot Four (4), Block Fourteen (14), Original Town of Klemme, Iowa

The sale of the other undivided 5-6 interest in said property will be made at the same time The sale of said real property is to be held at 2 00 P M. on November 22, 1947 This property is to be sold for cash with $1 000.00 paid on the day of sale, of which 1-6 is attributable to this guardianship, and the balance of the purchase price shall be paid on December 15, 1947 or as soon thereafter as merchantable title can be furnished Possession of the above described real property is to be given immediately upon sale thereof and conveyance to be made of the undivided 1-6 interest of John Josten by guardian s Deed duly approved by the Court said property to be sold free and clear of encumbrance, with the taxes for the year 1946 payable in 1947 and all prior taxes paid, and an abstract will be furnished showing merchantable title.

The guardian reserves the right to regect any and all bids.

Dated this 22nd day of October, A D. 1947

Earl E Josten, Guardian of the property of John Josten, an aged person.

By B C BERGE, His Attorney

(Published Nov 5, 12, 1947)

BAG WILD GEESE

Art Kramer and Ben Reibe of Garner are happy hunters. Both were able to bag 3 wild geese while in quest of ducks Monday. The nimrods were proudly exhibiting their quarry to envious hunters at Garner.

IGNORED RELATIVES

When John R. Hall, 88, of Ionia, died recently, his will revealed that none of his relatives had contacted him for 25 years and the bulk of his property was left to various charitable and religious institution in Iowa and Nebraska. The estate included a 320 acre farm.

"GO SLOW" IS WARNING ON INSTALLMENT BUYING

Let's not buy more on credit, even though controls over installment selling are off, warns Fannie Gannon, Iowa State College home management specialist.

There still aren't enough goods on the market to satisfy present customers. By increasing buying through installment purchases we compete for the scarce goods and contribute to inflation.

Even though "less to pay own with longer to pay" makes purchases seem easier, it's well to remember the added cost of installment buying. Stores will charge more for goods sold on time since their risks in installment selling are high.

When credit terms are eased there's always the temptation to overbuy. When we are unable at present to pay the full price for a purchase, there is a good chance that some unforseen circumstances may make it impossible to continue payments.

AROUND IOWA

DOG PROBLEM

Joy Hull, Simpson college student from Des Moines, has a problem. Her cocker dog, a lifelong pal, is pining away at home since she left, refuses to eat and is on the verge of a nervous breakdown. Joy is looking for some one in Indianola who will board the dog so he can be in "college" with his mistress.

NEW HOME

Apparently tossed out of a cage somewhere in Iowa to take part in a homing-piegon race, one of the birds is disgusted with such treatment and has decided to stay in Iowa. At the moment, he is making his home with Mrs. George Mendling of near Indepndence. The bird has a Chicago band.

EXPLOSION

When she attempted to light a gas heater in the basement before taking a shower, Audry Schuldt, 17, of near Deep River, was badly burned in an explosion which resulted. The explosion was so severe that it buckled the kitchen floor overhead and damaged the entire building.

BAD DAY

A recent Sunday was a trying day on the Mrs. John Wallace farm home near Williamsburg. A prize Belgian horse became entangled in a stanchion; and in trying to pry the stanchion apart, Archie Hoskinson was walloped on the jaw by a slipping timber, requiring medical treatment. The horse suffered a broken leg and had to be shot.

CAVE-IN

Dean Altenhofen, of Keswick, was killed recently while engaged in digging a ditch for a natural gas pipe-line. Four men were trapped when the walls caved in; one man crawled out and three had to be dug out. Altenhofen was the only fatality.

WAS GOOD, TOO

Mrs. Ernest Ruring of Gowrie and sister Beulah Hauser of Des Moines were looking over some old souvenirs recently and found a write-up of a chatauqua concert in which they had given a duet. The paper said their vocal duet "was one of the best numbers of the program." The paper also paid tribute to another singer, then unknown, who was pretty good, too. Her name was Gladys Swathout.

FOURTEEN YEARS

Marvin Bahnson of Inwood gives his cows a lot of personal attention. In the last fourteen years, he has missed milking them exactly 14 times. Once a year, it seems, he says to heck with it and lets some one else do the milking.

MISSING HEIRS

Does anybody know the whereabouts of Willis Folson or his brother? An estate running into many thousands of dollars is awaiting them at Storm Lake. Both parents of the two brothers died while the boys were quite young and it is not known what became of the two orphans.

JUMPED RIVER

Not every one has had the experience of jumping an automobile across a river, but Ward Sebern of Manilla leaped a 1941 car clear across the Nishnabotna river recently and lived to tell about it. With him in the car were H. H. Conrad and Donald Thompson also of Manilla. All received only minor injuries. The Nishnabotna bridge was washed out last spring and Sebern told officials there was no obstruction in the road to warn him.

END OF BATTLE

When Walter McNamera, of near Hamberg, sold his farm recently to Mark and Chris Wurtele, the sale marked the end of a "battle of the levee" which McNamera has been waging against the U. S. Army. 2 years ago the engineers cut through a levee on the McNamara farm to drain off surface water. A lot of top soil was drained off with it and McNamara refused to let the dike be repaired, as he wanted the river to back into the hole again and replace the silt. For two years, he kept the engineers off his land.

FIRST AND LAST

Forty two years ago, Harry Lyon, Jefferson barber, cut Dale Harding hair for free. It was part of his training as an apprentice barber. Last week Mr. Lyon retired from barbering and his last customer was — Dale Harding! Yes, this one was "free," also.

PEACH CROP

Most Iowans had trouble with their peach crop this year but Mr. and Mrs. Fred Schoenfeld of Grundy Center harvested a half-bushel this year from one small tree in their back yard.

KILLS EAGLE

Champion bird-catcher of the week is Ike Trunnell, a farmer of near Liberty Center. Mr. Trunnell saw the bird fighting an old black hen in his chicken yard, so he slipped through a gate and grabbed it, eventually being forced to wring its neck. The bird proved to be a golden eagle, with a six foot 10 inch wingspread. The birds are protected by federal law but Mr. Trunnell was justified in as much as he was protecting private property.

FARM MOTORISTS NEED TO DO BETTER DRIVING

Farm motorists do not drive as safely as their city cousins, Norval Wardle, Iowa State College agricultural engineer, says.

He refers to the National Safety Council report that the motor vehicle fatalities increased among farm people from 5,000 in 1945 to 7,000 in 1946. This was an increase of 27 percent as compared with 18 percent for the rest of the nation's drivers.

Traffic violations were the cause of over half of the fatal accidents. Excessive speeding and driving on the wrong side of the road were the most frequent violations. Other failures to comply with traffic regulations were improper passing, disregard for signals and devices and assuming the right of way.

Wardle pointed out that the farm motorist is driving in the most dangerous traffic area in Iowa when he drives on the open highway near his home. Statistics show that two-thirds of all fatal accidents on the highways in Iowa last year occurred in rural areas. However, Wardle points out that Iowa farm drivers have a better record than farm motorists in the rest of the nation.

There is need for extra precautions to insure safety at the farm driveway enterance, Wardle reminds.

DEPARTMENT OF PUBLIC SAFETY COMPARES 1947 DEATHS WITH 1946

The Department of Public Safety recently announced its compilation of comparative figures, representing motor vehicle deaths for the first nine months of 1947 as compared with the first nine months of 1946.

On September 30th of each year the total of 383 fatalities was exactly the same. The following recapitulation gives the break-down of facts as to the types of accidents:

Motor Vehicle Collided With	1946	1947
Pedestrian	79	67
Other motor vehicles	119	161
Railroad train	60	41
Street car	1	4
Bicycle	8	6
Fixed object	34	7
Overturned in roadway	9	11
Ran off roadway	69	78
Other non-collision	5	8
TOTALS	383	383

Further information shown in the records of the Department furnishes the facts that in 1946 there were 212 people who died in night accidents as against 178 in 1947.

Thirty-eight additional fatalities during the first 28 days of October brings the 1947 total to 421 fatalities, as against 418 for the same period in 1946.

From where I sit ... by Joe Marsh

Square Biscuits, Yet!

I see by a neighboring paper, that the round biscuit is on the way out. Yes, sir, home-management specialists have found that the square biscuit lends itself to assembly-line production and easy storage better than those customary ovals.

Well, we're all for progress, but that's one new idea we just don't cotton to. A round biscuit, spread nicely amidships with snappy country cheese, *looks* like a biscuit! And accompanied by a mellow glass of beer, it's a combination that you can't improve on!

So at the risk of being called old-fashioned, I'm voting for *round* biscuits, that fit a hungry man's mouth like no square imitation ever will . . . and for American beer served in the good old-fashioned way, in tall, cool mugs or ordinary glasses, with frosty sides and bubbles winking at the brim!

Think I'll step out to the kitchen for a snack right now!

Joe Marsh

Freedom Train Unfolds Story Of Nation's Democratic Ideals

WNU Features.

History is rolling across America in the form of the Freedom Train, the moving symbol of the nation's year of rededication to the ideals and practices of democracy. From Philadelphia, universally conceded to be "the cradle of American liberty," the Freedom Train has embarked on a 30,000-mile, year-long tour during which it will visit more than 300 communities in all of the 48 states.

An integral phase of the year of rededication, which is designed as a broad educational program to emphasize the blessings of the common American heritage of liberty for every individual citizen, the Freedom Train will bring precious documents recording that freedom to the attention of millions of Americans.

Ranging from the first printed references to Christopher Columbus' discovery of America in 1492 to the charter of the United Nations, approved in 1945, the documents unfold a story covering 453 epochal years in world history. More than 125 original copies of such historical manuscripts as the Constitution, the Bill of Rights, the Declaration of Independence and the Emancipation Proclamation are included in the national shrine on wheels.

Each document is placed in a plastic envelope fitted to the individual book or sheet. The envelope is waterproof, firepoof and shatterproof. Manufacturers claim the material is so strong that it would require a 100-pound ball traveling at 50 miles an hour to pierce the surface.

The covered documents are placed in cases of steel plate covered by special shatterproof double glass sheets. The glass is treated to discourage ultra-violet ray penetration as the rays are harmful to the old and fragile paper of many of the old documents.

Protective Measures.

Every object in the seven-coach train with exception of the documents is fireproof through installation of a special fire-extinguishing system employing carbon-dioxide.

Thirty-six marines, including many war veterans, will guard the display day and night.

Named "The Spirit of 1776" and sporting a brilliant red, white and blue color scheme, the Freedom Train will be a conspicuous exhibit.

Containing 128 items of American memorabilia, the documents included in the Freedom Train display have been termed "the outstanding collection of original American papers ever assembled in one exhibit."

The American heritage of freedom and free institutions is typified by such documents as the English Bill of Rights, the Declaration of Independence, Jefferson's Bill for Religious Freedom, the Draft of the Constitution with annotations by George Washington. Lincoln's first draft of the Emancipation Proclamation and Jefferson's letter on Freedom of the Press.

Shown as a sequel to the Declaration of Independence is a copy of the Treaty of Paris, signed September 3, 1783, in which Great Britain recognized the independence of the United States. The treaty was signed for the United States by Benjamin Franklin, John Adams and John Jay.

Historically Valuable.

Washington's Farewell Address, Lincoln's draft of the Gettysburg Address, papers of Thomas Jefferson, Franklin, James Madison, Andrew Jackson and other leaders in the early days of the country add to the historical significance of the exhibit.

Typical of the more glamorous aspects of the nation's early history are a manuscript containing the only known authoritative account of the first raising of the flag, the bona-fide log book of the famous frigate Constitution, better known as "Old Ironsides," and Jackson's letter to the secretary of war describing the Battle of New Orleans.

Among the odd exhibits are Benjamin Franklin's own epitaph in his own hand, one of the most famous epitaphs in the English language, which was written out for Samuel Morris and presented to him by Poor Richard on August 31, 1776, and the original letter in Siamese from King Mongkut of Siam offering to send a gift of elephants to President Lincoln in 1861.

Included in the exhibits in the World War II section are the original pencilled draft by Gen. George Marshall announcing appointment of Gen. Dwight Eisenhower to command the invasion of western Europe, the war department's original copy of the last radiogram sent by General Wainwright from Corregidor, the last part of which was garbled as communications were broken off, and Admiral Nimitz' original report of the Battle of Midway.

Surrender Documents.

As evidence that "Freedom Triumphs," the original German surrender documents at Rheims, signed May 7, 1945, and the log of the USS Missouri, displayed at the page covering the Japanese surrender aboard the battleship in Tokyo bay September 2, 1945, are placed on display.

Concluding the exhibit is a section, "Flags of Freedom," which includes such historic flags as the famous flag raised on Mount Suribachi by U. S. marines in the invasion of Iwo Jima.

Process Reversed As Teacher Herself Kept After School

PHILADELPHIA, PA. — Not a single small fry was on hand to witness the teacher's embarassment when Miss Betty Johnston, 38, instructor at Taggart elementary school, was "kept after school" for two hours.

Miss Johnston, who had remained after classes to mark papers, failed to notice the building custodian had locked all doors. She phoned police when she realized her predicament. Two patrolmen arrived with a ladder, but Miss Johnston refused to make the 25-foot descent from a first floor window. A search produced the janitor and a key.

He's Sharp

PLYMOUTH, MASS. — Leo Boghesani, barber, has decorated his shop window with a collection of more than 500 old-fashioned straight razors, including one used in Greece 700 years ago.

Repentant Outlaw Becomes Minister

RAWLINS, WYO. — An outlaw when he was only 14 years old, the Rev. Jenks D. Harris now travels by plane to preach in isolated communities frequently deprived of a minister's service.

Repenting of a crime career during the first year of a 15-year prison term in San Quentin for robbery, Harris decided to become a minister. He spent the next six years preaching to his fellow convicts and has continued his ministerial work since his parole 16 years ago.

As a child, Harris had listened to stories about the James brothers. After he left home, he acted as a western outlaw, underground character and stunt man in Hollywood, but picture work did not bring the income he desired. Using the plot of his current picture as a pattern, he formed a gang and robbed a bank.

Dewey Casts Eye Toward Presidency

New York Governor Stands High in Public Estimation

By BAUKHAGE
News Analyst and Commentator.

Washington.—Last week we looked at some of the contenders for the Republican presidential nomination. This week it is the New York governor's turn.

More than one person who has tried to talk about or write about Thomas Edmund Dewey has complained of the difficulty of this task. There doesn't seem to be any one place to begin or end.

Several simple declarative sentences can be written about the ambitious governor of the State of New York.

For instance, he is ambitious.

Everybody admits that, his friends approvingly, making it a sort of copy-book virtue; and Dewey has taken the copy-book to heart, not merely in regard to ambition, in general, but in attempting to justify a specific ambition, one we all heard some time or other in our youth: "every American boy has a chance to be president." Dewey has taken that seriously.

His enemies look upon Dewey's ambition as Brutus looked upon Caesar's.

I'm afraid that wasn't as simple or declarative a sentence as I intended. Let's try this again: Thomas Dewey is not a hail - fellow well-met. (I doubt if anybody will deny that.)

Baukhage

Thomas Dewey once was chosen as one of America's 25 best dressed men. I think anybody who has seen him will say that was a justifiable choice.

Thomas Dewey is a small man—in stature. (The jokesters have done the best they can with that joke but it's worn by now.) Standing in a small group with Dewey you aren't particularly conscious of his height—or lack of it. When he looks at you he can look hard enough to make you feel that you are almost seeing eye to eye, literally, I mean — not necessarily figuratively.

Tom Dewey is a hard worker; he is 45 and, like Taft, was a good student. When it comes to generalities — Dewey is more difficult to describe.

There is one thing, however, that emerges clearly when one examines Dewey's career. It follows a very definite curve which he undoubtedly plotted a long time ago and which will take the boy from Owosso, Mich., all the way into the White House if he is permitted to follow it.

Frequently he has had to pause in his upward course but he always manages to start over again where he left off, and continue in the same direction. He lost his first bids for the gubernatorial and presidential nomination in 1938 and 1940, respectively, but he tried again for the governorship in 1942, and was carried into office on a landslide that ended 20 years of Democratic control. That carried him along to the next milestone and he became automatic contender for the presidency in 1944. The revolt against the New Deal which put the Republicans back into power in New York wasn't strong enough to overcome the Roosevelt popularity so Dewey had to mark time until the next time—which is now.

However, there is no use leapfrogging the nomination, which is the issue at the moment. There is the usual controversy over the results of Dewey's western trip, which ended in August, but his managers, with confident optimism, announced on his return that his first-ballot strength at the convention would register at least 400 out of the 547 votes needed to nominate him.

Taft Might Hinder Dewey's Possibilities

However, the results of the more recent Taft journey might mean a double setback for Dewey if what is claimed is correct; namely, that Taft not only strengthened himself but strengthened Republican prospects, generally.

The reason for this is that the men who pull the strings in the Republican party have no great affection for Dewey. If they thought they were due for an easy victory they would be likely to push him aside regardless of his vote-getting ability. In other words, while the insiders want a man who can get the popular vote, they would rather have somebody whom they are entirely sure is their man, even if he isn't as popular — so long as he has edge enough to pull through.

While no formidable "stop Dewey" movement is evident — the fact that Taft tossed Warren of California a whole bowl of roses, took occasion to at least mention Stassen—and found no occasion to notice the existence of the governor of New York—seemed to indicate that there might be some concerted effort in the future on the part of the serious contenders. And, of course, there are always the favorite sons whose supporters always hope against hope to get together in a "stop Dewey" effort.

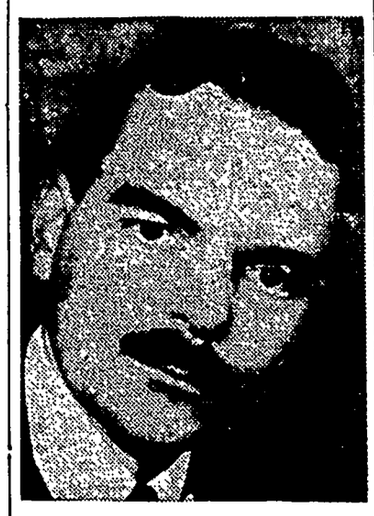
One thing about Dewey, however, is that he appears to be able to build as he goes. That is, up to the present, he has gained in velocity without having to reach too far back for his prestige.

Dewey's opponents point to what they call a "blank" record as governor. The Democrats say that about all he did was to cash in on a number of progressive steps taken by his predecessors clear back to Al Smith. While it is true that he has increased his political stature, moving steadily and steadfastly toward his goal — the White House — he has at the same time been accused by his opponents of leaning over backwards to avoid doing or saying anything that might prove an obstacle toward that goal.

This thought was put into concrete form in a recent resolution passed by the New York state Industrial Union council (the official CIO body which represents all the CIO unions of New York) at Saratoga Springs in September, which read: "We accuse Governor Dewey of permitting his personal ambition to take precedence over the best interests of the people of New York."

I don't mean to imply by this that Dewey counts too heavily on the CIO vote. Although he has created a considerable aura of progressivism about himself, some of his backers are very conservative and financially-powerful individuals.

There is one characteristic revealed in Dewey's career which may be forgotten as his record as an executive eclipses his achievement



THOMAS E. DEWEY
He's Ambitious.

as a prosecutor. It must be remembered that more than once he has sacrificed a highly lucrative position for the pure joy of criminal prosecution. First, when after making a good record on the staff of the United States district attorney, he postponed returning to private practice in order to prosecute Municipal Court Judge Hunstler, without pay, for the American Bar association; then, when he accepted the position as deputy district attorney at $16,000 a year to go after Dutch Schultz, Lucky Luciano, et al.

He is quoted as saying once that he would rather prosecute criminals than eat.

HEARTS IN THE HIGHLANDS . . . Four kilted members of the royal Scots guard are shown performing the celebrated Highland fling with swords at the Silver Lining festival which was held at the "cockpit" in London's famous Hyde Park. Festival was a tribute to London's 50,000 voluntary workers in the national savings movement.

NEWS REVIEW

Rough on Reds: Byrnes; AFL Overrides Lewis

MEMOIRS: *No Patience*

James F. Byrnes, who, when he was secretary of state, was a veritable personification of "patience on a monument" in his dealings with Russia, stepped down from his pedestal and announced that it was time to start slugging.

In his published memoirs, "Speaking Frankly," Byrnes proposed that the U. S. reply to Russia's "obstructionism" on atomic energy and German peace treaty agreements with "better and more" atomic bombs and a decision to drive the Red army out of Germany, by force if necessary.

Exponents of the "get tough with Russia" policy now have a sturdy champion in the former secretary of state, who resigned that post only last January because of ill health.

BYRNES

Byrnes presented a 10-step "course of action for restoring peace, basis of which must be the conclusion of a satisfactory German peace treaty. At the same time, he conceded that the plan of action conceivably could lead to World War III if Russia refused to co-operate.

First of all, said Byrnes, the U. S. should ask the Big Five to call a full-dress conference of all nations on Germany "early in 1948." If Russia refuses to participate or if she boycotts the conference, the other nations should proceed without her.

Then comes the stinger which Byrnes advocates. If Russia refuses to sign the treaty and likewise refuses to withdraw Red troops from western Germany, other nations should ask the U. N. security council to order her out. And if Russia vetoes the security council order, then the U. S. must drive her out of Germany by force.

However, Byrnes is firm in his belief that the U. S. probably will not have to resort to warfare. He thinks Russia will withdraw her troops from western Germany upon completion of a peace treaty.

REFUGEES: *From Soviets*

Streams of refugees are reported to be coming through Russia's iron curtain to the southeastern coast of Sweden.

Reason for their flight, they say, is that the Baltic lands where they made their homes, now under control of the Soviet Union, are being combed by the Russians for men and women to be deported to Siberia.

A secret transportation route out of the Soviet zone manages to spirit the refugees to Sweden. Cost for such a journey — 2,500 German marks.

BELABOR: *Lewis Downed*

"On this issue I don't think the federation has a head. I think its neck has just grown up and haired over."

Thus spake John L. Lewis, he of the king-sized eyebrows, at the American Federation of Labor convention in San Francisco. The issue to which he so lustily referred was that of whether the AFL should vote to wipe out its 13 vice presidents, of which Lewis is one.

And despite Lewis' name-calling and hammy, mane-tossing histrionics, the AFL did vote to abolish its vice presidents in a move to make the entire federation eligible to use the national labor relations board under the Taft - Hartley law.

JOHN L. LEWIS

The action, which leaves only William Green, president, and George Meany, secretary - treasurer, as top federation officers, was taken in order to permit the AFL officers to sign non-Communist affidavits for AFL federal unions which have no national officers of their own. No union may have access to the facilities of the national labor relations board under the Taft-Hartley law unless their officers sign the affidavits.

Lewis previously had adamantly refused to sign the non-Communist affidavit on the grounds that he would be making a concession to the Taft-Hartley law, much reviled by labor.

REPARATIONS: *Germany Pays*

European aid took a different turn with an announced plan by British and American military governments to dismantle 682 German industrial and war plants in their two zones for reparations.

Purpose of the move, slated to be carried out as swiftly as possible, is to expedite European economic recovery. Most of the factories are metal, chemical and electrical engineering, shipbuilding and power plants.

The announcement points up the problem, still not fully solved, of whether completely to destroy Germany's war potential by cancelling out her industrial strength, or to rebuild the German industry for peaceful production.

Obviously realizing the possible adverse effects which the dismantling of the plants might have upon the German people, the U. S. and Britain issued a joint statement emphasizing that they would consider suggestions from the Germans for substitution of equivalent individual plants.

VANISHING AMERICANISMS

Party Line Heading for Doom

That chatty, friendly institution, the rural party line, the force which has bound farm residents together into communities and spread more news than Walter Winchell, is getting ready to bid farewell to the American scene.

It's in the cards. The party line will be replaced, eventually, by the unsociable but efficient dial telephone exchange. That fact became apparent recently when a telephone and radio manufacturing firm announced development of a dial telephone exchange especially designed for the small community which has only 300 or 400 subscribers.

The new type of exchange, which will make dial phones economical for an operating company with as few as 40 lines, is termed unromantically a "community rotary exchange." Cost of installation will average about $100 a line, but the cost to an individual subscriber will be much lower than that because rural exchanges usually have from 4 to 10 parties on a line.

The unit will provide fully automatic service for individuals, private branch exchanges, 2, 5 and 10-party lines, as well as pay station service.

Major development is the circuit arrangement which completely separates toll from local service, thereby insuring the availability of lines for long distance calls, even though all local facilities may be busy.

Exponents of the "community rotary exchange" boast that once the unit is installed it continues to operate for months untouched by human hands.

With this mechanical marvel at the helm, the party line will become as obsolete as Benjamin Franklin's kite. No longer will every phone on the line ring when someone puts in a call. The jangling on the wall will be heard only in the home of the person for whom the call is intended.

Final analysis reveals that the new dial exchange can do everything the old party line did, and can do it better. With one exception: It can't trace down the doctor in an emergency.

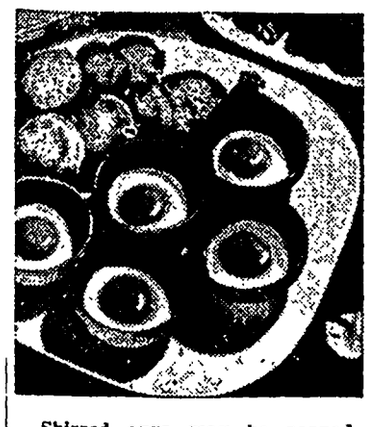
HOUSEHOLD MEMOS
by Lynn Chambers

Don't Skip Lunch If You're Striving For Balanced Diet



Shirred eggs may be popped into the oven a few minutes before luncheon. Line individual baking dishes with leftover vegetables or meat for a more substantial luncheon.

Have lunches suddenly become a problem now that cooler weather is with us and a few pieces of fruit and a glass of milk just don't seem to satisfy you? Or, are you like the woman I know who is trying to lose weight and is trying to get nourishment without a lot of calories and is trying to cut down on easy-to-prepare sandwiches?

No matter which of the above situations is your particular problem, the column today is designed to help. The woman who works around the house has a definite luncheon problem, mainly because she needs to balance her diet as well as keep up her energy for household tasks.

Calories are a problem to her whether she is trying to maintain, gain or lose weight. Economy, too, in these days of rising prices, is a problem because she doesn't always care to eat leftovers from the night before, at least, just as leftovers, heated and set on a plate.

For these reasons, I think the answer to the luncheon at home is to have eggs made in one of several interesting ways. And, if just eggs alone aren't appealing enough, use them with vegetables or other foods to make them appetizing.

Eggs are a rich protein food, low in calories, high in nourishment. They can be filling, and they can be tempting provided you experiment with novel ways of serving.

First on the list are two interesting salads with eggs. Serve them with crisp wedges of lettuce or lettuce cups.

Pimiento Olive Salad.
(Serves 4)

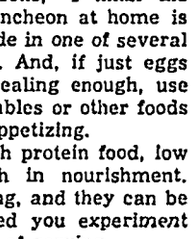
- 4 eggs, hard cooked
- ½ cup chopped ripe olives
- ¼ cup pimiento, chopped
- ¼ cup chopped celery
- 2 tablespoons chopped green pepper
- ½ teaspoon salt
- Mayonnaise, as desired

Mix chopped olives, pimiento, celery and green pepper. Place in crisp cups of lettuce and serve with eggs, sliced on top. Use with mayonnaise.

Bean and Egg Salad.
(Serves 6)

- 1 can of red kidney beans
- 4 sweet pickles, chopped
- 3 hard-cooked eggs, sliced
- ½ cup chopped celery
- 2 tablespoons finely chopped onion
- 1 teaspoon salt
- ⅓ tablespoon mayonnaise

Rinse, drain and chill the kidney beans. Add remaining ingredients, mixing thoroughly. Arrange in nests of lettuce. Garnish with a few slices of egg and other greens, if desired.



Here's a nice egg salad to have when you have a neighbor dropping in for lunch:

Egg and Cheese Salad Bowl.
(Serves 6)

- 1 bunch watercress
- 1 bunch chicory
- 1 head lettuce
- 4 hard-cooked eggs
- 1 carrot, cut into sticks
- ¼ pound cheese, cut into sticks
- French dressing

LYNN CHAMBERS' MENU

Clear Tomato Soup
Shirred Eggs with Chopped Ham
English Muffins
Green Bean Salad
Jelly Carrot Curls Celery
Spice Cake
Beverage

Break greens into bowl. Cut eggs into wedges. Combine all ingredients with french dressing to taste.

Here are egg dishes which are nice for luncheon if you have the youngsters coming into eat with you:

Eggs Diable.
(Serves 6)

- 6 hard-cooked eggs
- 6 slices toast, buttered
- 1 cup tomato catsup
- ½ cup chili sauce
- 2 tablespoons worcestershire sauce
- 1 tablespoon butter
- 1 teaspoon mustard
- 1 teaspoon vinegar
- ⅛ teaspoon salt
- ½ teaspoon pepper

Slice eggs onto buttered toast and cover with a sauce made by heating the other ingredients to the boiling point. Serve hot.

Egg-Asparagus Double Decker.
(Serves 6)

- 12 slices toast
- 6 eggs, creamed with 2 cups white sauce
- Asparagus tips

Cover half the toast with creamed eggs, place asparagus tips on each and top with second layer of toast. eggs and asparagus.

Dutch Baked Eggs.
(Serves 6)

- 6 hard-cooked eggs
- 2 tablespoons butter, melted
- 1 teaspoon minced parsley
- ¼ teaspoon dry mustard
- Salt and pepper
- ⅛ cup cleaned shrimp
- 1 cup cream or evaporated milk
- Grated cheese
- Butter

Chop eggs, add melted butter, seasonings, shrimp and cream; mix well. Pour mixture into greased baking dish and sprinkle top with grated cheese and bits of butter. Bake in a hot oven (400°F.) about 10 minutes or until cheese begins to melt.

Hard-cooked eggs cut in wedges add a satisfying note to salads as well as other easy-to-make luncheon dishes. Don't ignore their value as garnish and nourishment for they are a rich protein source.

Chinese Poached Eggs.
(Serves 6)

- 1 cup rice
- 2 tablespoons butter
- Salt and pepper
- 2 tablespoons flour
- 1 cup milk
- 1 teaspoon grated onion
- 1 tablespoon chopped celery
- 6 eggs, poached

Cook rice in boiling, salted water. Drain and blanch. Prepare white sauce by melting butter, blending in flour, salt and pepper. Add milk, grated onion and celery. Cook until thickened, stirring constantly. Arrange hot rice on platter, place eggs on top and cover with sauce. Garnish with paprika and celery.

Shirred Eggs.

Grease individual baking dishes. Break into this an egg and bake in a moderately low (325° to 350°F.) oven for 12 to 18 minutes depending upon firmness desired. Serve from baking dish. Top with bread crumbs or cheese before baking, if desired. Or, layer the dish with chopped chicken, sausages, bacon as well as cooked or mashed vegetables before breaking in eggs, as desired.

Released by WNU Features.

LYNN SAYS:

Remember these Facts When Using Eggs

Egg whites will beat better when they are warm. Let stand at room temperature for a while if you want them to beat until light and fluffy for meringues or cakes.

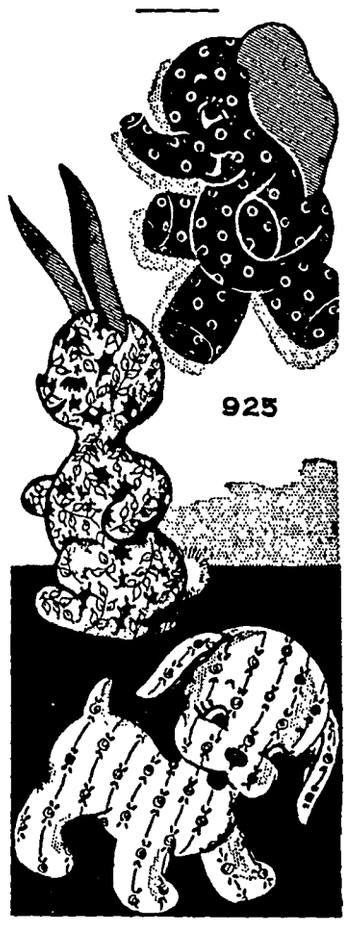
Scrambled eggs take on new glamour when they are served with cheese added to eggs while cooking; or, if you prefer, chili sauce—4 tablespoons to 6 eggs; or, chopped leftover meat.

Eggs are a highly perishable food and deteriorate rapidly at room temperature. They should be refrigerated to keep fresh.

The shell color of eggs varies with the breed of the chicken, but has nothing to do with the flavor, nutritive value or the cooking of the egg itself.

Use leftover egg yolks by simmering them in salted water for 10 minutes and then grating them for garnish on green vegetables, salads or creamed dishes.

Trio of Play Pals For the Little Child



THE best playmates a little child could have—a happy elephant, a proud bunny and a surprised pup—all cuddly, soft and safe for baby.

Bazaar Supper

The Methodists will hold their annual Bazaar with a Cafeteria supper on Wednesday evening, November 19th. Every one is invited.

THE SPORTS SPOTLITE

—By Rick and Oscar

Coach "Pat" Patterson has been working with a group of eager Shamrocks for the past 2 weeks getting them ready for one of the roughest schedules in the school's history.

There are four returning lettermen namely: Bud Carolus Bob Baack, Red Schmidt and Ed Grosshuesch. Those who are most likely to see action this year are Bud Montgomery, Bill Lacey, Dick Finders, Butch Brinkman Calvin Josten, Harley Barz, Maurice Trumbell, Ned Howard and Ralph Nueh-ing.

There are also some eager fresman that will surprise even themselves.

The first game will be on Nov. 14th, when the Shamrocks clash with the Hayfield Hornets, so be on hand at 7:15 to see the curtain raiser.

The rest of the schedule is as follows:

Home Games

Nov. 14, Hayfield
Nov. 20, Woden
Nov. 25, Britt
Dec. 2, Garner
Dec. 11, Kanawha
Jan. 2, Belmond

Shamrocks Open Basketball Season Against Hayfield

BASKET BALL SEASON WILL OPEN WITH HEAVY SCHEDULE

First Game Will Start At 7:15 When Reserves Will Play

The Klemme Shamrocks will open the basket ball season on the home court Friday night of this week when they meet the Hayfield Hornets in a double header game.

Klemme has four regulars back on the squad and who will replace Dean Jacobs, Shamrock star of the past three years, is still a puzzle, as Coach Pat Patterson has a couple of likely boys to start as the fifth man on the regulars. Eddie Grosshuesch, Harlan Carolus, Red Schmidt and Robt. Baack are the regulars left over from last year. The outlook for a good team is encouraging but the Shamrocks have a tough schedule ahead and will meet up with some fast Class A teams during the season.

Season tickets are now on sale and can also be purchased at the ticket window. Basket ball fans will save money by purchasing a season ticket for the ten home games of the season.

Home Games

Nov. 14, Hayfield
Nov. 20, Woden
Nov 25, Britt
Dec. 2, Garner
Dec. 11, Kanawha
Jan. 2, Belmond

Dec. 18, Crystal Lake
Jan. 6, Thornton
Jan. 9, Kanawha (to be played at Klemme)
Jan. 23. Fertile
Feb. 10, Ventura
Feb. 13, Hayfield
Feb. 20, Garner
County Tourney, Jan. 27 - 30 at Garner.

DUCK SEASON CLOSES NOVEMBER 19

Iowa's 30-day duck season closes at one hour before sunset November 19th. The 1947 season was greatly curtailed with a bag limit of only four ducks per day. Opening day was considered good in most sections of the state with a lull in duck shooting during the first half of the open season. Conservation officers report of unusually good goose shooting throughout the state, with an unprecedented flight of blue geese during the second week. As the current duck hunting season draws to a close, flights of northern ducks are making their annual appearance.

PHEASANT SEASON CLOSES NOVEMBER 20

The 1947 pheasant season, with the most strict bag and possession limits in history and with only forty open hour of shooting, closes at 4:00 p. m., November 20.

The following counties were open for pheasant shooting in north Iowa during the ten-day period: Emmet, Kossuth, Winnebago, Worth, Mitchell, Hancock, Cerro Gordo, Floyd, Franklyn and Wright.

Work Circle Will Meet

The Work Circle of the Klemme Methodist W. S. C. S. will meet at the church on Nov. 20th. Mrs. Art Wellemeyer and Mrs. Geo. Schoenwetter are on the serving committee.

Phone your news to 12.

Exams To Be Given For Klemme Post Office Clerk

The Eighth U. S. Civil Service Region announced today that an examination will be held for the Substitute Clerk or Regular Clerk positions in the Klemme, Iowa Post Office on November 22, 1947, 8:30 A. M., High School, Forest City, Ia.

The beginning basic rate of pay is $.79 per hour for substitutes. The salaries of regular clerks from $1600 to $2100 a year, depending upon size of the office.

Applicants must be citizens of or owe allegiance to the United States. The age limits are 18 to 50, except for veterans and persons in the Federal Service Indefinite employees.

In order to qualify applicants must pass the written test, which requires about 4 hours. Interested persons should ask for further information and obtain application forms from the local Postmaster or from the Eighth U. S. Civil Service Regional Office, Post Office and Customhouse Building, Saint Paul 1, Minnesota. Applicants must bring completed application forms with them at the time of the written test.

METHODIST W. C. S. C OFFICERS ELECTED FOR THE COMING YEAR

New Officers Will Take Over At The January Meeting

At the meeting of the Klemme Methodist W. S. C. S. on Thursday afternoon the following officers were elected for the coming year and will be installed at the December meeting:

President, Mrs. R. A. Jorgenson; Vice Pres., Mrs. Vern Bisom; Recording Secretary, Miss Irene Marshall; Corresponding Secretary, Mrs. Clarence Lemke; Treasurer, Mrs. John Chambers.

The following Secretaries of various departments are:

Missionary, Mrs. Elmer Arnold; Christian Relations, and Local Church Activities, Mrs. Roy Arnold; Literature and Publications, Mrs. Otto Lemke; Student Work, Mrs. Clarence Larsen; Youth Work, Mrs. Ronald Gibbs and Mrs. Mervin Groesbeck.

Childrens Work, Mrs. D P. Anderson; Spiritual Life, Mrs Ralph Elder; Status of Women, Mrs. Lloyd Sherwood; Supply Work, Mrs. Melvin Neuberger

The new officers listed above will take over in January.

COUNTY NURSE TO BROADCAST

Wednesday, November 29th, Miss Harriet Oxley, County Nurse will speak over dinnertime Review, KGLO, at 12:05 p. m. This is the 4th radio broadcast the nurse has participated in to further spread news of public health activities in Hancock County.

Topic for discussion will be the immunization programs recently held in our county Many children have been immunized in Britt and Garner and November 12th, Hayfield is having one.

The nurse will again broadcast in December.

Two Fined For Carrying Loaded Guns In Auto

Charles Kiefer and Shirley Kiefer of Mason City recently were arrested by a conservation officer for carrying a loaded gun in a car on a public highway. They were arraigned before Justice R. J. Fritsch of Garner and fined $25 and costs. $15 of the fine was suspended in each case on good behavior.

ANNUAL FARM BUREAU MEETING ELECTED JACK DETHMERS PRESIDENT

400 Hear Jack Dethmers And Wayne Kieth At Annual Farm Bureau Meeting

Four hundred Farm Bureau people at a special meeting on Monday evening, November 3, heard Jack Dethmers, Hancock County Farm Bureau president, and Wayne Kieth, Kossuth Co. Farm Bureau presdent, describe conditions in Europe. These conditions were observed by these farmers in a recent trip to Europe. Both emphasized the need for the people of the United States to take an active part in the difficulties of England and of Western Europe Mr Kieth showed colored slides of their trip.

Group singing was led by Fred Missal.

Miss Jean Ingebritson, of Crystal Lake, sang three vocal solos She was accompanied by Mrs. Zea from Crystal Lake.

Resolutions presented by the County Resolutions Committee were approved and will be sent to the State Farm Bureau Federation where they will be reviewed and incorporated into the state resolutions.

Officers elected for 1948 were Jack Dethmers, president; Erwin Kahl, vice-president; Rudy Urich, as secretary; Richard Brown, treasurer; Mrs. Clarence Greiman, Co. Women's Chairman and Co. Women's Voting Delegate; Mrs. Leo Jass, Co. Women's vice-chairman and Women's alternate voting delegate; Jack Dethmers, Co. Farm Bureau voting delegate, C J. Wille, Co. Farm Bureau alternate voting delegate, Mrs. C. J. Wille, Chairman of 4-H girls Co. Committee and Aaron Stromer, Chairman of Co. 4H boys committee.

Township directors approved were Harold Rockow, Madison Twp.; Harvey Engstler, Garfield Twp; Wm. Janssen, Twin Lake Twp; Edwin Thiemann, Ell Twp; Frank Bredlow, Liberty Twp., Jack Deitz, Britt Twp., Roy Rogeness, Crystal Twp., Norville Olson, Ellington Twp., Forrest Eckels, Orthel Twp.; Lowell Maley, Concord Twp., and Wm Steinhoff, Amsterdam Twp.

Mrs Clarence Greiman, newly eleceted chairman of the Co. Women's Committee in behalf of the committee presented a gift to Mrs. Harold Oxley, retiring committee chairman for her faithful service and leadership in the 5 years that she has been county chairman.

Jack Dethmers, Co. president, discussed the need for more money to adequately finance the county, state and American Farm Bureau programs. Members are demanding more services, more personnel, and of course, both services and personnel costs more now than in previous years. "Do we go ahead or do we slip behind?" is the question. Mr. Dethmers asked the members to think this through so they will be fully informed if the question is voted on at a special meeting at a later date.

TWINS

Twin calves were born at the Carl Lindsay home near Marengo recently. They are rugged calves but not "indentical"; one takes after the mother, a Holstein; the other takes after the father, a Guernsey bull.

HELLO, FOLKS!

Mr. and Mrs. Clarence Trampel are the parents of a baby boy, weight 7½ lbs. born Monday evening, November 10th, 1947 at the Garner Nursing home.

KILLING PHEASANT HENS ENDANGERS '48 HUNTING

Shoot no hens is the conservation minded pheasant hunters this year. They know that unless such a rule is rigigly followed by every gunner in the field there is serious danger that pheasant numbers may be reduced too low to recover rapidly.

However, the State Conservation Commission points out, there is no danger to future years' production if only cock birds are shot. They figure it out this way. Past studies have proved that pheasants are polgamous—that one cock normally has a harem of two or more hens. There may be as few as one cock to 10 hens without reducing egg fertility.

Roadside counts and population surveys, conducted last spring and again this fall by the commission, indicate that there are about the same number of cocks as hens in the state That means there are really more cocks than are really needed for production next year

So, a 10-day open season was called for most Iowa counties despite the fact that pheasant populations are lower than in years past.

The Conservation Commission did its part—now you do yours. Make sure it's a cock before you squeeze the trigger. Insure your future hunting by shooting no hens.

DO YOUR HOLIDAY GIFT BUYING IN KLEMME

Klemme Stores Are Stocked With Large Amount Of Christmas Gifts

No need to go out of town to do your Christmas Shopping. Klemme Stores are already getting merchandise on display for the early shopper and you can find a nice variety of gifts for every member of your family at money saving prices.

Completes Contract

Charles F. Merten, Hancock County engineer, has reported that the States Construction Company of Des Moines has completed its contract for placing of steel on Hancock county bridges.

Frances Myklestad Is Bride Of Aaron Johnson

In a simple cande-light service at the Goodell Evangelical United Brethren Church Wednesday evening, November 5th, in the presence of their immediate families, Frances Myklestad, daughter of Leonard Lee of Marshalltown, and Aaron Johnson, son of Mr. and Mrs. Ora A. Johnson, Goodell, were united in marriage with a single ring service read by the Rev. W. T. Boston.

The maid of honor was Mrs. R. E. Nelson, sister of the bridegroom, and the best man was Mr. R. E. Nelson, of Nora Springs.

The bride wore a beige satin street length dress with a corsage of gardenias and red roses. Her only jewelry was a three strand necklace of pearls, a gift of the bridegroom.

The maid of honor wore a black street length dress with white accessories and a corsage of pom pom gardenias.

The bride, who has been making her home with an aunt and uncle, Mr. and Mrs. Dan Fjetland, is engaged in teaching a rural school near Goodell. The bridegroom has been operating a D-X station in Goodell during the past year. He served a couple of years in the U. S Navy and was in several invasions overseas.

Mr. and Mrs . Johnson will make their home on a farm northwest of Goodell where he is now engaged in farming.

A reception and dance will be held at the Klemme Community Hall Thursday evening.

Birthday Party

Mr. and Mrs. Asa Gibbs of Garner entertained on Sunday afternoon in honor of their son Jotham Michael's first birthday. Those present were Mr. and Mrs. John Neuberger and Ruth; Mr. and Mrs. Harry Gibbs; Mr. and Mrs. Ronald Gibbs and Ronna. Mr. and Mrs. Gibbs served a lunch including a decorated birthday cake and ice cream. Jotham received several nice gifts.

Only 35 shopping days until Christmas. Do your shopping early and shop in Klemme.

KLEMME MEN RETURN FROM HUNTING TRIP NEAR NECEDA, WIS.

Fred J Arnold and Bert Jones left Thursday night for Neceda, Wisconsin, where they hunted deer with bows and arrows in that vicinity. The men had a couple of shots each at deer but in both cases missed their game by only inches. Bert grazed the back of one deer and his arrow had a tuft of deer hair on it after the shot. Because of threatening weather the men shortened their stay in the timber and were back home Monday night.

Both men are enthusiastic about hunting deer with bow and arrows and are already planning a return trip next fall This was Bert's first experience, but Fred made the trip last year. They hunted in a game reserve open only to bow and orrow hunting.

Avery Sunbeams Met

The Avery Sunbeams met at the home of their leader, Mrs. Roy Arnold, Saturday, November 8. All the members were present and three other girls joined the club. They are Judy Brady, Lois Lowenburg, and Joann Burgess. The assistant leader, Mrs. Leonard Kaduce, and Miss VanWert were also present. Plans for the Christmas party were discussed, and also the program for the coming year. A talk on how to care for your teeth was given by Pauline Kramer and a demonstration on how to let down a hem was given by Lillian Wille. A delicious lunch was served by the hostess.

Bridge Club Meets

Mrs. Kenneth Medin entertained the Saturday Bridge Club at her home Saturday afternoon. Mrs. Sumner Trumbell won high score in bridge and Mrs. Ray Jorgenson, Jr. was second high. Mrs. A. H. Dulmes was a guest. The hostess served a nice lunch after the games.

Traffic News

KNOW YOUR TRAFFIC LAWS

The Iowa state Law of the Road provides that headlights of motor vehicles must be dimmed, depressed or tilted whenever a motorist meets another vehicle on the highway after dark. Lights should be dimmed at a distance of 500 feet from the approaching vehicle.

This law is necessary because of the fact that headlights which are bright enough to illuminate the highway satisfactorily are also bright enough to blind other motorists when cars meet on the highway. Therefore, a mechanism for dimming headlights is built into all standard motor vehicles.

Neglecting to dim headlights has caused many accidents, and many traffic deaths, in Iowa. One driver who struck down a pedestrian told enforcement officers that he didn't see the pedestrian because he was blinded by the bright lights of another vehicle. Meanwhile, the driver who failed to dim his lights drove on without even knowing he had caused the death of another.

The smart motorist will always dim his lights — even when other drivers fail to do so, whether through ignorance, discourtesy, or forgetfulness.

Klemme Fire Department Holds Monthly Meeting

The Klemme Fire Department held their monthly meeting on Friday evening with 11 members of the department present The minutes of the previous meeting were read by Marvin Lemke, Secretary, and approved by the fire chief, Martin Brinkman. The members discussed having a supper in the near future.

The Klemme Fire Department has made five fire runs in the past two months.

Little Girl Five Years Old

Roxanna Back, daughter of Mr. and Mrs. Lynford Back was five years old November 8th. And it happened that Mason City was having a Santa Claus parade just that day for Roxanna, so she invited all her little friends to come and go along with her to see the parade. The little tots were collected and Mrs. Lynford Back, Mrs. Carold Larson, Mrs. Kermit Schlei and Mrs. Verle Keraus drove and took them to see the nice parade. Then they all returned to the Lynford Back home where a nice birthday dinner was ready to be served. Roxanna received many nice gifts from her little friends. And the little tots hoped Roxanna could pick just such a day next year.

FESTIVITIES BEGIN WITH A CAFETERIA SUPPER AT 5:00 P. M.

Evening Will Be Crammed Wit Games, Stunts, And Fun For Everybondy

Bring your family. Come in early and have fun at the Klemme School Carnival.

First Touch Of Winter Felt In North Iowa

The first touch of winter was felt in North Iowa on Friday when light snow and freezing temperatures were recorded on Friday, November 7th. In west and northwest Iowa from 6 to 10 inches of snow fell and the highways were blocked by the large drifts. Snow fell again in this vicinity on Monday.

Demonstrated Mouse Traps

Mr. and Mrs. Ed. Thompson were in Des Moines Wednesday, Thursday and Friday of the past week demonstrating their Run-Way mouse traps at the Woolworth Store. They report that they had a very successful demonstration and sold hundred of mouse traps.

Applications For Hawkeye Soybeans Due At County F. B. Office By Nov. 20

The Hancock County Seed Distribution Committee must have the application blanks requesting Hawkeye Soybeans not later than November 20th. This is necessary in order for the committee to decide on the 12 names allotted to the coutny. These 12 names will be submitted to the State Committee for final selection. Every questionnaire should be filled out as completely as possible so the committee will be able to make a fair selection.

ANNIVERSARY OBSERVED—Mr. and Mrs. Will Johnson of Klemme, celebrated their golden wedding anniversary with a dinner at the Klemme Methodist church which was attended by relatives and close friends. Will Johnson and Sarah Elizabeth Terry were married October 30, 1897, at Verona, Ill. They have resided on a farm near Klemme since 1916 and are the parents of 3 children: Sylvan J., St. Paul, Minn.; Effie (Mrs. Leroy Blunt), and Clarice (Mrs. Raymond Rooks.) They have 6 grandchildren and 2 great grandchildren.

THE BIBLE TODAY

International Uniform Sunday School Lesson

By Louie D. Newton, D. D.

SCRIPTURE: II Peter; Jude; Luke 2:40-52.

DEVOTIONAL READING: Matthew 5:3-16.

Building Character

Lesson for November 16, 1947

WE SHALL need to read carefully Second Peter if we are to profit most in the study of Sunday's lesson. Peter tells us:

"According as his divine power hath given us all things that pertain unto life and godliness, through the knowledge of him that hath called us to glory and virtue."

Dr. Newton

We may partake of the divine nature, having escaped the corruption that is in the world through lust. That, I realize, is very difficult for us to understand, and yet it is within the grasp of every boy and girl, every man and woman, in all the world.

In addition to Second Peter, we are asked to read Jude and Luke 2:40-52. The passage in Luke tells how Jesus grew and waxed strong in spirit, filled with wisdom; and the grace of God was upon him.

* * *

As Jesus Grew

WE HEAR a great deal today about juvenile delinquency. The question everywhere arises, What can we do to prevent juvenile delinquency?

We have the answer in Sunday's lesson. As Jesus grew in wisdom and stature and in favor with God and man, so can every youth in America grow into strong and beautiful manhood and womanhood.

The parents of Jesus, we are told, obeyed God in doing for the Child all that they were commanded to do.

* * *

The Love of God

"KEEP yourselves in the love of God," Jude 21. There is the formula for building Christian character.

This business of building Christian character is based on a formula—keeping within the circle of God's love.

It is just as essential to have the proper nourishment in building Christian character as in growing a fine ear of corn. Progress is not accidental. It is the result of right thinking, right behavior, right purpose. Only in the love of God can the young life find the nurture for Christian character.

* * *

Christian Mathematics

TURN again, if you will, to Second Peter, and read his mathematical formula by which Christian character is realized:

"Add to your faith virtue, and to virtue knowledge, and to knowledge temperance, and to temperance patience, and to patience godliness, and to godliness brotherly kindness, and to brotherly kindness charity. For if these things be in you, and abound, they make you that ye shall neither be barren nor unfruitful in the knowledge of our Lord Jesus Christ."

Old-fashioned stuff, someone will cynically observe. Aye, old-fashioned it may seem, but only from this old-fashioned formula can character be built—Christian character.

And what is it that our needy, frightened world is asking for above everything else today? For the certitude of hope that is found only in hearts that are staid upon God.

We may smile at Peter's mathematics, but his formula is the only hope for United Nations, the only hope for world peace, the only hope for civilization.

* * *

Jude's Benediction

YOU have read, I hope, the brief Book of Jude, only 25 verses. You have followed his pungent, cogent argument. You have followed his exhortation. And now you come to his benediction—a very fitting climax for Sunday's lesson:

"Now unto him that is able to keep you from falling, and to present you faultless before the presence of his glory with exceeding joy, to the only wise God our Saviour, be glory and majesty, dominion and power, both now and evermore. Amen."

As you sit in your living room, or on the train, or in the plane, or in the hotel, or at the hospital, or wherever you may be, reading these lines, remember this—the need of America today is more Christian character in the home, factory, store, bank, mill, field, school room, in the meeting house.

God grant that we may heed the admonition of the Scripture passages above cited, and think on our ways while it is yet day. The night cometh apace.

* * *

Put the Pinex into a pint bo and fill up with your syrup. Thus make a full pint of splendid c syrup, and you get about four t as much for your money. It spoils. Children love its pleasant

And for quick relief, it's a wo It loosens the phlegm, soothes the tated membranes, eases the sore makes breathing easy, and lets get restful sleep. Just try it, and pleased, your money will be refu

YOU, TOO, CAN BE AN EXPERT

TRY THIS NEW RED STAR HOLIDAY RECIPE

THANKSGIVING SWEET ROLLS

2 teaspoons sugar
½ cup warm water
2 packages Red Star Dry Yeast
½ cup sugar
2 teaspoons salt
1 cup lukewarm water
2 eggs, beaten
5½ cups sifted flour (approximately)
½ cup shortening

Dissolve 2 teaspoons sugar in ½ cup water. Add 2 packages Red Star Dry Yeast. Let stand 10 minutes. Place ½ cup sugar, salt and 1 cup lukewarm water in a large bowl. Stir yeast solution thoroughly and add to this mixture. Add beaten eggs and half the flour, mixing well. Add melted and cooled shortening, stirring vigorously. Add remainder of flour and mix well. Place dough on lightly floured board and knead for 3 minutes. Shape into smooth ball and place in greased bowl. Brush top lightly with shortening. Cover and let rise in warm place for 45 minutes. Punch dough down and shape into crescents, or braids. Place on greased baking sheet and let rise in warm place for 45 minutes. Bake in moderate oven (375° F.) 20 minutes. Makes 3 dozen rolls.

...re was a hoarse murmur from ...crowd in the opposite stands, ...saw the Aggies sprinting out ...field. They'd changed to dry ...ms and it took Jerry a mo... ...to spot the two new men in the ...backfield. Tall men, and fast.

...raday sat next to him. He ... "We're wearing them down. ...se subs in there?"

...!" Jerry said. "They're ... deep in backs. They're play... ...e, that's all."

...." Farraday nodded. "Try... ...protect their lousy six points. ...Big Dan said."

...y remembered the coach's ... in the dressing room. Big ...nowski didn't go in for pep. ...But there hadn't been a sound ...his calm voice, and a drip... ...ower.

...right," the coach had said. ...w it's wet, and bad footing, ...e can't pass much with that. ...But they've shot their bolt. You see what they're doing. Kicking early. Keeping us away. They've got a touchdown and we haven't. Get it back. Get the six points and I'll send Jerry out there. That's all we need." And he had turned to Jerry and smiled.

Jerry bit his lip. Even Dan didn't realize that you couldn't kick them all. Sooner or later he was bound to miss. And this was the last game.

"Here we go," muttered Farraday.

The Aggies kicked off. Taggert, the Tech quarterback, took it on his five, and brought it back twelve yards. The Aggie tackler barely

Jerry froze, grew rigid; gave a gasping sob. "Kick! Kick!" Taggert screamed.

brushed him, but it was enough to send him sliding in the mud.

Tech tried three plays and then punted.

The game settled into a punter's battle. Taggert had the wind at his back and counted on picking up distance on each exchange. But the Aggie kicker was good, too.

Jerry couldn't keep from watching the clock on the scoreboard. The big second hand jerked around, stopped, moved again. Jerry found himself nodding as the hand jerked. He was cold inside; a chill that had nothing to do with the wind and rain. Every minute passing made the odds against him greater.

The quarter ended; the teams changed goals. Now, he'd have the wind fighting him when he tried to kick. His luck was out all right.

"Hey!" cried Farraday, startled. "Hey!"

Jerry snapped awake. A fumble. There was a wild, awkward scramble for the ball. An Aggie, stumbling in the mud, dropped on it. The ball popped from beneath him, bounded toward the sideline. Taggert dove, gathered it in. He slid all the way to the Tech bench, and got up.

Farraday swore in sympathy. He said: "Murder! That ball's slippery!"

"Tough to handle," agreed Jerry.

"You needn't worry," said Farraday, chuckling. "They even hold it for you. All you got to do is kick it."

Jerry glared. Everybody figured it was easy because he only played a few minutes each game. He never even got in a practice scrimmage; too light, might get hurt. All he had to do was kick it, and he hadn't slept in a week thinking about it.

Tech started to drive. Taggert sent his plays into the line. He was snarling the signals, snapping his backs at the Aggie defense like a whip. Through tackle, guard, the other tackle. Then, back along the line. Five yards, three, four. A first down. Another.

Tech kept marching.

"Yow!" shouted Farraday. Big Dan leaped into the air. On the Tech bench only Jerry was silent, his eyes shifting from the clock to the field. He sat on his hands to hide their trembling.

Tech stuck to power plays. They bulled through for three yards, two The Aggie backs were playing close, backing up the line. The next play bounced off the Aggie wall. No gain.

Taggert suddenly faded back, passed. It was out in the flat and risky. The Tech half juggled the ball, but he held it. He went all the way to the seven yard line before the Aggies caught him.

Taggert opened up. He called a spinner, a reverse, a delayed buck. The referee's arms went up. Touchdown.

Farraday pulled the blanket off Jerry. He said: "Get going."

Jerry saw Big Dan beckon. "There's the ball game," he said, smiling. "Make it legal, Jerry."

Jerry swallowed. He opened his mouth, and then shut it tight. He nodded and trotted out onto the field. His legs moved him stiffly toward the referee. He heard his voice, thin and strained. "Ellis for Melkovich. At full." He walked woodenly into position and stared up at the cross-bar. It was a dim line in the gloom.

Taggert was drying the ball with a towel. He wiped his hands and knelt at Jerry's feet, Taggert grinned and said: "In the bag, kid I'll put my hand under it. The mud's like grease."

Jerry stood rigid. His forehead was clammy.

"Steady in there," called Taggert. "Keep them off him. Steady." His head turned as he glanced along the line. "Ready, kid?" Taggert's voice sharpened. "Signals!" he raised his hands.

Something clicked in Jerry's head. This is it, he thought.

"Seven, nine, eleven——"

At worst it was a tie. But a tie spoiled the season's record. He couldn't make it.

"Three, five——"

He'd done it too many times. A miss was overdue. He was going to miss.

"Two!"

The ball moved, grew large. It came back straight. Taggert caught it, placed it in position. Jerry took a step. He froze.

"Kick!" Taggert screamed, wild-eyed.

Jerry gave a gasping sob. He stooped, snatched the ball from Taggert's fingers, and ran.

He nearly hit the Aggie end, charging in. The end tried to stop himself, slipped, went down. His mouth was still open in amazement as Jerry dodged past.

He raced for the corner of the end zone. He could hear Taggert pounding along behind him, shouting in a high, excited voice, but nobody came near him. As he crossed the line, Jerry looked back. The Aggies were standing motionless, bewildered.

Jerry touched the ball down. He started to laugh. He looked up at the scoreboard and saw the 7 move into place.

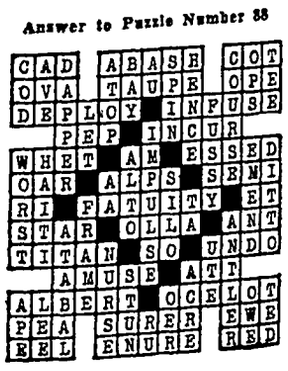
Answer to Puzzle Number 88



Series H-47

Sportlight

By GRANTLAND RICE

JACK KRAMER, the tennis star, was talking about the difference between golf and tennis. We had just asked him if there was any chance that he would follow in Ellsworth Vines' path and later take up golf for a living.

"Not the slightest chance ever," the astute Kramer said. "It may be tough to make a living out of tennis. But it's far tougher in golf. For example, in a tennis match if you can beat an opponent in straight sets or in three sets out of four, you usually can keep on beating him. Not always — but usually. It's nothing like that in golf. You can beat a star one day and next day some unknown will knock your brains out.

J. Kramer

"In tennis we knew pretty well who should reach the semi-finals and the final round at Forest Hills. We figured at least that most of the leaders would be hanging around. But at Pebble Beach they were scattering the dust of beaten stars all along the Pacific. Just about the time this golf championship really got under way, Frank Stranahan was out, Bud Ward was out, Smiley Quick was out, Ted Bishop, defending champion, was out — most of those picked to win were packing their clubs and heading somewhere else. Fellows who had lost in the first round at Baltusrol, a year ago, now were decorating their wigwams with scalps of leading stars."

"Tennis also has its upsets," I suggested.

Upsets Are the Rule

"I know that," Kramer said. "But only here and there. Only occasionally. Golf is nothing but one upset after another. Look at the last P. G. A. tournament. Most of the star golfers were out by the second round.

"I like golf as a game, but not as a way of making a living. It's too tough. Billie Vines has played a long number of brilliant rounds. But he rarely wins a big money tournament. And Vines has practiced thousands of hours at golf."

"Don't forget," I put in, "that tennis is played over a few square yards of space. A round of golf covers over five miles and some 150 acres. A tennis court is perfectly massaged. A golf course is full of trees, bunkers, traps, matted rough, ponds, lakes, maybe part of an ocean, hills, ravines, bushes and jungle. Irv Cobb told me once that he got so deep into the woods on some western course that he was attacked by two pumas. Also, there are few cuppy lies in tennis. No bunker heel prints in the sand."

"That may have something to do with it," Kramer said. "All I know is that I don't want any part of pro golf—even if I was 15 strokes better than my 85."

There is another angle that Kramer might have figured on.

The tension in golf is about four times the tension in tennis—or any other sport. There is only one cure or relief for tension that every other sport carries. This is action—movement. Golf has no such relief.

Too Tough for Many

It is much easier to keep your eye on a fast-moving baseball or a fast-moving tennis ball than it is to keep a fixed orb on a small, white ball that doesn't even flinch until you hit it or move it. Any football player will tell that his tightest tension is just before the first kickoff. After one or two body collisions this tension is gone. Nothing like that happens in golf.

Golf demands greater mental control than any other game. By mental control we don't mean cultural intelligence, which has nothing to do with sport.

Psychology always plays a far bigger part in golf than in any other game. In almost every other game you are playing against some opponent. In golf you are playing almost entirely by yourself. No one can interfere physically with anything you do. You can only beat yourself. Your main opponent is yourself—not the other fellow.

Golf demands no speed, no brawn, no quick mental reflexes under fire. There are no split seconds of mental action in golf as there are in baseball, football, tennis, polo and all games of physical action.

Knute Rockne, who played most games well, gave up golf. "It's too tough for me," Knute said.

Fred Stone was one of the greatest natural athletes I ever saw—acrobat, boxer, a star performer in most sports. "Fred learned how to ski in two hours," Rex Beach told me once—yet Stone tried and quit golf. It was a different game.

And those who have played other games so well hate to be duffers and dubs in a game that looks so easy and simple.

Sammy Byrd and Ellsworth Vines are the only two men I know who have starred at other games—baseball and tennis—plus golf. Byrd was a better golfer than he was a ball player, but he turned first to baseball.

Homes on Wheels

A total of 300,000 automobile trailers are now in use, either rolling over the nation's highways or parked in trailer camps, says the Automobile Manufacturers association. Many trailers are painted on the outside with aluminum paint to reflect heat in hot, sunny climates and on the inside in attractive color schemes to make them homelike.

Household Hints

—•—

An easy way to do scouring is to use a cork dipped in scouring powder.

—•—

A monkey wrench can be used as a lever for bending the various kinds of soft metal.

—•—

A furnace that does not do the job adequately often can be "coaxed" along merely by permitting a little air to get into the basement. Leave a window open. Furnace men will tell you that a poor air mixture often is responsible for incomplete combustion.

—•—

To make a ladder safe on soft ground nail a board across the ends of the legs to keep it from sinking into the earth.

—•—

The roof is the thing that can cause you untold grief. A leak can spoil your plaster, wallpaper and floors. If your attic is unfinished you can on a bright day spot roof leaks merely by darkening the room and looking for a needle of light.

—•—

Give your white blouse a bright and light touch by wearing one of the small chiffon scarfs tied in a bow at the neck. They are obtainable in kelly green, lemon yellow, crimson and many other lovely colors.

—•—

A novel effect can be achieved by framing small or medium size pictures in fabric instead of paper. A striking example: a pair of water colors noticed recently had mats of French blue velvet; the colors in the pictures were dusty rose and a dash of rich emerald green—frames, gold leaf. Effect: elegant and original.

Ostriches Kick Forward

An ostrich can kick hard enough to break a man's leg—or even kill him if the blow should catch right. Since ostriches can only kick forward, not backward, ostrich keepers always come up on the birds from behind.

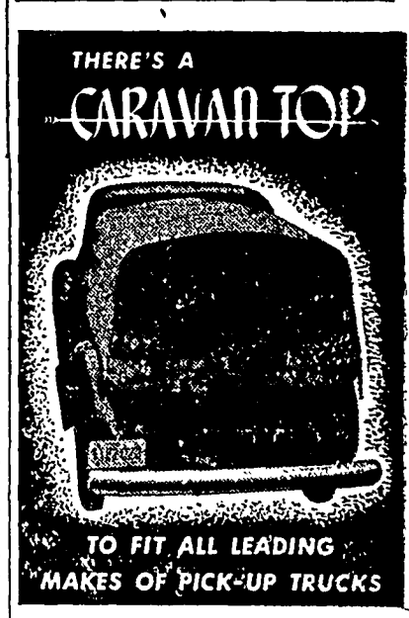
St. Joseph ASPIRIN 12 TABLETS STILL ONLY 10

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

THERE'S A CARAVAN TOP



TO FIT ALL LEADING MAKES OF PICK-UP TRUCKS

You can get a Caravan Top to fit your make and model of pick-up truck . . . in 4, 5 or 6 ft clearance to suit your specific need.

The waterproof, mildew resistant, heavy duck cover fits trim and neat over a sturdy aluminum frame conforming to the streamlined contour of your truck. On or off in a jiffy. Slide fastener opening each side of back curtain.

3 heights for every length. Avoid cut... from your automo... dealer or write direct

On motion and second the bond of Milton Evanson for the sale of cigarettes is approved.

On motion and seconded the board adjourned to November 3rd A. D., 1947 at 9 o'clock A. M.

ATTEST

FRED C. MISSAL,
County Auditor
JOHN CHAMBERS,
Chairman

IN THE DISTRICT COURT OF IOWA IN AND FOR HANCOCK COUNTY

IN THE MATTER OF THE GUARDIANSHIP OF JOHN JOSTEN, AN AGED PERSON, IN PROBATE NO. 3063 NOTICE·

TO WHOM IT MAY CONCERN·

Pursuant to an Order of the District Court of Hancock County, Iowa entered on October 2, 1947, the undersigned guardian will sell at public auction at the premises as hereinafter described, the following described real property situated in Hancock County, Iowa, to-wit·

The undivided 1-6 interest of John Josten in Lot Four (4), Block Fourteen (14), Original Town of Klemme, Iowa

The sale of the other undivided 5-6 interest in said property will be made at the same time. The sale of said real property is to be held at 2 00 P. M. on November 22, 1947 This property is to be sold for cash with $1,000.00 paid on the day of sale, of which 1-6 is attributable to this guardianship, and the balance of the purchase price shall be paid on December 15, 1947 or as soon thereafter as merchantable title can be furnished. Possession of the above described real property is to be given immediately upon sale thereof and conveyance to be made of the undivided 1-6 interest of John Josten by guardian's Deed duly approved by the Court, said property to be sold free and clear of encumbrance, with the taxes for the year 1946 payable in 1947 and all prior taxes paid, and an abstract will be furnished showing merchantable title.

The guardian reserves the right to regect any and all bids.

Dated this 22nd day of October, A. D., 1947.

Earl E. Josten, Guardian of the property of John Josten, an aged person

By B. C. BERGE, His Attorney

...fourth grade are enjoy... stories in their reader ...early pioneers. They all ...t they would have en... the trip in a house boat.

We learned a new song "My Little Papoose" which we like very much. We also sang Thanksgiving songs this week.

The third grade have learned how to borrow in subtraction.

Fourth Grade Geography class have been studying about Switzerland.

We had five in fourth grade who had all of their spelling words right on Friday and 3 in third grade.

SEVENTH AND EIGHTH GRADE NEWS

—By Delores Thiemann

Lois Lowenberg from Goodell visited our room Thursday.

Last Friday in Art we made pictures to represent books as it was Book Week.

In Penmanship we made the muscular movements to fill out a turkey.

In Arithmetic the seventh graders have been studying decimals.

The Eighth Grade Science Club met Friday, November 7 in their room.

Thursday the eighth grade made pictures of friendly and harmful insects.

Thursday morning we saw some skits from the Junior class play

Beverly Sobek returned to school Thursday after an absence of several days.

FRESHMAN NEWS

Reported by Deloris Karsjens and Beverly Pringnitz.

Another busy week has passed by and we still are enjoying it as much as ever. Of course there are some unenjoyable time, as when we had an Algebra, Science and English test.

In Science we have been having frequent debates of undecided scientific problems.

We have been studying Breakfast Menus in Home Economics this past week Almost every other day we had a laboratory in the kitchen. We have also kept a list of how many calories we have eaten in one day. Most of us have been surprised at the amount we eat daily.

In Algebra class we are still studying positive and negative numbers.

The Manual Training boys have been making small objects from wood.

The school house suffered only slight damage on Friday night, Hallowe'en, for many of the boys and girls were at a party at the Methodist Church. We all had a wonderful time.

SOPHOMORE CLASS NEWS

—By Gloria Haefner

This week in Literature the most interesting story the class studied was "The Man Without A Country" by Edward Everett Hale. It expressed the feelings of a man who had condemned his country and was sentenced never to hear her name again. I think reading it made us all appreciate our country more.

We have nearly finished the unit on straight line figures in Geometry. Here's hoping the the next unit isn't any harder.

In Home Economics we girls, before beginning actual baking and cooking, are studying the foods and their values. We spent considerable time this week studying the vitamins.

The boys in manual Training have learned how to plane and are going to start wood working.

In Biology we are studying the different phylum or groups of animals. We spent a period on examining clams, starfish, and worms. The boys discovered that girls aren't much afraid of worms.

We are all anxious to see our basket ball team in action. However, we will not have much longer to wait as next Friday evening is the time for the opening game of the season.

MUST HAVE SEED TESTED BEFORE SELLING

Agricultural seed to be sold legally in Iowa must be tested for purity and germination at a reliable seed testing laboratory before it is sold, county extension director Paul Henderson remided farmers seed growrs and dealers this week.

He urged that samples be sent to the Iowa State College laboratory now to avoid the seed testing rush later on. It takes at least two to three weeks to complete a purity and germination test, and may take longer later as more samples are sent in Farmers planning a farm sale should figure far enough ahead to assure getting results in time.

Seed sent in now will be back in time for the large Dec. market. Too, getting the seed tested well ahead of seeding time will give enough time to purchase other seed if tests of the present seed show up bad. Also, if the farmer suspects that seed he has bought is not correctly labeled or doesn't have a label, he needs a reliable test in time to take court action.

Anyone offering seed for sale without a label automatically exposes himself to court action according to seed law provisions. Action can be brought by either dissatisfied customers or state inspectors. All seed, including that sold at farm sales, from one farmer to another and by seed companies, is subject to the seed law.

It is also illegal to sell seed in Iowa if it contains more than three percent total weed seeds. Seed cannot be sold which contains any primary noxious weed seeds. Germination tests must have been made within the last nine months previous to sale.

FARM PROGRAM IS CONSERVATION INVESTMENT

Through the Agricultural Conservation program, the nation is investing in food and fiber security, believes, Alfred V. Josten, chairman of the Hancock county AAA committee. The conservation practices that farmers are carrying out under the program are not anly increasing production to meet present needs, but they are cutting down erosion and stimulating better farming practices which will help insure continuel abundant production.

The direct payments made to farmers and the materials and services furnished under the program, Mr. Josten said, are just as much public investments in conservation as are public expenditures for education and for technical assistance to farmers. They are just a more direct way of getting the conservation job done. The assistance to farmers under the ACP is helping to make educational work and other demonstrations effective.

COLD WEATHER

Iowans think it has been a balmy fall but not a visitor from New Orlens, who stopped in a Leon clothing store recently to buy some "warm" clothes. He purchased a sweater to wear under his suit and also a pair of long wool underwear. The temperature at Leon was 44 degrees.

RECIPES SUGGESTED FOR YOUR MEAT-SAVING FILE

Here are some main dish recipes from Jewel Graham, Iowa State College nutritionist, to help feed the family and at the same time save meat.

Potato Pancacks

3 eggs. 1 t. salt, 1 T. sugar, 3 c. milk. 2½ c. sifted flour, 1 T. melted fat, 3 c. grated raw potatoes.

Beat egg yolks; add salt, sugar, milk. Add flour, fat; beat. Stir in potatoes; fold in stiffly beaten whites. Bake on greased hot griddle. e

Hamburger Dinner

1 lb. ground beef, 1 egg, ½ c. bread crumbs. ¼ c. minced onion, ½ t. salt, ¼ t. peper, 2 T. hot fat, 4 to 6 medium carrots, 5 to 6 potatoes, ½ c. water.

Combine beef, egg crumbs, onions, seasonings. Form into patties; brown on each side in pressure saucepan; place potatoes and carrots on top. Add water; cook at 15 pounds for 8 minutes. Reduce pressure to zero quickly.

Corn and Cheese Souffle

¼ c butter ¼ c. flour, 1 c. milk, 1 c. grated cheese, 2 c. cream style corn, 1 t. salt, dash of paprika, 4 eggs.

Make white sauce of butter, flour, milk; add cheese, stirring until melted; add corn seasonings; remove from heat. Gradually stir in well-beaten yolks; fold in stiffly beaten whites. Turn into buttered baking dish; set in pan of hot water; bake at 350 degrees F. for 50 to 60 minutes.

Frankfurter Casserole

8 frankfurters, 1 medium onion, ¼ c. butter, 1-3 c. flour, 3 c tomatoes, 3 c. diced, cooked carrots, 3 T. ketchup, salt and pepper.

Saute minced onion; add flour; stir in tomatoes and cook until thick. Add carrots, ketchup, seasoning. Slice frankfurters across and mix in. Bake at 350 degrees F. for ½ hour.

Fish Potato Puff

2 c. flaked fish, 2 c. mashed potatoes. 1 t. salt, 1 T. lemon juice, 2 T. each chopped celery and parsley, 1 T. each minced green pepper and onion, 2 T. butter, 3 eggs, pepper.

Combine fish, potatoes, salt, peper, lemon juice. Saute and add celery, parsley, green pepper, onions. Add beaten egg yolks, beat until light; fold in beaten whites; pile in baking dish greased only on bottom. Bake at 350 degrees for ½ hour.

Fifty-Fifty Class Will Hold Meeting On Nov. 16th

The Fifty-Fifty class of the Methodist Church will hold a Pot Luck Dinner on Sunday, November 16th, at noon in the church dining room. All members and their families are urged to attend. A good program is planned and business meeting after dinner. Please come.

A Fenton duck hunter had a very disappointing experience recently. He crawled almost half a mile through mud and undergrowth to get a shot at some wild geese, only to find he was stalking some decoys set up by four Algona hunters.

Thirty-nine percent of all the farms in the United States do not have electricity.

Laying hens don't thrive in damp, cold buildings.

From where I sit ... *by* Joe Marsh

Prissy's Got a Man! (Maybe)

Yesterday Sis Martin, our librarian, found an article cut from their file copy of the *Clarion*. When she compared it with another copy that I gave her she found it was my column on "How to Keep a Husband Happy"

Nothing unusual about that. Except the last person seen reading the paper was Prissy Hoskins (our town's proverbial Old Maid)!

Well, if Prissy has finally got a man, more power to her. And more tolerance to both of them . . . because that's what my column was about: **Tolerance of a husband's taste for old hats, old pipes, old friends, and mellow beer. And tolerance on the husband's part of a wife's tastes and habits.**

From where I sit, nobody begrudges Prissy taking that clipping from the *Clarion*. But I'd like to hint that if she'd just *subscribe*, she'd get my thoughts on tolerance firsthand. And in return I'll treat her to a glass of beer.

NEW PALEFACE HUNTING GROUNDS . . . In the exotic tropical setting of Key Biscayne, once an Indian hunting and fishing ground, pleasure-bent palefaces now find easy hunting in their quest for rest, relaxation and recreation.

STEEPED IN HISTORY

Old Indian Stomping Ground Becomes New Vacation Gem

WNU Features.

MIAMI, FLA. — Where centuries ago Tequesta Indians fished and hunted, palefaces today seek sun tans 'midst the luxury of loafing under coconut palm trees on a tropic isle of idyllic contentment. This newest Gulf Streamland vacation gem is provided in Dade county's new 11 million dollar Crandon park, on Key Biscayne, a scant 10-minute drive from downtown Miami via the equally new six million dollar Rickenbacker causeway.

Both park and four-mile span from the Miami mainland to the ocean, via Virginia Key and Key Biscayne, will be formally opened November 9, 10 and 11 with the Tequesta festival. The celebration is named for the Tequesta Indians, who were the first known residents of the area now called Miami.

The out-of-this-world setting of this naturally exotic public playground, studded with more than 10,000 coconut palm trees, part of a once extensive copra plantation, stretches volumes into the past. Its two-mile expanse of reef-protected ocean bathing beach for centuries heard only the lush swish of palm fronds and surf, or the scream of sea birds.

Ponce de Leon, first tourist to discover the extra something south Florida offers in climate and sunshine, is believed to have stopped off at Key Biscayne in 1513, after a brief halt at the mouth of St. John's river at present Jacksonville. History shows that after exploring that area, he sailed southward along the Florida east coast, tarrying at St. Augustine, then continuing to an island he named Santa Marta.

South Florida authorities, after an extensive study of coast surveys along the Dade county coast are inclined to believe the Santa Marta discovered by Ponce de Leon was named Cayo Biscaino, or Key Biscayne, now site of the new park.

Just 400 years ago, Key Biscayne figured prominently when the Spanish explorer, Escalante de Fontenada, recorded the presence there of the Tequesta Indian tribe.

Fontenada was the lone surviving crew member of a galleon wrecked off Key Biscayne. Captured by the Tequestas, part of the Colusa federation, he was held in slavery for many years, but was allowed to roam, at will, within the territory ruled over by the Tequestas. Long a disciple of Ponce de Leon, he transversed the length and width of Key Biscayne, time and again, in an attempt to emulate his predecessor's quest for health and everlasting youth.

There's no known record, complete with skull and cross bones, of buried treasure on romantic Key Biscayne, although pieces of eight or pirate doubloons may be hidden beneath the golden sands where cover girls and their bronzed escorts today absorb their vitamins from the sky. Regardless of the mystery (or lack) of buried treasure, there's pleasure trove for all lucky lollers on the two million square feet of super bathing beach at Crandon park.

Black Caesar, notorious marauder of the Florida Keys, operated in this vicinity. This doughty highwayman of the waves frequently hid his plunder ship behind wooded isles such as Key Biscayne to stalk unwary merchantmen en route to Havana, Spain's Queen City of the Antilles. Perhaps some of Black Caesar's ill-gained loot now moulders near the southern end of the island!

Another linking of Key Biscayne to the "Florida that was" is the old Cape Florida lighthouse. A landmark in the keys, this lofty hurricane defier was built in 1826. Unfriendly, marauding Indians set fire to the structure in the same century, killed one Negro slave, wounded the white lighthouse keeper. The tower, for many years erroneously known as "Old Spanish Light," was abandoned in 1876, but it still stands, a monument to the past — a 20th century beacon to modern counterparts of Ponce de Leon.

Yes, Key Biscayne, site of Crandon park, is truly an island packed with pleasure trove — a recreational treasure chest, laden with rich prizes of nature for Dade county residents and their visitors.

Nation in Bloom As Flower Week Observance Set

The entire nation is "in bloom" this week for the third annual observance of National Flower Week. Sponsored by the Society of American Florists, National Flower Week is planned as a tribute to the beauty and happiness brought into everyday lives by flowers. Throughout the week unusual facts and information on flowers will be disseminated to the public.

Because of the abundance of flowers during the early part of November, the entire nation will be converted into a fall flower festival. Florist shops and greenhouses will hold open houses, featuring special displays of flowers and plants.

Typical of the marked strides made in floriculture are development of double varieties of many flowers and cross-pollination. Continuous research is being accomplished in all phases of floriculture. In the scientific field, hydroponics, a system whereby flowers are grown in chemical solutions without soil, required 75 years of study and experimentation.

Keeping the industry attuned with the times, shipments by air, telegraph deliveries and new methods of packaging and preserving flowers have been developed as means of prolonging the public's pleasure from flowers.

Woman of 101 Likes Long, Fast Car Ride

HUTCHINSON, KANS.—Mrs. Jennie Gilmore, who celebrated her 101st birthday anniversary this fall, likes nothing better than a "long, fast car ride."

Returning from a 3,500-mile auto jaunt to California, Mrs. Gilmore said: "I had a delightful time. In fact, I enjoyed every minute of it except when we had to slow down at times."

Chester Hedges, 54, her grandson, who drove, said Mrs. Gilmore complained only when he dropped the speed down to 40 or 50 miles an hour on long stretches of desert road. She prefers to travel around 70, he added.

Miniature Fleet Contains Famous Ships

NEW YORK. — A boyhood hobby has enabled August Crabtree to accumulate an entire fleet of ships, all miniatures carved to scale and equipped to the most minute detail.

Built by Crabtree over the last 20 years, the collection of 14 ships includes an Egyptian galley of 1500 B. C., a Roman ship that once plied the Mediterranean, a sailing ship of William the Conqueror's time, Columbus' flagship, the Santa Maria, and the British Britannica of 1840.

Crabtree started as a boy in Portland, Ore., making models of ships that sailed the Columbia river. Living on a small private income, he continued to carve on his collection although friends "thought it was a crazy idea."

During the war Crabtree put aside his hobby to lay the body plan for the first Liberty ship and a landing craft at a Vancouver shipyard.

Political 'Pros' Will Oppose Stassen

Former Minnesota Governor Is Playing Lone Wolf Role

By BAUKHAGE
News Analyst and Commentator.

(This is the third of a series on the men most talked about as candidates for the Republican presidential nomination).

WASHINGTON.—When the bakers were down in Washington sweating out a grain conservation program for their industry, my friend from Minnesota, Harry W. Zinsmaster, who is what the personal column calls a "frequent visitor" in the capital, gave a little luncheon for his colleagues and some press and radio men.

We had finished eating and were gathered around to listen to the bakers' troubles when suddenly the door opened and 220 pounds of blond, smiling, political potentiality burst upon us.

Our host shouted a happy "Hello, Harold!" then turned and announced: "Gentlemen, the next President of the United States."

I daresay most Minnesota Republicans will say "aye" to that. What the rest of the country says is awaited with interest by the candidate.

I suppose I have had 50 people ask me about Harold Stassen. "Why hasn't Stassen a chance?" they query.

Most observers seem to agree that if he has a chance, it's a pretty slim one to date. The reason is always the same: The professional politicians don't want him.

Baukhage

Not because he's a political "unknown." He could hardly be called that. Sure he took the job of county chairman at the age of 21. He was elected governor of Minnesota three times, could have been senator from that state, had he wanted the job.

In his case, it's not so much that he's a newcomer as it is the way he came up. That way is characteristic of his whole campaign, and two words describe it: "Lone wolf."

The situation favored Stassen when he forced his way into the gubernatorial race in 1938. Minnesota was in a bad way. There was vandalism and corruption, and the Farmer-Labor party, which had held a stiff grip on the state, was disintegrating through its own weakness and graft. Stassen entered the race against the wishes of the Republican Old Guard, but he eventually forced them to help him to some degree. It was largely his own efforts, however, that elected him.

In other words, "he butted into the governorship," according to old guard critics. Others say he did it merely as a step to the presidency, and that it was part of his overweening ambition—the same thing they say about Governor Dewey of New York. But the old guard fears Stassen's type of ambition more than Dewey's. They fear it because they feel that should Stassen become president, he might build up a strong personal following and thus get a stranglehold on the Republican party.

Conventional candidates don't commit themselves too heavily. His supporters claim that Stassen is a middle-of-the-roader, a little to the left. But it is not too much his liber-

HAROLD STASSEN
Does he have a chance?

ality to which the politicians object. I doubt if any practical politician expects us to turn back the clock. But in his highly unorthodox campaigning, Stassen has violated two rules.

One, by announcing himself early in the present campaign. Today he is the only official candidate for the presidential nomination.

Two, he has made and he repeats sharp criticism of the Republican program.

As Roscoe Drummond of the Christian Science Monitor puts it, "If they pick him to ride the elephant, they'll have to get a new elephant." Certainly, Stassen has hinted this was necessary when he said the Republican program must be more constructive, more dynamic. He doesn't consult with anybody else when he announces how to make it so. That's part of the lone-wolf complex.

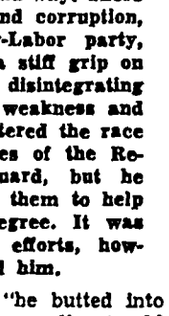
He comes up from the soil with a dirt-farmer father. He worked his way through college. He has a good military record as deputy chief of staff to Admiral Halsey. He is younger than Dewey (Stassen is 39), and taller than Taft—a sandy-haired, slow-spoken and deliberate six-footer.

★ ★ ★ ★

Vandenberg Won't Fight

Early this year, according to credible authority, a secret poll was taken by Republican senators as to their informal, off-the-record preference for a presidential candidate. Sen. Arthur Hendrick Vandenberg of Michigan won it.

In the same month, the senator made a statement in a national magazine in which he said he thought it was easier to run for president than not to run. He explained how difficult it was to deny that one is a candidate, once the story got started. He mentioned the question of the "draft" and expressed an opinion similar to that of Roy Roberts of the Kansas City Star in connection with Gen. Dwight Eisenhower—namely, that there had never been a real "draft" in his day. Vandenberg said that, of course, no man would refuse the nomination if it were handed to him as an accomplished fact.



Vandenberg

He concluded his remarks with this statement: "I am not a candidate. I do not expect or wish to be a candidate. I shall seek no convention delegates or approve of others in this behalf. I think my place of service is filling out my tenure in the senate."

Few men's stature has increased as Vandenberg's has as a result of his participation in international affairs. I think it is fair to say that Vandenberg not only made non-partisan foreign policy possible, but that his efforts in carrying out the non-partisan principle made a unified foreign policy itself possible.

A part of Vandenberg's influence in the field of foreign affairs is due to the fact that he has the enthusiasm of a convert. He was once frankly an isolationist. Today he has converted many others, and I believe that no single man has done more than he to break down the provincial attitude, especially in the Middlewest, which before World War II prevented America from taking leadership in world affairs—leadership which might have postponed, if not entirely prevented, the war.

I do not believe that he is actually eliminated from the nomination, but we can be certain he will not fight for the job. He had the high vote at the Republican convention of 1940 when the Willkie blitz struck.

Vandenberg's support of bi-partisan policy doesn't mean that he gives a blank check to the administration. He favors the Marshall plan and aid to Greece and Turkey, but he refused to recognize that aid as the "Truman Doctrine," insisting it was not a doctrine at all.

NOT FOR SISSIES . . . There was plenty of raw action during the girls' field hockey game between Bryn Mawr and Drexel Institute of Technology. Like when Doris Tarqinnio (left) of Drexel slugged a hard one in an attempt to score a goal and the Bryn Mawr goalie stopped it.

NEWS REVIEW

Congress Will Convene; No Russia: Chile, Brazil

TRUMAN CALLS *Congress to Meet*

Congress, summoned by President Truman, will convene in special session at noon, November 17, to deal with:

1. "The alarming and continuing" high prices at home and,
2. The pressing need for rapid-fire emergency need abroad.

President Truman's summoning of congress a month and a half before it normally would have reconvened marked a definite climax in U. S. domestic events for 1947. Although doubt existed for a long time as to whether a special session would be called to meet the two problems which have been screaming with urgency all year, it was the only really logical step to take.

Mr. Truman took it decisively. He conferred with his cabinet, and he conferred with key congressional leaders of both parties. He did not ask their advice on a special session; he informed them simply that he was calling one.

"It is urgently necessary," he said, "for the congress to take legislative action designed to put an end to the continued rise in prices . . . and to meet the crisis in Western Europe!"

Concerning prices, the President would not ask for consumer controls, but for authority for allocation of certain materials. European relief, scheduled to be given priority over the price muddle in congressional action, was highlighted by the growing desperation in France and Italy.

DENIAL: *No Force*

James F. Byrnes, said James F. Byrnes somewhat angrily, was and is a patient man. Moreover, he did not advocate in his recently published memoirs, "Frankly Speaking," that force should be used, if necessary, to drive the Russians out of Germany.

The former U. S. secretary of state made that rebuttal after widely printed reviews of his book had stated that he was urging the building of more and bigger atomic bombs and the use of force against the recalcitrant Red army.

He reiterated his belief that the U. S., Great Britain and France should proceed with a general German peace conference, regardless of the Soviet Union's attitude. If the Russians refused to sign the treaty, then the other nations should appeal to the security council of the U. N. to order the Russians out because, Byrnes said, "we will then be facing a situation likely to endanger the peace."

He Ate Nails—and Stuff

When surgeons operated on James S. Payne, inmate of Kansas state prison, to remove a nail from his throat, they discovered that the man was virtually a perambulating junk shop.

Three and a half pounds of metal, including two complete safety razors without blades, was the loot the doctors recovered from Payne's case-hardened stomach. The convict, serving an arson term, gave no reason for his metallic diet.

THE BREAKS

Chile, Brazil Kiss Russia Good-By

Acting almost simultaneously, two South American nations—Brazil and Chile—curtly announced severance of diplomatic relations with Russia because, as they both implied, they couldn't stand it any longer.

Brazil, which beat Chile to the gun by a few hours in breaking relations, had the less valid reason for its action, on the surface, at least. Stated reason for the move was given as the "extremely outrageous and even calumnious" articles in the Russian press attacking Pres. Enrico Gaspar Dutra and the Brazilian army.

Russia's Literary Gazette had called Dutra an incompetent soldier and a Fascist. It was the same magazine that had compared President Truman with Hitler, to which the U S. strongly objected but took no further action.

Chile, however, had a more deep-seated grievance. Communist infiltration in the nation's southern coal zone, leading to recent labor difficulties there, undoubtedly spurred the decision to sever relations.

Chilean Pres. Gabriel Gonzalez Videla previously had accused the Communists of planning to cripple Chile's production of copper, nitrates and other strategic materials and hamper defense of the western hemisphere and the United States. He also had announced his intention to "end once and for all" what he called Communist dictatorship over Chile's mine workers.

And in a burst of thoroughness, Chile also ended diplomatic relationships with Czechoslovakia.

If no other end is accomplished, the action by Brazil and Chile at least may answer the question of whether Communist penetration into a nation actually can be halted by breaking diplomatic relations with Russia.

FARM DISASTER LOOMS

Rain Is Needed To Save Wheat

Serious cuts in meat production and wheat selling for $5 a bushel may be in prospect if rains do not relieve the serious drouth plaguing the country's vast wheat fields from Texas to the Canadian border, a survey discloses.

A dry summer and below normal rains this autumn have delayed wheat seeding, kept planted wheat from germinating properly and forced farmers to "dust in" their grain in a manner reminiscent of the dust bowl days of the 1930s, crop experts report.

In addition to the damage to the plantings of winter wheat, farmers have not been able to use their wheat grounds for grazing, and millions of animals usually fattened on wheat during the fall either will move to market at lighter weights or without the fattening benefits of the wheat fields.

The Texas Panhandle, whose thousands of acres normally provide both grain and cattle pasture, has little topsoil moisture and only a scant supply of subsoil moisture. Texas cattlemen estimated that the state would have only 20 to 25 per cent of the normal pasturage this winter.

Crop experts in Oklahoma, Kansas and Nebraska have reported a serious danger of heavy winter kill this year. The wheat needs a moist, well packed soil to survive. The dust in which the grain now is being planted is little protection from the freezing and thawing weather which will heave the young seedlings from the ground.

Moreover, grain dealers and cattlemen have predicted that wheat would soar to $5 a bushel unless the drouth is relieved immediately. The price of wheat now is above $3, and a serious shortage next year, plus the heavy demand, will send it even higher, they said.

This year, livestock men say, there will be practically no pasturing, and many farmers are reported to be liquidating their herds rather than attempt to carry them without pasture on high-priced feeds.

DAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Serve Fruit Desserts for Meal Contrasts
(See recipes below.)

Fruit Desserts

Food studies show that people do not get as many fruits in winter as in summer, and frequently this is thought to be a result of their lack of availability; but a good percentage of fruits available in their fresh form are canned, and thus made available for use.

Then, too, there are a number of fruits more available in the cooler months than during summer — apples are in their prime, and so are pears. Look to the citrus fruits, also, if you want particularly luscious fruits that are scarce in summer. Make good use of the dried fruits like prunes and apricots for they have excellent vitamin and mineral values.

This is the season to make full use of the canned fruits you stored during the warmer months. Serve them chilled with simple cookies for an easy dessert or make them into one of the many delectable puddings such as the following:

Deep Dish Plum Dessert.
(Serves 6)

3 cups canned plums
¼ teaspoon cinnamon
¼ teaspoon nutmeg
2 tablespoons butter

Pit and chop the plums. Pour with ¾ cup of their juice into a greased shallow baking dish. Sprinkle with the spices and dot with butter. Cover with crust made as follows:

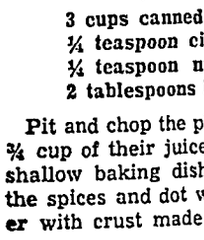
1½ cups sifted flour
2 teaspoons baking powder
½ teaspoon salt
6 tablespoons shortening
½ cup milk
2 tablespoons sugar

Sift dry ingredients; cut in shortening. Add milk to make a soft dough. Roll dough to ½ inch thickness and make a few short slashes in it. Place over the fruit in the baking dish. Sprinkle with 2 tablespoons of sugar. Bake for 45 minutes in a preheated oven (400°F.) Serve warm.

Princess Custard.
(Serves 6)

2 large bananas, diced
1½ teaspoons orange rind, grated
6 tablespoons orange juice
3 tablespoons sugar
2 tablespoons cornstarch
¼ teaspoon salt
1½ cups milk
2 egg yolks, slightly beaten
2 egg whites
2 tablespoons sugar
½ cup sweet crumbs (cake, cookie, graham cracker or vanilla wafer crumbs)

Combine bananas, orange rind and juice. In a double boiler, combine sugar, cornstarch and salt. Add milk gradually and cook until it thickens. Slowly stir into egg yolks. Cook until thick, 2 to 3 minutes. Remove from fire and fold in fruit mixture. Chill. Gradually add sugar to stiffly beaten egg whites, fold into custard. Place in sherbet glasses and sprinkle with crumbs.



Lynn Chambers' Menu

Broiled Hamburgers
Baked Potato with Cheese Topping
Buttered Broccoli - Carrot Curls
Toasted Buns Chili Sauce
Baked Grapefruit with Peppermint Topping
Beverage

Apricot Manhattan Mousse.
(Serves 8)

2½ cups apricots, sieved
6 tablespoons lemon juice
½ cup sugar
3 teaspoons gelatin
2 tablespoons cold water
1½ cups whipping cream
½ cup confectioners' sugar
1½ teaspoons vanilla

Add lemon juice and sugar to apricots and stir until dissolved. Soak 1½ teaspoons of gelatin in 1½ tablespoons water. Dissolve over hot water and add to apricot mixture. Pour into two refrigerator trays and place in refrigerator. Whip cream until it holds its shape then add sugar and vanilla. Soak remaining gelatin in water, dissolve over hot water. Cool and add to cream. Spread whipped cream mixture over apricot mixture and freeze.

Prunella Pudding.
(Serves 6 to 8)

1 cup whipping cream
1 cup milk
1 cup sugar
3 tablespoons cornstarch
½ cup milk, cold
¼ cup butter
1 teaspoon vanilla extract
12 slices soft bread
1½ cups prunes, cooked, pitted and chopped
½ cup shredded coconut, toasted

Combine cream, milk and ¾ cup of sugar in saucepan and bring to a boil. Moisten cornstarch with cold milk and stir into hot mixture. Cook until thickened. Add butter and vanilla. Cool until lukewarm. Remove crusts from bread, cube and toast, under broiler. Combine prunes with bread cubes and remaining sugar. Arrange half in bottom of a large pudding dish. Spread one half of crusted mixture over the prunes. Add remaining prune mixture, top with custard and toasted coconut. Chill 8 to 10 hours.

Caramelled Apples.
(Serves 8)

8 apples
16 marshmallows
1 cup butter
1 cup brown sugar
½ cup nut meats, almonds preferred

Arrange layers of apples, cut in eighths with marshmallows cut in to thirds, butter cut into pieces, brown sugar and nuts in a buttered baking dish. Bake in a moderate oven (350°F.) basting occasionally. Cool. Serve with whipped cream. This may also be served as a side dish with pork, turkey or chicken.

Released by WNU Features.

LYNN SAYS:

Save Food Dollars
By Using Everything Edible

Celery tops may be dried in the oven, then crushed to a powder and kept in a jar. They add a pungent flavor to soups, stews, casseroles, dressings and salads.

To increase the volume of egg whites, add a tablespoon of water before beating. Do not add more water than that. Slightly longer beating is required when water is added.

Did you know that baked grapefruit makes a lovely refreshing dessert, especially after a heart casserole or roast? Bake them just as you would potatoes, for one hour, then halve and top with any of the following:

1. Sprinkle each half with a heaping teaspoonful of sugar and dot with butter; or, top with teaspoonful of jelly.

2. Sprinkle each half lightly with salt and ½ teaspoonful of worcestershire sauce.

War-Ravaged and Hungry China Reclaims Riddled Agriculture

Widescale Effort Aimed To Rebuild Shattered Farms

WNU Features.

When the smoke from the last Japanese gun cleared away two years ago, China, whose 400 million inhabitants depend in one way or another upon the land for their living, faced the tremendous problem of rebuilding the agriculture which is her strength.

Fields, which had lain idle from the eight years of enemy occupation, had overgrown waist-high in weeds and the land lay hard and packed. Tools had been melted for scrap iron, seed eaten for food, draft animals slaughtered. Dikes neglected during the war years were crumbling, floods threatened.

In some areas, particularly Kiangsi, Kwangsi, Hunan and other south China provinces, hard-fought battles had resulted in stripping of the land. Villages were leveled to the ground, and only rubble marked the site of once-prosperous farming communities. The farmers themselves had fled to caves or to the mountains of Free China.

Faced by Famine.

China's need for the produce of the land was greater than it ever had been. She had not only her own hungry mouths to feed, but also those of the vanquished army as well. Food was short, famine threatened. She had to return to her devastated fields so she could produce food to help rebuild her shattered country. Then she could begin developing the industrial life she had started in the two decades before war broke out.

Into this situation came the United Nations Relief and Rehabilitation administration's agricultural rehabilitation program with 400,000 tons of agricultural supplies and hundreds of trained technicians from all over the world to help with planning and carrying out projects to increase food production in China.

To distribute the more than two million long tons of all supplies UNRRA shipped to China, the Chinese government created the Chinese National Relief and Rehabilitation administration, a ministry of the government, as UNRRA's operating agency in China. Foreign-trained specialists recruited by UNRRA all over the world act as advisors to CNRRA, giving technical advice and assisting in utilization of supplies. In addition, the Chinese ministry of agriculture and forestry co-operated with the program. The three agencies work together on almost all food production projects.

Increased Output Sought.

The agricultural program was divided into a dozen divisions: Fisheries, livestock, livestock disease control, crops, plant disease and insect control, fertilizers, fertilizer manufacturing, farm machinery, farm tool production, small agricultural industries, food processing and flood control, each devised to put Chinese farming back on its feet after the destruction of the war years and to train the Chinese themselves to carry on increased, more efficient food production in later years.

Before they could till the soil, Chinese farmers needed tools of all kinds, ranging from simple hand plows and spades to mechanized equipment, such as tractors and bulldozers which they had not had before the war.

The UNRRA-CNRRA farm machinery program to date has distributed more than 6,500 long tons of heavy mechanized equipment, including more than 1,138 small, efficient tractors to hum through the broad north China fields, combines to thresh grain quickly, bulldozers to level out war-pocked land, and irrigation pumps to bring life-giving water up to the fields. It also has established a series of small farm tool shops, known as the National Agricultural Engineering corporation, where the Chinese already have forged more than 35,000 hoes, plows and other small hand tools.

MODERN MACHINERY AMAZES PEASANTS . . . Chinese peasants watch with amazement as an American farm expert drives a tractor over hard-packed land. UNRRA has imported 1,136 tractors to help Chinese farmers in their gigantic task of rehabilitating the war-torn land.

Specialists Aid Work.

Forty-nine young American volunteers of the Brethren service unit, working with UNRRA-CNRRA, are teaching selected Chinese farm youths in all parts of the country to operate and maintain mechanized equipment new to them. Other highly-skilled personnel from all over the world are training the Chinese in other phases of the farm machinery program so that when UNRRA's task in China is finished, Chinese farm specialists can carry on the work.

Co-operative farms have been established in many devastated areas to help farmers return more quickly to their job of food production.

To replenish war-depleted stocks of seeds and to improve strains which have worn out, UNRRA has imported more than 4,500 long tons of improved cotton seed, various vegetable seeds, corn, soybean and forage crop seeds, and tree seed for soil conservancy. CNRRA regional offices throughout the country also have purchased seeds locally for free distribution to farmers.

Since proper use of commercial fertilizers provides most rapid means of increasing food production, the shipping of fertilizer from abroad and the development of fertilizer manufacturing within China are significant parts of the agricultural rehabilitation program.

Replenish Herds.

Farm animals, one of China's basic resources, were decimated by the Japanese during the long war years. Source of farm labor, power, fertilizer and food, they are irreplaceable in Chinese fields, and their numbers and blood strains had to be increased and improved.

From New Zealand, Australia, Canada and the United States, UNRRA has sent 3,590 head of cattle, 793 head of mules and horses, 1,001 head of sheep and 88 hogs, along with trained veterinarians and livestock specialists to teach the Chinese how to care for their valuable animals.

In addition to supplying stock, agricultural rehabilitation specialists have set up vaccination teams which already have immunized more than 200,000 head of native cattle against rinderpest, piroplasmosis and other deadly Oriental livestock diseases, and have established a vaccine-producing plant in Nanking where the Chinese will turn out their own vaccine to combat diseases which annually take a heavy toll of livestock.

Plant diseases and insects which destroy growing crops had to be controlled. Pesticides specialists have developed methods of destroying locusts in north China, riceborers in south China and other insects. They also have taught Chinese farmers throughout the country new scientific pest control measures. They have distributed DDT and other commercial preparations imported from the United States, and have set up a pesticides manufacturing plant in Shanghai which has produced 100 long tons of pesticides and manufactured more than 5,000 sprayers and dusters.

To help restore a sound rural economy in war-torn farm communities, UNRRA and CNRRA set up the Agricultural Industries service, whose technical advisors help improve small industries and establish new ones to be integrated into the village life.

One center already has been established in Shaoyang, Hunan, where a foundry, cement plant, cane sugar plant, sulfuric acid plant, coke and ammonium sulfate plant, night soil treatment plant, oil pressing and rice hulling and polishing equipment, and other small industries are in operation. A similar project has been started in Chungmou, Honan, in the Yellow river flooded area.

Train Women, Too.

Preservation of food through home and community canning and processing centers has been sponsored by UNRRA, CNRRA and MOAF, which have opened a food processing training school in Shanghai. Two classes of specially-trained Chinese men and women agriculturalists have been graduated and have gone out into interior areas of the country to start community centers. As another part of the project, plans are being made to establish milling and ginning plants for rice, wheat, oil seeds and cotton in remote areas of China.

One of the largest agricultural programs in China is the rehabilitation of the fishing fleet, which lost nearly 100,000 vessels during the war. A budget of nearly 27 million dollars is provided for the four-part Fisheries Rehabilitation administration, which is designed to repair approximately 3,000 junks and to build 7,000 new ones, to import 161 modern powered vessels from overseas, to provide food processing equipment, vitamin-oil and fish-meal plants, and to arrange cold-storage and ice-making facilities.

All of the 161 fishing vessels and auxiliary boats have arrived from Australia and the United States, and 18 of them now are manned entirely by newly-trained Chinese crews. Plying waters off Shanghai, Formosa, Tsingtao and Canton, the boats have brought in more than 6,500,000 pounds of fish. More than 150 trained fishermen from Australia, New Zealand and the United States have come to China to assist in the program.

To Control Floods.

Most dramatic of the agricultural activities in China is the dike repair and flood control program, sponsored by UNRRA and CNRRA and conducted by the ministry of water conservancy, to repair eight major and 16 minor projects. During the war-years, the hitherto carefully-tended network of dikes protecting Chinese fields from the ravages of floods were neglected, and their rebuilding and repair was of utmost importance.

Using UNRRA-imported flour as payment to laborers, UNRRA-supplied equipment and funds from the ministry, construction repair of 8,850 kilometers of dikes has been completed under the program.

The project affecting the most land is the Yellow river reclamation project, through which the turbulent waters were diverted from their wartime southern course to their pre-1938 channel through Shantung province. This undertaking has resulted in the reclaiming of more than two million acres of fertile agricultural land in Honan, Anhwei and Kiangsu provinces. For the work, 11,000 tons of engineering equipment and 65,000 tons of flour for payment to coolies were used.

Aid New Settlers.

To assist the settlers in the newly drained land, UNRRA and CNRRA are providing food, shelter, medical supplies, seed, farming implements and other necessities so that the productive soil again can bring forth food for China.

All of these programs are aimed not only at present-day rehabilitation of agriculture but also at an ever-expanding future Chinese food production as well. The foundation for this is being made by the training of thousands of Chinese farmers and others concerned with agriculture to carry on the work begun by UNRRA and CNRRA and by the projects themselves which have long-range agricultural improvement as their ultimate goal.

HOLDING THE DIKE . . . Using centuries-old Chinese methods of driving piles to hold the barrier, these workmen are engaged in UNRRA's dike repair program.

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "inwards" and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

KLEMME LOCAL NEWS

Mr. and Mrs. Ed. Kuhlmann of Menno, South Dakota spent Monday and Tuesday visiting at the Rev. Grosshuesch home.

Rev. and Mrs. Calvin Grosshuesch spent Armistice Day at the Rev. Herbert Wintermeir home at Hampton where they attended a meeting of ministers.

Mrs. Musefelt of Clarion and Mrs. Mary Waterman were dinner guests at the home of Mrs. Lena Helps Wednesday. In the afternoon the Becker sisters were callers.

Mrs. Carl Pearson accompanied Henry Schultz of Whittemore to Albia on Wednesday. They attended a military funeral service for a cousin, James Bates. Mr. Bates was electracuted while working with the

Miss Ruth Stille, of Des Moines, daughter of Mr. and Mrs. Lester Stille of Klemme, left Friday on a vacation trip and visit with friends at Little Rock, Arkansas. She made the trip via plane from Des Moines.

Mr. and Mrs. Sport Bridges are gradually getting their house remodeled. This is the late Ben Buehlmeyer residence. The Bridges family hope they can move into their new home by the first of December.

Mrs. Milder Day went to Mason City Saturday evening to help her grandson, Gary Day celebrate his 11th birthday on Sunday. His mother had baked him a birthday cake and decorated it in red, white and blue with 11 candles on it.

Sunday dinner guests at the Mrs. Mary Waterman home were: Mrs. Alex Hofgren of Chicago, Mr. and Mrs. Lyle Wilcox of Ames, Mrs. Fred Musfelt of Clarion and Mr. and Mrs. C. G. Waterman, and Mrs. Antonio Keraus of Klemme.

Dinner guests at the Victor Hueneman home Monday evening were Mr. and Mrs. Paul Stromer and Merlin and Russel Farrin of Rapid City, South Dakota; Mr. and Mrs. Rudolph Biernert and Franklin of Forest City; Mr. and Mrs. Fernon Griggs, Jay, Jane and Ronald Wood of Miller.

Mr. and Mrs. Wm. Meyer of Miller were callers at Mrs. Lena Helps' home on Wednesday evening. The Meyers have a house trailer and left Saturday for Illinois to visit with Mrs. Meyers' mother, Mrs. McKee. They will go to Kentucky for a visit and plan to be gone three weeks.

On Sunday, November 2nd, Mrs. Lynford Back entertained in honor of her father, Frank Kluckhohn's birthday. Those present were, Lynford and Roxanna, Frank Kluckhohn, Franklin Kluckhohn, Mr. and Mrs. Kenneth Kluckhohn and son, Mr. and Mrs. Herman Back, Mr. and Mrs. Franklyn Buseman. They all enjoyed a fine dinner, in fact they had so much to eat, Frank told us he missed supper entirely.

THE SPORTS SPOTLITE
—By Rick and Oscar

Coach "Pat" Patterson has been sending his squad through long and hard workouts trying to get them smoothed out by the 14th when they meet Hayfield in there first game of the season.

The starting lineup will run something like this. At forWard, Red Schmidt and Eddie Grosshuesch, Guards will be Baack and Montgomery or Bill Lacey. Harlan Carolus will fill the pivot post. The team will be of average height this year with the average at 5' 11".

The second team will start off the big schedule with this as its probable starting lineup. At forward are four probables: M. Brinkman, M. Pearson, C. Josten, and H. Barz. At center M. Trumbell or R. Neuhring. Probables at guard positions will be, R. Finders, W. Back, M. Howard and B. Katuin.

The squad looks good this year thanks to coack Patterson, whom I'm sure we all think is the best coach any school could have.

Everyone be on hand at 7:30 Friday evening, November 14 when the boys tear into those Hayfield "Hornets".

OK'S LEVIES FOR DRAINAGE TAXES

Hancock county supervisors approved drainage levies totaling approximately $37,000 for major and minor repairs on Hancock county drainage districts during 1947.

The largest of these levies totaled approximately $68,000 on the south main of Hancock county drainage district No. 1 and 2, the largest district in the county on which a $62,000 contract for cleaning out main ditches is now under way.

New drains being contemplated will boost the total drainage taxes to well over $100,000, the highest in many years.

Traffic News

KNOW YOUR TRAFFIC LAWS

The Iowa State Law of the Road prohibits the operation of a motor vehicle on the left side of the highway upon any part of a grade or upon a curve in the highway where the operator's view is obstructed within a distance of approvimately 700 feet. In effect, this prohibits overtaking and passion other vehicles on hills and curves.

The intent of this law is to prevent one of the most serious types of traffic accident, the head-on collision.

Every thinking motorist knows that it is sheer folly to pass another vehicle on a hill or a curve where forward vision is obstructed. A third vehicle, approaching unseen from the opposite direction, may suddenly appear in the path of the passing vehicle—with disasterous results.

In situations of this type, one or more of the parties involved may be innocent of any violation. Yet they suffer with the motorist who attempts to pass on hill or curve. The yellow "no passing" lines, when on your side of the center line, offer a guide warning you that there is insufficient visibility ahead for you to safely pass another vehicle. Therefore, if law-respecting motorists are to drive in safety and confidence, they must see to it that this law is well-publicized, well-enforced, and clearly understood and obeyed by everyone who drives on the public highways.

GAME STORAGE PERMITS FREE

In cooperation with the Cold Storage Locker Association, the State Conservation Commission is making every effort to assist hunters in the legal storage of game, and at the same time, every effort is being made to prevent illegal storage. All game in Iowa must be disposed of within ten days after the close of the season, except that under permit, game except waterfowl may be held until June 30 of the following year Permits may be issued to hold migratory waterfowl 90 days beyond the close of the season.

To store game beyond ten days after the seasons close, simply ask your locker operator for an application blank, fill it out, and mail it to the State Conservation Commission, 914 Grand, Des Moines 8, Iowa. All locker plants have been supplied with permit applications. They cannot, however, grant the permit. It is issued directly from the State Conservation Commission office with no charge. Game held in lockers may at no time exceed the legal possession limit and permits will be granted for each license under which game is taken.

LEGION FEATHER PARTY MONDAY

The Klemme American Legion will hold it's annual "feather party" at the Community Hall on Monday evening, Nov. 24, starting at 8:00 p. m.

They will have a nice selection of fowls for the occasion and it will be a night of fun for old and young alike. The Auxliliary ladies will serve free hot coffee and doughunts during the evening.

Everybody in the community is invited to attend.

Phone your news to 12.

KLEMME STORES WILL BE CLOSED THANKSGIVING

Klemme business places will observe Thanksgiving Day, Thursday, November 27 by being closed on that day. Business places will be closed Wednesday evening until Friday morning. Klemme schools will be dismissed on Wednesday afternoon until Monday morning in order to allow teachers to spend Thanksgiving and the week end at their respective homes.

GRANDMA KLUCKHOHN IS HONORED AT DINNER SUNDAY

Grandma G W Kluckhohn was honored at a dinner Sunday at the home of her grandson, Verle Keraus and family at Garner The dinner was a pre-Thanksgiving family turkey dinner and also to celebrate Grandma Kluckhohn's birthday, which was on October 6th but could not be celebrated at that time

Those present besides those above mentioned were Frank Kluckhohn and son, Franklin; Mr and Mrs. Clarence Kluckhohn and son Clarence of Waterloo, Mr and Mrs Fred Kluckhohn; Mr and Mrs. Wm. Keraus, Lynford Back and his family, Eugene Kluckhohn and family, Kenneth Kluckhohn and family and Carold Larsen and family.

Others in the immediate family who could not be present were Sadie Turgasen, a daughter, who is at the home of her son, Vernon and family in Chicago, and could not come. Two other grandsons, Donald Turgasen and family of State Center and Otho Keraus and wife of Osage could not be present.

SCHOOL SUPPER AND CARNIVAL WILL BE HELD FRIDAY EVENING

One of the big events of the year is scheduled for Friday night at the Klemme high school gymnasium when supper will be served cafeteria style beginning at 5:00 o'clock

In the evening the Carnival itself gets under way and will be a regular fair midway of attractions, games and stunts and fun for old and young alike. A short program will be given on the stage.

This will be a big affair and one that everyone will want to take in This week Friday evening. Come early and bring your family

The school band under the direction of Stanley Bulka will present a half hour of band music beginning at 6:45 o'clock. That will be followed by a short program given by the children in the lower grades. After the program there will be fun for all, games, prizes and contests for everyone. One attraction of the evening will be a cake walk.

The ladies of the community will start serving lunches at 5 o'clock. Their menu will feature home made pie, cake buns and doughnuts.

SPECIAL SESSION OF CONGRESS OPENED

Congress has opened its special session which was called by president Truman recently for the purpose of considering anti-inflation legislation and the emergency aid for Europe. Other matters are also likely to come up during the session although it is generally understood that there will be no further tax reducting measure introduced until the second session of the 80th Congress, which convenes immediately after January 1st.

Every indication points to a hot fight on the amount of money the United States should spend for European aid under the Marshall plan. Secretary of State Marshall recently told the Senate Foreign Relations Committee that $2,657,000,000 would be needed between now and June 1948 for world aid. Senator Robert A. Taft of Ohio, Chairman of the Republican Policy Committee, has declared this amount is too high and stated he would carry his opposition into the Republican party councils to cut the estimates both for long term and short term forign aid. In this he will no doubt receive the support of many of the Republicans as well as some Democrats.

What the Congress will do on the high cost of living remains to be seen, and will depend too, on Mr. Truman and the New Dealers. As long as government costs go up the cost of living will do likewise and this no one knows better than President Truman. Yet he and his administration have done absolutely nothing to reduce these governmental expenditures. In fact the presidnt and the New Deal Administration have fought the Republicans every inch of the way whenever any attempt was made to cut government costs What Mr. Truman and his cohorts actually are doing is continuing the high cost of living, but they'll make every effort to blame it all on the Republicans. But in this we are sure the people will not be fooled.

Study Group Met At The Home Of Mrs. D. P. Anderson

The November meeting of the Study Group of the Methodist Church held its meeting in the home of Mrs. D. P. Anderson on Thursday.

The meeting was opened by Mrs. E. J. Arnold giving the History of the song "O Zion Haste" after which it was sung by the group

Devotions on "Stewardship" and "God's Sovereign Ownership" were given by Mrs. D. R. Hummel. The lesson on "India and World War II" was ably given by Mrs. H. E. Harvey.

Gloria Haefner played a piano solo and Mrs. V. Bisom and Mrs. C. White sang the duet "The Lord Is My Shepherd."

Questions were in charge of Mrs. Roy Arnold.

Mrs. Clarence Larsen with the help of Mrs. R. A. Jorgenson will mail the Christmas packages to our boys in the service.

Rev. and Mrs. Harvey are in charge of mailing a package overseas to a minister's family.

Everyone was reminded of the Bazaar Wednesday.

Mrs. D. P. Anderson and Mrs. Ralph Elder served a delicious lunch to a large group of ladies.

Mrs. Fred J. Arnold Was Hostess To Bridge Club Thursday

Mrs. Fred J. Arnold was hostess to the U-Delt-Em bridge club at her home on Thursday afternoon. Mrs. Sumner Trumbell was a guest. Mrs. Art Kudje won the high score and Mrs. Ed. Jacobs won second high score.

Mrs. Arnold served a nice lunch after the games.

Shop in Klemme and save.

PLANS AUTUMN NUPTIALS

Mrs. Ben Nieman, Klemme, announces the engagement and approaching marriage of her daughter, Naomi, to Louis Brandt, son of Mr. and Mrs. Gus Brandt, 200 S. E. Center Street, Mason City. The ceremony will take place the latter part of November.

Jolly Workers Club Meets

The Jolly Workers Club met at the home of Luella Boelman Wednesday, November 12th.

Our President, Lily Pearson, took charge of the meeting. Election of officers was held and the following persons were elected·

President, Mildred Gruis; Vice President, Dorothy Helps; Secretary and Treasurer, Maude Bachman; assistant Secretary and Treasurer, Anna Conners; Flower and Card Committee, Edith Kramer; Program Committee, Jannis Nelson New officers will take their offices the first meeting in January.

A price was set on the Christmas gift exchange A Christmas dinner menu was also planned

Mildred Gruis read an interesting letter she received from our family in Holland thanking us for our boxes we had recently sent them.

Luella Boelman read the Roll Call and our meeting was dismissed by our President, Lily Pearson.

All enjoyed a paper sack school lunch and coffee was served by our hostess, Luella Baelman.

The December meeting will be at the home of Maude Bachman and will be the Christmas Party.

Pheasant Season Closes November 20th

The 1947 pheasant season, the most strict from the hunters' standpoint since the season first opened in 1925, closes at 4·00 p. m, November 20. Sixty-four counties were open from 12:00 to 4 00 p m. with a bag and possession limit of only two cock birds.

Duck and goose shooting in the entire state closed November 19.

Muskrat season is closed throughout the entire state, excpet along the Mississippi River from the north city limits of the city of Muscatine to the Minnesota state line, east of the Milwaukee railroad tracks. The 30-day season in this limited zone opens November 20 to noon and closes December 20 at noon.

The squirrel season throughout the entire state closes Nov. 30th. The season on cottontail and jackrabbits is open through February 29.

REUNION

One night at a battalion movie in France, Sergeant Lindsay Henderson met Staff Sergeant Archie Mahoney The two became very fast friends but were sperated following demobilization. Last week civilian Archie Mahoney needed a new radio tube; when he went to the electric shop, he was waited upon by civilian Lindsay Henderson. Both are now living at Denison.

Hancock Asked For $1150. To Aid Children's Home Society

TODD BERLIN DIED SUDDENLY FRIDAY EVENING AT LOS ANGELES, CAL.

Mr. and Mrs. George Lawhorn received word here that Todd Berlin of Los Angeles, Cal., died on Friday evening at 8:15 o'clock at the age of 46 years.

Mr Belin was well known in Klemme as he was the husband of Miss Eunice Braund, neice of Mrs. Lawhorn. Miss Braund made her home with the Lawhorns and with her grandfather, the late Mr. Henry Freie, for several years.

Mr. and Mrs. Berlin lived in Washington, D. C. several years where he was employed by the government. He later held a like position in Los Angles until he was stricken with cancer, from which he died.

Mr. Berlin is survived by his wife, Eunice Berlin, his father, R. Berlin and brother Ed. Berlin, both of Mason City, and one sister in Los Angeles.

FISHING SEASON CLOSES NOVEMBER 30

The 1947 inland fishing season on all protected fish closes at midnight, November 30, after an overall season described as good by conservation officials. Flood waters during the first half of the season in the inland streams was responsible for a slow start on the river fishing. In most streams, however, after the recession of the high water, carp and catfish was described as from fair to excellent.

Conservation officers reported that throughout the state there was a noticeable increase in the number of fisherman on the lakes and streams and their observation is verified by the fact that during the year ending October 31, 36,536 more fishing licenses were sold than during the previous comparable period. A total of 285,384 anglers were licensed up to the end of October.

TWIN LAKE PUPILS VISIT THE TIMES PLANT

Mrs. Quentin Stille, teacher in Twin Lake Township No. 1 brought her pupils to the Times plant Friday afternoon to give them a lesson on printing.

Elwood Geary demonstrated to the pupils how type was set on the Linotype machine and the working of the several presses in the plant were explained to the pupils.

Besides their teacher, the pupils present were Eleanor Priebe, Dorothy Lacey, Delbert Etchen, Leola Lacey, Norma Lacey and Roger Lacey. The pupils enjoyed the trip and were invited to come again.

LEGION FAMILIES HAD POT LUCK SUPPER AND PARTY

The American Legion and Auxiliary and families held a pot-luck supper at the Community Hall Armistice Day evening with many families present. After a good meal a most enjoyable evening was spent.

"Pete" Kilgore was M. C. at the program and Mrs. W. L. Patterson led the group in community singing, accompanied by LaNelle Harvey. Charlotte Lewis played two fine saxophone solos. A short play "The Medicine Man," was presented by Charlotte Lewis, Donna Havilin and Isabelle Gibbs. The remainder of the evening was spent dancing and playing bingo.

Shop in Klemme for Christmas Gifts.

Mrs. Emery Weaver of Garner has accepted appointment as rural chairman for the Iowa Children's Home Society campaign in Hancock County, it was announced this week by Mrs. G. W. Templeton of Garner, General County Chairman.

The County's goal is $1150.00 toward the $165,000 being asked throughout the state to support and continue the work of the society in caring for neglected or abandoned Iowa children through adoptive or boarding home care.

Mrs. Weaver is naming township chairman throughout the County to assist her in raising the quota apportioned to the rural area.

Mrs. Otto Jacobson of Britt has accepted appointment as Chairman of Britt and the following women will work with her: Mrs. Olive Johnson, Mrs. Doris Brandt, Mrs. Bertha Shaw, Mrs. Rowene Bilbrey and Mrs. Joyce Tandy.

A tea will be held Saturday, November 22nd at 2 o'clock in the V. F. W. Club Room in Britt. Maude Leachman, State Fund Raising Campaign Chairman, will be present with information and material regarding the Iowa Children's Home Society and the campaign. All workers are urged to attend.

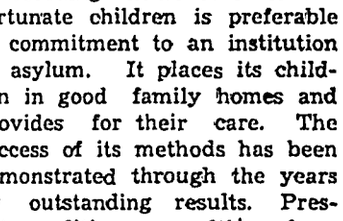
Iowa Children's Home Society, founded in 1888, has provideed care for more than 10,000 Iowa children. This is the first time in sixty years that the society has made a state wide appeal aside from tag days held in the past at irregular intervals that produced only minor amounts. These tag days have been discontinued.

The Society operates on the theeory that adoptive or family boarding home care for unfortunate children is preferable to commitment to an institution or asylum. It places its children in good family homes and provides for their care. The success of its methods has been demonstrated through the years by outstanding results. Present conditions, resulting from the impact of war and its aftermath, have greatly increased the demands upon the society in many ways. As a result, funds are greatly needed to carry on and expand the work and to replace precious reserves that have been badly depleted in recent years.

Patets Leave For Florida

Mr. and Mrs. Emil Patet left for Tampa, Florida, where they will spend the winter. Their address is 207 Lee Street, Tampa, Florida. They will remain in the south until next spring.

HELLO, FOLKS!



Mr. and Mrs. Leonard Kaduce are the parents of a baby boy, weight 8½ lbs. born Monday, November 17 at the Garner nursing home.

Mr. and Mrs. Max Barz of Alice, Texas, are the parents of a baby girl born November 4. She weighed 5 lbs. and 3 ozs. and her name is Brenda Maxine. Mr. Barz is a son of Emil Barz, and a former Klemme boy.

A baby girl was born to Mrs. Adell Bock of Montgomery, Alabama on November 11th. She weighed 7 lbs. Mrs. Phillip Bock and son, Carol, are in Alabama.

Must We Fight Russia?

MOST significant talk newspaper editors have had in Washington recently was an off-the-record conference with George Kennan, General Marshall's chief Russian policy maker. Here are the highlights.

Russia's tough talk is nothing new. It has been going on for 160 years, under both Czars and the Soviets. It was soft-pedalled in the 1920s and 1930s because the Bolsheviks were too weak to talk tough.

The main problem in Europe is the vacuum in France and Italy. This vacuum has to be filled. Big question is whether Russia or the United States will move in. The vacuum was recognized by Russia even during the war, and Stalin prepared then to fill it. The U. S. doesn't want to fill it, but does want to see it filled by democratic Frenchmen and Italians themselves. Whoever first fills this hole in Europe will be successful in dominating all Europe.

People of Europe are afraid of Russia but not of the United States. Because they are scared stiff, they would appease Russia before they helped the United States.

Inside Russia, the people are cynical, don't take Moscow's propaganda too seriously Vishinsky's barbed thunderbolts at U. N. are nothing new. He's only saying what he has said for two years, only this time it's louder

There is no real worry over war with Russia. Its people haven't recovered. Furthermore, the Russians figure they can get what they want by political means. Most significant key to the fact that Russia doesn't want war is that the Soviets always try to ride out war. They made a deal with Hitler in the last war in order to stay on the sidelines, and the last thing they want is war now with the United States.

"We are very far from war," concluded Kennan.

WALTER WINCHELL

Doodling on the Typewriter

Wisest thing the Thomas investigating group has done yet is shove Rankin (allegedly electioneering at home) to the background. He is congress' worst ad. . . . Capitol newsmen are wondering when Secretary of Agriculture Anderson and the President will get their signals straight. . . . One of the President's closest aides will be front paged before the 1948 campaign starts. For "connections" with the sale of lucrative (seized) German firms. GOPeople hope to have the matter well documented in six months.

Oh, those terrible capitalistic nations. The U. S. is spending more coin to aid foreign nations than to rebuild its armed forces. If this world isn't careful, there'll be nothing left to be careful about. . . . On Madison avenue there's a Society for the Prevention of World War III. Must be working overtime. . . . The Metopera may not do Prokofiev's "War and Peace" this season, not only because of "technical reasons" (as announced) but also because they see possibilities of an early war.

Such airs: Oscar Levant has three governesses, one for each of his heiresses. . . . If you never want to catch pneumonia, stay clear when Talu Bankhead and Lillian Hellman meet. Brrr! . . . All you have to do to have a Broadway hit show is to use a title starting with "A." Currently there are five that start with it.

WESTBROOK PEGLER

Special Rules Prevail in Sports

SOME of my colleagues on the sport side have been arguing that it isn't right to punish a man by some special law of baseball or pugilism for an act which is not illicit in the view of the cops, or to punish him for some offense already expiated in the public clink. That would be double jeopardy, wouldn't it? Yes, it would and it is supposed to be repugnant to our delicate sense of justice, but that is just what we say. It really is not repugnant at all.

The miscreants or martyrs here concerned are Leo Durocher and Rocky Graziano. Both are good but both were bad.

Happy Chandler, commissioner of the baseball industry, gave no reason why he suspended Durocher for the season of 1947. In my opinion, which is never humble or erroneous although it often stands alone, this was a whimsical, personal judgment of a man who had been touched off balance by a confusion of events. An equal effect might have been wrought by a briefer suspension or just some loud, public wigging.

Graziano is a guttersnipe. But anyone who tries to argue that his environment was responsible for his police record and his misconduct in the army must explain away Al Smith and the late Cardinal Hayes, who came from the same neighborhood, and explain the overprivileged sons of the Park avenue branch of the Jeeter Lester family.

WALTER SHEAD

G.I.s Lose Business Battle

WORLD WAR II veterans chalked up better records on the battlefront than they have on the business front, it is indicated in reports from the Veterans' administration loan guarantee office.

Figures compiled by the VA loan division for the Washington area disclose that about 1 out of every 10 business enterprises begun here with G.I. loans has gone in the red. The situation has reached the point where some banks want nothing to do with G.I. business loans.

Charging that many bankers flatly state "no G.I. business loans," Morgan Callahan, loan guarantee officer for the local office, has appealed to lending institutions to reach a happy medium. "Lots of veterans are still good propositions for loans," he insists.

There's a bright side to the story, however. Hundreds of successful businesses have originated from G.I. business loans. Success stories appear from every field, from physicians who have outfitted offices to gift shop owners.

In between are valuable restaurants, cigar stores, frozen food marts, drug stores, frozen custard emporiums, bakeries, tailor shops, furrier shops and multiple other business, all started from G.I. loans.

WRIGHT PATTERSON

Education Needed on Labor Act

I WAS staying at a San Francisco hotel filled with delegates to the recent American Federation of Labor convention. It afforded me an opportunity to talk to a considerable number of those present, including both leaders and delegates. It was very evident the opinion of the rank and file delegates had been formed by labor leader propaganda, and that the rank and file were not informed as to provisions of the act. The leaders very definitely had sold it to the union members as a "slave" law, without offering any information as to its provisions. Union members need some education as to what that law contains.

The FICTION Corner

GHOST ON BROADWAY

By ROBERT McBLAIR

IN THINKING of it afterward, Nettie Brainard could never get rid of the feeling that the light actually did change. In her empty tea room, the telephone on the cashier's desk rang. Although it was nearly noon, all of Broadway near Union Square seemed to dim to a queer, eerie twilight.

"Is this Miss Nettie Brainard?" a man's voice inquired.

"Yes," Nettie said into the instrument.

"Are you the daughter of Benamin Brainard, deceased, and Nettie Sharp?"

"Yes. Yes, I am."

"Is your mother there?"

"She's busy in the kitchen just now. She'll be busy for half an hour. Who is this, please?"

"This is Thomas Sharp. Your Uncle Tom."

Nettie gasped. "Uncle Tom! But — but— but you are dead!"

The man's laugh had a hollow sound. "Not quite," he said.

"But five years ago, up home in Maine, we got a registered package," Nettie insisted, her voice shaking slightly. "It held four British bonds, and his—your passport stamped in Chinese and Russian, and a letter from Harbin, signed by Jerry Angus, saying that you had—"

The man laughed again. "Now, Nettie, don't be so upset by this! Anything may happen in the Far East. Besides, I left home twenty-five years ago. Before you were born."

"Well," said Nettie swallowing.

"Now don't say anything to your mother. I want to speak to you alone. I'll be right over."

He hung up. The light seemed to flood back into the deserted tea room. "Heavens above!" Nettie said aloud. "Uncle Tom! Alive! Alive, after all! What ever shall I say to him? Why does he want to talk to me alone? Why, it's like having a visit from—from a ghost!"

Across the street, her mortal enemies, the two quick lunch places, with their neon signs and their bargains in coffee and doughnuts, now became friends for once. They assured her that she was not in some timeless world of the spirit. Instead, she was in the bustling world of today, where a girl of twenty-two, who loves a young doctor way back in her home town, is glad to stand by her ailing mother in New York, and try to make a tea room pay in a section where there is no room for tea rooms.

"Uncle Tom!" Nettie said again. All she could remember of him was that he was a black sheep, or something worse. Her own father, Benamin Brainard, never would permit his name to be spoken. This was because, over twenty-five years ago, Tom Sharp nearly had broken off Benamin Brainard's engagement to Nettie's mother

Tom Sharp had brought home some ruffian named Jerry Angus, and had introduced him to his sister, Nettie, at a time when her fiance, Benamin Brainard, was out of town on business. Nettie Sharp, then a girl of seventeen, had found Jerry Angus, the irresponsible wastrel, more enchanting than her businesslike and absent fiance. Her parents ended that romance, but not before Jerry Angus and Nettie Sharp pledged eternal devotion in a secret meeting arranged by the black sheep Tom Sharp. It was a heartbreaking farewell.

Jerry Angus and Tom Sharp left together to hunt gold in Alaska, and after that adventured in the Far East. Young Nettie Sharp married Benamin Brainard after all, and had one child, Nettie, before Benamin Brainard died.

He laid a brown envelope in Nettie's palm. His hand, she noticed, had on its back a large strawberry birthmark.

Tom Sharp became an occasional, rambling letter from some unknown far Eastern place. Then, from Harbin, his passport and his legacy had come to his sister.

Now Tom Sharp was alive again and hurrying to see his sister's daughter.

Just then the front door opened. In stepped a bouncy, stocky, gray-haired man.

"Well, Nettie," he said heartily, "come sit by your Uncle Tom. Yes, you've got your mother's bright brown eyes."

He led her to one of the yellow tables.

"Yes, yes, my dear. No one likes to be visited by a ghost!" He roared with laughter. "It was poor Jerry Angus who played that joke on me. Left me with no passport and no money. The crazy fool."

He glanced toward the kitchen. "But I mustn't waste time like this I found you by phoning the doctor in the old home town. The same name, but the son of the one I used to know. That's how time flies! . . . He told me about the operation your mother needs, which requires money. He told me more, Nettie Something about himself. But that was confidential."

Nettie's heart stopped beating. Was it some other girl?

"What did he tell you?" she cried

"Never mind. But, look, Nettie This cash came from smuggling arms in a good cause. Let it do some good!"

He laid a brown envelope in Nettie's palm. His hand, she noticed, was weathered, and had on its back a large strawberry birthmark.

"But, Uncle Tom!" she protested.

"Now, now!" He got up. "Of course you wouldn't take ten thousand dollars from just anybody. You've too much pride for that, I hope. But blood's thicker than water, child. Besides, if you and your mother must have a tea room, this will let you have one back home. . . . Take the advice of a wanderer, Nettie. Marry. Settle down. Don't miss love when it comes by."

He kissed her roughly on the mouth. Then he was gone, leaving Nettie feeling that this visit, from one mourned as dead, simply could never have happened.

The kitchen door opened. Nettie's mother came in.

"How can I begin to tell her?" Nettie thought.

"I couldn't hear what that man was saying." Her mother was talking. "But his voice seemed to be one I had heard as a girl. I kept expecting you to call me, Nettie. I wondered if I would know anyone I hadn't seen for so long. Like your Uncle Tom; well, I suppose I would know him"

She sat down and picked up a fork. "As for Jerry Angus," she went on, "the boy who wanted to marry me, years ago, I would know him anywhere He had a strawberry birthmark on the back of his left hand." She cut off a bit of lettuce. "Why are you suddenly looking so happy, Nettie? Do stop mooning, dear, and bring your mother her tea"

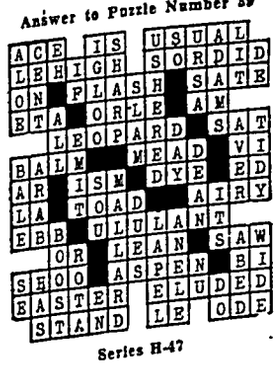
Answer to Puzzle Number 39



Series H-47

WATCH WHAT YOUR FACE SAYS

Probably it isn't right, but it certainly is human nature to pass judgment upon every stranger within a few seconds after you are introduced. Later you often-times have to reverse your judgment. That doesn't keep you from going ahead and judging everyone you meet.

Some of the men or women you meet win your heart immediately, even before they say a word. This they do by the expression on their faces. Others win you only after days or hours or weeks of association, which causes you to overlook their dead-pan expression and recognize their worth.

The faces we like, the faces of personality, are beautifully described by Rosamond Lehmann in her novel, "The Weather in the Streets." One of Miss Lehmann's characters says to a friend:

"I like what—what breaks out behind the features and is suddenly there and gone again. I like a face to warm up and expand, and collapse and be different every night and from every angle . . . and not be above looking ugly or comic sometimes."

In other words, what this woman liked and what others like in a face is life, expression, vitality, animation. We all like faces that betray the emotions that go on behind them rather than the dull, colorless, cold, unresponsive faces. We want to know that there is friendship behind the faces we see.

Study the expression on your face. If it isn't what you think it ought to be, do what Napoleon did, what Cleopatra did. Practice facial expression until you develop this important outward evidence of personality into a great and enduring asset.

BIBLE TODAY

International Uniform Sunday School Lesson

BY LOUIS D. NEWTON

SCRIPTURE: I John 1—3; John 21:15-22.

DEVOTIONAL READING: I Corinthians 13.

The Way of Love

Lesson for November 23, 1947

SUNDAY'S lesson is based on the writings of John, I John 1—3, and John 21:15-22. The devotional reading is First Corinthians 13.

Dr. Newton

Travelling on a plane at night a little while ago, I talked at length with a group of business men. The conversation turned at last to the Bible. I asked the group for their favorite passages in the Bible. They named several passages, but the majority said they loved most the writings of John.

I think their answer emphasizes this truth. John tells us about God and his love. That is the message of this lesson.

* * *

The Happy Way of Life

LOVE is the happy way of life. It is the only happy way of life. Children are happy to the degree that they are loved. Find me a home where children are truly loved, and I will have no difficulty in identifying that as a happy home.

Little children yearn for love, and they respond in love. That is one reason why they like dogs. Dogs love little children, unless they are the wrong sort of dogs. And little children love dogs.

If a dog can bring happiness to a little child by loving to the limit of its brute nature, how much more can parents, made in the image of God, bring happiness to little children by loving them.

* * *

Love Begets Love

JOHN declares, "This commandment have we from him, that he who loveth God love his brother also," I John 4:21.

We cannot hate people if we see them through eyes of love. The Bible somewhere speaks of the eyes of the heart, and it is of such eyes that I am now thinking.

A friend of mine complained that some strangers had bought the house next door to his. They had a strange name, they talked strangely, they looked strange He was tempted to sell his beautiful home and move to another community. He frowned when I smiled at him. I asked him if he would do what I proposed as a solution to his difficulty. He hesitated. I suggested that he cut an armful of dahlias from his garden and take them to the strange neighbors. He did. He discovered that the strange neighbor was an expert horticulturist. Today they are great friends. They love one another.

* * *

Follow After Love

HERE you will need to read I John 2.7-11. We need not pass resolutions about better relations within nations and between nations unless we are willing to follow after love in the everyday relationships of life.

Just across the fence, just across the hedge, just across the desk, just across the hall, just across the way, narrow or wide it may be, is a human being who yearns for love. It is generally safe to assume that the people you see every day are lonely people. You may not understand why, but they are lonely.

What can you do to help them in their loneliness? That is where the water begins to hit the wheel in applying this lesson to everyday life.

In the pioneer days of our country, people were more neighborly, because they were aware of great danger—danger from Indians, danger from wild beasts, danger from the wilderness about them. This sense of danger drew them together. Today, with our walled apartments, we have lost some sense of interdependence. That is why we are so lonely. Follow the better self within you. Penetrate these barriers. Follow after love. And you will be happier as you make your neighbor happy.

* * *

The Way of Love

THE way of love is the way of Christ. "A new commandment I give unto you," said Jesus, "That ye love one another as I have loved you."

Not until we reach the point that we can look at life through the eyes of love—the eyes of the heart—can we know the joy which comes when we follow the way of love. It may sound very simple. That is the reason why it is so vital. It is the one way up and out for our frightened world. The way of love is the way God wants us to go today and tomorrow.

* * *

Household Hints

Never scour china or pottery. Hard rubbing and cleansing powders may cause the color to fade and damage the smooth finish.

—•—

When you make a fruit pie that's likely to run over, put a cooky sheet under it. The cooky sheet is much less bother to clean than the inside of the oven.

—•—

Knots in the thread when hemming table linens may be avoided simply by running each needleful of thread through a piece of paraffin before sewing with it.

Orthel Eagles Boys 4-H Meeting Held At Eckels

The Orthel Eagles Boys' 4-H club met at the home of Wayne Eckels on Friday, November 11.

The boys discussed feeding and management of Baby Beeves with Paul Henderson, County Extension Director. They also decided that their December meeting would be held Dec. 16 at the home of Larry Fox.

The boys decided to name the club Orthel Eagles.

Plans are going forward to secure one of the men in the township as local leader

THIRD AND FOURTH GRADE NEWS

—Teacher, Miss Tanner

Warren Terhufen was absent several days this week, due to sickness.

We are beginning story telling in fourth grade language class.

Raymond Helps celebrated his 10th birthday November 10. He treated us to frost sticks.

We have five narcissus bulbs that are growing nicely.

The third grade dramatized the story in their reader. "A Ride To Animal Town," on Thursday.

The following had 100 in spelling.

THIRD GRADE

Gary Baack
Fonda Bier
Berleen Bridges
Ronald Trampel

FOURTH GRADE

JUNIOR CLASS NEWS

—Irene Lyons

The Junior Class has been trying to get back on scheduled classes again. As you all know our play was November 6th and has caused a lot of excitement for us. This was not only a lot of work for the cast but for the teachers too, because it was hard to get our lessons and attend play practice. All the Juniors wish to thank you, the public for your support of our play. We do hope you enjoyed it.

In Economics we have been learning how to invest and spend our money.

In English we have been learning the origin of new words and their meanings. Although many of us do not like to admit it the words will be very useful to us.

In typing we are trying to speed up, but we make so many mistakes that we don't average very many words per minute.

In Sociology we have been studing poverty in crime. It is indeed appalling the great amount of money spent on crime every year.

We are going to have a school carnival on November 21st, so won't you please come. It is for the benifit of the school so I'm sure that if you spend some money you won't mind.

FRESHMAN NEWS

—Mary Ann Blumer

On Armistice Day we had our first vacation for a half a day. I wonder who felt best about this, the pupils or the teachers?

In Algebra we have started on subtraction of signed numbers. All of us are trying to remember the rule, "To subtract one signed number from another, etc" We each had to write a poem in literature this week. Some found it easy, but the rest of us just couldn't get the words to rhyme. But all in all, we turned out several good ones at that. Also some of us had to report on articles in the Readers Digest, and we find it's an interesting magazine. We studied cereal this week in Home Economics. We had a laboratory Thursday and we cooked some of it ourselves. In science we're studying magnatism and electricty. We've looked at several compasses and and saw static electricty made.

Six weeks tests are coming soon so we'll have to start studying harder. Most of us hope we can raise those grades on our report cards. I imagine all of us want to be quieter in study hall so we can raise our conduct grade too.

Family Living Training School Held

The fact that women are interested in salads for their families was very evident on Thursday, November 3, when forty-eight women attended the training school on "Salads That Satisfy" which was presented by Miss Mildred Nelson, Ext. Nutrition Specialist, from Ames. The demonstration was held in the Central States Building in Britt.

Each of these forty-eight women will take this lesson back to their home communities. So if you are one who is interested in "Salads That Satisfy" contact your township Farm Bureau Chairman to find out when and where the meetings in your township will be held.

GET SEED CLEANED FOR CERTIFICATION

With bin inspection for seed certification already started, County Extension Director Paul Henderson this week urged all Hancock County farmers that want to complete certification requirements to get their seed cleaned as soon as possible.

A crew of six inspectors are now making bin inspections over the state. But they can not take bin samples unless the seed has been cleaned.

All hybrid corn seed must be shelled before the samples are taken. With other seed, the grower has the option of cleaning only 200 bushels before the inspection. However, if the grain field contained secondary noxious weeds, Henderson advises cleaning all the seed, since it must meet secondary noxious weed seed requirements.

DELAYED! PAPERS LOST THIS WEEK

The Times is late this week as our paper and news syndicate feature is lost somewhere between here and Des Moines.

At the time of writing this we are trying to locate the lost shipment and if it is not located we will be forced to print on a single sheet this week.

—The Editor.

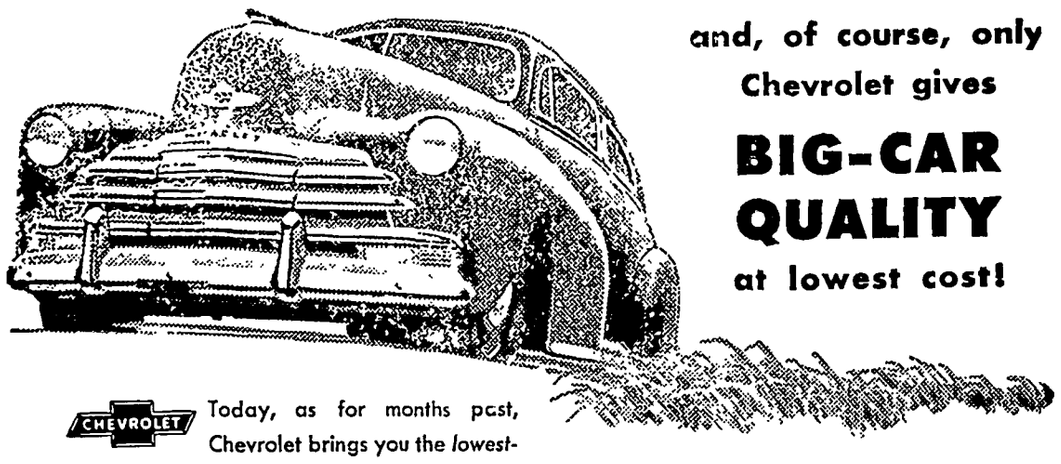
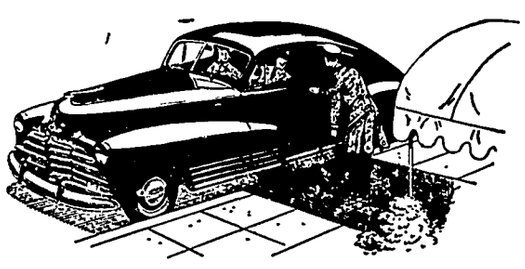
LOWEST-PRICED LINE IN ITS FIELD...

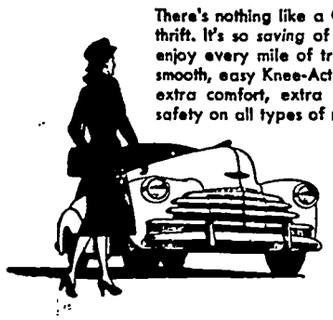


and, of course, only Chevrolet gives
BIG-CAR QUALITY
at lowest cost!

CHEVROLET Today, as for months past, Chevrolet brings you the *lowest-priced line of passenger cars* in its field. And, in addition to lowest prices, Chevrolet gives you Big-Car beauty, Big-Car comfort, Big-Car road-action and reliability. That means outstanding dollar value—the kind of value found only in Chevrolet. It's the *one* car offering all the advantages of BIG-CAR QUALITY AT LOWEST COST described for you here!



You'll be genuinely proud of the smart, smooth lines and contours—spaciousness—luxury of Chevrolet's Body by Fisher—exclusive to Chevrolet in the lowest-price field.



There's nothing like a Chevrolet for thrills and thrift. It's so *saving* of gas and oil, and you'll enjoy every mile of travel in a Chevrolet. Its smooth, easy Knee-Action Gliding Ride means extra comfort, extra riding-steadiness, extra safety on all types of roads.

Get the *three-fold* safety of Chevrolet's Fisher Unisteel body construction, the Knee-Action Ride and Positive-Action Hydraulic Brakes—found only in Chevrolet in the lowest-price field.

May we remind you again of the wisdom of bringing your present car to us for skilled service, pending delivery of your new Chevrolet. See us for thoroughly reliable, car-saving service—*today!*

MORE SHIPPING FEVER IN COLDER WEATHER

take precautions against shipping fever K. W. Stouder, veterinarian at Iowa State College, says the disease can knock the profits out of feeding, especially this year with high-priced steers.

Shipping fever hasn't been much of a problem so far this fall because the weather has been good. But when the cattle are exposed to cold winds, sleet or snow while on the trip or standing in open lots, the disease may become serious.

Tired, droopy steers are the ones likely to be coming down with shipping fever Other symptons are fever, a dry muzzle, tears flowing from the eyes and often scours.

The best way to guard against the disease is to use bacterins 2 to 3 weeks before the cattle are shipped. Cattlemen who go to the ranges to select their cattle can make sure this is done.

For the man who buys his cattle through separate markets after they have been shipped, this isn't practical. Here the use of bacterins is not advisable because the cattle may already be in a negative phase of shipping fver The use of bacterins then might aggravate the symtoms.

Giving the cattle proper care upon arrival will do much to prevent losses, Stouder says. Give them plenty of rest and water, but don't give them much feed except roughage. Watch them closely If droopy scouring animals show up, call the veterinarian He can determine whether further treatment is needed.

Many experienced feeders feel that dumping 50 pounds of common baking soda in the water tank as soon as the cattle arrive helps to avoid shipping fever or lessen its severity Stouder says.

Actual cause of death is pneumonia in most cases. So animals suspected of having shipping fever should be protected from rain. Put them in a comfortable place where the air is good. Encourage the animals to rest. Stouder suggests an open shed with plenty of dry bedding

Farmers Plan To Build 11,423 Miles Of Terraces To Check Soil Washing

Terracing is gaining popularity in Iowa. The Soil Conservation Service reports that soil conservation district farmer's plans included 11,423 miles of terraces up to July, 1947. Nearly 4,000 miles have been built, more than double that of last year

Ray Armstrong, agricultural engineer at Iowa State College, says that terracing isn't a competitive practice planting on the contour and a good rotation program must go along with it to save the soil. Building a terrace is a mechanical means of shortening the slope. Water either is absorbed or moved off laterally at a slow velocity decreasing its soil-carrying capacity.

Two Types

Two types are recommended, level and graded terraces. The first to fit the needs of western and southwestern Iowa. The other works in the rest of the state.

Level terraces are advocated in western and southwestern Iowa, if Marshall silt is 60 inches deep. This soil is pervious enough to absorb the normal rainfall. Use at least a 16-foot cross section channel. There is no need for a terrace outlet over grassed waterways.

Armstrong says to construct a broad base with a gentle back slope. A block constructed at every 300 to 500 feet will prevent destruction of the whole terrace system if one section over-tops.

Graded terraces are recommended for the rest of the state The top soil is less pervious and water has to be drained off over grassed waterways.

Grassed Waterways

Grassed waterways should be built one to two years before the terrace construction is begun. This gives the sod time to get well established, Armstrong says. If a terrace is built first the water dumped on bare soil, extreme soil loss will result.

Armstrong advocates blocking the upper end of the terrace. Start with a two-tenth percent grade—two—tenths of a foot drop per 100 feet of horizonal distance. Increase to a four-tenth percent slope at the terrace outlet. This sloping will give ample discharge of water and at a slow enough velocity to prevent erosion. Use a wide base terrace with a 12 square-foot cross section channel for grade terraces.

Build Top Soil

If the farmers isn't acquainted with terrace construction, it would be wise to build only the top two or three inches first. Then become acquainted with terrace maintenance before going farther down the hill.

Always start the terrace at the top and work down. Get technical advice from the soil conservation planner or county extension director before building terraces, Armstrong says. An improperly laid out and an inadequately built terrace may cause more damage than good.

From where I sit ... by Joe Marsh

Metropolitan Papers Please Copy!

Folks here were burned up over an article on Our Town I reprinted from a city paper. Made us sound like a bunch of "hicks" who whittled sticks and wore chin whiskers. (Last person I saw with chin whiskers was passing through on his way east.)

So I ran an editorial on how we spoke of city "slickers"—as overdressed wiseacres, only interested in making money, and spending it in night clubs.

Fact is, if we got to know each other we'd probably find we're not much different, underneath. City folks work hard; like to come home at night to their families; and relax with a moderate glass of beer, like we do.

From where I sit, it doesn't matter if you live in an apartment house or on a farm—work in an office or a cornfield—the American tradition of quiet home life, temperate habits, and neighborliness is common to all of us.

Joe Marsh

STREAMLINED MARINE CORPS . . . Streamlining its forces for modern warfare, the marine corps is placing greater emphasis on small units and increased firepower. Shown here is a group of Second Division marines marching back to camp after an extensive day of maneuvers on the beach at naval amphibious base, Little Creek, Va.

SAGA OF ACHIEVEMENT

Marine Anniversary Recalls Proud Heritage of Service

WNU Features.

Six months after establishment of the corps, United States marines made their first landing on someone else's beach in 1776, an action which has been repeated successfully more than 200 times in the illustrious and colorful history of the heroic fighting organization.

Founding of the marine corps on November 10, 1775, by act of the Continental Congress and the proud marine heritage of tradition and achievement are being recalled this week as the traditional birthday celebrations are held throughout the world.

This year, for the first time, the leathernecks are being joined in celebrations noting the 172nd anniversary of founding of the marine corps by the new, postwar citizen marine corps, the leatherneck reserve force which is being built up throughout the country.

From the Shores of Tripoli in 1804 and the Halls of Montezuma in 1847, marines have carried the American flag around the world. Their battle record in every conflict, beginning with the Revolutionary war and continuing through Guadalcanal, Tarawa and Iwo Jima, still indelibly carved in memory as World War II battle shrines, have earned for marines the tradition of being true to their motto of "Semper Fidelis—Always Faithful."

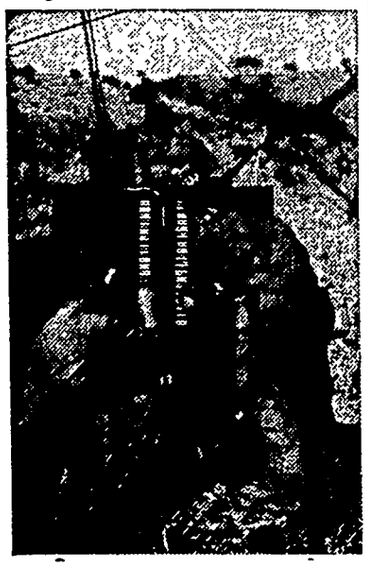
Always a "ready force," the marines have lived up to that reputation even in such varied postwar assignments as guarding historical documents aboard the Freedom Train, setting a new speed record for jet-propelled planes, training Venezuelan marines, demonstrating the latest amphibious tactics to midshipmen or cadets and serving as part of the occupation forces in Japan.

To keep attuned with modern atomic warfare, the marine corps is undertaking a complete streamlining of its forces. Smaller but harder-hitting units are being formed which will have the flexibility and mobility needed for rapid movement.

Back of these revamped first-line defense forces will be the new citizen marine corps. These citizen marines, who live at home and hold their civilian jobs, will be trained at local armories and airfields in the marine tradition for service if needed "in the air, on land and sea."

A modernized system of up-to-the-minute instruction in new developments and technical training will be offered to citizen marines who volunteer for sparetime instruction.

A nationwide enrollment drive for the citizen marine corps opens this week in connection with the anniversary festivities. The campaign will reach its peak in January.



CITIZEN MARINES . . . Members of the citizen marine corps play an integral role in the revamped marines. Three members of the organized marine corps reserve are shown here setting up field communications during summer maneuvers.

Programs Attuned To Locale Planned For Luxury Trains

CHICAGO. — Packaged entertainment, fitted to the locale and produced by showmen in studios before the train ever leaves the station, is the latest promise in luxury travel by the railroads.

Everything from physical comforts to psychological color and sound effects are being utilized by train designers to please the passenger and make him fully conscious of the ease and relaxation of train travel.

Latest in the long list of postwar improvements is the plan of the Santa Fe railroad to use wire recordings for reproduction over the public address systems in new passenger equipment now under construction at shops of Pullman-Standard Car Manufacturing company, in Chicago.

In designing programs for these new trains, it is planned to have a producer study their specific routes and then select music and entertainment to fit the locale. Rivers, creeks and waterfalls will call for sparkling, tinkling music. Indian country may call for music with the chanting undertone so characteristic of the early American Indian folk and war songs.

Because nothing short of a major catastrophe interferes with the railroad schedule of a fast, cross-country streamliner, the producer in the studio will know in advance the exact time a train will pass through certain country. He will select his entertainment accordingly. His timing may call for the techniques of the radio producer; his choice of music an intimate knowledge of human emotions and history of the country.

Both Santa Fe and Pullman-Standard engineers point out that the use of wire recordings has several advantages in this type of custom-built entertainment. The units are small and compact and several hours of entertainment can be recorded on a spool of wire no larger than the average fishing reel.

Once set in motion, the unit requires no attention, as announcements and dialogue will be worked into the program at the studio. However, should special announcements be required, a flip of a switch will change the circuit to a microphone in the steward's office and another flip will bring back the wire recorder with practically no loss of time to upset the predetermined schedule.

Comics Lend Cue For Pulling Teeth

WESTFIELD, MASS.—Taking a cue from the comic strips, John Dvorchak, 65, a tailor, decided to save a dentist's bill by pulling out teeth with pliers.

The method proved successful for the first tooth, Dvorchak reported. Two more, he feels, have to come out but he will await a steak roast, for which he'll probably need the teeth, before pulling them in the same way.

Girls Prove Adept at Fooling Fish

PORTLAND, ORE.—Catering to one of the last all-male sports fields, two Portland sisters have made big business of the fish fooling game.

In their business of manufacturing lures for game fish, the Misses Ardath and Irene Bunnell admit that they frequently have more trouble overcoming masculine sales resistance than providing trout with a phony meal.

"Women don't know anything about either casting or tying flies" seemed to be the typical sportsman's reaction to their line of coachmen and golden demons when the girls first launched their business.

Soon, however, the Portland sisters were giving established Scotch fly tiers stiff competition. Zane Gray, the novelist and one of America's most notable fishermen, was one of their first customers.

Democrats' 1948 Chances Uncertain

Truman's Popularity Grows But Party Itself Is Shaky

By BAUKHAGE
News Analyst and Commentator.

(This follows a series on the men most talked about as candidates for the Republican presidential nomination).

WASHINGTON.—One Sunday last month, a friend and I watched President Truman unveil a plaque on Covenant First Presbyterian church. The occasion was a ceremony establishing the church as a national house of worship for Presbyterians.

Just previously, a wreath had been laid on the nearby statue of John Witherspoon, Presbyterian clergyman, signer of the Declaration of Independence, and one-time president of what is now Princeton university.

"There never was a time," President Truman said, in paying tribute to John Witherspoon, "when we needed more of the backing of those people who believe in the Golden Rule, and who believe in the teachings of Jesus Christ."

The President was, of course, speaking of moral support, but he had reason to be rather cheerful because of another kind of backing which he had just learned he had — the kind measured by Dr. Gallup's polls. Gallup called it "one of the most dramatic reversals of political sentiment in history."

Baukhage

On October 16 of last year, the poll reported Democratic party strength at its lowest point in 16 years. Three weeks later, the survey was confirmed at the polls with election of a Republican congress.

But today, Mr. Truman's popularity is way up. A year ago the score was 53 to 47 in favor of the Republicans; in the last count it was 56 to 44 in favor of the Democrats.

On the question: "Do you approve or disapprove of the way Mr. Truman is handling his job as President?" the scoreboard said: Approve — 55 per cent Disapprove—29 per cent. The rest expressed no opinion.

Much water has flowed over the dam since the two polls were taken. More will flow; and, at any rate, no poll can measure the imponderables facing the Democrats. They have been going through a whole cycle of hopes and fears. The October poll may have been almost as surprising as pleasing to party leaders. They know there must be an end to all things, and it is pretty hard to prove that the stream has not been crossed and that the voters who used, sometimes, to elect Republican presidents, still shudder at the danger of changing horses.

The one biggest abstract obstacle to the election of the Democratic president is the fact that the Democrats have just been around too long. Undoubtedly the biggest concrete threat is General Eisenhower. When that atomic boom first threatened to break, the President was on the high seas, but the details were reported to him blow by blow—and it was quite a blow.

Probably the next biggest headache is the internal condition of the party. After long delay and much dissatisfaction, a new national chairman, Sen. Howard McGrath (Dem., R. I.) was selected, and welcomed in most quarters. He has a job cut out for him because the Democratic machine has grown very rusty in the last years, and it is not only rust which has corrupted.

Nor is it the machine alone that creaks. Will-o-the-wisp Wallace with his constant threat of a third party is a threat to the Democratic party itself. Nobody believes that a third party candidate could possibly be elected as things stand now.

But did you ever see that traffic-safety slogan: "Don't try to guess what a child will do?" Democratic leaders are up against the same thing. They don't dare guess what that problem child, Henry Wallace, will do. He is quite capable of going ahead and starting a third party with the full knowledge that it couldn't accomplish anything but the election of a Republican president.

A third party would have not merely a nuisance-value, but Wallace might dream up a long-range scheme of leading a political labor movement like Britain's. After many defeats, that turned into a political party which finally attained power and put a socialistic impress on the whole British national economy. So the Wallace threat is a very definite one.

Wallace

And what about the labor vote? It has long been a theory, iterated by former AFL boss Gompers, and (until passage of the Taft-Hartley act) reiterated by his successor, Mr. Green, that there was no such animal.

Franklin Roosevelt claimed there was no labor vote, as such. Former Secretary of Labor Frances Perkins said there was none, and in those days, there wasn't, despite the existence of the American Labor party in New York City.

I doubt that there is a "labor vote" now, despite the AFL's new "Education and Public Relations" unit, and the CIO-PAC, and their threats to punish supporters of the Taft-Hartley law. As a matter of fact, I understand opposition to the law is cooling, except where fires are being artificially fanned, and old-timers tell me it will (a) be modified and (b) be forgotten.

The fall congressional election in the eighth Pennsylvania district where such Herculean efforts were put forth to make the bill an issue, didn't prove too much either way, except that the highly-organized CIO campaign did NOT defeat the Republican candidate.

Party Machinery Has Deteriorated

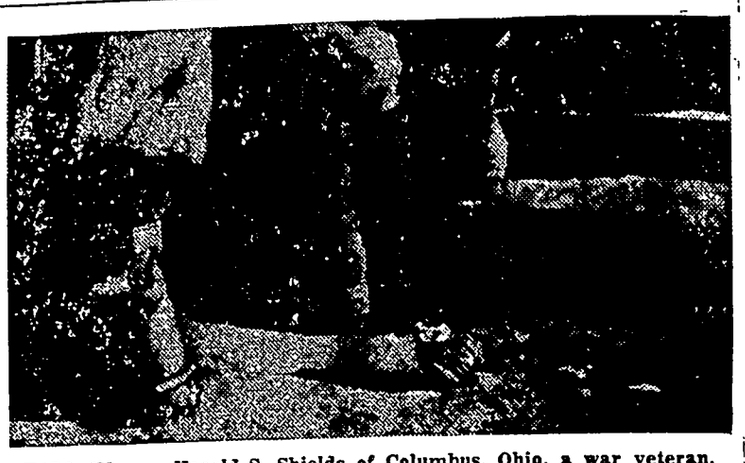
Democratic party machinery has deteriorated rapidly since 1938 when it was discovered that Roosevelt's coat-tails were no longer strong enough to put local candidates into office. Gradually, precinct, city, county and state organizations began to take far more interest in electing local officers than they were in working together as a unit for the national candidate. In Roosevelt's case, that was hardly necessary. And the White House got into the habit of thinking it wasn't necessary to do much for the local people either. So the gulf widened.

It is true that real bell-ringing was carried on by the left wing organized around the CIO-PAC, but in some cases this support proved the kiss of death. The Democratic machine will have to work for the co-operation of Wallace and the present offshoots of CIO-PAC because it cannot afford to alienate that type of support. Gallup a month or so ago reported in a survey of political orientation that 50 per cent of the American people favored a middle-of-the-road policy

Of course, much depends on who becomes the Republican candidate for president. That is the reason that the possibility of an Eisenhower or even a MacArthur on the horizon raises jitters in the executive mansion.

Much also will depend on the strength of the big city bosses. The Kelly machine is pretty weak. Chicago's new Mayor Kennelly is giving the city an administration such as it hasn't had in a long time. But he has weakened, not strengthened, the old Kelly outfit. However, I hear that Sen. Scott Lucas a down-stater, who always fought Kelly until the last time, may run for governor of Illinois. He is strong down-state. This might help Truman with the Illinois delegation.

How strong will the new Kansas City machine be? O'Dwyer is refurbishing Tammany, but the Tiger hasn't its old wallop. How much the greatly-weakened Hague machine in New Jersey can contribute, I don't know. There is one thing to be considered. Almost all the machines (except Crump's Memphis regulars) have been weakened by the growth of power of the labor bosses. What the Democrats may gain by the labor bosses' influence in attracting some of the liberals who made up the Roosevelt following, may be lost in alienating some of the old-line party workers.



FALL IN . . . Harold S. Shields of Columbus, Ohio, a war veteran, won the grand prize ($1,500) in the newspaper national snapshot awards contest this year with this picture of a baby sparrow in a situation unique among baby sparrows. Shields called it "Fall In."

NEWS REVIEW

Meat, Wheat Peril Seen; Get Tough: U.S. Public

FOCD PUZZLE

Meat vs. Wheat

Domestic food situation in the U. S. is entering a critical stage, with two aspects standing out in sharp opposition to each other:

1. The government, determined to ship 500 million bushels of wheat to Europe by next June, is campaigning to save a major portion of that amount by cutting down on the feed consumption of cattle, hogs and poultry That line of reasoning holds that smaller flocks and feeding to lighter weights will save more grain than any other single effort.

2. The supply of meat is going to be considerably less than it has been and the demand will be greater. Meat prices are expected to go much higher in 1948. Further curtailment of meat production by saving grain at the feed trough will intensify that already serious situation.

There is no danger of a bread or food shortage of any kind this winter because of the nation's bumper wheat harvest. The pinch, if it comes, will appear after the middle of next year, precipitated by a currently threatening drouth and failure of the winter wheat crop. Added to that is the fact that domestic uses, plus exports, will leave from this year's harvest of 1.4 billion bushels only a 100 million-bushel carryover by the time of the next harvest — too small a volume in the event of a short crop.

Meat, which right now is a little cheaper than it has been because more animals are being slaughtered, will continue in great demand next year because consumer buying power will remain high.

The supply, however, will be less. The agriculture department estimates there will be only 21.5 billion pounds of meat produced in 1948, compared to 23.2 billion pounds this year. There will be 4 million fewer cattle on farms next January than last January, smaller hogs will be sent to market and there will be no increase in the stocks of sheep, which are at an 80-year low.

PLAGUE: *Egypt Stricken*

Cholera, the dreaded black plague is spreading so swiftly in Egypt that a total of 6,000 dead has been predicted by year's end.

With many stricken villages isolated by troops, other small communities are ringed with bonfires day and night in the belief that fire will keep out the disease.

Meanwhile, neighboring nations were taking steps to prevent the spread of cholera from the upper Nile valley. Greece, Italy and Palestine have discontinued international traffic, while private shipping lines will bypass Egyptian ports and air travel is diverted away from Egypt.

Outside help in combatting the disease is at a minimum in Egypt. Swiss scientists alone were said to be helping local health officers. There is a desperate shortage of vaccines, DDT and medical specialists.

GET TOUGH: *U. S. Approves*

Soviet leaders, who cry "warmonger" every time an American diplomat splits an infinitive, are gravely in error if they suppose there is any major cleavage between the American public's views on Russia and the state department's so-called "tough" policy toward the Soviets.

That conclusion was brought out in a recent Gallup poll which indicated that, actually, the predominant mood of public opinion today

favors an even tougher policy than the state department is following.

Answers to the question, "Do you think that in dealing with Russia and other countries the U. S. is insisting too much on having its own way?" were: Yes, 12 per cent; No, 78 per cent; No opinion, 10 per cent.

Further, 62 per cent of the American people believe that the U. S. is being too soft in its policy toward Russia. Only 6 per cent think it is being too tough, and 24 per cent say our official attitude toward the Soviets is about right.

FINAL TOUCHES: *Marshall Plan*

After caroming from praise to criticism to condemnation for the past few months, the celebrated Marshall plan to help Europe regain its feet is being whipped into final shape under direction of Secretary of State George Marshall, its progenitor.

One known fact loomed large in the mind of the American taxpayer: The plan may cost up to 20 billion dollars for the four-year period during which it will be in effect.

Marshall, who abandoned temporarily his debating in the U. N general assembly, returned to his Washington office to put the finishing touches on his plan, which will be laid before congress when the special session opens November 17.

The Marshall plan, subject to late revisions, may be outlined broadly in these main points:

1. U. S. would make available to Europe next year a combination of relief and recovery supplies totalling about six billion dollars. Relief supplies (food) would be free; recovery supplies (machinery) would be financed with loans.

2. Because of shifting conditions, it will be impossible accurately to forecast the amount of help Europe will need beyond the first year.

3. Sums from the U. S. would decrease each year as recovery progress was made.

4. The plan would be administered in the U. S. by a new government agency and in Europe by an organization representing the 16 nations which drew up their estimate of needs at the Paris conference.

75,000 WORKERS

Building U.N. Home Huge Task

The 65 million-dollar job of constructing the United Nations' world capital along the East river in New York City will benefit more than 75,000 workers during the next three years, headquarters planning officials have predicted.

Chief architects of the future skyscraper city of glass and marble estimated that a total of 25,000 persons eventually would be employed in construction and other direct work upon the actual site.

An additional 50,000 workers are expected to contribute indirectly in production of materials and in other outside labor. Labor expense will account for 42 million of the total 65 million dollar construction cost.

Currently, the more than 50 administrative, architectural and engineering members of the headquarters planning staff are more or less marking time while they wait from day to day for some word on how the skyscraper project is to be financed.

A sledge-hammer detail of 100 workers already has demolished about 40 per cent of the old slaughter houses and garages now occupying the area, but no large-scale construction can begin until the general assembly gives the go-ahead signal.

And that signal will not be forthcoming until a financing program, almost certainly to be based on a big United States loan, has been arranged.

In the meantime, considerable work is being done on refinement of detailed designs, improvement of a master system for circulating people and vehicular traffic through the international zone and on preliminary surveys regarding interior design and furnishings.

Officials say U. N. may decide to follow the example set by the League of Nations and accept furnishings from each member country, each nation contributing a product for which it is famous—like rugs from Persia and tapestries from Belgium.

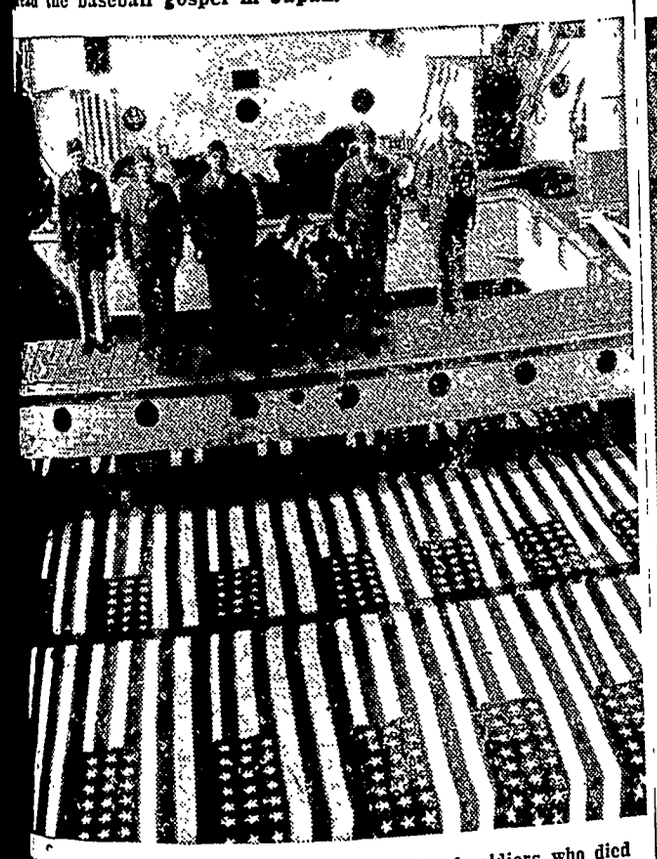
IED FOREST . . . Chimneys rising grotesquely skyward are silent sentinels of the flaming dis- that struck the Maine resort center of Bar Harbor. They mark the site of the once beautiful Malvern Hungry forest fires were responsible for the deaths of at least 22 persons throughout New England ught 32 million dollars damage. In Maine, 851 permanent homes and 297 cottages were destroyed 0,000 acres of forest were consumed by the flames. Bar Harbor itself was two-thirds destroyed in that raged for days.

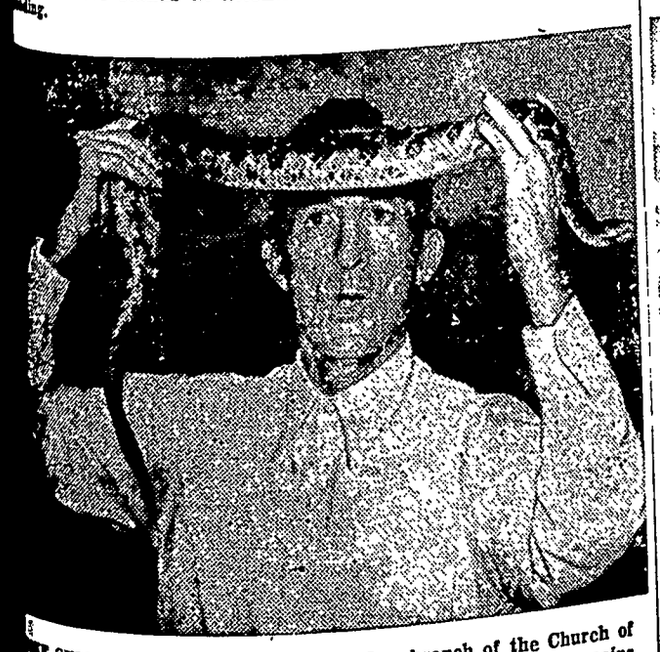
AMERICAN CUSTOM TRANSPLANTED . . . Not so many years ago, anyone caught playing base- in Japan probably would have wound up playing shortstop before a firing squad. But things are differ- now, and the kids are taking up the game. Cpl. Roy Blumenauer of Frederick, Md., is shown here ing for his team of Japanese youngsters, G. I. guests at the army's Kanbayashi rest-hotel at Yu- ki, a Japanese mountain village. The Red Cross encourages the pastime and supplies the equipment read the baseball gospel in Japan.



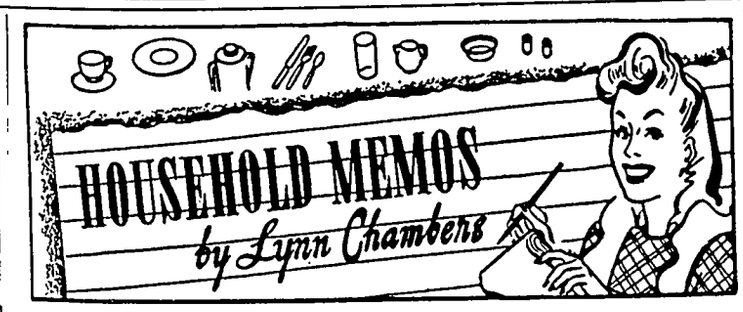
MAN PATTERN . . . Flag draped caskets of soldiers who died reas and now are being returned to their loved ones in the United es form a stately pattern in the hold of the army transport, Joseph Connolly, which carried them from Europe. The ship brought 6,200 es to New York in this first shipment of European war dead. An guard here stands at attention above the caskets prior to the ding.

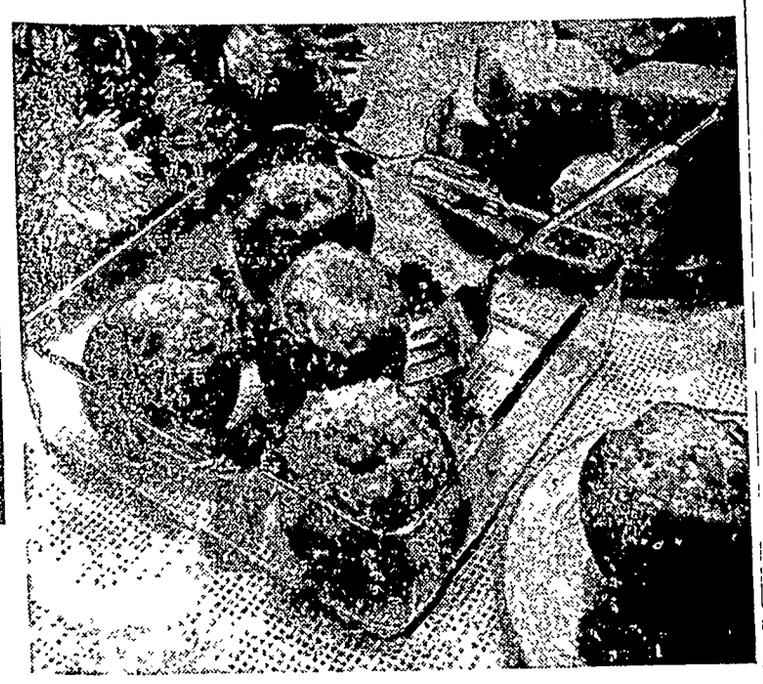
TALL SPORTS STORY . . . Coach Ken Loeffler of the St. Louis Bombers basketball team calls Ephraim "Red" Rocha a "real find." Rocha is 6 feet, 8½ inches tall, weighs 185 pounds and can't miss the basket.

REFORMS AT 92 . . . Since 1900, James Ferguson has spent more than 45 years in jail for various offenses in his native England. Recently convicted for house- breaking, he was paroled.



E CULTISTS DEFY DEATH . . . One branch of the Church of has used poisonous snakes—rattlers, copperheads and moccasins religious faith demonstrations in Kentucky for the past 10 years, ite the fact that a state law forbids snake-handling on penalty of ne. Here, W. H. Edmonds holds aloft a big rattlesnake during ce at the River street Church of God in Harlan, Ky.





Baked Stuffed Tomatoes Save Meat
(See Recipe below)

Meat Savers

Every now and then when we are called upon to save meat, it helps to have dishes with meat-like texture and flavor so appetites are satisfied. Fortunately there are certain combinations of vegetables which, when served with some cheese, are excellent just for such a purpose

Tomatoes with a bit of bacon are satisfying for hearty appetites; so are squash and lima beans, with a bit of sausage. Au gratin combinations are interesting, too, from the point of view of satisfying appetites as well as the budget.

Use the recipes given today when you want to save on meat, these dishes are not meant to be used as a vegetable side-dish for the average family as they are just a bit too much on the hearty side for such a purpose.

***Baked Stuffed Tomatoes.**
(Serves 5)

- 5 tomatoes
- 5 slices of bacon
- 2 cups bread crumbs
- 2 tablespoons chopped onion
- ½ teaspoon salt
- ⅛ teaspoon pepper
- ½ cup grated cheese
- Sprigs of parsley

Cut tops off tomatoes and remove pulp. Cook bacon until crisp Break into small pieces Make a stuffing by mixing tomato pulp, bacon, bread crumbs, onion, salt and pepper. Fill cavities of tomatoes with the stuffing Sprinkle tops with grated cheese Place tomatoes in a heat-resistant glass dish. Bake in a moderately hot (400 degree) oven for 30 minutes. Serve garnished with parsley

Squash, Sausage and Lima Bean Platter.
(Serves 4)

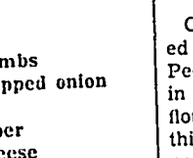
- 2½ cups cooked, mashed squash
- 1½ cups cooked lima beans
- 1 tablespoon butter
- 8 sausages

Arrange squash in four nests on a heat resistant glass utility platter Place lima beans in center of each squash nest. Dot lima beans with butter. Place sausages around squash nests. Bake in a moderate oven (350 degrees) for 30 minutes or until sausages are done.

Sausage Stuffed Eggplant.
(Serves 4)

- 1 medium eggplant
- ⅔ pound pork sausage
- ½ cup chopped onion
- 1 clove garlic, minced
- 1 green pepper, chopped
- 2 tablespoons chopped parsley
- 2 cups cooked brown rice
- ½ teaspoon poultry seasoning
- Salt and pepper
- ¼ cup grated cheese

Cut eggplant in half lengthwise. Cook in boiling salted water for 10 minutes, or until it is almost tender Cook sausage meat slowly in large skillet until lightly browned, stirring occasionally. Add onion, garlic, green pepper and parsley, and cook until vegetables are almost tender Pour off some sausage fat, leaving about ¼ cup in pan. Add rice. Scoop egg-plant pulp out of partly cooked halves, leaving a half-inch shell. Chop pulp and add to sausage mixture; add poultry seasoning and salt and pepper to taste. Fill eggplant shells with the mixture. Sprinkle with cheese. Bake in a moderate oven (350 degrees) until well browned



LYNN CHAMBERS' MENU

Celery and Potato Soup
*Baked Stuffed Tomatoes
Hot Biscuits
*Baked String Beans with Mushrooms
Molded Pear Salad Relishes
Chocolate Cake
Beverage

*Recipes given.

***Baked String Beans with Mushrooms.**
(Serves 6)

- 1 pound string beans, slivered
- 1 pound mushrooms
- 2 tablespoons butter
- 2 tablespoons flour
- 2 cups milk
- ¼ cup buttered bread crumbs

Cook green beans in boiling salted water until tender. Drain well. Peel, slice and saute mushrooms in butter. Dredge mushrooms in flour and add the milk. Cook until thickened Combine with beans and pour into a buttered baking dish. Over the top sprinkle the bread crumbs. Bake just long enough to heat through and brown the crumbs.

Onions with Potatoes.

- 8 bermuda onions
- 3 cups diced cooked potatoes
- Salt and pepper
- ⅔ cup milk
- 2 tablespoons butter
- ¼ cup cheese, grated
- Paprika

Peel the onions and cut a slice from the top of each. Parboil in boiling salted water for 15 minutes. Drain and scoop out, leaving just a shell. Season potatoes with salt and pepper. Place in an iron skillet over a low flame, cover with milk and dot with butter. When all the milk is absorbed, fill the onion shells with the potato mixture and cover with grated cheese. Dust with paprika and run under the broiler flame to melt the cheese and heat thoroughly.

Corn and Bean Pudding.
(Serves 6)

- ½ cup butter
- 2 eggs, separated
- 2 tablespoons flour
- ½ teaspoon sugar
- ½ teaspoon salt
- ½ teaspoon white pepper
- Paprika
- 1 cup soup stock
- 1 cup cream
- 1 quart cooked and shredded green beans
- 2 cups corn
- 1 chopped green pepper
- 1 chopped pimiento
- 1 teaspoon chopped parsley

Melt butter; add yolks, then flour, sugar, salt, pepper and paprika. Add soup stock and cream. Fold in egg whites and vegetables. Pour into a greased baking dish and bake in a moderate oven (350 degrees) for 30 minutes.

LYNN SAYS:

Save Time Keeping Clean With These Tips

Warm soapsuds and water are the best treatment for cleaning leather furniture

When you place a clean cover on your ironing board, have it wet and pull it tightly, Tack it on and it will dry wrinkle-free.

When your china dishes become slightly discolored, use a little whiting to clean them Rinse well in lukewarm water.

Patent leather is best cleaned with a clean, lint-free cloth dipped in vinegar.

To keep seldom-used kettles from acquiring a musty odor, store without covers.

An easy way to scour pots and pans is to use a cork dipped in scouring powder.

Iodine stains from a rug are best removed by sponging with denatured alcohol, followed by a wash with mild soapsuds made in lukewarm water.

SEWING CIRCLE PATTERNS

Pretty Yoked Gown for Winter Popular Lumber Jack Outfit

FOR cold winter nights — this pretty yoked nightdress will be cozy and warm made up in a flower sprinkled flannelette. If you like, it can have short sleeves and be tied with a narrow belt.

* * *

Pattern No. 8086 is for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, long sleeves, 5¼ yards of 35 or 39-inch; 1 yard purchased ruffling.

Comet's Tail

The tail of a comet is always on the side away from the sun, probably because it consists of extremely rarefied matter thrown off by the comet, and is powerfully repelled by the radiant pressure of the sun.

Let Winter Come

A COMFORTABLE, well tailored lumber jacket outfit that's destined for a busy winter. Armholes are deep, cuffs snug, skirt smooth and free. Choose a soft grey woolen in solid tone or striped.

KLEMME LOCAL NEWS

Mrs. Martha Ridder, who has been visiting with Klemme relatives for some time, has gone to Fort Dodge where she will spend the winter at the home of her son-in-law and daughter, Mr. and Mrs. O. A. Fredin.

Dr. and Mrs. A. H. Dulmes and son Dick, drove to Grundy Center Friday afternoon to help Mrs. Dulmes' mother, Mrs. Mary Mutch celebrate her 88th birthday. Mrs. Mutch has not been well for several months. The Dulmes family returned home the same evening.

Herb J. Bailey was visiting with old friends and looking after business in Klemme Saturday. Mr. Bailey spent most of the summer at Spirit Lake and enjoyed a lot of fishing there and also in Minnesota. He will spend a few days with his daughter Ruth and husband at Oskaloosa and will then go south. He expects to spend the winter at San Diego, California.

Mr. and Mrs. Eugene Greiman entertained to dinner Sunday Mr. and Mrs. Walter Rosendahl and family; Mr. and Mrs. Harvey Barz and family; Mr. and Mrs. Marvin Barz and Darlene; Mr. and Mrs. Ronald Barz and family and Mr. and Mrs. Fred Barz.

ORDER FERTILIZER NOW FOR NEXT YEAR'S USE

Order fertilizer for next year now, advises H. R. Meldrum, Iowa State College agronomist. With last year's consumption over 14 times larger than in 1940, and the amount used in 1948 expected to be even larger, the fertilizer industry is having difficulty meeting demands.

Expected production by the fertilizer industry for next year includes a 9 percent increase in nitrate, a 10 percent increase in phosphoric acid and a 3 percent increase in potash. These figures are on a national basis, and don't necessarily mean that Iowa farmers will get all they want.

Potash is the shortest in supply at this time. If this situation continues, farmers will be wise to save what potash they have for use on corn, since it is here that the largest response is obtained.

In general, nitrogen should be used for small grain, phosphorus for legumes and a combination of nitrogen, phosphorus and potash for corn, Meldrum says. More and more farmers are finding fertilizers a paying proposition for their soils. They have purchased more fertilizers because of a higher farm income and because the price relationship between the cost of fertilizer and the value of farm products is favorable.

The fertilizer industry has more than doubled its output compared with the average of the 5 prewar years.

Fifty-Fifty Class

The Fifty-Fifty class of the Methodist Church held their annual dinner Sunday at the church parlors with a goodly number present. After the dinner, there was a program and short business meeting with the following officers elected for the ensuing year: President, R. A. Jorgenson, Jr. Vice President, Claude White; Secretary and Treasurer, Mrs. Everett Guth; Sick Committee Chairman, Mrs. R. A. Jorgenson, Jr.; Relief Chairman, Mrs. Clifford Montgomery and Teacher, J. A. Chambers. All those having articles to be packed for over seas relief, please call Mrs. Montgomery, as they are packing a box this week.

SPORT SPOTLITE
—By Rick and Oscar

The Klemme Shamrocks have started off the season by beating Hayfield 57 to 20. Schmidt and Carolous took the scoring honors by making 24 and 22 points respectively. Montgomery and Lacey both playing their first game on the first string looked good. Baack played his usually good game while Grosshuesch messed up the night by fouling out in the first quarter.

The Shamrocks second team ripped into the Hayfield Hornets second stringers to defeat them on the Shamrocks home floor with the scoreboard reading 38 to 15 when the final buzzer sounded.

The boys in green and white were a little bit stiff at the start but soon had things rolling in fine style with the score 25 to 5 at the end of the first half.

Butch Brinkman was the high pointer for his team with a total of 14 points. Butch did a nice job of ball stealing that really fouled up the Hornets offensive drive.

Red Josten was next to Butch getting 11 points. Dick Finders got 6 points and also contributed 2 points to the first team game.

The Shamrocks next opponent will be Woden so be on hand Thursday to see the changes and improvements.

HEAVY, WET SNOW FELL IN THIS PART OF IOWA ON FRIDAY NIGHT

This part of Iowa is really having its first good taste of winter weather as about 4 to 6 inches of heavy, wet snow fell in this section Friday night. Luckily there was no wind with the snow so there were no drifts to battle

With the snow came colder temperatures and near zero readings were recorded in parts of Iowa. Around Klemme the mercury dipped to a chilly 6 degrees Monday morning.

Traffic News

KNOW YOUR TRAFFIC LAWS

Before passing, or attempting to pass another vehicle proceeding in the same direction on the highway, the operator of the overtaking vehicle, not within a business or residence district shall give audible warning with his warning device. So states the Iowa State Law of the Road.

This law serves several purposes, but they all are concerned with the safety of the motorists involved, and their passengers.

When a driver sounds his horn before attempting to pass, he gives fair warning to the motorist ahead. That motorist is then required by law to give way to the right, if practicable, and to refrain from increasing his speed.

If passing is to be accomplished safely, the advance motorist must be aware of the fact that he is being passed. Otherwise he may inadvertently block the passing vehicle. Also the advance motorist may see an obstruction in the roadway, not clearly visible to the overtaking motorist, which would make passing dangerous. He can then instruct the overtaking motorist, by means of a hand signal, to refrain from passing at the moment.

It should be noted that the law provides for audible warning to be given before passing, not while passing.

Legion And Auxiliary Will Meet Next Tuesday Evening

The Klemme American Legion and Auxiliary will meet at the hall on Tuesday evening, Dec. 2nd.

The Auxiliary ladies plan a gift exchange with the gift not to exceed 75 cents in value.

Mr. and Mrs. Henry Ward and Mr. and Mrs. Art Polsdofer are on the serving committee.

Birthday Party

Mrs. Albert Priebe gave a birthday party for her daughter, Meriam on Saturday afternoon to which was invited Meriam's class mates.

The afternoon was spent in playing games after which Mrs. Priebe served a nice lunch. Meriam received some nice gifts.

Mr. and Mrs. Conrad Quandt left this noon for Kansas City where they will spend Thanksgiving with their son-in- law and daughter, Mr. and Mrs. Ernest Gerardi and daughter, Gracka Maria. They expect to return home Friday or Saturday.

Rev. Earl Josten and son, Bobbie of Des Moines visited Saturday with Rev. Josten's father, John Josten, and other Klemme relatives. They were here to attend the sale of the late Erick Josten house.

Joan Christie, daughter of Mr. and Mrs. Verner Christie entered Mercy Hospital at Mason City last Thursday for treatment for pneumonia. She was able to be returned home Monday afternoon.

Mr. and Mrs. Archie Johnson of Balaton, Minn. came for a week's visit at the parental Verner Lewis home east of Klemme.

Ruth Ann, daughter of Mr. and Mrs. Walter Lauster was ill all of last week and confined to her bed. She is greatly improved at this writing.

SHAMROCKS SPLIT BALL GAMES WITH BRITT EAGLES

The Little Shamrocks defeated the Britt Reserves here Tuesday night 34 to 27 with Finders leading the attack with 11 points, Brinkman 9, Josten 8 and Trumbell 6.

The Shamrocks played a fairly even game the first two quarters with Britt in the lead at the half 8-7. From there on the Shamrocks bogged down and Britt was in front 18-11 at the end of the third quarter and won in the final 28 to 18.

Red Schmidt made 7 points, Carolus and Grosshuesch each 5 and Baack 2. Britt's little forward, No. 21 smashed through for 14 points.

County Tourney, Jan. 27 - 30 at Garner.

TOWNSHIP CHAIRMAN NAMED FOR HOME SOCIETY CAMPAIGN

In preparation for the campaign at Garner for the benefit of the Iowa Children's Home Society, Mrs. G W. Templeton of Garner, County Chairman, has announced the following list of workers who will assist her in the drive: Mrs. Gladys Johanson, Mrs. Edith Pollock, Mrs. Hazel Tompkins, Mrs. Fern Katter and Mrs. Elsie Koolbeck.

Hancock County's quota is $1150.00 to be applied toward the $165,000 being raised in the state of Iowa.

Township Chairman who will conduct the fund campaign throughout the County for the benefit of the Iowa Children's Home Society have been announced by Mrs. Emery Weaver of Garner, rural co-chairman, as follows Erin, Mrs. Doyce Friedow, Britt; Amsterdam, Mrs. Wendell Johnson, Kanawha; Madison, Miss Ida Meckstroth, Forest City, Garfield, Mrs. Carl Hoeft, Garner; Twin Lake, Mrs. Herman Hegineger, Belmond; Ellington, Mrs. Kenneth Gast, Miller; Ell, Mrs. Orville Steward, Garner; Avery Mrs. Virgil Cook, Klemme.

Township Chairman have not been secured for the balance of the township but arrangements will be made for those this week The women who will help Mrs. Kenneth Gast in Ellington Township are Mrs. Hanson and Mrs. Rufus Schott.

Iowa Children's Home Society needs the support of every citizen and it is to be hoped that in the campaign in this county that generous support will be given. It does not seem unreasonable to expect that Hancock County will not only reach its quota, but will materially exceed it for such a worthy cause. Especially so since this is the first time in 60 years that such an appeal has been made.

SHAMROCKS REPEAT; TAKE TWO FROM WODEN HIGH CAGERS

The Klemme Shamrocks added another victory when they took both games from Woden here on Thursday night, the Little Shamrocks winning 39-23, while the regulars went on a rampage to win 41-17.

Red Schmidt and Harlan Carolus led the Shamrock attack with 14 and 12 points, while Smith for the losers made 6 points.

600 Took In Carnival

SCHOOL CARNIVAL FRIDAY EVENING WAS A HUGE SUCCESS

Crowd Estimated At Six Hundred Were Present For The Festivities

The Klemme High School carnival was without a doubt the biggest event ever held in the history of the school. A crowd, estimated at about six hundred people milled around the school gym, playing the games and patronizing the many stands. Several hunderd people came early to enjoy the cafeteria supper served at the school.

Supt. A. L. Kingery reports that total receipts for the evening amounted to $1,659.90. He gave $1300.00 as an estimate of the net profits after all expenses had been paid and will have an accurate report published next week.

The ladies of the community started serving supper at 5:00 o'clock. The menu featured home-made buns with hot beef or chicken, doughnuts, pie cake, and coffee. The ladies were kept busy the entire evening serving coffee and sandwiches. At 6:45 p. m. the school band, directed by Stanley Bulka, took over and presented a very fine concert which was followed by a short program presented by Miss Seim's kindergarten pupils and Miss Halfwassen's first and second grade pupils. This was a very popular feature of the evening's entertainment.

The rest of the evening was given over to noise, fun and hilarity in true carnival style, with old and young participating Concessions consisting of the beauty shop, fortune teller, ring the ducks and merchandise stands were doing a lively business while hundreds played the bingo game and won prizes.

Top prizes for the evening consisted of a 220 pound pig given to the school by Ed. C. Buntenback; an electric refrigerator procured for the school through "Stub" Lewis and a portable radio. Clarence Swalve won the refrigerator. Lee Jennings the pig and L. Wolfe of Mason City, the radio. Door prizes went to Mrs. Merlin Neuberger who received an electric iron and Cecil Bridges got a large cake. For the children a little girl got a camera and Tommy Hevilin won a bantam chicken.

"Pat" Patterson and his group of "super salesmen" did a fine job in promoting the carnival and selling tickets. A group of ladies in the community also deserve a lot of credit for the fine work they did in soliciting for the bingo games and for serving the lunch.

The money made at the Carnival will go into the school Activity Fund and will be used for athletic supplies and band equipment, etc.

Birthday Held For Grandma Wille

Mrs. Esther Barz entertained in honor of Grandma Wille's birthday Sunday evening. Those present were Mr. and Mrs. Ernest Palmby from Vernon Center, Minnesota; Mr. and Mrs. Fred Barz; Mr. and Mrs. Leslie Hartbeck and family; Mr. and Mrs. Louis Jurgameyer and Leland; Mr. and Mrs. Walter Rosendahl and family; Mr. and Mrs. Harvey Barz and family; Mr. and Mrs. Marvin Barz and Darlene; Mr. and Mrs. Ronald Barz and family; Mr. and Mrs. Eugene Greiman and family; Mr. and Mrs. Edmund Josten and Donna Lou and Mr. and Mrs. Milvern Barz and Edward Barz.

Grandma Wille received some nice gifts and all enjoyed a fine lunch.

GARNER CARDINALS HERE NEXT WEEK, THURSDAY, DECEMBER 4

The Garner Cardinals high school basket ball teams will come to Klemme next Thursday night, December 4th for a double-header basket ball game with the Shamrocks. This is slated as one of the top games of the season.

BELL'S PRODUCE STORE ON THE AIR THIS THURSDAY AFTERNOON

Fred Bell, proprietor of the Bell's Produce Store was notified by S. C. Borsum, the Sales Manager of the Omaha Branch for Kellogg's Feeds that "Kellogg's Feeds and your fine store will be on the air on Thursday, November 27th at 12:05 p. m. over KGLO, Mason City."

Fred has been doing a nice business in the feed line and this will be the second time this year that the company has broadcast for him.

Hancock County Dairy Products Improvement Association Holds Meeting At Britt

A meeting of the Hancock County Dairy Improvement Association was held at the Legion Hall in Britt, November 18. An interesting evening was spent by a group of 60 men, consisting of plant employees, cream haulers, and board members from all the creameries of the county.

Guest speakers for the evening were Prof. A. W. Rudnick, of the Extension Dairy Department at Iowa State College. His topic was on the general improvement of cream and milk coming into our plants. Russel Weaver, quality control man of the State Brand Creameries spoke on the sanitation and the quality of the butter. Earnest Smith, Dairy and Food Inspector, discussed the improvement of our creameries. Nick A. Venechulk, fieldman for the county, spoke on the quality program as a whole, talking on all three links of the program; the farmer, the hauler, and the creamery operator. Jens Jensen of Britt was master of ceremonies for the evening.

W. S. C. S. Will Install New Officers Dec. 4th Meeting

The Klemme Methodist W. S. C. S. will meet at the church on Thursday, December 4th at which time Rev. H. E. Harvey will install the new officers for the coming year.

Mrs. Frank Sandrey is leader of the Worship Service and Mrs. Harvey is leader of the Pro-program.

Hostesses are Mrs. Herman Gast, Mrs. Ronald Gibbs and Mrs. Mervin Grosbeck.

Erick Josten House Sold At Auction Here Saturday

The Erick Josten house south of the City Hall was sold at public auction by the Josten Estate Saturday. Bidding was lively for the property which finally was sold to Edmund K. Josten for $5,250.00.

Mr. and Mrs. Josten expect to move to town soon. They have rented their farm to Mr. and Mrs. Ronald Barz.

Mr. and Mrs. Ernest Helps of Garner attended the Legion Feather Party here Monday evening.

HELLO, FOLKS!

Mr. and Mrs. Fred Sobek are the parents of a 7½ lb baby girl born Friday night at the Ben Netland home in Klemme.

C. J. Wille Died Suddenly Tuesday Afternoon

TWO PUBLIC AUCTION SALES WILL BE HELD NEXT WEEK

There will be two public auction farm sales in this Community next week. The first is Earle Smith's sale on Monday, December 1st, and the other is Donald Mourlam's sale on Wednesday, December 3rd.

Smith's Sale

Earle Smith has quit farming and is in the service station business in Klemme. He will sell 12 head of livestock and a large amount of fine machinery.

Mourlam's Sale

Donald Mourlam is quitting farming to go into the trucking and corn shelling business and will move to Belmond. Mr. Mourlam features 90 head of livestock and an exceptionally large amount of farm machinery. Much of this is nearly new.

Both of these sales are advertised in this issue of the Klemme Times. Turn to these ads now and study the list of merchandise to be sold. You may find just what you are looking for at these sales.

OLIVER DEALERS HELD A MEETING AT F. J. ARNOLD SHOP

Fred J, Arnold, local Oliver Dealer, was host to the Oliver Dealers in Block 6, which comprises several counties in this part of the state, at his shop last week Tuesday evening. The dealers hold a meeting every two months. The next meeting will be held at Ledyard. There were 29 dealers and Oliver mechanics from 9 towns present at the meeting here.

Mr. A. T. Foley, of the Omaha Branch, was the main speaker. A discussion was also held on Cletrack tractors, combines and corn pickers.

Lunch was served at the Quandt Cafe after the meeting.

County 4-H Banquet Set For Dec. 6th At Garner

The County 4-H Banquet for members and leaders of 4-H clubs has been set for 6:30 on December 6th. The high school music mothers have agreed to serve the dinner. This is the first County 4-H Banquet that has been held in many years.

Awards will be presented to the 1947 winners. Special talent numbers will be part of the program. County 4-H officers will have charge of the program.

4-H members should get their tickets from their local leaders. All tickets should be purchased or reserved before December 2nd. The local leaders will report to the county office on December 2nd.

LEGION HAD SUCCESSFUL FEATHER PARTY MONDAY NIGHT

The Klemme Legion had a very successful Feather Party Monday night with a big crowd prsent. The men took in nearly $600 during the evening and will have a net profit of over $300.

Free hot coffee and doughnuts were served to the big crowd present. The Legionaires plan another Feather Party to be held before Christmas.

Young Ladies Entertained At Court Whist Party

Miss Gertrude Grosshuesch entertained a group of young ladies at her home Thursday evening at three tables of Court Whist.

High scores at each table were won by Doris Johnson, Bernice Tanner and Mrs. Eldon Hagen. The Misses Harriet Oxley and Fredericka Girres of Garner were out-of-town guests.

PROMINENT KLEMME FARMER DIED FROM HEART ATTACK

Funeral Services Will Be Held Saturday Afternoon At The Reformed Church

Cornelius J. Wille, 58, prominent Hancock County farmer, died suddenly Tuesday afternoon at about 4:30 o'clock at his farm home one mile east of Klemme.

Mr. Wille was apparently in good health and had been in town during the day and in the late afternoon had come into the house from the barn to warm up when he was stricken and died in a few minutes.

Services Saturday Afternoon

Funeral services for Mr. Wille will be held Saturday afternoon at the Klemme Evangelical and Reformed Church at 2:00 o'clock with the Rev. Calvin Grosshuesch officiating. Burial will be in the Ell Township Cemetery near Klemme.

Obituary

Cornelius J. Wille, the eldest son of Henry and Antje Wille, was born November 24, 1889 on a farm near Klemme. He was brought to holy baptism in the Ell Town Reformed Church, Rev. Henry Treick, Pastor. He then attended the public and church schools and was confirmed in the Klemme Reformed Church March 27th, 1904 by Rev. Albert Muehlmeier.

On the 18th of February 1914 he was united in marriage to Marie Thieman. Nine children were born to them of whom one died in infancy. During the first year of their married life they lived on a farm 6 miles northwest of Klemme, then they moved to the Schuldt farm northeast of Klemme. Since then they have lived on the Wille homestead. In February 1939 they celebrated their Silver Wedding.

Mr. Wille was a well known farmer of our community and very active in the various farm organizations. At the time of his death he served as President of the local R. E. A., President of the Klemme Cooperative Creamery, Township Chairman of the A. A. A., Board member of the Hancock County Oil Co., Board member of the Farm Security Administration.

He lead a busy life, managing his farm and taking an active part in various farm programs. The family are loyal members of the Evangelical and Reformed Church and take an active part in all activities.

Surviving him and mourning his death are his wife Marie Wille and his children: Norma, Mrs. Harold Rockow, Garner; Ruby, Mrs. Edmond Blanchet, Garner; Ada, Mrs. Vernard Rockow, Barron, Wis.; Adala, Mrs. Russell Bailey, Garner; Raymond, Garner; Aaron, Glen and Darwin of Klemme. Seven grandchildren, one brother, Carl Wille of Klemme, one sister, Mrs. Naska Bock, of Klemme and a half sister, Mrs. John Kendall, Des Moines.

The pallbearers will be: Edwin Thieman, Paul Thieman, Paul Jahnke, Arthur Schlawin, Mithchel Bock and Wayne Greiman.

Miss Iris Rosendahl, pianist, will accompany the following quartett: Dean Jacobs, Robert Baack, Ardell Rosendahl and Edward Barz.

Klemme Lady Awarded KGLO Bouquet Last Friday

Mrs. Lena Schroeder, Klemme, was honored last Friday by being presented with the KGLO bouquet, in this case for her good work in helping out with church work, community work and for being an all around "good neighbor" in Klemme. Congratulations!

Internal Revenue Is Eternal Problem

Income Tax Spectre Haunts Next Session of Congress

By BAUKHAGE
News, Analyst and Commentator.

WASHINGTON.—It is a cloudy fall day, and the last tattered brown leaves are fluttering nervously on otherwise-bare branches, wondering whether it is better to make the plunge now or wait for more favorable breezes.

About the same thing is going on in an old colonial mansion on Connecticut avenue where, beneath those high ceilings and once-aristocratic surroundings, Republican national committee typewriters are clicking, mimeographing machines are whirring and sweet telephone bells jangle out of tune.

Party leaders, like the uncertain leaves are wondering whether the twice-vetoed tax bill, carefully reupholstered and furnished with what they hope in non-bounceable equipment, will bring in the votes this time.

Down the block and across the street in an office-building where the plaster on the walls is hardly dry, sit their opposites, members of the Democratic national committee, in their brand-new quarters. They are hopefully predicting that any "effort to make this tax reduction bill a law when the world is trembling on the edge of disaster, will boomerang.

Baukhage

Democrats say that if a tax reduction bill should pass, is vetoed and the veto overridden, what it does for the folks with over $5,000 income a year will be balanced off by what it doesn't do for the folks below that income bracket.

You remember the original bill, (H.R. 1,) the first bill into the house hopper January 3, 1947. At that time Democrats labelled it the 10-20-30 bill, claimed it would save the man with two dependents and $2,500 a year income only 59 cents a week, while it would save the man with a $100,000 yearly income $250 a week.

But that tax reduction bill and a later one substantially the same were squashed by presidential veto and congress upheld the veto. But now the possibility of something new (and very attractive) has been added—A community property tax provision for every taxpayer.

Briefly this means that a husband and wife may divide their income into two equal parts, computing the tax on each of those parts, and multiplying by two. This naturally cuts the total amount of tax to be paid. Under present tax schedules, for example, the tax on two joint incomes of $50,000 each comes to less than the tax on a $100,000-net income because of the steeply-graduated surtax rates.

GOP Confident Of Bill's Passage

Thirteen states — Oregon, Washington, California, New Mexico, Arizona, Nevada, Idaho, Texas, Oklahoma, Louisiana, Nebraska, Michigan and Pennsylvania — already have community property tax provisions. So has Hawaii. The provision, if inserted in a federal tax bill, would put citizens of the other 35 states on the same basis.

The money savings under the community property tax clause would not benefit those married couples whose combined net income is less than $3,000 because the rates don't change up to that point That is why opponents say this community property tax proposal, too, is aimed at saving money for the bigger taxpayers and doesn't help out the little fellows (although the tax advisor to the ways and means committee tells me that neither would any benefits accrue under this provision to the married couple whose combined income is $5,127,000 a year).

But the Republicans feel sure that this proposal would carry a tax-reducing bill through. They claim many Democrats living in states contiguous to the community - property tax states would support it.

Here's the way Democrats view the situation:

They know that the last tax bill might have been passed over the veto; some say it certainly could have been passed, had it included the community property tax provision. They are not flippant about the Republicans' ability to muster the necessary two-thirds vote this time to override a veto.

But Democrats nourish this hope: That if tax debate is insisted upon before the question of lower prices and European aid (including the long-range Marshall plan as well as emergency aid) is settled, the public will say Republicans are fiddling with politics while Europe burns and will repudiate those Republicans at the polls.

Even if a tax bill should surmount the veto-hurdle, Democrats still hope it will boomerang on the familiar argument, mentioned earlier, that it gives uncommonly little to the common man and is balm of gilead for the high brackets.

Republicans counter with the assertion that tax relief is a crying need. They feel Americans will not be too angry if their financial load is lightened at the expense of Europe, provided that emergency relief is voted and perhaps a Marshall plan accepted in principle but considerably shaved down as to the total actually authorized.

You may have read the report "Taxes and the Budget: a Program for Prosperity In a Free Economy," a document issued by the non-partisan, non-profit Committee for Economic Development. This group employs a large staff of experts who study governmental problems and report on them at frequent intervals.

There is much in this latest report to give aid and comfort to the tax-reduction school, but it also contains the warning that "it is not necessary or desirable to make final decisions about 1948 tax policies at this time. It will be necessary early next year. At that time, it will be possible to get a clearer picture of the expenditure outlook ahead and of the degree of inflationary pressure which then exists."

But the question of "inflationary pressure" and how to ease it is already a highly political one. Both parties realize that they have to grab the reins if they are going to get credit for guiding the country out of a boom-bust cycle.

Bi-Partisanship Apple Cart Tipped

When President Truman revealed the fact that he intended to use the emergency session of congress convening November 17, not merely to consider aid to Europe, but also to ponder a program for lowered prices, it "upset the apple cart," as one Republican said to me. An agreement had been reached to give priority to aid to Europe. Senator Taft, boss of the Republican policy committee, immediately made the reassuring statement that he felt the question of emergency aid and possible preliminary legislation on the Marshall plan could and would be satisfactorily taken care of by December 19. He didn't say what else, if anything, he had in mind for the boys on the hill to handle. But he did assure them they would be home well before the Christmas holidays.

Taft

Then came the Truman announcement that efforts to check inflation would be considered on a par with the aid-to-Europe plan. He said the two were closely interwoven because if the dollar continued to shrink, the purchases of supplies couldn't be stretched to meet the need.

After that Taft lost little time in tossing any implied bi-partisan program for the congressional session to the winds. If Truman was to include consideration of a domestic economy program, all bets were off. "All of the policies of the present administration," said Senator Taft, were so bad he couldn't "go along with them."

And so the bi-partisan apple cart was upset.

What is going to happen is decidedly hazy at this writing.

ACCIDENTAL PICTURE OF PORPOISE . . . Porpoises, frisky schoolboys of the sea, are forever playing their version of leap frog. Here are eight of them (count 'em) caught in a playful mood by the camera off the coast of Southport, N. C.

NEWS REVIEW

Big 4 Harmony Remote; Grain Men Ask Hearing

BIG FOUR: *Pessimism*

With the imminence of the most vital international occurrence of recent months—the Big Four foreign ministers meeting in London on November 25 — the mood surrounding the coming conference was predominantly one of pessimism.

That there was much justification for such pessimism, no one doubted. When the chief representatives of the U. S., Great Britain, France and Russia come together they will tackle the tough, deadlocked problems of writing peace treaties for Germany and Austria.

Deputy foreign ministers, in London to dispense with preliminaries before Marshall, Molotov, Bevin and Bidault put their heads together, said the powers were as badly split as ever on major issues.

If the conference fails, as it is very likely to do, the U. S. will have to face the question of whether or not it wants to conclude a separate peace with that portion of Germany outside the Russian-occupied zone. Such a treaty, not involving the Soviets, probably would precipitate a final split between this nation and Russia.

Nevertheless, sentiment has been rising in the U. S. favoring such an action if the Soviets refuse to cooperate in straightening out the problems of Germany. James F. Byrnes, former secretary of state, advocated that course, as have other responsible officials.

The corollary to that proposition is that the U. S. then must follow through by keeping itself strong militarily and economically, proving to the rest of the world that it has embarked on a definite policy course and that that course is the right one.

INVITATION: *Grain Battle*

Three of the nation's major grain exchanges, smarting under President Truman's accusation that their "speculation" is responsible for prevailing high prices of cereals, have carried the attack into the enemy camp by requesting a special congressional investigation by the joint committee on the economic report.

The request was made by the Chicago board of trade, Kansas City board of trade and the Minneapolis grain exchange in a letter to Sen. Robert Taft (Rep., O.) and Rep. Jesse P. Wolcott (Rep., Mich.), co-chairmen of the committee. Taft responded immediately with a promise of further hearings.

Countering Mr. Truman's repeated charges that gambling and speculation by grain exchanges have boosted food prices higher, the exchange officials contended that the real cause of the rise in grain prices is the administration's "extraordinary and ever increasing purchases of grain and flour for export." Administration "bungling and lack of planning" also were cited by the grain officials.

Wherever the truth may lie—and it probably is somewhere midway between the government and grain exchange viewpoints — it should be recognized that a force akin to a minor economic law is operating in this particular controversy:

Normal government reaction, whenever grain prices shoot above what is considered a safe level, is to lay the blame on the grain exchanges, charging them with manipulating prices through speculation. That has occurred often enough in U. S. history to bear out the theory. Grain dealers, of course, invariably blame the situation on over-exporting.

From that standpoint, at least, an investigation at this time should shed some new light on the long-standing controversy. It might even provide some real information on why prices are so high.

HEADLINERS

IN WASHINGTON . . . Sen. Owen Brewster (Rep., Me.), above, of the senate war investigating committee, smiled gently, called first successful tests of Howard Hughes' 25 million dollar flying boat "gratifying."

IN SARASOTA, FLA. . . . The Herald-Tribune, polling beardless males to discover how many strokes are needed for the morning shave, compiled this statistic: From 38 strokes for a fuzz bearder to 175 for a wire hair.

IN TACOMA . . . Edgar H. Eisenhower, the general's brother, laughed heartily, said he was only joking when he remarked that he would form an "Against Eisenhower for President Club" with himself as president.

RED CZECHS: *Go Communist*

Add Czechoslovakia to the list of Communist - dominated nations in Eastern Europe.

A man named Klement Gottwald, Communist premier of Czechoslovakia, has emerged as a new strong man, possessing complete authority from the national cabinet to rebuild the government of semi-autonomous Slovakia.

Rebuilding the government of the semi-autonomous nation will mean simply that Gottwald and his Communists will change Czechoslovakia from a nation whose people had at least a part measure of self-government to a nation under totalitarian rule.

Although the Slovak Democrats, predominantly conservative, are the majority party in the country, the Communists were able to place Gottwald, a former blacksmith, in complete power.

Thus Czechoslovakia has shifted from a position as a Soviet satellite with some will of its own to a lower position as a Russian dominated state with literally no self-determination. It has become another unit in the string of Soviet buffer states to the south and west.

INSTALLMENT BUYING

Curbs Off, Prices May Go Up

Government controls on the favored American practice of installment buying went off November 1, and from now on the purchase of that radio or refrigerator is strictly a matter between you and the dealer unless congress decides to step in again at the special session.

One result of the removal of installment buying curbs is very likely to be an increase in the already badly swollen prices of consumer goods.

Under the law, now out of effect, a down payment of one-third of the purchase price was required of anyone buying on the installment plan. Now, however, the rule book has been thrown away, and retailers doubtlessly will reduce the amount of the initial payment.

Attracted by the lure of "easy terms," hard-pressed householders now may see their way clear to buying needed items that they felt they could not afford before. With the down payment and installment terms relaxed, demand for goods is sure to rise; but it is certainly far from sure that the supply of such goods will increase accordingly.

Thus, if the old law of supply and demand follows its natural bent, prices will rise too, or the day of falling prices will be postponed.

Installment credit, economists say, is a volatile factor in our economy and can be a considerable force operating to help bring about a depression.

When goods are available on easy credit terms, consumers are tempted to buy to the limit. They overpledge their incomes. This accentuates the boom and eventually a saturation point is reached. The excessive credit has to be liquidated out of current income on the downswing, and so the depression, if one is already in the making, is given a further impetus.

A VOICE FROM THE COUNTRY

Agricultural Revolution Dooms Old-Fashioned General Farm

(Editor's Note: This is the first in a series of articles on current problems by Louis Bromfield. One of America's leading writers, Bromfield is author of "The Green Bay Tree," the Pulitzer prize-winning "Earl Autumn," "The Rains Came," "Pleasant Valley" and numerous other books.)

By LOUIS BROMFIELD
Released by WNU Features.

Lately there has arisen in the mind of the writer doubts concerning two patterns of American life in which all of us have taken great pride in the past. These are unwelcome doubts but observation and study of the patterns in relation to the highly integrated industrialized world in which we live make them unavoidable. They are:

1. **That the old-fashioned pioneer pattern of self-sufficient general farm is doomed.**
2. **That our present complicated, complex economic civilization cannot afford countless small enterprises save under very exceptional circumstances.**

Both doubts are certain to arouse protest and even abuse, but both deserve the consideration of every thoughtful citizen.

The general farm, producing a little of everything, is an American pattern growing out of life upon isolated frontiers and no longer fits into a highly complex national economy. A few acres of corn or oats or wheat or hay cannot support a corn picker, a combine or a hay bailer. Therefore the general farmer is at once at a great disadvantage, in competing with the corn farmer, the wheat farmer or the specialist grass farmer or the fruit farmer, all of whom are doing efficient jobs along specialist lines with the high degree of mechanization which any specialist enterprise can support.

Bromfield

Because the general farm cannot support a high degree of mechanization, the general farmer must work long hours, do things in an old-fashioned, slow and inefficient way. His gross income is almost certain to be only a fraction of that of the specialist in dairying, grass farming, corn and hogs, fruit, potatoes or any other undertaking where a man is doing one or two things efficiently and well, instead of 10 or 15 things inefficiently, slowly and painfully.

"Because the general farm cannot support a high degree of mechanization, the general farmer must work long hours, do things in an old-fashioned, slow and inefficient way."

I know of one specialist farm of 160 acres, raising apples, raspberries and hybrid seed corn which last year grossed $33,000. It is highly mechanized. Alfalfa is grown not to feed cattle but to mulch orchards and raspberries. The labor schedule is balanced the year round with no peaks and no slack periods. All attention is focused upon the three specialties and high production yields per acre rather than gambling upon high prices to survive is the basis of all operations. The income is high and the hours short because the farmer is operating efficiently.

The same acreage, operating as a general farm with a few chickens, a few cows, a few hogs, a few acres of wheat, oats, corn or hay, could have produced a maximum gross income, even in these times of high prices, of only about $6,000 or $7,000, with a net of not more than $3,000.

The farmer would be at the mercy of a custom bailer, corn picker, combine or haybailer, and would be forced to do things the hard, old-fashioned way and frequently suffer losses because the machinery was not available when his crops were ready. Bad weather or sudden decline in prices can ruin him or reduce him to subsistence level.

I suspect that in another generation the old-fashioned general farm will have become a curiosity except in poor agricultural areas where a few farms cling to the old ways. Anyone with an observant eye driving through agricultural country can see for himself the waning of the old pattern.

The well painted barns and houses, the new automobiles, the landscaped grounds around the farm house, the good fences — all of these one sees on dairy farms, fruit farms or potato farms. The farms that appear to be falling apart are almost always practicing agriculture in the old pioneer pattern. A good many of them are closing down each year or shifting over to specialization in order to improve income and living standards or even to survive.

It is all part of the vast agricultural revolution now in progress and it is the result of pressures from our highly integrated, mechanized industrialized civilization. The farm is no longer a frontier outpost in the defense against Indian attack when it was necessary to produce nearly everything that was consumed.

In most productive areas of the U. S. today, a farmer is an integral part of our social, mechanical, economic structure using electricity, gasoline, machinery, prepared feeds and other things which bind him into the whole structure so that he must integrate himself and his farm into the structure in order to survive.

The farmer of the future will not be a hunter-trapper-farmer, but a businessman, a scientist and a specialist. All of us will benefit by the change in terms of prices lowered through efficiency, in terms of health and in terms of taxes which no longer will be needed to subsidize farms living by a pattern which has become obsolete and which, in the past, has cost us dearly in many ways.

The passing of the general farm does not mean the passing of the family-sized farm. It is not a question of the amount of land but of how it is used and what the farm plan is. A specialized farm of 100 acres operated under an efficient plan produces 5 to 10 times as much income with much less labor than the same acreage operated under the old system of "egg money" for the wife. Sentimentally, the passing is sad but I'm afraid it is inevitable.

"The farmer of the future will not be a hunter-trapper-farmer, but a business man, a scientist and a specialist."

Black Flags Spur Army Safety Plan

FORT LEWIS, WASH.—Designed to keep army personnel "accident conscious," a new safety program has been launched by Fort Lewis officials.

Separate unit headquarters are issued white flags, to be flown from the roofs of headquarters buildings. In case of an accident resulting in hospitalization or death of unit personnel, the white flag is taken down and replaced with a black flag.

Never Too Old

ALBANY, N. Y. — You can teach an old dog new tricks, insists State Sen. Thomas C. Desmond, chairman of a legislative group investigating problems of the aged. As proof, he offers evidence that one old-timer "over 65" listed himself as an "apprentice" on a questionnaire.

Lord's Acre Nets $30,000 for Needy

BYRON, N. Y. — Residents of this farming community harvested a $30,000 crop on Lord's Acre, with all proceeds destined to go for domestic and foreign relief.

An auction sale, offering merchandise collected through co-operative community effort as well as the output from fields in the adjacent territory, attracted 7,000 buyers to Lord's Acre, a pleasant plot of land just inside the village limits. The auction climaxed a project commenced a year ago when residents of the village decided to do something to relieve worldwide suffering and to promote human understanding.

Three charitable institutions, National Catholic Welfare association, Protestant Restoration fund and United Jewish appeal, will snare in the proceeds. Nine needy families in foreign countries will be aided.

*Sweet Potatoes Creamed Onions
*Brussels Sprouts
*Cranberry Sherbet
Olives Celery
Mixed Pickles Hot Rolls
*Chiffon Pumpkin Pie
Mints Beverage
*Recipes given.

***Savory Brussels Sprouts.**

Cook three pounds of carefully washed brussels sprouts until done in salted water. Drain and place in saucepan over low flame with two tablespoons of melted butter, tossing until all are coated. Pour in ¼ cup strong chicken stock, season with salt and pepper. Place in serving dish and cover with ½ cup of coarsely rolled bread crumbs which have been browned in butter.

***Sweet Potatoes.**
(Serves 6)

6 medium sweet potatoes
¾ cup brown sugar
2 tablespoons butter or substitute
⅛ teaspoon nutmeg
¾ teaspoon cinnamon
¼ cup water
½ cup sliced brazil nuts

Boil sweet potatoes until almost tender; peel and cut in half. Place in shallow baking dish. Combine brown sugar, butter, spices and water. Bring to a boil. Pour over potatoes; sprinkle with brazil nuts. Bake in a moderate oven (375 degrees) for 30 minutes or cook in a heavy skillet on top of the stove, basting frequently.

***Cranberry Sherbet.**
2 cups sugar
2 cups water
1 quart cranberries
Juice of 1½ lemons
Juice of ½ orange

Make a syrup of the sugar and water, cooking five minutes after it starts to boil. Add the cranberries and cook until clear, then run all this through a fine sieve. Cool and add the fruit juices. Freeze in refrigerator trays. This may be made the day before using.

***Chiffon Pumpkin Pie.**
(Makes 9-inch pie)

1 tablespoon unflavored gelatin
¼ cup cold water
1¼ teaspoons cinnamon
¼ teaspoon ginger
½ teaspoon nutmeg
1 teaspoon salt
½ cup brown sugar
⅔ cup milk
2 cups cooked pumpkin
½ cup whipping cream
½ teaspoon vanilla
1 9-inch crust

Soften the gelatin in water. Add spices, salt, sugar and milk to pumpkin. Place in double boiler and heat to boiling point. Remove from heat, add gelatin and stir until dissolved. When cold fold in whipped cream and vanilla. Pour into crust and chill. Sprinkle with crumbs from two graham crackers.

Crust: To 12 finely rolled graham crackers, add 2 tablespoons of sugar and ¼ cup melted butter or substitute. Press in an even layer against sides and bottom of a nine-inch pie plate.

Released by WNU Features.

Drop a few cubes or slices of carrots into fish chowder. It adds color as well as flavor.

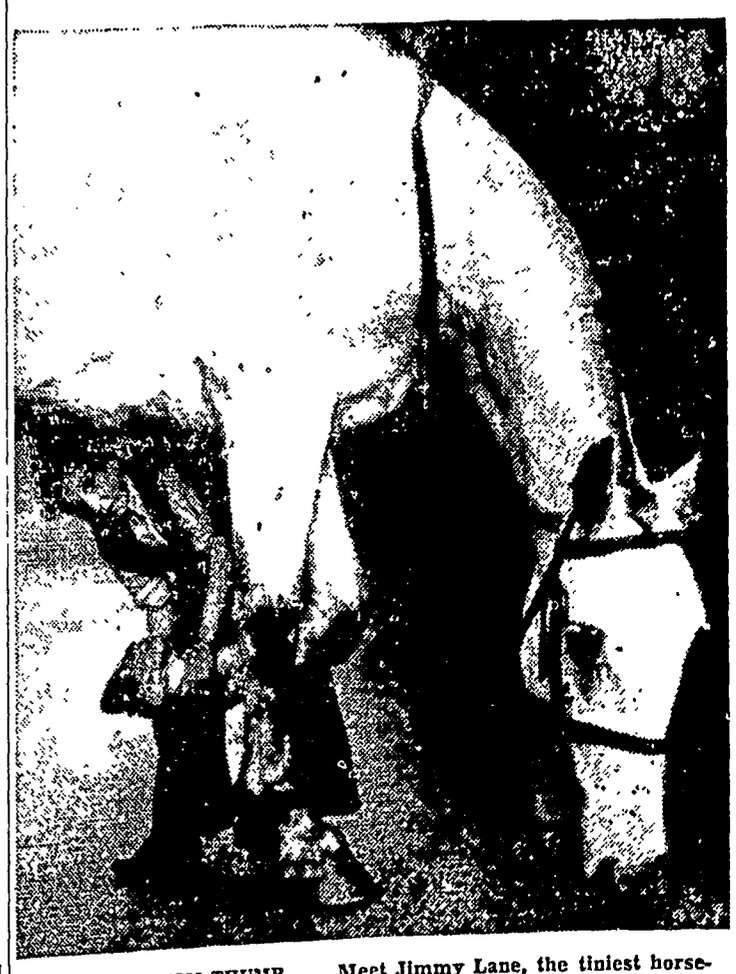
Watermelon rind, spiced, of course, is a nice appetizer when wrapped in bacon and broiled.

Cook your cereals with a bit of molasses for extra special flavor. This also helps add iron to the diet.

Have you ever tried creamed dried beef on fluffy baked potatoes? It makes a nice supper on busy wash days. Add a few peas for color if you're so inclined.

DESTRUCTIVE BALL GAME . . . The engineer at the controls of this giant crane has to keep his eye on the ball, literally. The pellet he is swinging, a two-ton steel sphere suspended from a 120-foot boom, is being used to demolish a building in the vicinity of New York's East river where a site is being cleared for construction of the United Nations world capital.

FOOD CRISIS WILL LAST THROUGH 1949 . . . Sir John Boyd Orr, director general of the U. N. food and agriculture organization, warned that the world food crisis will last through 1949, and that "long continued hunger in wide areas will result in increasing social and political unrest." With him in the photo are Lord Bruce of Australia (center), chairman of the U. N. food council, and U. S. Undersecretary of Agriculture Norris E. Dodd.



TURFDOM'S TOM THUMB . . . Meet Jimmy Lane, the tiniest horseman in the world. Jimmy, a native of Newmarket, England, weighs only 49 pounds and is so short that he has to be lifted on a mount when he works one out, as he often does.

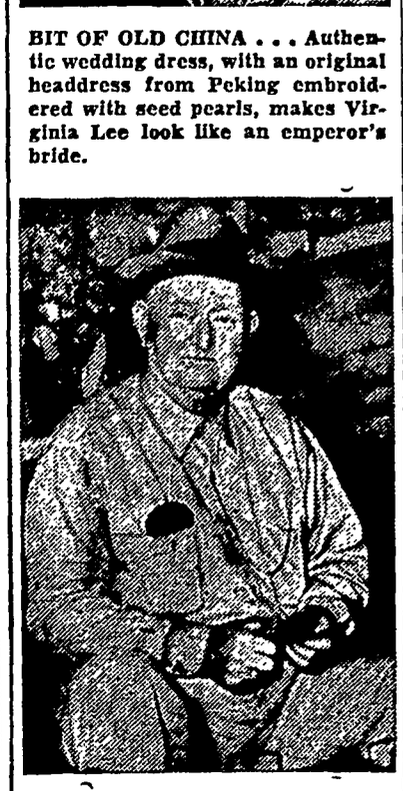
GREECE ARMS AGAINST CHOLERA . . . As the death toll in Egypt mounts into the thousands as a result of the cholera epidemic sweeping that Middle East nation, Greece, fearful that the disease may spread to the north, is taking precautionary methods. The government, in cooperation with the Greek Red Cross, is providing anti-cholera inoculations free to the people in specially improvised centers. Shown here are some Athenians, eager to immunize themselves against the disease.

GERMAN BISHOP . . . Bishop Friedrich Otto Dibelius, ranking Protestant minister of Berlin, paid a courtesy call on President Truman when he arrived in the U. S. to visit theological seminaries.

SPELUNKER . . . Mrs. Norma Lee Fisher, shown with son Freddy, 2, is Pittsburgh's only woman spelunker. A spelunker, by the way, is a member of the national speleological society, a group of cave hunters and explorers.

ANOTHER DECORATION . . . Gen. "Hap" Arnold, retired chief of army air forces, received a new decoration, this one from the Chinese government for achievement in military aviation.

BIT OF OLD CHINA . . . Authentic wedding dress, with an original headdress from Peking embroidered with seed pearls, makes Virginia Lee look like an emperor's bride.



FAR FROM THE MADDING CROWD . . . In the back yard of his Uvalde, Tex., home, John Nance Garner, former vice president of the U. S., now sits placidly in the sun and shucks pecans.

BIBLE STUDY

International Uniform Sunday School Lesson

SCRIPTURE: I John 4—5; II John; Acts 4:1-13.
DEVOTIONAL READING: Romans 8:1-11.

Proof of a Christian

Lesson for November 30, 1947

OPEN your Bible to I John 4—5; Second John; and Acts 4:1-13, and you will have the Scripture background for Sunday's lesson. Add to the above passages Romans 8: 1-11, as devotional reading, and you will be thinking of the unimpeachable proofs of a Christian.

Two men are brought before us as examples of Christian discipleship.

Dr. Newton

Peter and John had been preaching Christ to the people in Jerusalem, and they were arrested and brought before the Sanhedrin. The rulers and priests scolded them, asking by what power or name they had done this. Peter, filled with the Holy Ghost, answered them:

"Be it known unto you all, and to all the people of Israel, that by the name of Jesus Christ of Nazareth, whom ye crucified, whom God raised from the dead, even by him doth this man stand here before you whole. . . . Neither is there salvation in any other; for there is none other name under heaven given among men, whereby we must be saved."

And then follows the verse that reveals the proof that these humble fishermen were really Christians:

"Now when they saw the boldness of Peter and John, and perceived that they were unlearned and ignorant men, they marvelled; and they took knowledge of them, that they had been with Jesus."

* * *

The Lord Is My Helper

IN HEBREWS 13:6, we find this revealing statement: "The Lord is my helper; I will not fear."

The more we study the words of John in Sunday's lesson—words that remind us again and again that God is love, that we love him because he first loved us, that when we love him we are made strong in serving him, the clearer we come to understand the incident in Acts 4:1-13, when Peter and John stood boldly before the Sanhedrin, impressing the court with the fact that they had been with Jesus.

They were not afraid because they were conscious of the presence and power of God. The Psalmist put it sublimely when he said, "The Lord is my Shepherd, I shall not want."

* * *

When We Walk With God

THE incontestable proof of a Christian is the manner of life he reveals when he walks with God. "And this is love, that we walk after his commandments. This is the commandment, that, as ye have heard from the beginning, ye should walk in it," II John 6. When we walk with God, in the light of his word, what a glory he sheds on our way!

A group of men sat in the University Club in Boston, discussing religion. Someone asked Professor William James to define Christianity.

"I will not attempt a definition of Christianity, but I can give you an illustration."

And he pointed to Phillips Brooks. There was no argument. Phillips Brooks was proof positive that Christianity is something vital and practical and real and effective in everyday life.

* * *

Who Is a Christian?

WE COME now to the question which always emerges when we think along this line, Who is a Christian? Look now at I John 4: 15-21. I quote some of these revealing words:

"Whosoever shall confess that Jesus is the Son of God, God dwelleth in him, and he in God. And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love, dwelleth in God, and God in him."

We are not certified as Christians by any man-made creed, nor by any ritual or ceremony. We are certified as Christians by the direct access which every soul may have with God, through Jesus Christ our Great High Priest forever.

Church membership does not make us Christians. Baptism does not make us Christians.

Anyone may become a Christian, provided he or she is willing to confess their utter lost estate and, repenting of sin, believe on the Lord Jesus Christ as Saviour and Redeemer. Christ is the Author and the Finisher of our salvation. There is none other name under heaven given among men whereby we must be saved.

"Whosoever will may come."

* * *

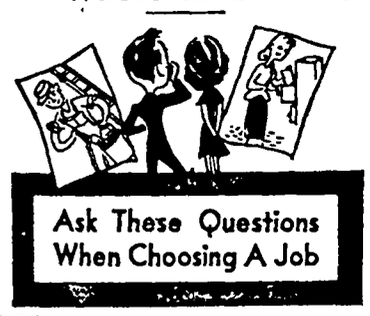
Guide to Jobs: How, Where to Get Them



WHAT'S in a job? It depends on what you're looking for. Do you want security and will you be content with a smaller salary to have that assurance? Then Civil Service is a good bet for you with its pension benefits and retirement plans.

* * *

If you have chosen a certain industry, canvass the field either in person or by letter of application and push your way in by strength of perseverance, if necessary. It's wise to ask yourself these questions and others when you're job-hunting. Is there a chance for newcomers? Am I equipped for job or do I need further schooling at night? What are the salary opportunities?

Dozens of fields are analyzed for you in our Reader Service booklet No 201—where the jobs are, how to get them—selling — transportation — manufacturing —professions—and "glamour trades."

Send 25 cents in coin for "Guide to Jobs: How and Where to Get Them" to Weekly Newspaper Service, 243 West 17th Street, New York 11, N. Y. Print name, address with zone, booklet title and No. 201.

Splendid Cough Relief Is Easily Mixed at Home

To get quick and satisfying relief from coughs due to colds, mix this recipe in your kitchen. Once tried, you'll never be without it.

First, make a syrup by stirring 2 cups granulated sugar and one cup of water a few moments, until dissolved. A child could do it. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then get 2½ ounces of Pinex from any druggist. This is a special compound of proven ingredients, in concentrated form, well-known for its quick action on throat and bronchial irritations.

Put the Pinex in a pint bottle, and fill up with your syrup. This makes a full pint of splendid medicine and you get about four times as much for your money. Never spoils. Tastes fine.

And for quick, blessed relief, it is surprising. You can feel it take hold in a way that means business. It loosens the phlegm, soothes the irritated membranes, and eases the soreness. Thus it makes breathing easy, and lets you sleep. Money refunded if not pleased in every way.

Pinex Is Swift Acting!

DIRTY OIL RUINS ENGINES

AC "5-Star Quality" Oil Filter Elements have an exclusive safeguard in the Collector Tube Trap. It's made of acidproof glass cloth, which can't rot and thus allow pollution of the engine oil. Don't take a chance on dirty oil. Buy AC and *be sure.*

KLEMME LOCAL NEWS

Mr. and Mrs. Fred Bell of Klemme; Mr. and Mrs. Kenneth Johnson of Goodell and Mr. and Mrs. Earl Reed of Marshalltown were dinner guests Sunday at the Fred Etchen home.

Mrs. Mildred Day of Klemme and Mr. and Mrs. Dorance Day and son Gary, of Mason City, will drive to Sioux City Thursday morning to spend Thanksgiving Day at the Donald Nissen home.

Mr. and Mrs. Elmer Beier will leave Friday in their car for De Ridder, Louisiana for a visit with relatives. Mrs. Herman Bridges, who has been visiting there, will return home with them.

"Curley" Back and "Pete" Kilgore drove to Des Moines Sunday to spend the day visiting with Bob Hartzell at the Veterans Hospital. They found Bob getting along fine.

Keith, small son of Mr. and Mrs. Kenneth Voights, returned home last Wednesday after spending several days with his grandparents, Mr. and Mrs. C. F. Polk at Clarksville.

Alvin Larson has opened a body and fender shop at the Larson Hiway Service west of Klemme. He has installed a complete line of tools to take care of body work and car painting.

Joe Johnson entered the Mercy hospital at Mason City last week and on Friday morning underwent a major operation. His condition is reported critical.

Bob Hartzell, who is patient at the Verterans Hospital in Des Moines, underwent an operation there Thursday. Reports are that he is getting along fine.

Rev. and Mrs. Calvin Grosshuesch left Friday for Tripp, South Dakota where the Rev. Grosshuesch spoke at a dedication service on Sunday. They returned home Monday evening.

George White's own story! Begin the fabulous showman's colorful story, "The Luck of George White," in The American Weekly, the great magazine distributed with SUNDAY'S HERALD-AMERICAN.

THANKSGIVING VACATION FOR KLEMME SCHOOLS

There will be no school in the grade and high schools of Klemme on Thanksgiving, November 27 and the Friday following, November 28. This will give the teachers and students a short vacation from their duties.

Williams Savings Bank, Williams, Iowa,

Nearly 44,000 Iowa farms still do not have electric service, according to a recent survey made by the Rural Electrification. This is 21 percent of all the farms in the state.

NOTICE

1948 AUTOMOBILE AND TRUCK LICENSE PLATES

•

New 1948 license plates will not be issued except for the first half-year for trucks. Be sure and lay your last half 1947 truck plates aside for use afer June 1, 1948. Full year truck plates and automobile plates will only have revalidating tags to be placed in upper righ-hand corner of old plates.

These tags and half-year truck plates go on sale

December 1st

Remember, here is no need in requesting certain numbers to be retained for you since you JUST KEEP YOUR 1947 PLATES

New farm trailer plates will be issued. Be sure and ask for yours.

Card Of Thanks

We wish to thank every person or firm who donated merchandise, money or food to the Carnival, and we thank those people who gave their time and labor to make the school carnival a success. It could not have been done without the splendid cooperation of the entire community.

The electric refrigerator, which was one of the big drawing cards of the Carnival, went to Clarence Swalve. It was secured through the efforts of "Stub" Lewis and Supt. Kingery. We regret that Mr. Lewis' name was omitted from the list of donors. It took a lot of correspondence and telephone calls on Mr. Lewis' part before he could promise delivery of a refrigerator. The first refrigerator was delayed in shipment and last Friday Mr. Lewis made a special trip to Des Moines to get another so it could be on display at the school Friday night.

Members of the Klemme Board of Education.

Members of the Klemme School Faculty. (1tc)

(Omitted by mistake last week)

The Legion and Auxiliary wish to thank everyone who took part in the Armistice Day Program.

Special thanks to Karl Hass; Stanley Bulka and the Band; LaNelle Harvey; Mrs. Patterson; Mrs. Roy Arnold and Rev. Harvey. (1tc)

The annual Methodist Bazaar and supper was a fine success and over $227.00 was taken in. The ladies wish to thank all who donated or helped in any way, and thanking all who patronized them. They especially thank all those who donated chickens for the supper; and the kitchen committee under the direction of Mrs. Marvin Isvik and Mrs. Roy Arnold for their efficient work. (1tc)

I want to thanks my neighbors and friends for their help since I returned home from the hospital, and also thanking all who sent me letters and cards and who visited me while I was at the hospital. I appriciate all greatly. Mrs. Paulina Wessels. (1tc)

From where I sit ... *by* Joe Marsh

Ma Hoskins Sneezed at Cats!

Ma Hoskins couldn't understand why she got a fit of sneezing every time Harpo, the cat, came in the room. Finally figured she'd have to get rid of Harpo altogether.

Then Doc Hollister explained she had an "allergy." Cat's fur made her sneeze like strawberries give some folks rash. He gave her an inoculation so she and Harpo could live sneezelessly together.

I guess a lot of us have "allergies" in the social sense. Some folks just can't stand movies, or radio comedians. Other folks don't go for beer. Myself, I enjoy a moderate glass of beer or two with friends . . . but it's up to them what beverage they choose.

From where I sit, the important thing is not to let our social allergies result in antisocial taboos. Let's not criticize the fellow who likes beer if we like cider. A little inoculation of tolerance can help us live-and-let-live happily together.

Thanksgiving Is Here Again

The going may have been rather rough since last Thanksgiving, but the most of us will have things to be thankful for, and it is our hope that you have had your share of the good things the past year.

One of the things that we have to be so thankful for is our old friends as well as the new friends we have made since last Thanksgiving Day.

We wish everyone a happy Thanksgiving Day in this year of peace.

Our Own Hollywood Inquiry

Q. Now then, you are a producer Conceding as I do that any Communist influence in our movies should be ruthlessly effaced, I would like to come down to the responsibility for those Hollywood "westerns," in which 49 out of 50 shots are misses.

A. There is propaganda there, obviously foreign, to disparage American marksmanship and promote the idea at home that one bullseye in 50 is good enough.

Q. What about those scenes in which the cowboys get behind overturned covered wagons and blaze away at one another, necks out a foot, with nobody getting hurt?

A. Certainly nobody who respected America would write or direct a scene that way.

—•—

Q. Have you noticed how almost every romantic film has at least one scene in a haypile? Why is that?

A. Karl Marx always held that to undermine democracy you must get across the idea that life should be a matter of haypiles. This softens up the populace.

Q. Who is responsible for those half-Nelson embraces and pressure-cooker kisses in the pictures?

A. Enemy propaganda! Think of the man-hours wasted, not to mention the woman-hours. Our foes know that if they could get all Americans kissing like that they would have no time or energy left for anything important, and the republic soon would crumble.

—•—

Q. Now let us take those long lists of credits appearing on the screen just before a picture begins. They take in the name of everybody from the fellow who washed an electric light bulb or polished a piano up to the director, assistant director and assistant to the assistant. Is there a reason for this?

A. Yes sir. There you have the hand of somebody unfriendly to America again. Those credit lines are slowly but surely unnerving the American public. And an unnerved public is a futile public in any struggle.

—•—

Q. One more question. Who is to blame for double features?

A. Now you are getting hot in your search for evil influences in the movies.

Q. Answer my question; who is to blame? An arch enemy of the American people?

A. You don't think a FRIEND WOULD DO IT TO US, DO YOU?

Household Hints

Save needless hours of repair work by catching small tears and other rips promptly. Besides, if you darn a small tear, the repair job will be less conspicuous.

—•—

Youngsters aren't fussy about realism. As long as their toys are attractively finished in bright colors, they need not be exactly like the animals or objects they imitate.

—•—

Do not let Turkish towels become too soiled, because scrubbing wears them out.

—•—

Make a neat gallery for family portraits. Instead of placing a host of them on the piano, frame all the favorites in the same kind of frame and hang them together on the wall.

—•—

Treat zippers on your galoshes with vaseline if they have become rusted and are difficult to slide. Be careful not to get any on the fabric.

—•—

When making biscuits with sour milk, measure one-half teaspoon soda for each cup of sour milk. The flavor of the biscuits will be better, their health value greater, and the biscuits will be light and fluffy.

Christmas shopping needn't be a trying experience if you follow this suggestion. For friends who enjoy the pleasure of cigarette or pipe smoking—here are two great gift ideas that are sure to please. For the man or woman who prefers mild, mellow, rich-tasting cigarettes, select a carton of Camels, the national favorite. And for the pipe-smoker, wisely choose a handsome tin of the largest-selling pipe tobacco, Prince Albert. Both Camels and Prince Albert come in attractive gift packages. No other gift wrapping is necessary. Camels and Prince Albert are "ready to give." At your dealer's now!—Adv.

Relief At Last
For Your Cough

THE FICTION CORNER

'THE BARGAIN'

By MRS. W. E. ABBOTT

Emma Haines wakened with difficulty from her early morning sleep. That noise! What was it? It was like water swirling rapidly down a drain. Her brain cleared, and she heaved her great bulk out of bed. Only one thing sounded like that!

The outlaw pig belonging to Ed Slatterly was raiding her garden again. Probably wanted more of her prize watermelons. She'd show her! Hastily she thrust her feet into slippers, put a house dress over her nightgown, and started for the door.

There she was, the demon! She'd know that bony, stubborn figure anywhere.

"Get out of there, you ornery creature!" Emma picked up the nearest stone and threw it with all her strength at the skinny sow. The pig grunted and ran toward the hole under the garden fence, which she had prepared for herself. She squeezed her gaunt frame under the wire, grunting noisily. Emma threw another stone, and the sow trotted off down the road toward home.

Emma sputtered to Seth all during breakfast about the sow.

"She's against everything I've ever seen in nature," complained Emma. "Eats watermelons, of all things! Of all the truck I have in my garden, those melons are the things I prize most. And doesn't that cussed pig know that? She makes for the melons every time."

Seth didn't say much. After all, he was more than ordinarily fond of pigs, all pigs. He loved to raise them, see them grow large and contented from good feeding. Anyone had only to look at his fifty fat hogs to know Seth enjoyed caring for them.

Emma sighed. "I'd go over to see Slatterly today, if I didn't have so much to do. I'll try to go tomorrow. It's simply got to stop! Those trashy swamp folk will have to learn to keep their stock to home!"

It was three days before Emma found time to visit the Slatterlys. It was two miles back to their shack at the edge of the swamp, but Emma was a hearty fifty-year-old woman, and she loved the walk through the fields and wood lots. Several of the Slatterly children were playing around the cabin. They were handsome children, in spite of their dirty, unkempt appearance.

"Where's your Dad?" said Emma shortly to the oldest boy.

"Paw!" yelled the boy.

Ed Slatterly appeared at the door of a shed behind the house. He was a small, wizened man. Emma had never seen him when he wasn't chewing tobacco. She walked towards him. Over his shoulder she looked inside the shed. There hung a butchered pig.

"Oh," she said. "That your pig, Ed?"

"Yes, Ma'am," he replied. "I was aimin' to give you a piece of that meat."

Emma softened. She walked inside and looked at the meat. It looked good. "Watermelons must make good hog feed," muttered Emma to herself.

"Ma'am?" said Ed Slatterly.

"I said that would be nice," replied Emma. "We'd love having some fresh meat. It's very kind of you."

With the help of one of the boys, Ed took the pig down from the hook and cut off one of the hams for Emma.

"That's too much," she said firmly.

"No, Ma'am," he said. "I have a lot of young 'uns, and they eat hearty, but the weather is warm. Meat won't keep too long. You take it right along home."

"That's mighty fine of you, Ed Slatterly," said Emma. Her conscience was beginning to hurt.

Emma carried the ham all the way home and put it in the refrigerator to cool. Meat was expensive, and the thought of a roast of fresh ham made her happy.

She was at peace with the world when she went to bed that night.

Early the next morning she woke up in confusion. That peculiar sound again. Water, going rapidly round and round in a drain. No! It couldn't be! She sat up. There wasn't another pig anywhere that sounded quite like that.

She bounded out of bed and hit the floor with a thud. Slippers, the house dress over her nightgown, the flying trip to the garden. She rubbed her eyes. It was Slatterly's sow! There couldn't be two such pigs in all the world.

Dazedly she picked up a stone to throw at the creature.

"Emma." Seth's voice was calling from the bedroom window. "Leave her be. I'll be down."

A moment later he appeared in the yard, his overalls drawn hastily over his pajamas. He looked sheepish.

"It's all right, Emma," he said. "That's our pig now."

"Ours!" cried Emma. "Oh, no, not that!"

Seth ran his hands nervously through his hair. "You see, I just couldn't bear seeing that hog looking the way she did, all run down and thin and neglected. So I traded one of our pigs to Slatterly for her. That gave them meat, and I thought I could maybe fatten her up."

Emma stared at him open-mouthed.

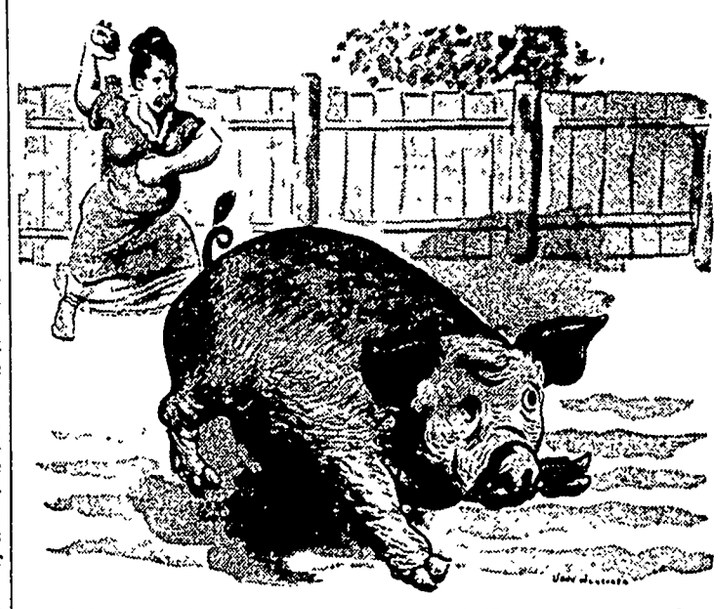
"Although I gotta admit, she is an outlaw," said Seth. "May have to get rid of her after all."

"May have to!" cried Emma. "May have to, indeed! What about my watermelons? You certainly will have to!"

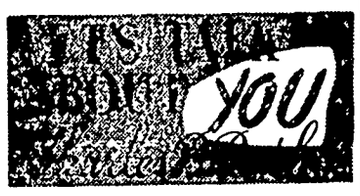
Seth grinned and wiggled his toes in the grass like a small boy.

"Whatever you say, Emma," he said meekly. "Whatever you say, my dear."

Seth hadn't been married thirty years for nothing. He knew the value of silence. He knew with certainty that this was not the time to mention that he had promised the Slatterlys a dozen of Emma's prize watermelons, as soon as they were ripe, to complete the deal.



"Get out of there, you ornery creature!" Emma picked up the nearest stone and threw it with all her strength at the skinny sow.



Don't Forget to Compliment Them

One of the most effective salesmen I have ever known accomplishes his near miracles in business, not by any intellectual system, but by following one of the simplest of all plans I know for impressing others favorably.

He compliments his customers. They like it so much they buy from him. They also form an attachment to him which makes it next to impossible for a competitor to come in and make sales.

All great leaders from the beginning of the world have found that if they can compliment others properly and judiciously they are employing an aid which is beyond price it is so valuable.

When you compliment a person, it shows that you are interested in him and want to please him. In you that person sees a reflection of his own desires. And that's what makes us like others—a reflection of the things we like most in ourselves.

Of course I am not recommending flattery. When a compliment degenerates, it becomes mere flattery; it is not a boon but a handicap to friendship. You can't trust flattery. We feel we can trust compliments.

This salesman I am telling you about never makes the mistake of flattering his customers.

"What I try to do with every man is find out what he wants to hear about himself," he explained. "I never compliment him upon things that are obvious—that others compliment him upon. About those things he gets tired of hearing. But all of us yearn to have somebody tell us about some other excellence of ours—one that isn't quite so obvious."

That is a shrewd observation on human nature. I remember reading how bored John D. Rockefeller was when complimented upon his business success. He wanted to hear something else. The thing he wanted to hear was praise about his household economies. And Andrew Carnegie wasn't nearly so proud of having given away so many millions of dollars as he was of his ability as a public speaker.

The point I am making is that if you want your compliments to do the most good you have to ferret out little things which the other person would like to hear somebody say about him.

The next thing my salesman friend does is to make his compliments ring true. He isn't fulsome about them ever. He is truthful. He can go into any company and be liked and popular because in any company he finds something nice to compliment everybody upon.

The reason he finds these things is that he looks for them. There isn't any reason why you shouldn't do just as much is there?

by GRANTLAND RICE

LAST year, on our way west, we traveled as far as Chicago with George Halas, owner of the Chicago Bears. The discussion came up as to whether or not there were spots enough for two football leagues, with eight teams in each circuit, just as baseball has today.

Halas didn't think so. "We have the only league," he said, "with New York, Chicago, Philadelphia, Washington, Pittsburgh, Boston, Detroit and Los Angeles. These are the proven places. There is room enough for two big leagues in baseball," Halas continued, "but not football."

G. Halas

We suggested these spots — New York, two clubs; Chicago, two clubs, and one each for Philadelphia, Los Angeles, San Francisco, Brooklyn, Pittsburgh, Washington, Cleveland, Boston, Buffalo and Baltimore.

"That only adds up to 14 clubs," Halas said. "We still need two more, and I don't like three you've thrown in — Buffalo, Brooklyn and Baltimore. Football is different than baseball. Brooklyn always has been a great baseball town. Brooklyn's football team cost Dan Topping around $300,000 and its new owners more than $250,000."

These figures are startling, one has to admit. Still Collins in Boston is out more than $500,000 and Detroit is at least that much in the red. And these are two National league cities.

There must be something wrong in the running and handling of pro football. Looking back 20 odd years, there have been more than 20 teams in the National league. Only four have ever made money. They are New York, Chicago, Washington and Green Bay. Philadelphia has been breaking even, and so has Pittsburgh. The rest have gone bankrupt or, like Detroit and Boston, are more than half-a-million out.

So far, Brooklyn, Boston and Detroit have been the major dabblers in red—well more than a million and a half. Miami blew up with a $300,000 detonation. Outside of a few teams, both leagues have suffered heavily on the financial side.

Overpaid Players

Many of them have been paying football players two and three times what they were worth. Players more than 28 years of age have been puffing around. Others have reported 20 to 40 pounds overweight. We agree with Red Blaik—when you've passed 28, go out and get another job.

We'll also add—when you weigh more than 230 pounds — take up some fat man's game. At least 40 per cent of the pro football players today are in no physical condition to play out a game that demands so much on the physical side.

Just what will happen later is a guess beyond our reach. Pro football, so far, has cost various promoters close to 10 million dollars. A few have made money, but nothing like this amount.

I don't believe the losing promoters will take this beating much longer. And this includes both leagues. As far as I can dig up the figures, pro football, as great a game as it is, is still deep in the red.

Los Angeles has proved to be the best town for pro football, with Cleveland in second place. The N. Y. Giants, through the fine football that the Mara brothers and Steve Owen have provided for so many years, are well on the safe side. Washington has been a sellout on a 34,000 basis, due to Sammy Baugh. When Baugh leaves, George Marshall will have more headaches than a ton of aspirin can cure. The sound spots in pro football today are Cleveland, Los Angeles, New York, part of Chicago, Pittsburgh, Philadelphia and San Francisco.

Chicago can't possibly take care of three teams. The Rockets already have discovered this sad news. Brooklyn, a fine baseball city, possibly the best, has known only third and fourth rate football teams for years. Brooklyn never has had a chance.

Few Opportunities

I still believe Buffalo and Baltimore can be strong centers, given high-grade teams. Neither will support a loser, long. There has been talk of Atlanta, Dallas, Akron and a few other cities, including New Orleans, that might work out. They might—if you care to gamble with a $300,000 loss. Most of these are strictly college towns.

There was, some years ago, a general belief that pro football would wreck college football, just as pro baseball smothered college baseball. I never believed this would happen. The college game is stronger today than it ever has been before. Pro football isn't. Look over college attendance figures—86,000 at Michigan—around 80,000 in the California, Pennsylvania and Ohio State stands—60,000 in Los Angeles—from 40,000 to 60,000 all over the college map. College football is still outdrawing pro football, game for game, by at least two to one.

NEEDLEWORK PATTERNS

Adorable Easy Crocheted Kitten

No. 5602

AS CUTE as can be is this crocheted kitten for tots to carry around. Crocheted of grey wool with white face, paws and tail, green eyes, black nose and mouth are embroidered in simple stitches. Add a big pink bow.

Defendants.

IN EQUITY NO. 11,572

ORIGINAL NOTICE

TO THE ABOVE NAMED DEFENDANTS

You and each of you are hereby notified that the petition of the above named plaintiffs is now on file in the Office of the Clerk of the District Court of Hancock County, Iowa, at the Court House in Garner, Iowa, in which the plaintiffs allege that they are the absolute unqualified owners in fee simple of the following described real property situated in Hancock County, Iowa, to-wit:

That part of Tracts No. 1 and No. 2 of the Auditor's Sub-Division of the West Half (W½) of the North East Quarter (NE¼) of Section Thirty one (31), Township Ninety-five (95) North, Range Twenty-three (23), West of the Fifth P M., Hancock County, Iowa, more particularly described as follows: Commencing at a point 514½ feet east of the Northwest corner of the North East Quarter (NE¼) of Section Thirty-one (31); thence South to a point 474 feet South and 500 feet West of the Northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31), thence east to the the right of way of the C. R. I. & P. Ry., formerly the right of way of the B. C R & N Ry, thence in a northeasterly direction along the right of way line of the C R I & P Ry. to point directly east of the point of beginning, thence west to the point of beginning, excepting therefrom a tract of land described as follows Commencing at a point 588 feet East of the northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31); thence south 200 feet, thence east 66 feet, thence North 200 feet; thence west 66 feet to the point of beginning,

subject only to a contract of sale to Art Knoke, dated January 29, 1947 and recorded in Book 56 of Farm Land Deed Records of Hancock County, Iowa, page 134, in the office of the County Recorder of Hancock County, Iowa, and in said petition the plaintiffs allege that they are credibly informed and believe that you make some claim adverse to the title of thes plaintiffs in said property

These plaintiffs further pray in their petition that the title to the above described real property be quieted, established, and confirmed in these plaintiffs by the Court, subject to said contract of sale, and that the defendants above named, together with all unknown claimants and all persons unknown claiming any right, title or interest in the above described real property and all the heirs, spouses, successors, assigns, grantees legatees, devisees, and beneficiaries of each and all of the above named defendants be forever barred and estopped from having, asserting, or claiming any right, title, and interest in above described real property, adverse to these plaitiffs in said property, and pray further that the Court grant such other further equitable relief as may seem just.

You are further notified that no personal judgment will be asked against any of you and no costs will be assessed to any defendant who does not appear

For further particulars, see petition now on file as aforesaid.

You are further notified that unless you appear before said Court at the Courthouse at Garner, Hancock County, Iowa, before the 31st day of December A D 1947 your default will be entered and judgment and decree rendered against you for the relief demanded in the petition, and the title to the real property of the plaintiffs above named will be quieted, established, and confirmed in them subject to the contract of sale to said Art Knoke and you and each of you will be forever barred and estopped from having or claiming any title or interest to that of the plaintiffs.

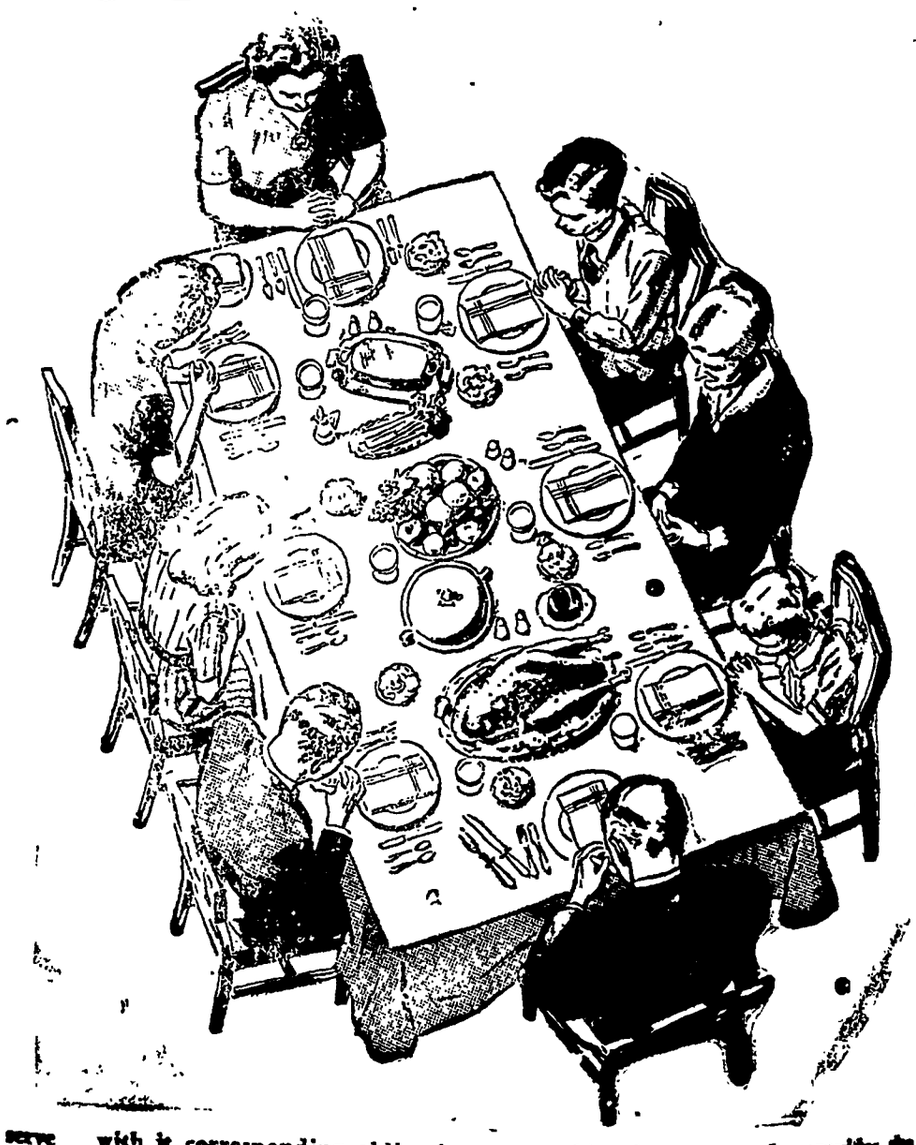
THANKSGIVING · 1947

Our Father we thank thee for the bountiful harvest and for the privilege of serving Thy Kingdom with Thy gifts of grain. Help us to understand the power of our yield, to think of food as a weapon for peace. Guide us in our efforts to use Thy gifts wisely so that swords may be turned into plowshares and Thanksgiving Feasts may reach into every home. May Thy doctrine of brotherly love encircle the earth and peoples everywhere work ceaselessly for Thee. Amen.



Our rich fields and laden tables serve as a symbol of hope for hungry peoples throughout the world. As we celebrate the reaping of our annual harvest, far from the tormented faces of uncounted starving children, may we renew our determination to help our fellow men. Enjoying the priceless advantages of our rich lot, brings with it corresponding obligations. Maximum industrial and farm production must be maintained in order to fill our responsibilities. Reddy Kilowatt, your dependable electric servant, works for maximum production 24 hours a day bringing efficient, economical electric service to farms, homes and factories. Keep Reddy working for you . . . he provides the power for better living and increased production.

This will be the demonstration Ed. will hold year. He plans to make a week's tour of Woolworth next summer and put on nstrations.

ite a number of the large stores are now featuring trap made in Klemme.

Traffic News

KNOW YOUR TRAFFIC LAWS

A speed limit of 20 miles per hour has been established by the Iowa state Law of the Road: (1) When driving past a school-house when children are entering or leaving school or playing at or about the school, (2) When passing through a marked "school crossing." When passing a school bus that has stopped to load or discharge student passengers the Iowa Law requires every driver of a motor vhicle to come to a stop and then to proceed with caution, not in excess of 10 miles per hour.

It is obvious that the purpose of these laws is to protect the lives of Iowa school children. Therefore, they are respected and obeyed by all responsible, right-thinking motorists.

Driving at 20 miles per hour gives the motorist more time to see children who are apt to run into his path. It also gives him a chance to stop his car quickly in an emergency.

Since it normally requires more than 40 feet, including reaction, distance and braking distance, to stop an automobile traveling at 20 miles per hour, the 20-mile-per hour speed limit is not an unreasonable one. It should be strictly observed.

CONSERVATION DEMONSTRATION ON FARM LOCATED NEAR GARNER

The 320 acre farm owned by Mr. and Mrs. Wm. Hoeft and operated by Jake Blumer has been planned for conservation farming. The plan was developed by Hoeft and Blumer, assisted by Vernon Moss, local conservationist of the Soil Conservation Service, assigned to assist Hancock County Soil Conservation District. District commissioners elected to plan the farm and use it for demonstrating practices. In general the plan is to retire the erodable hill land with protective conservation practices, and to improve drainage on the bottom land, much of which is now pasture, for intensive farming. When completely laid out according to the conservation plan the farm will have 20 acres protected by terraces, 136 acres protected by contour farming, 13000 feet of grassed waterways and improved drainage of 107 acres.

To date 7200 lineal feet of contour guide lines have been laid out, several hundred feet of fence has been removed, along with some fall plowing on the contour where the grassed waterways left to help control erosion. Terraces planned for the farm will not be constructed until the fall of 1950 and '51 which will provide time to establish terrace outlets and good legume-grass sod on the fields to be terraced.

Farmers and townspeople of Hancock County are encouraged to visit the farm from time to time to witness the change from square fields with rows up and down hill to contour tour fields with rows on the level. The farm is located 3 miles North of Garner in the West half of section 7 of Concord Township.

HERE'S ONE WAY

George Elder, Spencer man, and his companions were out hunting pheasants all one day last week but found no birds. Disappointed and tired, they returned to their automobile. Just as they were getting ready to leave, George heard a rustling in the nearby bushes. He reached in and grabbed a live cock pheasant.

KLEMME VAGABONDS OPEN SEASON HERE FRIDAY NIGHT

Independents Will Appear In Their New Suits For The First Game

The Klemme Vagabonds will open their basket ball season on the home court Friday night, December 5th.

The Vagabonds had a large following of fans last year and this year should be even better as they are scheduling some of the faster Independent teams in North Iowa. Friday they meet Ray's and Bob's Ice Cream, one of the Mason City Y M. C. A. League teams. They are booking several Mason City league teams and it is possible they may have another game here Monday evening.

The local boys will sport their brand new suits for the first time in Friday night's game.

As a preliminary there will be a game between the Klemme Grade School boys. This proved a very popular feature last year when the Vagabonds played.

Come out and give the boys your support in their first game of the season.

GARNER CARDINALS PLAY THE SHAMROCKS HERE ON THURSDAY EVE

The Garner Cardinals will come to Klemme this Thursday evening to play a double-header game with the Shamrocks. This should be one of the best games on the Shamrock card

Coach Patterson is giving the Shamrocks a stiff work-out and polishing off the rough spots that showed up in the Britt game last week.

GARNER ALL-STARS DEFEATED BELMOND IND.

The Garner All-Stars defeated the Belmond Independents at Belmond 24 to 13. Rev. Stuebbe of the Peace Reformer Church is a member of the All-Stars.

BOY KILLED

Kent Thomas, 8 year old youth of near Anita, was killed near there recently as his older brother was trying to take from him a rifle that Kent "wasn't supposed to touch." The .22 calibre bullet struck him in the forehead.

There are no parking meters in Klemme . . . parking costs you nothing in Klemme and you always find a convenient place to park while doing your Christmas shopping.

Scouting

BOY SCOUT ANNUAL MEETING

The annual meeting of the Winnebago Council, Boy Scouts of America will be held at the All Vets Social Center near Clear Lake, Iowa on Thursday, December 11, according to Mr. M. C. Lawson, Council President, from Mason City.

This meeting, which has formerly been held in Mason City will bring together the official board members from all over the nine-county area for the Annual business meeting at 3 p m. There will also be a special meeting at the same time of all Scoutmasters, Cubmasters, and Senior Leaders under the direction of Council Commissioner, Ray Rorick, and field Scout Executives Allan Duitman and Roy McKinney. Ladies of Scouting will be the guests of the Council at an afternoon tea in charge of Mrs. Tom Burns, Mrs. Marion Gilmore and Mrs. Roscoe Miller, all of Clear Lake.

At 6:15, banquet hall doors will open for the 28th Annual Council gathering. Mr. Carl Dwyer of Mason City is the program Chairman for the banquet which is open to all the Scouters and Friends of Scouting. According to Mr. Dwyer, an excellent program has been arranged. Mr. George Charno of Kansas City will be the speaker of the evening. Mr. Charno has for many years been a very active Scouter in the Kansas Ctiy Council and is a very accomplished speaker. Scouts who have received the rank of Eagle in 1947 will be guests at the banquet and have a very definite part in a very impressive ceremony being arranged by the members of the Annual Meeting Committee.

This meeting usually draws a crowd of near to 300 Scouters and wives and it is expected that a larger crowd will be on hand this year.

MASON CITYAN IS BRIDE IN MILWAUKEE

Announcement is made of the mariage of Mrs. Olga Griffen, formerly of Klemme, 412 15th S S., Mason City and Wesley Updyke of Prairie du Chien, performed November 16 in the Kingsley Methodist Church at Milwaukee by the Rev. Earl Allen.

The couple was attended by Mrs Velma Messling and Henry Zack The bride wor a blue organdy formal with pearls at the neckline and a corsage of red roses and white carnations

Following the ceremony, a reception and dinner were held at th home of Harland Messling a nephew. A 3-layer wedding cake decorated the table.

After a wedding trip, the couple will be at home after November 26 at 807 Van Buren N. E. Mason City. For travel, the bride wore a blue suit. They will visit in Milwaukee, Bluemont and Wauceke, Wis.

Forty At Thanksgiving Dinner

Mr. and Mrs. George Schoenwetter entertained forty relatives and friends at a Thanksgiving dinner at their home.

Mr. and Mrs. Schoenwetter also received a Thanksgiving cablegram from their son Howard, who is now stationed in Guam.

Look Out!

SHOP LIFTERS BEWARE!

There has been some petty thievery going on in the Klemme stores the past week since Christmas merchandise has been put on display. Some children have been seen picking up small items. Parents should warn their children that stealing is a mighty serious offense.

If any more of this takes place the person committing the crime will be prosecuted.

Bowling

BOWLING LEAGUE BEING FORMED IN KLEMME

A meeting was held at the Community Hall Monday evening to organize a bowling league for the winter. So far seven teams are being made up and an eighth may be included.

The 7 teams now being made up are sponsored by Bud Nieman, Farmers Elevator, Melvin Schlei, Corner Drug, Bob Greiman, Northern Lumber and Francis Buseman

The first game will be played tonight between Nieman's team and Bob Greiman's team.

A list of schedules and names on the various teams will be published next week when the league is fully organized.

College Students Home For The Thanksgiving Vacation

There were a lot of Klemme young men and women home from colleges for the brief Thanksgiving vacation. Our roving reporter may have missed some of them, but the following were home for a few days:

Dean and Elwyn Jacobs, Novella Bredbenner, Ivan Blumer, Mr. and Mrs. Leo Blumer, Marcelle Josten, Mr. and Mrs. Lyle Wilcox, Eunice and Clarence Larsen, Bruce Arnold, Ewald Grosshuesch,, Jean Kurtz, Emilie Johnson, Eugene Haberkamp, Dean Merkel, Dorothy Ellingson and Peggy Coobs.

It always seems good to the people in the old home town to have the college students home again, even for a few days.

George Boehnke To Be Main Speaker at 4-H Banquet

George Boehnke to speak to 4-H Boys and Girls at their County Banquet Saturday, Dec. 6th at 6:30 p. m in the Garner High School auditorium.

Maynard Dorow and Phyllis Jurgensen, County Boys and Girls club presidents will team up as toastmasters.

Awards will be presented and the 4-H leaders will be recognized.

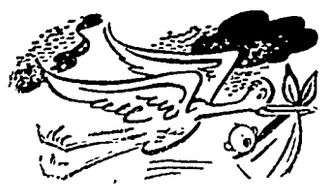
Avery Township Farm Bureau Meets

The Avery Township Farm Bureau held their annual organization meeting on Monday, November 24 at the home of Walter Koehler. The new officers elected for the coming year were Vern Schleuter, for township chairman, and Mrs. Walter Koehler, secretary.

Elsie Mae VanWert, County Extension Home Economist gave a short talk on the Iowa Farm Bureau Federation meeting. Slides on Use of Fertilizer were shown by the Extension Director, Paul Henderson.

Have you done your Christmas shopping! 18 more shopping days. You will find what you want in Klemme.

HELLO, FOLKS!



Mr. and Mrs. Edward Mauritz, 1607 E. 4th St., Marshfield, Wis. are the parents of a baby daughter, Janet Louise, born Thanksgiving Day. Mrs. Herman Baack left Sunday from Mason City by train to help care for granddaughter and mother.

Mr. and Mrs. Walter Gast are the parents of a baby boy born Monday, December 1, 1947 at the Garner Nursing home. He weighed 6 lbs. 4 oz. and has been named Wayne Edwin. Before her marriage Mrs. Gast was Miss Phyllis Kirkwood of Klemme.

Former Klemme Lady Died At Garner Thanksgiving Day

Going Down

ELECTRIC RATES GO UP AT NEW HAMPTON; GO DOWN IN KLEMME!

A recent press dispatch told of a 15 percent increase in the electric rates at New Hampton, a town of 3,000 population where that city operates a municipal plant.

And in the mails this morning was the new rate schedule from the Central States Electric Company announcing a CUT in electric rates in the town of Klemme, with about 600 population! The new, lower rate of the Central States is already in effect and will apply on this month's bill.

The Central States has reduced their rates on their entire system and did it voluntarily in keeping with their promise made several years ago and since that time have made several rate reductions. They are living up to their slogan "Adequate, Low Cost Electric Service Builds Better Towns."

Earle Smith's Farm Sale Drew Large Crowd

Earle Smith reports to the Times that he had a big crowd at his closing out farm sale on Monday afternoon and that everything sold at a good figure. He says he is well pleased with his sale.

The Times handled the advertising for Mr. Smith.

Methodists To Hold Quarterly Conference Dec. 8th

Quarterly Conference of the Methodist Church will be held on December 8th at 7:30 p m. at the church parlors. We will be hosts to other Q. C.'s of the Sub District, so lets have a good turn out from Klemme. The Standard Bearers will serve a lunch for twenty five cents.

Clear Lake Man Buys Goodell Oil Station

A deal was closed at Goodell Monday in which Aaron Johnson sold his business and stock of goods in the North D-X service station to Lloyd Hayes of Clear Lake. Luverne Miller of Clear Lake will be the manager and has rented the John Honnell property.

Correction

In the write-up of the Methodist Bazaar a typographical error was made in the amount taken in. Instead of $227, the correct amount should have been over $277 in receipts.

WRONG MESSAGE

Police Chief Jesse Morse of Red Oak got a message on his radio-controlled car last week to proceed to the fire station to see the Maryville (Mo.) police chief. He carried out the request but was unable to find any police chief from Maryville. The Shennadoah radio sation came in with an explanatory message. It seemed that the original request was beamed from a similar radio system in Potterville, California and referred to the Maryville, Cal., police chief. Sometimes, radio is TOO wonderful.

LOST HAND

Clair Schuler, 20, of near Atlantic, lost his left had one day recently in a corn picker accident. He was working alone on the machine when his hand become caught in the rollers.

MRS. AUGUST LAU PASSED AWAY AFTER LENGTHY ILLNESS

Mrs. August Lau passed away at her home in Garner Thanksgiving Day, 3:00 p. m. after a lengthy illness.

She was born April 21, 1885, at Le Mars, Iowa, being the youngest of six children born to the Rev. and Mrs. Wm. Koerner. She was christened Helen Elnora. Her father was a minister in the Methodist Church. When she was three years old her family moved to Freeport, Ill. Among the places she lived as a child were Rockford, Ft. Dodge and Charles City, Iowa. She attended Charles City College and graduated from that institution.

In 1901 her father retired from the ministry and moved to Klemme, where Mr. Koerner and his son Albert built the first rural telephone line out of Klemme. Helen Koerner was the first telephone operator in Klemme.

In 1905 Helen Elnora Koerner became the bride of August G. Lau of Klemme. They resided on a farm near Klemme until 1923, when they moved to Mason City, where Mr. Lau engaged in the automobile business. Three children were born to them.

In 1934 they moved to their farm in Liberty township where they lived until the spring of 1945 when they sold their farm and purchased a home in Garner, their present residence.

Services were held Sunday, November 30, 2:00 p. m. at the Methodist Church in Garner with the Rev. E. F. Broberg officiating: Burial was in Memorial Park Cemetery near Mason City. Pallbearers were: Ben Reimer, Owen Nuehring, I. L. Abele, Fred Steiff, Roy McMillin, and E. F. Bock. Mrs. Howard Dusenberg, pianist, accompanied the following quartette: Mrs. Chet Stille, Mrs. E. F. Bock, Clair Tompkins, and Dean Tompkins.

Mrs. Lau is survived by her husband and three children, Mrs. Ruth McHugh, Waterloo; Caryl of Gary, Indiana; and Norman of Mason City; three grandchildren; two sisters, Mrs. H. J. Stille, De Ridder, La., and Mrs. J. E. Stille, Klemme; one brother, A. G. Koerner, Klemme. Many other relatives and friends mourn her passing. One brother, Rev. Wm. F. Koerner, St. Paul and one sister, Mrs. W. F. Stille, Klemme and her parents preceded her in death.

Mrs. Lau was a home-loving, Christian mother. She was a faithful member of the Methodist Church. Her faith in the Lord Jesus Christ never faltered even though her illness caused intense suffering for more than a year. In her suffering she found comfort in the word of St. Paul, "I reackon that the sufferings of this present time are not worthy to be compared with the glory that shall be revealed."

She will be greatly missed by her family and many friends. They will receive comfort from the Lord whom she trusted and followed into Life Immortal.

NINETEENTH YEAR

At Westside, Iowa, a tractor belonging to Arthur Schoessler is now in its 19th year. Talking picures were just a novelty and Herbert Hoover was president of the United States when Mrs. Schoessler bought the machine, which has done all the heavy work on his farm ever since.

Rev. and Mrs. Paul Potter and baby of Ruthven visited at the J. A. Chambers and Roy Arnold homes Wednesday.

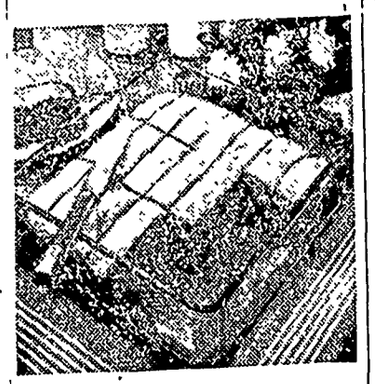
Plan on Baking Holiday Sweets Well in Advance



Peanut bars are easy to make and easy to serve. They are ideal for snack fare for the youngsters, as well as family get-togethers during the holidays.

It won't be long now before the holidays are with us, and that means the children will be home with their constant demands on the cookie jar. It means, too there will be plenty of entertaining, perhaps not of the elaborate variety, but evenings in front of the cozy warmth of the fireplace, when there should be a simple cookie or cake to serve.

Wise cooks will plan to do a lot of their holiday baking early. Some of the cookies and confections can be made early, and they will taste so much the better for it. Then, too, most women like to make such things as pudding and fruit cakes before the holidays so as to relieve the strain on the kitchen later on.

If you're making fruit cake or pudding, chop the fruits the day before and prepare your molds. Then the making of the recipe will be easy and there is less chance for error.

English Plum Pudding.
½ pound butter
1 pound light brown sugar
5 eggs
1 pint milk
1 pound fine bread crumbs
1 glass grape juice
1½ pounds raisins, floured
2 pounds currants
½ pound citron
1 ground nutmeg

Cream the butter and sugar, add beaten eggs, milk, bread crumbs, grape juice, raisins, currants, finely sliced citron and spice. Steam in a buttered mold for five hours.

Have you ever made your fruit cake in little fluted paper cases for individual servings? It's really very easy and saves on baking time.

Small Fruit Cakes (Dark).
1½ cups butter
2 cups dark brown sugar
8 eggs, beaten light
3½ cups flour
1 teaspoon each of cloves, allspice and cinnamon
1½ pounds raisins
1½ pounds currants
½ pound citron, sliced thin
½ cup melted grape or currant jelly

Cream butter, add sugar and cream until light. Beat the eggs until frothy and add to the butter and sugar. Sift the flour and spices over the cut up raisins, currants and citron and mix well. Beat into the other mixture; add the melted jelly. Fill small paper cases and bake in a slow oven for about 30 minutes.

Small Fruit Cakes (Light).
¾ pound butter
1 pound sugar
12 eggs
1 scant pound flour
1 to 1½ pounds grated coconut
1 pound citron, sliced fine
1 pound blanched, sliced almonds
1 pound raisins, cut fine
1 pound candied pineapple, sliced fine
¼ pound candied cherries, sliced fine
⅛ cup orange juice
½ teaspoon mace

Proceed as in recipe above.

Both children and adults like peanuts, and there's nothing better or easier than to include them in a bar type of cookie made delicious with brown sugar.

LYNN CHAMBERS' MENU

Cream of Tomato Soup
Baked Veal Baked Potatoes
Green Peas with Celery Rolls
Apple, Banana and Raisin Salad
Frozen Custard *Peanut Bars
*Recipe given.

***Peanut Bars.**
(Makes 21 bars)
⅓ cup shortening
1 cup brown sugar
2 eggs
1½ cups sifted flour
¼ teaspoon salt
1 teaspoon baking powder
⅓ cup light cream
1 teaspoon vanilla
1 cup peanuts
2 teaspoons confectioners' sugar

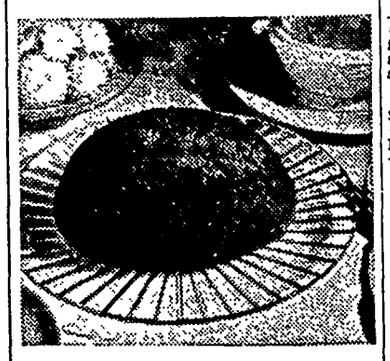
Cream shortening until fluffy. Gradually add brown sugar. Thoroughly beat in eggs. Sift flour, salt and baking powder together and add to shortening mixture alternately with cream. Stir in vanilla and peanuts. Bake in a moderate oven (350 degrees) in a square glass cake dish for 30 minutes. Remove from the oven and sprinkle the top with confectioners' sugar.

Crumb Cake.
2 cups flour
1½ cups sugar
2 teaspoons baking powder
¼ teaspoon salt
½ cup butter or margarine
2 eggs, well beaten
½ cup milk
½ teaspoon cinnamon
½ cup nuts, chopped

Sift dry ingredients together. Cut in butter. Reserve one cup of mixture. To remaining mixture add combined eggs and milk. Beat well. Pour into greased pan about 7 by 11 inches. Cover top with reserved mixture. Sprinkle with cinnamon and nuts. Bake in a moderate oven, 375 degrees, for 35 minutes.

Brazil Nut and Fruit Sweets.
(Makes 36 balls)
¾ cup brazil nuts
½ cup raisins
½ cup apricots
½ cup pitted dates
¼ cup coconut

Put enough of the brazil nuts through food chopper to measure ½ cup; reserve to roll mixture in. Put remaining nuts through chopper with raisins, apricots, dates and coconut. Mix until well blended. Form into one inch balls. Roll in remaining ½ cup of nuts.



Do your holiday baking early by planning to make plum pudding now. Steam it in a mold and then store it in a tightly covered tin until ready to use.

Almond Crisps.
⅓ cup butter
1 cup light brown sugar
1 well-beaten egg
1 cup flour
½ teaspoon cream of tartar
½ cup blanched, coarsely chopped almonds

Cream the butter and sugar until light. Add egg. Sift together the dry ingredients. Into this mix the nuts. Beat all together. Drop from the end of a spoon onto a greased baking sheet and bake in a slow oven (325 degrees) to a light brown.

Vanilla Wafers.
½ cup butter
⅔ cup sugar
Yolks of 2 eggs
1 cup flour
1 teaspoon vanilla
⅛ teaspoon salt

Cream butter and sugar together. Add egg yolks and cream again. Gradually stir in the sifted flour, vanilla and salt. Drop from the end of a spoon onto a greased pan in small rounds, about an inch apart, and bake in a moderate (350 degree) oven until delicately browned.

Released by WNU Features.

LYNN SAYS:

Flavor Tricks Improve Simple Dishes

Scramble eggs with some tomato soup from a can. It's different and very delicious.

When you make that chocolate pudding, the children will like it even more if you pour a little of the pudding in the cup, add a layer of crushed peppermint candy, a layer of pudding, a candy layer and then more pudding.

Making cheese souffle? Add glamour by baking it in par-boiled halves of green pepper.

When you cream salmon, don't forget that a speck of curry does wonderful things to it.

Bay leaf and a bit of cloves added to tongue while it cooks are flavor tips you don't want to overlook.

Ever tried luscious devil's food cake with whipped cream flavored with crushed peppermint candy? Bake in a loaf or square pan and top with the cream. Saves time.

...hesitated. The flush on her ...deepened. "This is my job," ...reaching out and hugging ...close to her side. "Did you ...me to go into a convent?"

...Cummings studied the boy a moment. "You're a handsome little fellow, at that," he admitted grudgingly. "How old are you?"

"I'll be five tomorrow," Geoff boasted. "That's why Daddy's going to meet us here. He's going to buy me a fire engine, the biggest one in the biggest store in New York."

"Five," Cummings reflected aloud. "I must say, Jan, that isn't very flattering. You waited just about long enough for the ink to dry on the decree. What's your name, son?"

"I'm Geoffrey G. Huxley Jr.," Geoff said.

where she belonged with Geoff and the man she knew now she loved.

"You've taken awfully good care of Jan," she heard Cummings say. "She never looked better, not even when she was Mrs. Cummings."

"Well, we try to keep her happy," Huxley responded, smiling warmly at Janet. "Don't we, Geoff?"

"They are good to me," Janet said, and her voice was suddenly husky. Geoff slipped his hand into hers. "How about my present?" he wanted to know.

"True enough," Cummings put in. "I mustn't get in the way of a fire engine. And I'll leave you, sir, to guard an old flame. Goodby, Janet." He pressed her hand a moment and was gone.

Janet turned to Huxley. "I'm sorry," she said wearily. "I didn't intend to . . . to . . ."

"To pretend you were Geoffrey's mother instead of his governess," he finished for her. "I realize that, Janet. But if you only knew how

Somehow she managed a casual smile. "Gracious," she said lightly, "it must be old-home week."

Cummings whistled softly. "THE Geoffrey G. Huxley? Standard Oil Huxley? You did pretty well, Jan."

Janet nodded. Yes, she'd done pretty well, up to now. But any minute. . . . She rose quickly.

"I mustn't keep you Dred. It's been nice seeing you again, almost like having a lock of your hair. I . . ." Her voice trailed off. She might have known. Geoffrey G. Huxley Sr., big, hearty and perennially rumpled, was striding toward them, an eager grin on his tanned face.

"Hello, son." He stooped and tousled the boy's hair affectionately. "Hope I haven't kept you waiting long," he said to Janet. She shook her head and raised her hands in a slight, helpless gesture. "Mr. Cummings—Mr. Huxley."

"Dred Cummings?" Huxley asked with obvious interest.

The other man nodded. "That's right. Your wife has told you about me, I suppose."

Huxley glanced at Janet's strained face. "The papers have been full of those murals of yours," he said easily.

Janet stood very still, listening to their conversation, watching their faces. Dispassionately she noted Dred's conceit, his pomposity. He was, suddenly, a stranger who should be on his way, leaving her long I've been pretending exactly that. Besides, if I were a little boy who had been motherless since the day he was born, I'm sure I'd like a mother for a birthday present almost as well as a fire engine. Perhaps, if you approve, we can give Geoff both."

Series H-47

THE BIBLE TODAY

International Uniform Sunday School Lesson

BY LOUIE D. NEWTON, D.D.

SCRIPTURE: III John.
DEVOTIONAL READING: I Corinthians 1 10-17

Christian Fellowship

Lesson for December 7, 1947

SUNDAY'S lesson is based on the short third Epistle of John. You can read it in two minutes, but you will not exhaust its meaning in a lifetime. Link with III John the devotional reading found in First Corinthians 1:10-17, and you have a great and glorious picture of Christian fellowship. Note these words:

Dr. Newton

"Now I beseech you, brethren, by the name of our Lord Jesus Christ, that ye all speak the same things, and that there be no divisions among you; but that ye be perfectly joined together in the same mind and in the same judgment," I Corinthians 1:10.

And these words from III John, second verse:

"Beloved, I wish above all things that thou mayest prosper and be in health, even as thy soul prospereth."

Here we have the basis for Christian fellowship.

* * *

Let Us Love One Another

WHAT is the first test of Christian fellowship? Read I John 4:7.

Love one for another is the first and last test of Christian fellowship. Of course, love one for another is dependent upon love toward God. We do not really love one another until we first love God. And we do not love God until we realize that he first loves us.

Why do we keep certain letters? Because they are from those who love us, and whom we love. Boys and girls can help to make this a better world if they will express their love one for another in letters.

* * *

Gracious Words

IN ECCLESIASTES 10:12, we read: "The words of a wise man's mouth are gracious."

Christmas will soon be here. There will be many Christmas cards and Christmas letters. Let us think carefully of some lonely boy or girl in our community who may not receive such a message unless you send it.

More than that, think of the lonely boy or girl in the hospital, in the orphan home, in the underprivileged tenement. Think what a letter from you to such a lonely neighbor would mean!

* * *

Doing Good

CHRISTIAN fellowship, in the last analysis, is doing good. "He that doeth good is of God," says John, and we know that it is true. Intermediate boys and girls can seize upon numerous methods of proving their Christian attitude as we come on toward the Christmas season. Discuss with your teacher next Sunday the idea of providing Christmas gifts for underprivileged boys and girls of your age. If not in your community, somewhere.

While in Europe last summer, I was impressed with the fact that there will be very little Christmas for the young people in many of those lands this year. War has left its frightening desolation. The people are without money and without homes and without clothing and without food.

May I suggest that you discuss plans by which you may send packages through CARE to some lonely, needy neighbor in Europe this Christmas, thus proving your sense of Christian fellowship.

* * *

Furthering the Gospel

AS WE grasp more fully the meaning of this lesson next Sunday, our hearts will gladly respond to the opportunities for furthering the Gospel of Jesus Christ, even as Gaius and Demetrius impressed John.

In every community are crying needs for Christian ministry. Your newspapers will be telling of special opportunities for Christmas help. Your Community Fund chairman can give you names of worthy neighbors who need help.

"I thank God for your fellowship in furtherance of the Gospel from the first day until now," wrote Paul to the Philippian Christians.

How did they show this fellowship? In many, many practical ways, some of which Paul names. They sent food, books, clothing. More than that, they gave themselves in personal visitation to lonely friends. They cheered the faint.

How happy we shall be if after the study of this lesson we go out to do with all our might what our hands find to do.

* * *

Stassen at Best On Labor Issues

WHERE I STAND
By Harold E. Stassen
(Doubleday—205 p. p.—$2)
By Bill Schoentgen

In an age of quasi-literate politicians, Mr. Stassen, the determined candidate for Republican presidential nomination, has tugged at the bootstraps of his social consciousness and raised himself above the hurly-burly of the vote-getting mob to the rare level of a forthright political thinker who takes as his ken his own national society.

The former governor of Minnesota attempts no probing into the intricacies of foreign policy and makes no bones about admitting it. His thesis is that once a sound, forward-looking domestic organization has been achieved, an equally constructive foreign policy may be worked out from that basis. This is not to say that the lack of an expression on foreign policy is not felt in Mr Stassen's book. It is one of the shortcomings.

More important, Stassen's lethargic estimate of foreign policy, his relegation of it to a secondary position, his failure even to touch upon the voluminous subject of foreign aid, all would seem to indicate a preference for a kind of tolerant, elastic nationalism. Whether or not this is the right time for the emergence of a strong nationalistic philosophy in the United States is a topic which is being subjected to universal debate. The man from Minnesota consistently refrains, in his book, from entering the discussion. It is an omission which undoubtedly will be brought piercingly to his attention by his more antagonistic colleagues.

But it is in the area of labor problems and labor legislation that the writer is most confident of his ground. In a single monolithic chapter he dissects and analyzes the varying status of the United States labor movement from 1920 to 1947, and nails down with a hammer of undeceptive realism its inevitable relation to the prosperity and soundness of the entire economy.

Stassen offers his theories on labor in the form of the testimony which he presented before the senate labor committee in February of this year, during the period when congress was preparing the legislation which ultimatly resulted in the Taft-Hartley act.

That law, he believes, "will be the foundation for a fair, just and well-balanced labor policy in America." In total, Stassen approves of the act. Specifically, he is opposed to three portions of the law as it stands: (1) The provision making it unlawful for a labor organization to contribute to election funds; (2) the non-Communist affidavit rule; (3) the "ultimatum" stipulating that existing union shop contracts cannot be renewed unless and until an election is held and a majority of all employees votes in the affirmative.

For the rest of his platform, Stassen turns to the issues of taxation (with which he deals from the standpoint of "dynamic capital"), housing, survival of small business and the paucity of medical care and hospital facilities. To each of these he brings an application of the classic Republican theory of laissez faire and damns heartily all efforts to give the federal government greater control in those fields.

Practical Potholders in Jiffy Crochet

Pattern No. 7466

DID you ever see such gay potholders? They're practical, too. Good and thick, and sturdy. Made of rug cotton or candlewick.

* * *

Make these pretty flower potholders. Protective as well as gay! Pattern 7466 has directions for both.

Our improved pattern — visual with easy-to-see charts and photos, and complete directions—makes needlework easy. Price 20 cents.

Send your order to:

Sewing Circle Needlecraft Dept.

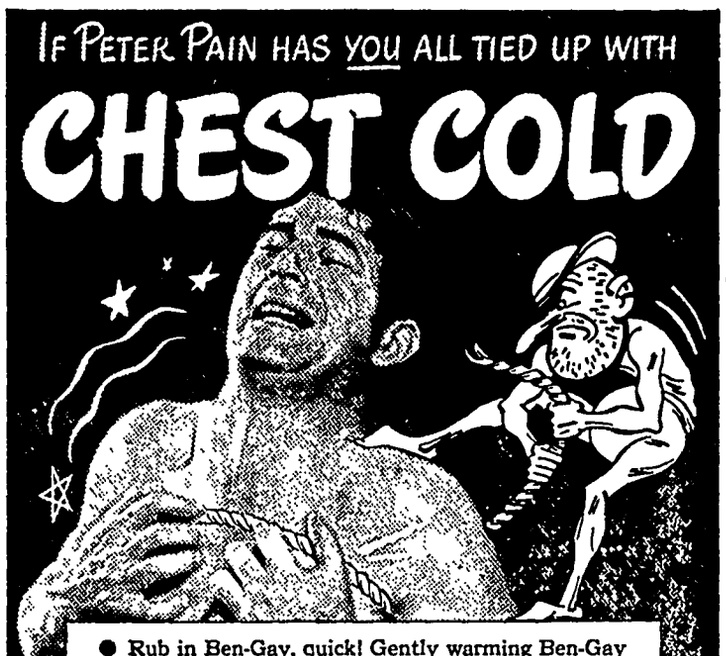
Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

IF PETER PAIN HAS YOU ALL TIED UP WITH
CHEST COLD



● Rub in Ben-Gay, quick! Gently warming Ben-Gay brings speedy, welcome relief from chest-cold discomfort. You see, Ben-Gay contains up to 2½ times more methyl salicylate and menthol—two pain-relieving agents known to all doctors—than five other widely offered rub-ins. Insist on genuine Ben-Gay, the original Baume Analgésique.

Also for Pain due to RHEUMATISM, MUSCLE ACHE, and STRAINS.
Ask for Mild Ben-Gay for Children.

QUICK... RUB IN Ben-Gay

Firestone
CHAMPION GROUND GRIPS
CHOICE of CHAMPIONS
IN ALL THREE 1947 NATIONAL PLOWING MATCHES

CHAMPION Plowmen know that the performance of their tractor tires can "make" or "break" them in a plowing match. They must have tires that take hold and pull — on soft ground — on hard ground — on sod — on stubble. They must have tires that take a full, clean bite, a center bite — tires that plow right through under all conditions.

That's why winners in the three big national matches this fall (Big Rock, Wheatland, Illinois and Webster City, Iowa), plowed on Firestone Tires. They, like most other contestants in these big events, could not afford to gamble with a "broken center" tire that might let them down by clogging up with trash, slipping and spinning.

Firestone Champion Ground Grips will perform for you on every job just like they perform for champion plowmen. They will always take you through. And they will take you through faster, without slipping. That means time and money saved.

Specify Firestone Champions when you order a new tractor or when you buy replacements for your present tractor. See your nearest Firestone Dealer or Store today.

Listen to the Voice of Firestone every Monday evening over NBC

TAME DEER

Early last spring, the Gust Larson family of near Swea City found a young fawn with a broken leg. They took it home and splinted the leg, meanwhile getting a permit from the game warden to keep the young deer. Now the animal is hale and hearty and is a great pet of the Larsen's, being so tame it will "beg" for food of any one who comes by.

KILLED BY ROCKET

The modern age crossed trails wih the old near Manly recently. One of the Rock Island Rockets struck a 240 pound deer, killing it instantly.

NERVOUS, TOO

When Geo. W. Reach, 78, and Sarah Johnston, 73, both of Mt. Ayr, applied for a marriage license in the office of the page county clerk last week, they were as nervous as younger persons making such application. The bride-to-be was so "be-fuddled" that she could not remember her last name and had to ask the assistance of Mrs. Russell Hudson, daughter of the prospective groom.

Phone your news to 12.

Welding? Yes!
Because of the many small jobs that c not be brought to the shop we have found necessary to get a small portable gas weld outfit. With it we can weld cast iron, st copper, bronze, etc. up to 3-16 of an inch thickness in most cases without taking a thing apart. This outfit is small enough to through an ordinary door and we have h enough to reach 25 feet from the tanks. T is ideal for welding pipe when you can't fittings.

AROUND IOWA

PRAIRIE FIRE

The farm home of the Ben Nehls family south of Denison was threatened by a "prairie fire" one day recently A group of about fifty men finally put the fire out after a vigours fight. It is thought a lighted cigarette from a passing car had started the blaze.

SIGNALS

Adel residents have found out why a big army plane occasionally flies over the town, as low as the law permits. Lt. Tow Laster of Topeka occassionally comes up to visit his sister in Adel. In the day time he lowers his landing gear to signal sister Joan to put another plate on the table and start for the Des Moines airport. At night, the lieutenant turns on his landing lights.

BODY FOUND

The army graves registration service recently announced the finding of the body of Corporal Leland Faktor, Worth county young man who was the only Iowan lost on Jimmy Dolittle's history-making raid on Tokyo in the early years of the war. Faktor's plane was one of those making a crash landing in China and his body was burried about 450 miles southwest of Changhai.

STRUCK

While working near Joice, Clifford Krambeer of Britt was struck by a bolt of lightning. The bolt came without warning, or without previous lightning or thunder, as Krambeer was fastening a steel gate. He was rushed to Joice but had recovered by the time they reached town.

GOOD PAY

Recently Floyd Bubeck of Wall Lake in Wright County township took 239 hogs to market. They were of pretty good quality. The check he received for them was $21,458.57. The check was one of the largest ever written by the firm which bought them, to any single farmer.

BROKEN NECK

Death still lurks on Iowa highways. When the driver, Larkin DeHart of Logan fell asleep, his car left the highway, rolled about 350 feet and then plunged into Hog Creek. DeHart suffered severe cuts. His passenger, Gerald Henderson, 22, of Logan, who was sound asleep in the back seat, received a broken neck.

SURPRISE

George Van Houten of Everly has been suffering from headaches and neck pains. He entered a Souix City hospital for treatment and was surprised to find that his neck had been broken in an automobile accident last June, one vertebrae being broken and another one splintered. His neck has been put in a cast which he will wear for the next six or eight weeks.

NO PARTY

At Independence recently, two men who were enjoying a convivial evening mourned for the companionship of an associate, who at the moment was languishing behind prison bars in the Independence county jail. They decided to go over and cheer him up with a few bottles of pop, into which they had injected certain invigorating ingredients. Sheriff Hart interrupted the surprise party; one of the men joined his comrade in jail and the other, being fleeter of foot, disappeared into the night. Both men have been charged with disorderly conduct.

SHOT

At an Oskaloosa hospital Norman vanden Baard, 13 is recovering from a .22 calibre gunshot wound accidentally inflicted by his friend, Gary Vriezlaar, 14. The bullet entered Norman's arm and went clean through, ending up in his stomach. Both lads are from Pella, the accident occured while they were going after the cows on the Vanden Baard farm.

TOOK NO CHANCES

Thieves broke the lock on the chicken house door at the farm home of John Hamann near Danbury and took 50 chickens. The vandals also took the family dog, who returned the following day. A few nights later the thieves returned and took the dog a second time. The dog, a valuable cattle dog, had not returned the second time, at last report.

THIS IS REAL SAD

At Harlan, Mr. and Mrs. Don Miller have been waiting impatiently to move into a new house which has been under construction for them. The same week they planned to move in, the new structure caught fire and burned, being almost a total loss.

TWO TEETH

The parents of Linda Kapsch, of Varina, have something to brag about. When Linda was born on Oct. 28, 1947, she already had two lower teeth. Only 10 days later, Dr. H. J Kestel extracted one of them. Not many people can say anything about visiting the dentist at the age of ten days.

WINNER

Johnny Davenport,, Kellerton won a Ringgold county corn yielding contest with an average of 561 bushels per acre In Shelby county, Arnold Christensen won a similiar 10—acre yield contest with 112.4 bushels per acre.

DID YOU KNOW JOHN BALL?

Workman excavating to make way for a cellar stairway at the former E. P. Day residence in Grinnell found an ancient tombstone. The stone is of the old style with straight shaft and rounded top. Written on the stone was, "John Ball, died May 24, 1885, age 74 years, 2 months, 13 days." Up to the present time, no one in Grinnell has reported knowing anything about John Ball, nor how nor why the tombstone was found beside the Eddie Day home.

Congress Tackles Labyrinthine Job

Marshall Plan Complexities Involve Vast Field of Work

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—There never was a better example of the difficulties encountered in a democratic government than those which are being faced as the specially-called short session of the 80th congress carries on its debate today.

I doubt if any parliamentary body in the world, or any despotic ruler, for that matter, ever faced a problem more complicated in detail, wider in its scope, or more important in its potential results than the Marshall program for aiding Europe.

Since the idea of the Marshall plan was first broached, I have had opportunity to gain a few short but very intimate glimpses into the machinery which contributed to its completion. Some of us, for example, recently were given a very condensed and revealing personal account of the last, long, earnest sessions in Washington where the representatives of the 16 European countries sat down in the state department to carry on their daily, and sometimes nightly, seminars with the representatives of our government.

Baukhage

These discussions went through three phases. The first phase was a careful expansion of details lacking in the formal report drawn up by the Paris conference.

You would be surprised at the number and scope of those details, many of which had to await special memoranda from technical experts in the countries involved. For instance, we can imagine a conversation something like this:

"Just a moment," one of the American officials says, with his pencil poised over the pad in front of him, "You say that it will be impossible to increase the output of the mines in Country X without additional mining machinery. You gave us the figures for the total equipment estimated, but I wish you would describe specifically the types and the quantity you need."

If the foreign expert had the statistics with him, they were checked, and the discussion of that particular item ended. If not, the next point was taken up, awaiting the detailed figures which had to be cabled from Country X.

However, that phase was concluded without any serious casualties. In fact, I understand it gradually blended into the third phase, which was a two-sided discussion, bringing out exactly how the Paris report was formulated. Whether, for instance, it was a synthetic combination of various separate viewpoints and separate plans, or whether the parts were fitted together with due relation to each other so that they could be taken apart and put together again. The Americans took it apart and, we were told, it went together all right.

As I say, this was a two-sided discussion, and I understand that it developed a common appraisal of the plan. In other words, when it was completed, either American criticism had been satisfied, or the European viewpoint had been sufficiently altered to achieve harmonious agreement.

In setting forth their views, certain "main factors" were emphasized by the Europeans.

In the first place, in normal times, Western Europe traditionally imported more goods from the western hemisphere than they exported to us. However, this imbalance was compensated for by the trade between the Far East and Western Europe. This trade furnished Western Europe with sufficient dollars to make up part of the difference.

Secondly, in normal times, particularly in the case of Great Britain, there was the factor of "invisible income." This "invisible income" was made up, in part, of investments held by individual Britons and the British government, of the income in commissions and other fees which the British and other nations earned as a clearing-house of merchandise, through the use of shipping facilities and many other services which it was convenient and practical for European nations to provide for the world. But this "invisible income" has largely disappeared now.

We asked one of the European representatives what had happened to it. The partial answer of course, was obvious: With world trade at a standstill, many of the services no longer are being provided. And as to the personal holdings, one European representative said: "Before the war, I owned 100 shares of A.T.&T., and 20 shares of General Motors. But they had to go long before the war was over—the interruption of my earning power, high taxes and so on."

Still another important factor is the consideration of the normal trade which formerly existed between Eastern and Western Europe.

It was interesting to note at this point, that considerable optimism was expressed by the Europeans over the possibility of a resumption of this Eastern-Western trade.

In the course of this meeting and several others, we have had a chance to learn many more details of this complicated plan and its evolution that possibly can be reported here. And yet these meetings could reveal only tiny fragments of the tremendous amount of research, analysis, study and discussion which was reduced to a few salient points, and presented to committees of congress in Secretary of State Marshall's final report.

Secretary Marshall, himself, had to go through a long period of briefing. In his last news conference before he met with congressional committeemen, he had, as he put it, "immense ground to cover."

Marshall Target Of Press Critics

I mentioned Secretary of State Marshall and his last news conference before meeting with the congressional committees. There has been growing criticism of Mr. Marshall here in Washington. It took form after the conference and has appeared in editorials.

One Washington editorialist complained that Marshall won't talk, that the newsmen at the conference drew a blank because Marshall was uncommunicative. The Wedemeyer question came up, for example. Marshall would say nothing. He added, not petulantly, but in a tone that forbade further questioning: "Furthermore, I don't feel obliged to report on every conversation I have with the President." Period.

That was quite true. He doesn't and shouldn't. Any secretary of state who did feel obliged to import all information exchanged with the chief would not long hold his job.

But! In a democracy, if you are an official, you have to live in a goldfish bowl. The editorialist quoted the late Clinton Gilbert on Secretary of State, later Chief Justice Charles Evans Hughes. Gilbert, speaking of Hughes, said: "He talks to the country daily. He takes the people into his confidence, telling all that can be told, and as soon as it can be told. He makes no step without carrying the country with him . . . that is democratic control of foreign relations."

Marshall and the Press

Well, that is not State Secretary Marshall's way.

Many of the traits that make a man a splendid leader of armies, a strategist, likewise make it impossible for him to cater to a public which reacts only to emotions—not as armor plate reacts to shellfire. You cannot land a million men on a foreign beachhead, nor feed and clothe and care for them so they can carry out their gigantic mission, with a glib tongue, a charming smile or a keen sense of publicity that gets your campaign on the first pages.

Secretary of State Marshall is a great planner and an excellent executor of plans. It is up to someone else to "sell" those plans.

NEWS REVIEW

Aid Deadline Requested; U. S. Corn Yield Down

DEADLINE:
December 1

Apparently feeling that congressional approval of his request for 597 million dollars in stop-gap aid for France, Italy and Austria was assured, U. S. Secretary of State George Marshall sounded a new keynote—speed.

He suggested to the house foreign affairs committee that a deadline of December 1 be established for emergency relief to the three hard-pressed nations, and looked ahead to an early March deadline for his four-year, 20-billion-dollar plan for eventual European recovery.

State department witnesses backed up Marshall's plea for speed. They testified present funds would carry France and Italy only through December, beyond which looms the brink of chaos and confusion—political, moral and economic—unless additional help is rushed across the sea.

Also testifying before the house foreign group, Lewis Douglas, U. S. ambassador to England, offered a brief, pointed summary of the whole issue of immediate foreign aid: There can be no guarantee that the aid program will succeed, but it would be more risky to deny Europe financial help and watch despair and pandemonium spread across the continent.

Finally, it was the opinion of Secretary of Commerce Averell Harriman that emergency European relief "can be substantially met," despite supply problems in this country.

China, Too

Virtually forgotten under the press of urgent affairs in Europe is the problem of China — ravaged, still contorted in war, constantly backsliding into greater political and economic corruption.

As a modicum of aid and comfort to that Eastern nation, Secretary Marshall has proposed a 300-million-dollar aid program to be administered in conjunction with the European phase of the Marshall plan.

At the same time, Marshall held to his stand that the suppressed report of Lt. Gen. Albert Wedemeyer on conditions in China would not be made public. He intimated that it drew such a dismal picture that to release the report would be harmful both to the United States and to China.

CORN DOWN:
Semi-Finals

There was a smattering of bad news in the agriculture department's semi-final crop report of the year. It had to do with corn and winter wheat.

The 1947 U. S. corn crop now stands at an estimated 2,447,422,000 bushels, a decrease of 11,252,000 bushels from a forecast made a month ago. That is slightly below the 10-year (1936-45) average of 2,639,102,000, and far under last year's record yield of more than 3.2 billion bushels.

Hopes for another bumper wheat crop next year received a thorough dampening with the department's announcement that about 25 per cent of the intended winter wheat acreage in the important great plains area had not been seeded by November 1 because of dry weather.

Simultaneously it appeared that meat production had started a downward trend, impelled by the reduced corn crop and higher feed prices.

Department of agriculture spokesmen estimated that there will be a cattle population of only 77 million on January 1, 1948—8.6 million below the all-time high of 85.6 million on January 1, 1945.

As a result, consumers will be eating less beef, pork and poultry next year—there just won't be as much to go around.

RED ACTION:
Riots, Terror

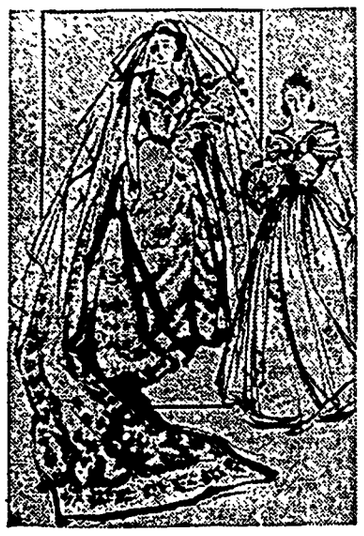
Communist-borne trouble and terror was on the increase in France and Italy.

Spreading paralysis gripped the French port city of Marseille as workers responded to a general strike call by Communist labor leaders after a day of rioting in which one person was fatally wounded and six others seriously hurt.

In Milan, Italy, Communists sacked an anti-Red newspaper plant and attacked a police station in the course of rioting which gripped the city in a state of near terror. They demanded the immediate suppression of newspapers "which incite people to hate and vengeance," the suppression of "organizations of Fascist character" and the arrest at once of "all persons suspected for their activity against the Italian republic."

In both Marseille and Milan, the Communists seized upon relatively unimportant incidents and managed to magnify them to a point where they could incite violence.

Gown of the Year



This is an artist's conception (front elevation) of the wedding gown worn by Princess Elizabeth on November 20 for her marriage to Lt. Phillip Mountbatten. On the right is one of the bridesmaids' dresses. The wedding gown, upon which such adjectives as glorious, exquisite and ethereal have been lavished, was of ivory duchess satin, strategically embellished with seed pearls, crystal and hand-embroidered designs based on paintings by Botticelli. The train of transparent ivory silk tulle was 15 feet long.

OH, HAPPY UNITED STATES

Wild Animals Put Bite on India

Do you pity the poor American pedestrian who figures to get his lumps from being booted in the derriere by a rampaging motorist when he crosses the street? Think nothing of it.

In India red-faced monkeys, savage tigers, wild elephants, prowling bears and poisonous snakes kill more than a million persons every year.

Like the traffic menace in the United States, this situation at last has attracted the attention of the central and provincial governments in India. They have declared the monkeys which invade the Hindu city of Benares and bite pilgrimaging worshippers to death "one of the greatest menaces of our time from the animal kingdom."

Although a handsome bounty is paid for every monkey's head—$10 for a male and $6 for a female—efforts to end the monkey menace are up against strong religious sentiment. Hindus consider the monkeys sacred.

Yet, in Benares, children are being pushed from temple steps to their death by wild monkeys almost daily. Last year monkeys killed 107 persons there.

And there are other hazards which nature in the raw holds for the Indians. Wild elephants in the provinces of Assam, to the north, and Mysore, to the south, move in great groups, trampling villages, destroying crops and leaving behind a grim toll of human lives.

On the slopes of the Himalaya mountains black bears killed more than 3,000 persons in 1945 alone. Special anti-bear squads now have been organized to combat this terror.

Just 100 miles from the great metropolis of Bombay, in western India, can be heard the chilling growl of the man-eating tiger. Every year 200,000 Indians fall prey to them.

Most dreaded of all, however, is the hooded, glossy king cobra and its smaller brethren. There are an estimated 40 million snakes in India—one for every 10 human beings. And every year they kill 400,000 people.

Civilization has quite a ways to go at that.

Sportlight

by GRANTLAND RICE

THERE is always the end of a road, of every road. Back in 1913, a Notre Dame team came to West Point with a quarterback known as Gus Dorais and a stocky end remembered as Knute Rockne. This combination beat a strong Army team 35 to 13, with Dorais winging the ball to Rockne in a complete rout.

This game started a series that eventually became more important than Harvard and Yale, Yale and Princeton, California and Southern California, Army and Navy or any inter-team duel you can think of at the moment.

F. Leahy

The Army-Notre Dame meeting reached such heights that a year ago, Biff Jones, Army's graduate manager, told me he could easily sell a million tickets at $10 each. I think he could.

In the series of 34 games—Notre Dame has won 23 times, Army 7 times with 4 tics. Notre Dame was far in front until the war came along where, for example, from 1928 through 1943 Notre Dame won 13 games, lost 1 and tied 2.

Army had no material and manpower to match Notre Dame—and Army had no Rockne. But most of these games were well-balanced contests, hard and closely fought, until Army piled up a terrific margin of 107 points in 1944 and 1945.

Frank Leahy came back in 1946 to check the Army hurricane with an 0-0 party, largely emphasized by its extreme dullness, where neither team would take a chance. It was the dullest game I saw last year. Now they have met for the last time in many years at South Bend. This is the end of the road—for some time. How long, no one knows. It may be a couple of years—it may be forever.

No one has ever questioned the superior material Notre Dame has known in these 34 years—up to the war. Notre Dame has been the capital of football in this country—always the team you had to beat—and always the team you seldom did. Usually the team with the better football material and at least adequate coaching—more than adequate with Knute Rockne and Frank Leahy coaching — two of the greatest.

I might add that Notre Dame also came along with a spirit that Army and Navy might have equalled—but never could surpass. Notre Dame meant football in this country from the days of Rockne, Dorais, Gipp, the Four Horsemen and too many others to mention here.

Last Game at South Bend

Having been a close friend of Knute Rockne's and Notre Dame for many years, there are certain rebuttals that still might be offered. Many letters have come in attacking Army for dropping Notre Dame, just when Notre Dame was storming back. These letters came from Notre Dame's subway alumni, not from Notre Dame.

What this Notre Dame subway alumni and others overlook in charging Army with retreating under fire is that from 1932 through 1937, Pittsburgh, under Jock Sutherland, wrecked Notre Dame in five out of six games.

"I'm through with Pittsburgh," Elmer Layden told me. "We haven't got a chance. They not only knock our ears back, but we are no good the next week. I'm calling off the Pittsburgh series." Which Notre Dame did.

I talked this over a few days ago with Sutherland, who now coaches the Pittsburgh Steelers.

Jock smiled. "You couldn't blame Notre Dame," he said. "They only scored 15 points against us in those six years."

So Notre Dame, having broken off the Pittsburgh series when Jock was, around, can't consistently charge Army with quitting Notre Dame with Leahy around. I have an idea that Jock would like nothing better than a joust with Leahy. And vice-versa. It would be interesting to see Leahy and Sutherland, with an even shot at material, hook up. I know both would relish the chance.

Leahy is a great coach, one of the best. He also has material that most coaches can only dream about. He has much better material than Army has. In particular, he has Johnny Lujack who was once rumored headed for West Point.

* * *

Pro vs. College Football

It is always a pleasure to have an argument with an expert. We are referring to Paul Brown, who is now head coach of Cleveland's powerful All-America conference team.

"Pro football," he says, "soon will dominate football just as pro baseball took over the old game from the colleges. College interest is slipping badly. In such cities as Cleveland, New York, Chicago and Washington, the pro game is now supreme."

The fact is that college football today in the matter of public interest is so far ahead of the pros, there isn't even a faint argument.

l 4-H club parade, held ion with the Wednesday show, is considered one impressive features of on.

well as boys are active raising. This year sev- farm boys and girls' baby beeves, lambs and test limited to the par- exhibitors between the 20. The event, known as the junior livestock feeding contest, will be held on the opening day.

The top prize winners in junior classes are admitted to the open competition. In past years, junior entries have been serious contenders for highest honors of the show in competition with those fitted and shown by professional talent, and on six occasions in recent years the grand champion steer of the show has been exhibited by farm boys and girls.

Addresses by nationally prominent speakers, educational tours, discussion meetings, banquets, recreational events and entertainment attractions also are on the calendar for the 4-H club congress.

Unique Experience.

For the boys and girls who attend there are a lot of "firsts" — first trip away from home, first train ride and hotel stay, first big banquet and similar novel experiences throughout the week.

They learn to know customs and habits of people from other sections of the country, to know that as 4-H'ers they're doing an adult's work, and doing it well. They learn that industry and agriculture have common interests, that they can advance together by working together. But best of all, they learn that farming and homemaking are pursuits of which they can be proud, and that America is looking to the farm for many of her future leaders.

This year 4-H boys and girls as well as stockmen must keep track of the age of the steers they show at the international, as entries will be classified according to age rather than weight. The change is designed to give showmen credit for fast gains and "weight for age," which are important in figuring profits.

Cattle Predominate.

Nearly half of the entry of the 1947 show will consist of cattle. The three important breeds of cattle which supply the bulk of the nation's best beef—the Hereford, black Aberdeen-Angus and the red, white and roan Shorthorns—will be represented in the largest exhibition of purebred cattle ever held at any show on the continent.

More than a thousand sheep, representative of the 11 breeds which yield most of the country's wool, lamb and mutton, will be on display. Exhibits also will include several different breeds of swine and more than a thousand horses.

A majority of the animals shown in the cattle, sheep and swine departments are disposed of at auctions held before the show closes. Total sales on animals exhibited last year amounted to $1,826,597, with all classes bringing record-shattering prices. Carlot sales illustrate the price trend last season. Fat cattle brought $41.75 per hundredweight, compared to $15.62 at the 1941 international; hogs, $27 a hundred, against a 1941 price of $11.04, and sheep, $29.78, compared to $13.71 in 1941.

An all-time exposition high was established for the grand champion steer, Royal Jupiter, a 1,370-pound animal shown by Oklahoma A. and M. college. The prize animal brought $10.50 per pound. The 1941 price was $3.30 a pound.

Youths Share Money.

A large share of returns from the auction went to junior feeders. The champion steer of the junior classes, raised by an Iowa farm girl, was sold for $4.50 per pound. The grand champion wether lamb brought $5 a pound to its 16-year-old owner. The junior champion barrow netted $1.60 a pound.

As the result of a misunderstanding, the prize swine carcasses were sold twice last year. The first auction was upset when John Rupnick, a "city feller" from Chicago, bought all the swine, thinking the prices being quoted were for the entire carcass instead of by the pound. When they were resold, the six carcasses brought $411.02 instead of the $2,022.50 Rupnick bid in his innocence of the proceedings.

The 1947 show marks the 25th anniversary of the International Grain and Hay show which, although a department of the livestock exposition, is in itself the world's largest annual competitive exhibit of farm crops. Nearly every agricultural area of the world has been represented in recent years.

Many of the top stables in this country and Canada will exhibit their top riding and driving horses and ponies in the horse show. Thirteen performances are scheduled during the week.

Range Detectives Still Riding Herd On Cattle Thieves

BEAUMONT, TEX. — One of the few carryovers from the days of the Old West, cattle thievery still represents a major problem for cattlemen and Texas Rangers, whose vigilance never relaxes.

Lean and lanky Texans of sturdy pioneer stock made their own law back in 1877 at Graham, Tex., when they organized the Texas and Southwestern Cattle Raisers association to wage war on rustlers who were running off thousands of cattle each year.

Between 1883 and 1892, the special officers and inspectors of the association recovered 11,668 head of cattle valued at more than $185,939. Between 1913 and 1933, almost 40,000 cattle were recovered, with a valuation of more than $1,873,200.

Recoveries are declining, not because rustlers are less cunning, but because the association never has relaxed its relentless campaign to help its 6,000 members.

In the four years from 1943 to 1947, there were only 4,488 cattle recovered. They represented $339,489 worth of beef on the hoof.

It's hard for rustlers to dispose of stolen cattle even though there are more than 500,000 brands on record. Watchful inspectors are stationed at Houston, Fort Worth, San Antonio, Lubbock and Texarkana. These men see every shipment of cattle going in and out of these cattle centers. Association men also are stationed at stockyards in other states.

A VOICE FROM THE COUNTRY

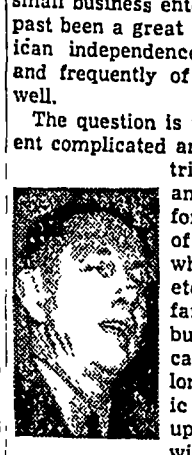
Complex Economy Threatens Small Business Enterprise

(Editor's Note: This is the second in a series of articles on current problems by Louis Bromfield, one of America's leading writers.)

By LOUIS BROMFIELD
Released by WNU Features.

There are times when it seems that the pattern of our agricultural and business life appears not to have kept pace with the development of industry and technology.

The old frontier of the general farm is one case in point. Another is the field of distribution of all goods, but notably of food, and the small enterprise, either retail or industrial. Like the old-fashioned general farm, the small business enterprise has in the past been a great bulwark of American independence and character, and frequently of our economy as well.



Bromfield

The question is whether our present complicated and complex industrialized economy any longer can afford these remnants of another day, and whether the proprietors of the general farm and the small business enterprise can survive much longer the economic strain placed upon them. Tied in with the problems of both is the question of distribution, notoriously expensive and inefficient, and in the actual process of painfully adjusting itself.

It is not only that the world has shrunk immensely in our time but also that the United States has shrunk with it. The problem of adjusting wages and purchasing power to the prices of all commodities has become the most urgent one now confronting the free enterprise system. Size, specialization and efficiency all have their bearing upon living costs, and notably upon food prices.

The old-fashioned general farm is an inefficient unit in our highly complex interrelated production economy. So, too, is the small retail enterprise competing with the efficiency, buying and distributing power of the vast, well-integrated chain stores, super-markets and cooperatives.

The economic pressures of our century are all toward bigness, efficiency and low-cost production and distribution, exactly as the rewards of the automobile industry have gone to mass-production, assembly-line big companies which produced a commodity of high quality for a low price. In the problem of food costs this efficiency begins at the farm, extends through the old field of distribution to the retail outlet.

Cycle of High Costs.

The high cost of food begins on the farm through inefficiency and low production per acre, which produces high costs per man hour and per commodity unit. It continues through the field of distribution which involves handling — many times — commission merchants, market rigging, and at times a spread of price between producer and consumer of several hundred per cent.

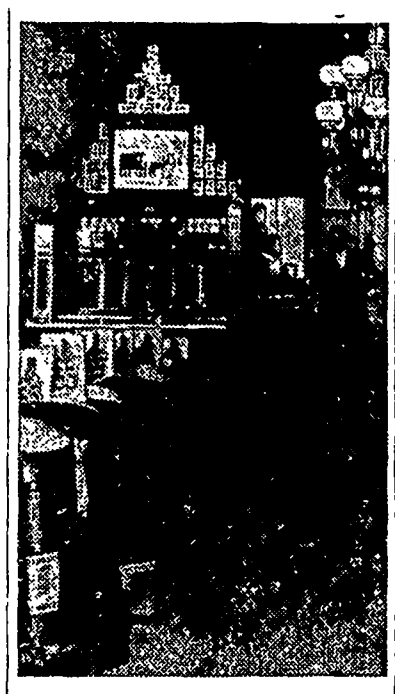
The point is that small retailers as well as the great chain stores or cooperatives are a link in this chain, but that the small retailer is largely at the mercy of market rigging, commission merchants, expensive small-lot distribution and multiple distribution agencies (that is, the great wholesale buyers and commission merchants, the local wholesale distributors, et cetera—each of whom takes a cut eventually paid for by the consumer or in losses by the small retail proprietor).

At the same time, the small retailer is a victim of the economic squeeze created by the ability of the chain stores, super-markets and cooperatives to set low prices because of smaller purchase and distribution cost. Rarely, save in deluxe areas like New York's Madison avenue, can the small unit retailer set a price higher in his community than that of the bigger organizations, although his costs may be much greater.

The economic tendency and pressures today are certainly all in the direction of low costs, high efficiency and the bigness which creates them. The consumer is concerned almost wholly with the goal of buying the best quality for the lowest price. Certainly super-markets, chain stores and cooperatives are growing and will continue to do so, taxed or tax-free in the case of big cooperatives, for even with taxes they still can sell at lower prices than the small independent operator.

Dollar Value Paramount.

All of this, of course, raises the grave question of monopolies, if not nation-wide, at least in certain states and areas. Monopoly, in turn, implies government regulation. But at the moment, at least, the consumer is not concerned with these things. He is concerned solely with making his dollar buy as much as possible, both in quality and quantity.



"In a sense, the small distributor, as exemplified by the corner grocery store, and the old-fashioned general farmer are, like the horse and buggy, relics of a former day."

The fundamental point is that the pressures against the small enterprises are economic and, therefore, extremely powerful. In a sense, the small distributor, as exemplified by the corner grocery store, and the old-fashioned general farmer are, like the horse and buggy, relics of a former day This was before the world and this nation had shrunk, when the retailer bought his food directly from the farmer, and food commodities were not shipped from rural communities into the cities and then back again to the town in those same rural communities with an enormous distribution markup in between. This markup the big food handlers are able largely to eliminate by direct mass buying and shipping. The forces of economics and of mass production and distribution are difficult or impossible to resist.

Of course, it would be possible for government to subsidize the small, inefficient, handicapped operator with taxpayers' money, very largely that is what has happened in the case of the unprogressive, inefficient farmer and the absentee-landlord-tenant systems in agriculture. But the consumer takes the beating because he continues to pay not only high prices but also taxes in the form of subsidies out of the other pocket.

It is notable that the National Poultrymen's association recently urged congress to drop all poultry and egg price-support measures so that the subsidized, inefficient poultry producer would be eliminated and the prices would find a lower level to the consumer, but one still profitable to the efficient producer.

Sentimentally, I hate to see the passing of the old-fashioned general farm and the corner grocery store. Both institutions gave me much happiness and friendliness in my youth, but I am afraid there isn't any longer much place for them in our highly complex, economic civilization in a shrunken world. In the end, we shall be forced to catch up with our times by the sheer ruthless force of economics and because the consumer no longer can afford either institution.

Ex-G.I. Finds Old Army Shirt in Surplus Store

HASTINGS, NEB.—When Charles E. Jenkins, a war veteran, was buying work clothes in an army-navy store here, a familiar looking khaki shirt caught his eye.

It was the shirt he wore through the Solomon islands campaign. He had turned it in when he was graduated from officers candidate school in 1944.

Jenkins' initials and serial number in the shirt were in his own handwriting. When Jenkins submitted his dogtag as final proof, George Engelbrecht, store manager, gave him the shirt.

Free Licenses Give Indians 'Pretty' Cars

TALLAHASSEE, FLA.—Florida's dwindling band of Seminole Indians once again will be able to "dress up their cars and make them look pretty" as a result of a long-standing agreement on automobile license plates.

The Redmen have at least one advantage over the "palefaces" in that they don't have to pay for their license plates. The policy was started about 17 years ago by Gov. David Sholtz, who wanted to help the Seminoles with their problems.

Sholtz took his entire cabinet of state officials down the Tamiami trail to hold a powwow with the Indians, explaining that Florida wanted to assist the Indians in any way possible. But the Indians turned down his offers, insisting that they didn't want any help from the palefaces except free licenses to "dress up their cars and make them look pretty."

A quiz with answers offering information on various subjects

The Questions

1. Which has the most bones in its neck, the giraffe or the sparrow?
2. How old is the game of chess?
3. How are illegal stills being tracked down these days?
4. How many different kinds of trees are there on the White House grounds?
5. Why is the India rubber worm so called?
6. What is the "ultrasonic laundering" of clothes that has been predicted by a Britsh scientist?
7. What is the ratio of people to land in Alaska?
8. What is a grebe?
9. Approximately how much is "as much money as a man can carry"?
10. When did World War I officially end?

The Answers

1. The giraffe has 7, the sparrow 16.
2. It is said to have originated in India in the third century A. D.
3. By airplane.
4. Ninety different kinds.
5. Because a 15-foot specimen, for example, can extend itself or be pulled to a length of 90 feet.
6. The use of vibrations of highly pitched inaudible sound waves to shake out the dirt.
7. Approximately one person to every 10 square miles.
8. The grebe is a paddle-footed, almost tailless diving bird related to the loon.
9. Ten billion dollars in the largest bills printed (100,000 dollar bills).
10. July 2, 1921, when President Harding signed a joint resolution declaring peace with Germany and Austria.

Defendants.

IN EQUITY NO. 11,572

ORIGINAL NOTICE

TO THE ABOVE NAMED DEFENDANTS:

You and each of you are hereby notified that the petition of the above named plaintiffs is now on file in the Office of the Clerk of the District Court of Hancock County, Iowa, at the Court House in Garner, Iowa, in which the plaintiffs allege that they are the absolute unqualified owners in fee simple of the following described real property situated in Hancock County, Iowa, to-wit:

That part of Tracts No. 1 and No. 2 of the Auditor's Sub-Division of the West Half (W½) of the North East Quarter (NE¼) of Section Thirty one (31), Township Ninety-five (95) North, Range Twenty-three (23), West of the Fifth P. M., Hancock County, Iowa, more particularly described as follows Commencing at a point 514½ feet east of the Northwest corner of the North East Quarter (NE¼) of Section Thirty-one (31), thence South to a point 474 feet South and 500 feet West of the Northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31), thence east to the the right of way of the C. R. I. & P Ry, formerly the right of way of the B C R & N Ry thence in a northeasterly direction along the right of way line of the C R I & P Ry. to point directly east of the point of beginning, thence west to the point of beginning excepting therefrom a tract of land described as follows Commencing at a point 588 feet East of the northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31), thence south 200 feet; thence east 66 feet thence North 200 feet, thence west 66 feet to the point of beginning,

subject only to a contract of sale to Art Knoke, dated January 29, 1947 and recorded in Book 56 of Farm Land Deed Records of Hancock County, Iowa, page 134, in the office of the County Recorder of Hancock County, Iowa, and in said petition the plaintiffs allege that they are credibly informed and believe that you make some claim adverse to the title of thes plaintiffs in said property.

These plaintiffs further pray in their petition that the title to the above described real property be quieted, established, and confirmed in these plaintiffs by the Court, subject to said contract of sale, and that the defendants above named, together with all unknown claimants and all persons unknown claiming any right, title or interest in the above described real property and all the heirs, spouses, successors, assigns, grantees, legatees, devisees, and beneficiaries of each and all of the above named defendants be forever barred and estopped from having, asserting, or claiming any right, title, and interest in above described real property, adverse to these plaitiffs in said property, and pray further that the Court grant such other further equitable relief as may seem just.

You are further notified that no personal judgment will be asked against any of you and no costs will be assessed to any defendant who does not appear

You are further notified that unless you appear before said Court at the Courthouse at Garner, Hancock County, Iowa, before the 31st day of December A D 1947 your default will be entered and judgment and decree rendered against you for the relief demanded in the petition, and the title to the real property of the plaintiffs above named will be quieted, established and confirmed in them subject to the contract of sale to said Art Knoke and you and each of you will be forever barred and estopped from having or claiming any title or interest to that of the plaintiffs.

A Nickel 5¢ Buys a Lot of

ELECTRICITY

YES SIR—Your electric nickel goes twice as far as it did ten years ago.

Reddy Kilowatt, your dependable electric servant, represents one of the few services that cost you consistently less, even though most prices have gone steadily upward.

Reddy is proud that his wages are low — lower than ever before. He knows that more and more people every day are able to enjoy his economical, efficient service . . . without making drastic budget changes.

Today, a nickel of Reddy's wages will run your refrigerator for nearly two days. It will run a 60 watt bulb for 20 hours . . . or bring you 18 hours of top-flight radio entertainment.

We are proud of our rate reduction record. Increased use on your part . . . and more efficient operation on our part, has made lower rates possible . . . even though taxes, wages and fuel costs have risen steadily. The average daily cost of electricity to homes we service is only 10 cents — less than the cost of a loaf of bread!

Wherever you live, Reddy Kilowatt is on the job, bringing you better living, electrically. He makes your work easier, your living more pleasant — at such a low cost!

The "Christian Christmas" European Relief Drive

President Jack Dethmers, of the Hancock County Farm Bureau, announced today that a county-wide campaign to collect donations for relief to Europe will be launched on December 22, 23, and 24.

The drive, to be known as the "Christian Christmas" Relief Drive, will be sponsored by all church groups, civic organizations, as well as business and professional groups. A meeting of interested groups is planned for Saturday, December 13 at 1:00 p. m. in Britt.

Endorsing the project from a state level are churches of all denominations, as well as Governor Blue's Food Relief committee, headed by Dean H. H. Kilde of Iowa State college, and the Iowa Farm Bureau.

The idea of a state-wide compaign to raise the equivalent of 100 carloads of corn was originated at the annual meeting of the Iowa Farm Bureau in Des Moines. The 22 farmers who flew to Europe during September are serving as spear-heads for the project in the state.

Each county has been given a goal of one carload of corn, or its equivalent in cash. Hancock County will make every effort to reach its goal by the day before Christmas. Plans are now being formulated for the solicitation and collection of corn, cash and clothing, which will be distributed to the needy in European countries through reliable relief agencies.

All farmers in the county, as well as all residents of the cities and towns will be asked to contribute to the "Christian Christmas" campaign. Not only is it the purpose of the drive to prevent as much starvation as possible, but also it is to build good will to the greatest extent possible.

YOU CAN HELP THE POST OFFICE DURING THE CHRISTMAS RUSH

People of the Klemme community, as well as other communities, can do a lot to help their post office workers during the Christmas rush.

Acting Postmaster Franklyn Kluckhohn made a few suggestions that will help them a lot if folks will cooperate.

It is not too early to send your Christmas cards that go out of the state. Send them now so they will get there in time.

He also suggested that when you address your cards have them all turned the same way. That is: with the stamps all in the same corner and then tie your cards into three packs. Local cards in one pack; in the State in one pack and out of the State in the third pack. Cards you have thus sorted hand them through the window intead of dropping them in the box.

Mail your packages right now if you have them ready.

MRS. WINNIFRED MERKEL IS BRIDE OF FRED KOTHENBEUTEL

Mrs. Winnifred Merkel and Fred Kothenbeutel were united in marriage Saturday afternoon at 4:00 o'clock at the Klemme Evangelical and Reformed parsonage with the Rev. Grossheusch officiating at the double ring ceremony.

Immediately after the weddmony the couple left on a wdding trip to Minnesota and other points. They expect to be at home after the first of the year in Klmme. Mr. Kothenbeutel recently purchased the Erdman house, now occupied by the Herman Back family, which was the former home of Mrs. Merkel.

KNOW YOUR TRAFFIC LAWS

AN AUTOMOBILE AGE

We live in an automobile age! Our grandfathers did not. In 1895 there were four automobiles in the United States—a Haynes, a Ford and an imported Benz. People were shocked because these cars could be driven at "the ungodly speed of 11 miles per hour."

Today there are approximately 37,164,405 motor vehicles in the United States. In 1935 Sir Malcom Campbell attained his goal of 300 miles an hour! On August 23, 1939 John Cobb, another Englishman, broke the former record of 357.5 per hour by attaining the unprecedented speed of 368.9 m. p. h. The The automobile has had a phenominal development in 45 years.

In 1900 there was an automobile for every 9,500 inhabitants in the United States. Today there is a registered auto for approximately every fifth person. In fact, there are so many drivers, that every man, woman and child in the country could be riding in an automobile at the same time.

This Automobile Age has brought us pressing problems. In 1946, 33,500 persons lost their lives in motor accidents; and many of others were injured This means that, in a year's time, in our use of motor cars we are wiping out the equivalent of the entire population of a fairly large city.

The responsibility for solving this urgent problem lies with the individual driver. There are a lot of drivers to shoulder this responsibility Approximately every third person in the United States drives a car. Our total runs over 140,000,000. We have more than 45,000,000 drivers of automobiles.

The automobile is a remarkable machine. It moves by itself because of the power produced by combustion within. It is self-moving, self-propelled. It is a mechanism which is constantly being improved. But it is never complete until the driver is added. With a poor, inefficient driver at the wheel the automobile can be one of the most destructive mechanisms known to man. Statistics prove that the human element in driving causes 70 percent of our fatal accidents, yet with a good driver, one who is courteous toward other motorists, and watches his speed, and remains ever Safety conscious, the automobile proves that it is what it was intended to be—a safe instrument of general good, rather than a weapon of destruction.

High School Carnival Showed Net Profit Of $1,325.73

Supt. A. L. Kingery reports that receipts from the recent high school carnival totaled $1,661.90 and that after all expenses had been paid there was a net profit of $1,325.73.

This was by far the most successful school event ever held from a financial standpoint. The money will be used for various school activities, such as equipment and music for the band and supplies for the athletic department.

IOWA INCOME TAX CUT LIKELY

As the members of the Iowa State Legislature are preparing to go to Des Moines for the Special session opening Dec. 16th, there is every reason to believe that the Iowa tax, which was returned to the full 100 percent at the regular session early this year, will be cut. Just what method the legislators will adopt to make this reduction has not been definitely determined at this writing but there are strong indications that the plan which may meet with the majority of the solons will be to increase the exemptions.

Recently we stated that the man on the street isn't particularly concerned how tax reduction is brought about. He doesn't care whether it is done by changing the rate, increasing the exemptions or putting it on a 50 percent basis. All he is interested in is what he has to pay as his share of the tax. The members of the legislature must determine the kind of a bill to be enacted to bring about this reduction.

All polls and surveys which have been made indicate that the people are overwhelmingly in favor of a reduction. The most recent one was the Iowa Poll which very definitely confirmed Governor Blue's contention, when he called the special session, that the citizens of Iowa wanted a reduction in their income tax. Another poll which is now being taken, but which has not yet been completed, shows overwhelming trend in favor of a bill to bring about a reduction. In view of these demands, on the part of the people for income tax reduction, it is our opinion that the legislature should not delay and should show no hesitation in enacting a tax reducing measure.

MR. AND MRS. FRANK SCHULZ HONORED AT ANNIVERSARY DINNER

Mrs. Lester Neuberger successfully carried out a surprise dinner at her home Sunday to celebrate the 30th anniversary of the marriage of her parents, Mr. and Mrs. Frank Schulz of Klemme. Mr. and Mrs. Schulz's anniversary was on Friday, December 12th.

Twenty-four relatives gathered at the home of Mr. and Mrs. Lester Neuberger east of Klemme and brought with them well filled baskets for the big wedding dinner. Following the dinner Mr. and Mrs. Schulz were presented with a purse of money.

Those present at the dinner were Mr. and Mrs. Frank Schulz, Lester Neuberger and family, Robert Schulz of this community; Mr. and Mrs. Guy Geddes; Quentin Geddes and family; Mr. and Mrs. Chester Geddes; Mr. and Mrs. Gus Schulz, Donald, Betty and a friend, all from the Hayfield community; Mr. and Mrs. Charles Strate of Nora Springs; and Mr. and Mrs. Orville Borg of Forest City.

All enjoyed a fine time and it was a day that Mr. and Mrs. Schulz will long remember.

Birthday Party Held At Bridges Home For Two Children

Mr. and Mrs. Glen Bridges entertained relatives and friends Saturday afternoon at a birthday party for Sharon who was 12 years old on Friday, December 5th, and for Vicki, who was one year old on Saturday, Dec. 6th.

A good time was enjoyed and a nice lunch was served. The children received many nice gifts.

Mrs. H. G. Voetberg of Garner was an out-of-town guest.

Buy and sell with a Times want ad.

Iowa Children's Home Society Campaign Progresses

Early reports from workers indicate that the campaign for $1150.00 in Hancock County for the benefit of the Iowa Children's Home Society is progressing nicely, it is reported by Mrs. G. W. Templeton of Garner, campaign chairman. However, she points out, only scattered reports have been received to date and there is a long way to go before the county's quota is reached or exceeded.

All workers are urged to complete their solicitations and make reports to Mrs. Templeton. Persons who wish to contribute and who may not have been given an opportunity to do so may mail them to Mrs. G W. Templeton, Garner, Iowa.

Workers have completed their campaign in Ell and Ellington townships and both townships turned in more than their quota. Let's hope the rest of the townships will do as well.

Remember, this is the first time in sixty years of operation that Iowa Children's Home Society has asked for funds in a general campaign, it is hoped that when all reports are in, the county will have reached its goal.

MR, AND MRS. C. A. BACHMAN PASS THE QUARTER CENTURY MARK

Mr. and Mrs. Clifford Montgomery, Bud and Carole were dinner guests Sunday at the home of Mr and Mrs. Clarence Bachman, southeast of Klemme. The occasion was the Twenty-Fifth Wedding Anniversary of Mr and Mrs. Bachman

Mrs. Montgomery had baked and decorated a cake for the occasion. Mr. and Mrs. Bachman received many cards and letters of congratulations in honor of the event. They received a telephone call from their daughter, Mrs. Maxine Nettifee in McAllen, Texas and another long distance call from Mrs. Bachman's sister, Mrs. Harm Aries at Waterloo.

KANAWHA BULL DOGS WILL TANGLE WITH SHAMROCKS THURSDAY EVE

The Kanawha Bull Dogs will meet the Shamrocks on the Klemme court this week Thursday evening in a double header.

The Kanawha Bull Dogs have a power-house team this year and have tumbled all opponents by a large score The Shamrocks will have to get right down to business to win this one. Kanawha has trounced some Class A schools, including Garner.

Entertained At Dinner

Mr. and Mrs George Kern of Liberty entertained to a duck dinner Sunday the following: Mr and Mrs. Emil Blumer, Mr. and Mrs. Will Krause, Mr and Mrs. Will Riemer and Iola, Mr. and Mrs. Ben Riemer, Mr. and Mrs. Merlin Neuberger and Dean, Mr. and Mrs. Carol Brager and Daryl.

Elected President

Alfred Josten was re-elected chairman of the Hancock AAA committee at an organization meeting Saturday.

A. E. Rasmussen was re-elected vice chairman and Clarence Bird of Woden, regular member. Sam Barber of Kanawha was elected first alternate and Arthur C. Fredrickson of Britt, second alternate.

Feather Party.

Plan now to attend the Legion pre-Christmas Feather Party at the Community Hall on Monday evening, December 22.

Klemme Civic Club Re-Organized At Meeting

NAOMI NIEMAN AND LOUIS BRANDT ARE MARRIED NOV. 25

Mrs. Ben Nieman of Klemme announces the marriage of her daughter, Naomi, to Louis Brandt, son of Mr. and Mrs. Gus Brandt of Clear Lake at the St. Patricks parish in Clear Lake Thursday, November 25, at 2:30 p. m., with the Rev. J. J. Buzynshi officiating.

The bride wore a white wool dress with brown accessories. Her corsage was of red roses.

Mary Lou Brandt, sister of the bridegroom, was maid of honor. She wore a green wool dress, and had a corsage of yellow roses.

Attending the bridegroom was the bride's brother, Ben Nieman, jr.

After a short wedding trip they will be at home at 414 N. Second St., Clear Lake.

The bride is a graduate of Kanawha high school and is employed at the Clear Lake Telephone Company office.

The bridegroom attended the Clear Lake schools. He served three years in the armed forces, and is presently employed by a lumber company at Clear Lake.

FIRE HAZARDS GREATER IN WINTER

Farm fire hazards increase by more than a third during the winter months, county extension director Paul Henderson warned Hancock County people this week.

Cracked chimneys, corroded flues and the absence of spark arrestors on the chimney tops are mainly the blame for the jump in winter fires. Increased requirement for heat in the homes and barns, defective furnaces and careless disposal of hot ashes are some of the other common causes, Henderson has pointed out.

Norval Wardle, farm and home safety specialist at Iowa State College, says that 70 percent of the winter farm home fires are caused by faulty heating systems and sparks on the roofs. Put on spark arrestors—"good ones that are easily installed are obtainable anywhere the the state," Wardle says. Make a check to see that heating systems are working properly.

Fire prevention is only half the job for complete fire safety. A farmer must take time to instruct his family and his farm hands in the use of fire-fighting equipment. A sufficient number of approved fire extenguishers must be in handy locations around the place.

Farmers are reminded that the first five minutes of a fire are the important ones You can do more to control a fire in the first five minutes than can be done in the next 5 hours.

SEVENTH AND EIGHTH NEWS

We have been making bar graphs and line graphs in 7th Arithmetic and are working interest problems in 8th arithmetic.

The seventh grade completed "A Christmas Carol" in literature Friday. The eighth grade has been pondering over the cryptograph in The Gold Bug by Edgar Allan Poe.

A number of Christmas projects were started in art class this week.

Sharon Bridges showed us some interesting foreign stamps from different countries of the West Indies this week while we were studying about these countries in geography.

DR. A. H. DULMES NAMED PRESIDENT OF KLEMME BUSINESS CLUB

At a meeting of the Klemme Civic Club held Tuesday evening at the F. J. Arnold implement store Dr. A. H. Dulmes was named President for the coming year with "Mike" Lemke as vice-president and Asa Arnold as secretary and Treasurer.

Arrangement were made to decorate the Main street of Klemme for the holidays and to have Santa Claus Day on December 20th, the Saturday before Christmas. Santa Claus will come to Klemme and give free treats to all children in the Klemme trade territory.

Other matters were also taken up at the meeting to include summer entertainment.

SUPER-STATION OPENING DAY WAS GREAT SUCCESS

Crowd Estimated At Over Six Hundred People Visited The New Station

The new Hancock County Coop. Association Super Service station opening here last Saturday was a big success in every way.

During the afternoon open house was held and people were streaming in and out of the building after having looked over the fine lay-out and the equipment and enjoyed a treat of hot coffee and doughnuts which were served to all visitors from 1:00 until 6:00 p. m.

Roy Railsback, general manager of the company, was well pleased with the opening day and wishes to thank all who paid the station a visit.

The new super-station here is manned entirely by Veterans of World War II. Harold Kotenbeutel takes care of the office and front work, Garland Brinkman is in charge of greasing and oiling and Don Schaefer takes over minor mechanical troubles.

Both of the back room boys also work in the car washing and waxing department. On opening day a new feature was introduced in North Iowa as a car was washed and then treated with a new plastic wax that made the car look like it just came out of the factory.

In addition to the several service departments, the new super-service also handles an extensive line of merchandise which is advertised in this issue of the Times.

VAGABONDS WON FIRST TWO GAMES THE PAST WEEK

The Klemme Vagabonds, independent basket ball team, are going like a house afire and have won their first two games of the season by defeating decisively two Mason City teams: Ray and Bob Ice Cream on Friday night 70 to 45. Monday night they defeated the Moose Lodge team 57 to 32.

Game Again Monday Night

On Monday night, December 15, the Mason City Y. M. C. A. team comes to Klemme to meet the Vagabonds. The Y. M. C. A. is rated as one of the best basket ball outfits in Mason City.

There will be a good preliminary, probably the grade school boys will play again at 7:30 with the main game slated for 8:00.

Shamrocks Downed By Belmond Cagers Tuesday Eve

The Shamrocks were defeated by the powerful Belmond quintet at Belmond on Tuesday evening by the score of 51 to 39.

Study of Taxes, Did You Say!

A citizen's committee has made a study of the income tax and made a report to congress. Only in the latter respect is this new. Millions of Americans have been studying it for years. And have found their study is no good unless accompanied by a check.

—•—

The committee favors changes. This makes it unanimous.

—•—

Taxes have been heaped on the American citizen until the only difference between a dollar and a snowflake is that the snowflake has crystals and lasts a little longer with favorable weather conditions.

—•—

Nobody writes success stories in the Horatio Alger mood any more. It is the same as confessing publicly that you are behind the eight ball. Life has become a succession of notary publics, printed forms, confusing paragraphs, dotted lines, galloping decimal points, double talk in fine print and the annual discovery you might have broken even if it had not been for the fact you did well financially.

—•—

Taxes have become as routine as rain. You are taxed for the alarm clock that wakes you up, taxed on the shaving soap and the razor blades, taxed on the bath fixtures, taxed on the towels, taxed on the pajamas which you hop out of to get into the heavily-taxed business suit, taxed on the breakfast dishes and taxed on the commutation ticket to the office.

—•—

For over 150 years our legislators and leaders imposed a tax with caution and apprehension. Holding a constituent's head under water was thought to be poor tactics. But that's all over. A politician of today thinks nothing of telling the voters he is endowing them with a happy future while going through their pants pockets.

—•—

Remember when the newsboy who rose to be a financial giant would boast about it? Look at him now The poor halibut wishes he had the paper route back. And not too many customers.

• • •

The 'Miss Hush' Matter

An automobile, an airplane, trips abroad and wagonloads of household equipment and clothing luxuries are being offered in another "guess who?" radio program in which a verse is the guide to the identity of a well-known American. This time it is a single woman. The verse runs:

Second for Santa Claus,
First for me;
Seven for wreath, thirteen for thee;
Bring me an auto, a book and a ball
And I'll say Merry Christmas
In spring, not in fall.

—•—

As a result more people now are being carried out of homes in straitjackets than at any time since the Clara Bow mystery voice. Everywhere you go you encounter men and women talking to themselves. Our house has gone nuts, too, with the missus tottering around muttering "Seven for wreath . . . two if by sea . . . thirteen for Notre Dame . . . one if by land' . . . Yale 23, Santa Claus, 7. . . . It must be Isadora Duncan. . . . No, she's dead."

—•—

We derided such goings on for a time but now we, too, are bounding from library to library, reference book to reference book, dilemma to dilemma, false clue to false clue and booby-hatch to padded cell.

• • •

EXCEPTION

I never join in blasts against
The neighborhood canine
Who barks and howls in dead of night—
No sir! The pooch is MINE!

• • •

Thirty-nine Englishmen have arrived in the United States determined to settle here or in Canada because of conditions in the British isles. They feel an Englishman has the same right to life, liberty and the pursuit of happiness as anybody else.

• • •

"The I.C.C. has been asked to permit a fee of 15 cents per package or bag carried by railroad porters. The present rate is 10 cents. Until a few years ago there was no specific charge."—News item.

Household Hints

Wooden handles are preferable to bone for kitchen knives as bone has a tendency to chip.

—•—

A hammer, screw driver and a pair of pliers will find many uses in the kitchen. Keep these tools in a drawer along with the usual kitchen implements.

—•—

China or pottery should never be scoured. Hard rubbing causes the color or gilt to fade and damages the smooth finish.

—•—

Use old pillow cases to cover dresses in the clothes closet. Make a slit in the closed end and draw pillow case over the garment on the hanger.

If you're stuck for Christmas gift idcas—consider giving smokers on your list, either of these two popular gift items that dealers are featuring now! Flavorful Camel cigarettes or mild, mellow Prince Albert Smoking Tobacco. With these gifts you're sure to please—more people are smoking Camels than ever before, and more pipes smoke P. A. than any other tobacco! Besides, they mean a minimum of fuss or bother for you—for they come all ready gift-wrapped. The Camel carton is colorfully dressed for the occasion, containing 200 mild, cool flavorful cigarettes. And Prince Albert for Christmas giving is offered in the popular full pound container. Even a gift card is unnecessary—for both Camels and Prince Albert have space for cheery Christmas greetings. And wait till you see what a hit your gifts will make—you'll feel jolly as St. Nick himself.—Adv.

Toward Religious Christmas Indicated

People are placing greater emphasis this year on the religious significance of Christmas. This is indicated by the popularity of Christmas cards featuring whimsical angels, snow-covered landscapes about village churches, the traditional Bethlehem scenes and similar religious themes.

Many of this year's greetings recall the first Christmas with passages from the scriptures and famous prayers, illustrated by colorful nativity scenes and reproductions of famous Madonnas. Present-day religious practices are emphasized by congregations streaming to church on Christmas morning, families praying and choir boys singing "Noel."

Comrades of the Cross

...cot think or reason,
...ly know He came.
...hands and feet of healing
...d wild heart all aflame.

...eyes that dimmed and softened
...ll the things He saw,
...in His pillared singing
...and the marching Law.

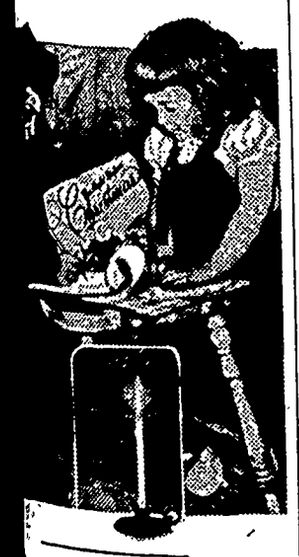
...know He loves me,
...ds and understands—
...h His heart that holds me,
...oh, His certain hands.

...Man, the Christ, the Soldier,
...from His cross of pain
...to the dying comrade,
...d, we shall meet again."

—By Willard Wattles.

English Schoolboys Originated Cards

The basic idea for today's expressive Christmas greetings traces back to an old English custom. More than 250 years ago, English school children demonstrated their penmanship by drawing elaborate "Christmas Pieces" using large sheets of special paper with engraved borders picturing the year's important events.



Character of Santa Claus Leads Others

The proper Christmas symbol has a strong hold on the youth of the world is the character of Santa Claus. He probably originated in Holland and was imported to America by the early Dutch settlers. The character has been changed in different countries and regions but remains in spirit the same Santa Claus that came from Holland.

Our Favorite Trees For Christmas

FIR and spruce are the predominating favorites among Christmas trees. Balsam fir always has been an American favorite. The story goes that the Lord sent three messengers—Faith, Hope and Love—to find a tree as high as Faith, as eternal as Hope, and as wide as Love, and which bore the Sign of the Cross on every bough. They brought back the balsam fir. Three varieties of spruce, blue, white or Norway, also are big sellers in the tree markets.

If your tree is neither fir nor spruce, you may have some variety of pine or cedar. Almost any evergreen makes a Christmas tree, the species being dictated largely by where you live. In Colorado folks use the lodgepole pine because the firs grow too high up in the mountains to be cut and shipped easily. Tennessee uses white cedar, and in California you may even get a redwood.

Burning of Greens Is Ancient Festivity

The Burning of the Greens has formed a central part of Twelfth Night festivities in England since the Middle Ages. Large fires were held to purify the fields and to assure bountiful crops. Everyone in the district gathered together to sing the Wassail Song and to drink from the Wassail Cup.

The ceremony was revived in America in 1930, when George M. Haushalter held a Burning of the Greens at Rochester, N. Y., and since has become an annual event there as well as in other communities. Discarded Christmas trees and wreaths were held for the New Year's celebration, then collected and burned at a gala community bonfire. It has been accepted as the end of the New Year's celebrations.

Object to Christmas

To the Jehovah's Witnesses, a Christmas tree in one's home "signifies that one is willing to worship the evil descending all the way from Nimrod."

The Witnesses also believe that Christmas should not be celebrated because it is an admixture of a Christian idea and a pagan setting. The older Witnesses still observe Christmas because the founder nowhere spoke against it.

THE FICTION CORNER — LOVE TAKES A HAND

By ROBERT McBLAIR

SAVAGELY, old Adam Courtney twisted his cigar-yellowed moustache. From the parlor sofa, the muffled sobs of Diana, his shapely and lovely young daughter, expressed an unshakable defiance. He glared at her with all the anger a deep love would permit.

"I—I AM going to marry Jim Bailey," she chanted monotonously. "I don't care if he HASN'T got the money he ought to have to start in business. I don't care if he HAS only — three thousand instead of six." The slender legs kicked hysterically. A slipper flew across the room. "I LOVE him, doggone him! I LOVE him!"

Grimly, Adam Courtney went for his hat and his heavy cane. Grimly he left the house. He knew where to find Jim Bailey. Barred from calling on Diana, he would be waiting at the club—the big social and athletic club—for her to join him for the dance tonight.

In the old days on the West Coast, he thought angrily, a matter such as this might have been settled with a .45. Now business and money and convention had overtaken him — after his marriage, late in life.

This Week's Best Fiction

Diana was all he had, since the young wife he adored had died in childbirth. Ever since that day, his only child had been his only interest, taking the place of her mother before her. Never before this had she defied him, turned from his love to the love of someone else. As things stood tonight, however, he had lost her—unless somehow he could hold her back.

Surely this called for desperate measures. As he stalked into the club, he spied the ruddy, muscular young object of his quest. In the black and white of dinner clothes, Jim Bailey sat watching a game in the busy card room. Jim rose, and the table fell silent, as the grim old man came up.

"Jim Bailey," Adam Courtney thundered, "are you man enough to take a gamble?"

Jim Bailey simply stared.

"I understand you have three thousand in the savings bank," old Courtney said. "I'll put up two dollars to every one of yours. Give you two to one on every bet. Six thousand to three thousand, table stakes. If you lose—you will agree to leave my daughter alone."

"And what if I win?" asked Jim Bailey.

"Win?" Adam Courtney's bony face paled. "Win—you marry her, sir, of course."

Jim Bailey hesitated, and the whole room stopped breathing. Everybody understood the struggle that had been going on between him and Diana, on the one hand, and Diana's father on the other. Under ordinary circumstances, no one would expect him to agree to risk losing his money and his hope of future happiness on the turn of a card. But suddenly it had dawned on everybody that this situation was not ordinary.

Only two weeks before, the old man had caned a newspaper editor who had intimated that Adam Courtney, in the old days on the Coast, had been a professional gambler. No one believed a word of the accusation. But now, to refuse publicly to play would tell the world you believed what the editor had written, and were afraid of being rooked.

Jim Bailey wet his lips. "Do you want to play with chips, sir, or cash?—but even money!"

The money in Jim's hand told her the rest. She ran to her father. The grim old man ignored her.

"Cash!" said Adam Courtney grimly.

Next evening, each bearing his stake of three thousand dollars, they took their seats in the card room.

"Draw poker," announced Adam Courtney, tearing open the pack. "Table stakes. And," he leaned across the table and looked Jim Bailey in the eye, "a gentleman's agreement!"

"Okay," Jim Bailey said. "Will you cut, sir?"

Open gambling was not permitted in the club. But what employee would dare stop this? Like wildfire the news spread. Members hurried in just in time to see the old man lose five hundred dollars on a full house, against Jim Bailey's four tens.

At first, luck seemed to favor Jim Bailey. But presently the calm, grim old man began to win.

Then the old man lost three large bets. The stacks of money stood about even again—each three thousand dollars.

Jim Bailey dealt. Adam Courtney looked at his cards. He counted out five hundred dollars. Jim Bailey looked at his cards. Without hesitation, he pushed an equal amount forward.

Then each drew cards. Jim Bailey held up three cards and drew two. Adam Courtney asked for but one. The old man looked at the card. Quickly he pushed forward his whole remaining pile.

THE spectators glanced at one another. Some thought they had glimpsed the two hands. To start with, as they afterward explained, Jim Bailey had held three aces, Adam Courtney three kings. On the draw it seemed that Jim, with three aces pat, had caught two queens. Thus he had the highest possible full-house on this deal. But the old man had caught another king, and held four—the winning hand.

Would Jim Bailey put up his whole pile and call the old man's bet? If he did, the game was over. He would lose his money, and Diana, too.

Jim Bailey's hand shook as he riffled his remaining pile. Since the old man hardly had held four-of-a-kind to start with, and had drawn but one card, the odds were forty to one against his now having four-of-a-kind or better. Suddenly, his face no longer ruddy, Jim Bailey pushed his whole pile forward.

"I call, sir," he said. He spread out his hand. "I've got a full-house—aces over queens."

Then occurred one of those disturbing interruptions which explain the new screens at the card room door. There was a cry and a commotion, and Diana, Adam Courtney's daughter, appeared in the doorway, staring in at the players.

She was dressed to go to the dance. Her hair was arranged in the style of twenty years ago. In a white satin dress which had belonged to her mother, she looked (as an elderly member said) the spitting image of Adam Courtney's dead wife.

Old Adam Courtney glanced up, stared, as at a ghost. Heaven only knows what memory — perhaps of his and his wife's glowing early happiness—passed through his mind. He drew a deep, slow breath. His cane dropped and clattered. His white head disappeared beneath the table as he retrieved the cane from the floor.

This distraction lasted but a moment. Then Adam Courtney sat up and faced Jim Bailey. Leaning awkwardly forward, his left hand heavy on the table, the old man turned his own cards up, one by one.

THE KING OF DIAMONDS. "One!" the crowd breathed. THE KING OF HEARTS. "Two!" the crowd whispered. THE KING OF CLUBS. "Three!" the crowd murmured. Then he turned — THE QUEEN OF DIAMONDS.

It was his last card.

Not only had he failed to catch the king of spades on the draw, apparently he had drawn but one card, when he should have drawn two. He held only four cards, a worthless hand.

The grim old man had lost! Jim Bailey had won, not only the old man's three thousand, but his daughter.

Jim Bailey gathered in all the money. He stood up, holding it in his hand. Everyone watched Adam Courtney's daughter as Jim Bailey crossed to where she stood framed in the doorway.

She touched Jim's arm—and hesitated. Of course she had been told what was up. The money in Jim's hand told her the rest. She ran to her father. The grim old man ignored her. She put her arm around him and kissed him full on the yellow stain in his white moustache. He still ignored her. She turned and ran back to Jim.

Hand in hand, the two young people left the club. Their motor roared away, seemingly with a triumphant note that spoke of money enough for a business, and for marriage, and independence.

Old Adam Courtney sat staring at his bony left hand flat on the table. For a moment his shoulders seemed to sag. Then he straightened, and tilted a quizzical, twinkling look up at the circle of staring faces.

"I knew what she was wishing," he said. He lifted his left hand. There beneath it, face up on the table, lay the missing king of spades.

Patience of Edison

It takes patience to be a scientist. Thomas Edison conducted some six thousand experiments before he found a material suitable for the filament of his incandescent lamp. This took him eight years.

MRS. ALDEN FUNERAL WILL BE HELD FRIDAY AT THE HOME

Mrs. Milton Alden, 55, died suddenly of a heart attack at her home 6 miles east and 1 and 1-2 miles south of Klemme Monday evening.

Funeral services will be held at the home Friday afternoon at 1:00 o'clock with the Rev. Grosshuesch officiating. Burial will be at Hampton. The Wellemeyer Funeral Service in charge.

Wet Snow And Sleet Damages Telephone And Electric Lines

Heavy, wet snow turning to rain and sleet with temperatures falling below freezing, struck North Iowa Thursday morning, causing a great many telephone lines to go down, snapping off poles and wires and causing some damage to electric lines as well. Ice was still clinging to wires Monday and lines still were going down. Linemen have been on the go day and night trying to restore service.

Roads were also covered with ice, making driving in most sections of the state dangerous.

Donald Mourlam Had Large Crowd At His Farm Sale

The Don Mourlam farm sale advertised in the Klemme Times brought out a big crowd last Wednesday and Mr. Mourlam reports that he had a very good sale and that bidding was lively and his large herd of livestock and his machinery brought good prices He was well pleased with his sale. B. A. Reemtsma was the auctioner.

Girls 4-H Training School Held

Would you like to learn to sew? The 4-H club project in Hancock County is clothing for 1948. Mrs. Elsie Williams, clothing specialist, gave our leaders and older 4-H girls in the county new ideas and helps under selection of clothing, clothing construction, care of clothes and grooming at a county-wide 4-H training school held in the Britt IOOF hall on Wednesday, December 3rd.

In Lesson I generalizations of each of the phases of the project were given with special emphasis on selection and construction of clothing.

Mrs. Williams will be back in our county for the second training school on January 30.

Be sure to check safety devices on mechanical corn pickers.

"Cash On The Barrel Head"

Thousands of co-ops, all across this country, are giving back millions of dollars to their patrons—returning buying power in cold cash. This money will keep cash registers ringing up and down the Main Streets of America as it goes to buy shoes for Johnny and Mary, a new dress for the Missus, new tires for the family car, perhaps a new stove, or any one of a thousand-and-one other things.

Co-ops are community builders, home-owned enterprises that tend to arrest financial erosion, the draining-off process which siphons an undue portion of wealth from where it is produced to a few metropolitan centers. Co-ops are good citizens, being "of the people, by the people, and for the people," and incorporated under the laws passed by the elected representatives of the people.

Remember: Coops Are Community Builders

Klemme School News

FRESHMAN NEWS

By Shirley Bisom and Sondra Bridges

In Algebra we are still studying sign numbers. Today we had a test, which was hard for some.

In English we finished the chapter on "Letter Writing" and have started on Story Telling

In Home Economics we have been studying about kitchens. Monday we divided into three groups and each group made a whole breakfast. We also have been drawing diagrams of our kitchens at home.

In Science we have been doing experiments and studying the importance of industry and sources and control of power in industry

SOPHOMORE CLASS NEWS

—By Merlyn Helps

In manual training this past week some of the boys have completed our work shelves and various articles such as gun racks, corner shelves, and twin shelves have been made.

The girls have been studying how to prepare luncheons and suppers in their Home Economics class.

In Biology we have been learning about the soil and its formation. We have just completed a chapter on reptiles and classes of mammals. A test was given Wednesday and Mrs. Andrae complimented us on exceptionally good papers.

In Geometry we have been studying theorems, proofs and propositions. Today Mr. Andrae gave us a test. We hope the results will be good.

During the past week in our English class we have been studying and writing reports. We find this very difficult because of the research work, but we hope to gain something useful from it.

A week ago we drew names for our exchange of Christmas presents.

JUNIOR CLASS NEWS

The high school and faculty drew names for Christmas one day last week. Some of the students seemed quite satisfied, while others seemed to wish they had gotten someone else's name. But I am sure everyone will be happy with what they get when it comes time to receive their present; and they will be satisfied with what they get.

English class, which for a while was a little dull, has now came to life somewhat. Why? well, we started a unit on "Listening, Discussion and Debating." Several were quite sure that they would not like to enter in the the debating, but they entered right in when it came time to have a debate in class.

The Economics class too seemed to stray from the subject of borrowing, tending and labor unions, but when Mr. Patterson reminded us of it, we reassured him that we were discussiong everyday economics.

"Alright, type Exercise 30 on page 59 thru twice without any mistakes," sounded thru the room in typing class one day the past week. But most of us have found that it takes quiet and a lot of concentration to do this.

SENIOR NEWS

We have now started on the last six weeks in this semester.

Literature has proved to be very interesting this past week. We have been studying about magazins and everyone has had a chance to give a report on one magazine. There has also been some very good reports given from the Readers Digest.

In History we are studying about the Jacksonian Democracy. Mr .Kingery surprises us every once in awhile with a little quiz. For some of us it helps our grades if we haven't forgotten to study.

In Algebra we are working on Quadractic Functions and Equations such as incomplete quadratics, graphic solution, the factoring method, completing the square and the quadratic formula.

The Bookkeeping class is now starting on the chapter of "Adjusting and Closing Entries." After this chapter we will start on The Walker Practice Set which will take two weeks.

We are hoping that Shirley Stille will get better soon and be able to come to school.

Dairy Herd Improvement Ass'n Monthly News

Hancock Dairy Herd Improvement Association reports for the month of November, 24 herds tested, with 89 cows dry. The total number of cows tested was 362; 273 cows were in milk. The average production per cow (including dry cows) was 581 lbs. of milk and 23 0 lbs. of butterfat.

Some of the records completed during the month were: Fern Huling, Britt, Registered Holstein, produced in 305 days 13,736 lbs. of milk and 437.0 lbs. of b. f. Dethmers and Molander, Garner, Registered Holstein, produced in 298 days 11,788 lbs. of milk and 346.8 lbs of b. f. Virgil Cook, Klemme, Registered Holstein, produced in 270 days, 11,248 lbs. of milk and 344.6 lbs. of b. f. C. J. Wille and Sons, Klemme, Grade Guernsey, produced in 258 days, 7,247 lbs. of milk and 372.1 of b. f. Everett Sheets, Britt, Registered Holstein, in 299 days produced 10,824 lbs. of milk and 381.1 lbs. of b. f. Kenneth Donovan, Wesley, Registered Guernsey produced in 240 days 4,592 lbs. of milk and 364.2 lbs. of b. f. Roy Jacobs, Klemme Grade Holstein, in 305 days produced 10,426 lbs. of milk and 341.1 lbs. of b. f. Jack Ostercamp, Britt, Mixed Breed, produced in 305 days 8,334 lbs. of milk and 340.5 lbs of b. f.

SEED LESS RED CLOVER AND INCREASE ALFALFA

With present alfalfa seed supplies the largest on record, and red clover seed production one-third less than last year, farmers will do well to consider seeding more of their land to alfalfa and substituting alfalfa for some of the red clover in their seeding mixtures.

That is the suggestion of H. B. Cheney and E. S. Dyas, the extension agronomist at Iowa State College.

Increased use of lime and fertilizer during recent years has made more land suitable for alfalfa, since it requires a non-acid soil well supplied with available phosphorus. The land should also be well-drained. Much of Iowa's land was farmed intensively during the war and since. It needs to be seeded down to a grass-legube mixture. This includes a good deal of land that has been cropped to corn for two or more years. An alfalfa, red clover and bromegrass mixture makes an excellent hay and pasture seeding for such land.

On the more acid, drained soils, alsike clover may be mixed with red clover to stretch seed supplies.

In tests conducted by the Iowa Agricultural Experiment Station over a 9-year period, alfalfa yielded 24 percent more than red clover. Moreover, the tests in other states have shown that corn yields increase more following alfalfa than red clover.

Since alfalfa seed production shows a much larger increase in the south than in the north. care should be taken to obtain the harder, northern grown seed for use in Iowa. Recommended varieties include Ladak, Ranger, Buffalo, Grimm and common alfalfa grown in Kansas or in the states to the north

We wish to thank all who sent us cards, letters and flowers and who visited us while we were at the Garner Nursing home. Mrs. Lenoard Kaduce and Terry Lynn. (1tp)

I wish to take this way of expressing my sincere thanks to all who sent me flowers, cards and letters and who visited me while I was in the hospital. I appreciate your thoughtfulness. Joe E. Johnson. (1tc)

I want to thank my neighbors and friends for remembering me on my birthday, December 8th with their nice cards and gifts. Mrs. T. (Grandma) Blank. (1tc)

I would like to take this way of thanking everyone for remembering me with cards, letters and visits while I was in the hospital. They were appreciated very much. Mrs. Roy Jacobs. (1tc)

Household Hints

By Mary Jane

Pie crust with imagination—use chilled orange juice or pineapple or lemon juice instead of cold water. Before rolling out the dough add a few nut meats and roll, makes different and delicious flavor.

Keep children from loosing books for good. Place a penny postal card with complete address of youngster on the inside cover of the book by using Scotch tape, then who ever finds the book can use this postal card and inform the looser where he can pick up his book.

Take a shopping bag along to the show when taking one or more children to the show and you can put cap, mittens and everything you remove while in the show, then you won't have to crawl around under seats hunting lost articles.

Read about the army's plan for making greater use of manpower See "The Stigma Is Lifted From the 4-F's" in The American Weekly, the great magazine distributed with SUNDAY'S CHICAGO HERALD-AMERICAN.

AROUND IOWA

COYOTES

While hunting pheasants near Tennant, in Shelby County, Jack Hockett and Lawrence Koltemann flushed a couple of coyotes and killed both of them. The coyotes have been killing sheep in that vicinity recently. At least two of them will kill no more.

ELEVATORS

Farm elevators caused injuries to two Pella lads recently. John Bandstra, 10, received a broken leg when an elevator fell, crushing him under it. He also received internal injuries. Earlier in the week, Lawrence Molen, 14, received a brain concussion when an elevator fell on him. He has covered.

STRANGE COW

When Harlan Hunter, of ne New London started for t barn one day last week, noticed that the cattle were bawling and that there w considrable confusion in th barn yard. A large buck dee mingling with the stock, too one look at Mr. Hunter, the jumped away and skipped int the brush.

TWO BROTHERS

Mrs. Van Ballah of Ayshire learned she lost a brother, Gene Hoover, of Bettendorf, last week when Mr. Hoover fell from a scaffolding and plunged 40 feet to the ground. Ten years ago, she lost another brother, Clifford Hoover, in the same manner when the collapsing framework on a large steel tank had hurled him to his death.

MANTELPIECE FALLS

While playing at "folk dances" in front of the fire-place in a neighbor's home, little Donald Higgenbotham, 6, of Kingsley met death. A large oak mantelpiece over the fire-place became dislodged and fell on the boy's head, killing him almost instantly.

PRANKSTER?

Tired and weary after a hard day's work, Mrs. Melvin Pratt of Spencer received a phone call the other evening. A man's voice told her that she had won $1,000 on the "pot o'gold program". She has received no money and it appears the call was the work of a prankster.

GETS THEM

At Stuart, a big Great Dane male dog, 'Buck", is probably Iowa's outstanding coyote-killer. Owned by Garland Davis, the five-year old dog killed 12 foxes his first "year" of hunting two years ago and is much in demand whenever foxes or coyotes need exterminating. "Buck" does not hunt alone; he operates with a supporting cast of "trailers", or tracking dogs, and Buck closes in for the kill.

JEWELER CLARION

Television Opens New Era in Politics

Millions Will See and Hear National Conventions in '48

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Reporting official Washington entered a new era with the opening of congressional committee hearings on the aid-to-Europe program.

The caucus room of the senate was crowded; a dozen members of the senate foreign relations committee were seated at one side of a long table, facing the spectators. Chairman Vandenberg was in the middle; at a small table opposite him sat the witnesses, Secretary of State Marshall and Undersecretary of State Lovett. The newsfolk (some 125 of them) packed several green baize-covered tables placed at right angles to the senators'.

The room was a glare of light. Powerful bulbs had been substituted for the ordinary ones in the crystal chandeliers. In addition, there were great klieg lights glaring down, and, before the hearings were over more than one pair of sun-glasses appeared.

Baukhage

Secretary Marshall was tossing off the billions as he stated the amounts needed for long-range and short-range recovery, interim emergency relief and medium-range rehabilitation. "Two billion, six hundred and fifty-seven millions . . . five hundred and ninety-seven millions . . . five hundred millions . . . one hundred and fifty millions. . . ."

Pencils scratched, senatorial pencils as well as reportorial.

"Then that would be one million . . ." mused Vandenberg aloud, confused by the avalanche of digits. Everybody laughed. The mere thought of ONE million among all those ciphers seemed absurd.

Now Senator Vandenberg is very meticulous about making statements concerning foreign policy. He never will agree to an ad libitum interview on the air, won't allow himself to be quoted, except from a prepared statement.

The day after the "one million" remark, one of my colleagues was kidding him.

"How did you like it, Senator," he asked, "When you mixed up millions and billions, and it not only went out over the air, but also your adding and multiplying went out to some 150,000 television spectators?"

My friend expected the senator to hit the ceiling. But quite the contrary. He was so pleased when he realized the number of people television had brought into the caucus room to see and hear senators and witnesses discuss what Vandenberg considers such a vital matter that he forgot his old prejudices.

Television helped draw both the Republican and Democratic national political conventions to the city of Philadelphia. Television may have a very definite effect on the type of man and woman who will enter public life in the future, and it certainly will have its effect on reporting methods used in covering public events.

Roger Clipp, general manager of Station WFIL and WFIL-TV was selected to sell to political committeemen the television advantages of Philadelphia, which is on the coaxial cable—the highway that carries the images. It stretches from Washington up into New England and west to Schenectady.

Philadelphia's advantage, said Clipp, is its central location which allows it to draw upon the pool of skilled television personnel located in the East and makes it easily accessible for hard-to-get equipment. He estimated that financing the job will require $175,000 for both conventions.

In addition to the regular station coverage, television receivers and large screens will be placed in the basement of Convention hall and in adjoining Commercial museum. In this way, all the party members who cannot find room in Convention hall, plus about 25,000 spectators a day, can be accommodated close to the actual scene of activity.

According to Clipp, coaxial cable and established relay links will tie together at least 14 stations in the East. In addition there will be a special, experimental East-to-West network of stations to carry into the Middlewest.

As he talked to politicos, Clipp tossed off a few impressive figures himself—more than 68½ million people populate the area to be covered by televising the conventions. That many people add up to some 257 electoral votes, he added.

This is in contrast to the situation in 1940 when the GOP convention in Philadelphia was covered by two video cameras whose pictures reached an audience of less than 10,000 viewers.

Of course, not everybody in every state where the coaxial cable stretches its length will be handy to a television set in June and July of '48, but we count four or five to a set ordinarily, and when a big show is on, the spectators jump to 30 per set.

More and more taverns, hotels and public places are installing television sets. In fact, out in Chicago, some people became concerned when they found that children who otherwise wouldn't enter a tavern went in to see the televised baseball and football games. So they started a campaign to purchase television sets which could be installed in schools and Sunday school rooms. They charged a nickel or dime entrance fee until the set was paid for.

Changing Techniques

Mark Development

They say the Washington correspondents, as a result of all this televising, are getting "klieg eyes." Someone suggested that perhaps reporters will be televised right out of existence. They won't. The telephone didn't drive out the telegraph. Although the teletype has pretty much replaced the telegraph operator (manual sender) somebody still has to write the messages.

You always will have to have a reporter to strain the news through; you can't deliver it completely in the raw. It takes a human brain, not a machine, to interpret it.

Already changes in the technique are developing. One, for instance, heard over the networks is unique in form, and television will improve it. Perhaps you have listened to the excellent summary of the United Nations in which you hear portions of the speeches of the delegates which were recorded when they were made and between them an announcer reading a prepared script and a commentator summarizing, explaining, interpreting. Now you will see, as well as hear, what goes on here, there and everywhere, just as you did at the televised hearings referred to earlier.

In order to do this job of summarizing and interpreting, a man must be as thoroughly familiar with the subject matter as any reporter who writes an important news story. He must have sufficient background and experience, enough general knowledge and specific information to select the proper recorded portions, to give them the weight they deserve and pick the salient points to be summarized.

He will be a reporter or commentator, writing his story with his lips, picking out the "quotes" by pouring the stored-up soundwaves from the wax record or the wire recorder out through the spout of the microphone onto the air.

The profession is the same. Only the technique changes.

• • •

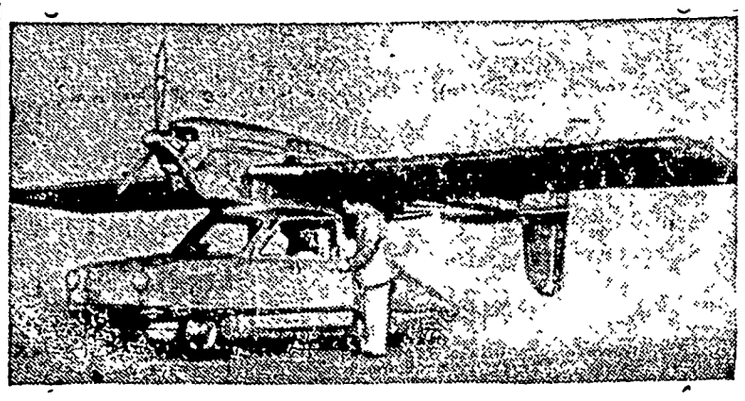
President Truman imbibed some 1,260 calories on the first meatless Tuesday. But he'll probably need more on Thursdays. That's the day he meets with press and radio correspondents.

• • •

German Communists joined Nazis even before the Soviet alliance with Germany in the war. They may do the same now, and we'll have the old beef sandwich they used to talk about in Germany—brown outside and red inside.

• • •

People with high blood pressure usually suffer from "inhibited aggressive impulses," says Journal of Living. Which makes it easy to bet on what Stalin won't die of.



IT HAD TO COME . . . Sooner or later someone was bound to bring out a combination airplane and automobile, and this is Consolidated-Vultee's first experimental model along that line. Wing and power plant are detachable from the automobile-type fuselage.

NEWS REVIEW

French Premier Quits; Marshall Hits Russians

DIVIDED:

All France

All Gaul is divided into three parts—Communist, Socialist and DeGaullist.

Unable to make an impression on the turbulent French scene, Premier Paul Ramadier resigned his office in the face of widespread Communist-inspired strikes and France's elder statesman Leon Blum was given a mandate to form a new Socialist government.

Leon Blum

The situation in France had never been worse. It was touch and go, with the terrifying possibility of a civil war looming as a result of the present deep unrest.

Underlying cause of it all is France's prostrate economic condition and the prospect of a cold, hungry winter. Even if U. S. stopgap aid is rushed through immediately it will fall far short of being the oil needed to pour on the troubled waters. Superimposed on that situation were these political factors:

1. The Socialist government, trying to pursue a moderate course, was being squeezed between the stronger Communists to the left and Gen. Charles De Gaulle's Rally of the French People on the extreme right.

2. The Communists, true to the teachings of Marx, were trying to foment revolution by instigating the paralyzing strikes after their legal and political methods to overthrow the government had failed.

3. General De Gaulle, seeking the governmental reins for himself, has said he would deal with the Communists with a strong, authoritarian hand. De Gaulle is feared because he stands for totalitarianism.

The real struggle for France is being waged between the Communists and DeGaulle's followers. Moderate Socialism is simply caught in the middle.

FED UP:

With Russia

To his Chicago audience, it sounded as though U. S. Secretary of State George Marshall was full up to here with Russia's obtuse and exasperating tactics in the field of international relations.

He made it clear that the state of active resentment of the Soviet Union, to which Americans have been goaded by the obstructionist actions of Russian leaders, can in no wise be interpreted as warmongering.

Thus, Marshall charged Russia with blocking European recovery and waging a deliberate anti-American propaganda campaign.

"It is time to call a halt to such inflammatory practices," he said. The U. S. refuses to "stand by and watch the disintegration of the international community to which we belong."

It was one of the most angry denunciations yet made against Russia by a high U. S. official, and there was a distinct possibility that it was a reasonably accurate reflection of the temper of the times. Marshall's Chicago address, added to all the other recent expressions of disgust (including President Truman's) with Russian policy, indicated that perhaps a U. S. ultimatum dealing with Soviet obstructionism was not too far distant.

As a matter of fact, a strong possibility existed that Marshall might make just such a stand at the London conference of foreign ministers to discuss German and Austrian peace treaties. Awaiting the conference with utmost seriousness, the secretary of state told his Chicago listeners that:

"It is my purpose to concentrate solely on finding an acceptable basis of agreement to terminate the present tragic stalemate and to speed the advent of a new era of peace and hope for Europe and the world."

FOURTH ESTATE

Editors Polled

America's weekly newspaper editors, the still, small voices from the grass roots, would make Harold Stassen of Minnesota their personal choice as the Republican presidential candidate in 1948, according to a straw poll conducted by Publishers' Auxiliary, newspaper publication devoted to the weekly field of journalism.

At the same time, with laudable objectivity, the editors expressed their belief that Gov. Thomas E. Dewey of New York would be the one to receive the GOP bid.

President Truman, as virtually the only conceivable Democratic candidate, was chosen by the editors for that party's nomination. They also conceded overwhelmingly that the Democratic delegation would give him the nod at the national convention next year.

Publishers' Auxiliary distributed 500 ballots to country weekly editors in 48 states and tabulated the

results on the basis of 218 completed ballots, representing a 43.6 per cent return.

Although the straw poll contacted a representative section of small-town editorial opinion, its results cannot be held entirely conclusive because of the unknown quantities present at the time it was conducted. California's Gov. Earl Warren had not yet declared his candidacy for the Republican nomination, and the MacArthur sentiment was barely a ripple.

According to the election forecast section of the poll, 36.9 per cent of the editors believe President Truman will be re-elected; 21.9 per cent think Dewey will be the next chief of state; 12.4 per cent favor Eisenhower; 9.5 per cent have confidence in Taft, and 5.4 per cent believe Stassen will be elected.

Editors polled were predominantly Republican. A GOP candidate was named as personal choice by 66.7 per cent and a Democrat by 30 per cent.

ATOMS AND AGRICULTURE

Isotope To Help Farm Income

Not only did the atomic bomb explosions at Hiroshima and Nagasaki reveal the presence of a new and terrible war weapon, but they also may have ushered in an era of greater progress and prosperity for the American farmer.

Researchers at Oregon State college in Corvallis currently are conducting experiments which they believe may add millions of dollars worth of produce to the nation's yield in agricultural products.

Key to that expanded production is the radioactive isotope, a by-product of nuclear fission, which is being used in experiments that reach into every field of natural science.

But at Oregon State college and Washington State college at Pullman, major experimental emphasis is placed on agriculture.

Investigation of the application of the atom to agriculture has been given impetus by the estimate of William W. Waymack, member of the atomic energy commission and Des Moines, Iowa, newspaper publisher, that radioactive isotopes may be instrumental in increasing farm production in the U. S. by 240 million dollars in one year. Over a period of 10 years, such an increase would pay for the two billion dollars spent on developing atomic energy during the war.

Value of the isotope to agricultural research is similar to that in other fields of research. Its radioactivity permits its use as a tracer through the organisms of plants and animals. Applied in fertilizers to the soil, its progress can be traced in the living plant, providing a medium for the understanding of plant life and nutrition never before available.

Several isotopes are being used to study soil chemistry of potash in the hope of finding more effective ways of furnishing nutrition to crops. Another is being utilized to study the effects of application of lime to the soil. Still other areas of research may yield important knowledge on absorption by grain of phosphate and chlorine from the earth.

A VOICE FROM THE COUNTRY

U. S. Dollars Can't Halt Cataclysm Facing World

(Editor's Note: This is the third in a series of articles on current problems by Louis Bromfield, one of America's leading writers.)

By LOUIS BROMFIELD
Released by WNU Features.

There are times when some of the men in positions of power or influence in this country seem like pitiful, ant-like figures confronted by a vast wave about to overwhelm them which, like Canute, they are commanding to stand still.

Their voices, loud out of all proportion to the roar of the oncoming wave because we all are standing near them, still seem puny and insignificant. What they are crying out to the wave approaching them is: "We will pay you to subside. We will give you billions of dollars and raw materials and manufactured commodities, if you will simply subside and behave yourself." They are trying to buy off what is a world cataclysm.

Bromfield

The world is far worse off than even the loudest calamity howlers of the state department have implied. The two world wars, the vast increase of world population during the 19th century, the industrial revolution with its evil social results, the dire shortage of food in the world, the demoralization and chaos of most governments, the intrigues of Russia in a distintegrating world are not merely incidents of comparative historical insignificance to be repaired overnight by a few billion dollars.

Recalls Past History.

Together (and they are inseparable) with many other intimations of disaster they form a great wave of history such as destroyed Carthage and brought about the fall of Rome. They represent a revolutionary change in world society as great as the disappearance of feudalism or the inauguration of the Industrial Age and the rise of the British Empire.

There is no way of dissipating the wave, confining it or ordering it to cease. The best we can do is to put out stout anchors against the storm, adjust ourselves and hope to survive as people do in a hurricane.

The wave is everywhere evident—in the Orient, the Near East, Russia and Europe. To fling ourselves against it, to think that we can buy off or even postpone its approach is simply a folly by which we weaken our own forces. Unfortunately, perhaps tragically, the responsibilities for our defense are largely in the hands of men who still are thinking in the idiom of an age which is already past and will not return.

Withstanding the Wave.

It is possible that we, as a nation, may be able to stand as a rock in the path of that oncoming wave, surviving it as Rome survived the wave which swept her world as barbaric Carthage challenged her power and security. We shall not do so if we deliberately weaken ourselves in insignificant, picayune efforts to halt the wave.

I mean, by picayune efforts, four billions loaned to England and dissipated quickly, 20 billions poured into Europe to vanish perhaps without result overnight, or even billions and billions more. Waves of history, like earthquakes and hurricanes, are not to be bought off. They are simply not in the market.

The unrest, the perpetual strikes, the unwillingness of British coal miners to produce more, the despair of absurd and destructive Nihilist philosophies like Existentialism, the inertia and the despair of whole peoples, the prevalent philosophy of living from day to day, the evil tactics of Russia in exploiting all these elements and many more, are all a part of that wave of history.

Money will not cure the despair of a twice-defeated Germany. It will not get more work out of the British coal miners, who constantly seek more and more pay for less and less work in a desperate nation on the verge of bankruptcy. It will only permit the miner to relax a little more before the final catastrophe which may engulf us as well. It is significant that the abler and more honest European leaders are showing some recognition of this fact.

Purge Is Necessary.

To soar into the realms of philosophical history, there come times when a purge of men and nations seems necessary and inevitable, when man is forced to depend upon himself alone and to develop ingenuity, energy, leadership and indeed a whole new soul in order to save himself and his country. A Europe which is unwilling to give up artificially pegged currencies, complicated customs barriers, a Britain which still seeks to re-establish cartels and 19th century closed-trade areas, has not yet reached the catharsis out of which new strength, new character, new hope is born.

"Money will not get more work out of the British coal miners, who constantly seek more and more pay for less and less work in a desperate nation on the verge of bankruptcy."

Forced into socialism on the one hand by poverty and disaster, Britain still clutches with the other the decaying remnants of the 19th century imperialism which brought her in another age great power and wealth. That imperialism lies behind the advancing wave of history, gone forever.

The humanitarian responsibility for food lies almost wholly upon our shoulders and, so long as civilization exists and Christian morality has any weight, cannot be avoided. We cannot look for humanitarianism in the moral and ethical vacuum represented by Soviet Russia. The men in Moscow, in themselves a horrible manifestation of the wave, will use their wheat politically. They will even sell it at a high price, demanding in turn American dollars because their own pegged currency has no real value in the world.

Russia Overestimated.

Despite its ruthlessness and realism, Soviet Russia is not a power comparable to this nation. As Walter Lippmann has pointed out, the satellites and the nations Russia has swallowed up are, in their present state, liabilities rather than sources of strength.

Essentially Russia is only a potential power which can fall into disintegration quickly in the face of another war. It is not impossible that the Balkans and central Europe can fall within a generation into the desolation of the Thirty Years war. That possibility, too, is a part of the "Wave of History."

We shall not stop the wave by pouring out billions and billions carelessly or perhaps generously or under any other circumstances. We can, however, perhaps keep intact a citadel about which world civilization can rebuild itself. We shall not do so by economically weakening ourselves. The quickest route to the destruction of democracy is that of economic depression. To weaken ourselves in a futile attempt to halt the wave of history is the surest way to death of democracy and, in the end, of western civilization.

Sympathetic Irish Replace Shamrock

OGDENSBURG, N. Y.—Loss of a shamrock is a crushing blow to all good Irishmen, Police Sergeant and Mrs. Timothy O'Leary insisted in coming to the rescue when someone stole a 50-year-old shamrock plant from Mrs. George Valley.

After reading a newspaper account of Mrs. Valley's plight, the O'Learys sent her some slips from their own shamrock plant, brought here from Ireland 92 years ago.

Country Store Proves Good Risk

LITTLETON, MASS.—Business is booming at the Littleton common store, a typical old country store founded 98 years ago, since it was taken over by a conservative Boston investment firm four months ago.

After investing in the store with some spare "risk" dollars, Paget corporation of Boston "modernized" the establishment to the extent of installing new counters and an enlarged line of goods. To retain the old neighborhood store atmosphere, the modernization program involved non-glamorizing. No chrome steel fittings or neon lights mar the old-fashioned setting.

Since then there has been a brisk turnover in licorice sticks, brooms, wheelbarrows and cording for corn husks. Dress shirts can be found on a counter alongside dungarees while modern bathroom cabinets are displayed alongside rakes and hoes.

By ED EMERINE
WNU Features.

A sharp axe cut into the sturdy trees. When a clearing had been made, the axe and other hand tools were used to cut and fit the logs. All of the wood used in construction of the house was cherry and walnut, with blue ash for the floors. The doors were held together with wooden pegs and fitted with hand-wrought hinges and intricate home-made locks. There were often quaint closets and carved mantels. Stone fireplaces with great hearths provided for heating and cooking.

Thus were the first of the "old Kentucky homes" built. Many of the builders were veterans of the French and Indian wars, or followers of Gen. George Washington during the Revolution. When all was in readiness, the pioneer returned to Virginia or some other colony and brought his wife and family to their new home in a dark, mysterious wooded land known as Kaintuck, or Kentucky. Guns stood by the door, or hung above the mantel, and ammunition was close at hand. But young and struggling America was pushing westward from the Atlantic seaboard. The "dark and bloody ground" was being penetrated.

First Explorations.

Kentucky was then a part of Fincastle county, Virginia. Marquette and Joliet probably discovered it, but it was Daniel Boone and his companions who, shortly after 1760, explored the region. The first settlement was at Harrodsburg in 1774, and Boonesborough was founded a year later. Today, in Pioneer Memorial state park is a replica of Fort Harrod. In this 28-acre enclosure, which is surrounded by a stockade, is a monument to the first permanent settlement in the west and one of the finest collections of the pioneer period.

The frontier would have been challenge enough, but the settlers were constantly harassed by Indians and the Revolutionary war was being fought. The wily Boone, who always had been accustomed to life in the woods, was a source of strength to the people of the frontier, although he was captured by the Indians on at least two occasions.

Blue Licks Battlefield state park encloses the scene of the last battle of the Revolution and recalls Boone's unheeded counsel to the militia. The troops were drawn into an ambuscade and a disastrous battle followed. Following the close of the Revolutionary war, Boone returned to his home and family, and Kentucky became a safer place to live.

Kentucky county had been organized, and later, when other territory was added, it became Kentucky district. In 1786 Virginia gave conditional consent to the organization of Kentucky as a separate state. In 1792 Kentucky, with its present boundaries, was admitted to the Union. The northern boundary was made the low-water mark on the northern shore of the Ohio river so that the river itself is a part of Kentucky. This was done to keep the Indians from crossing the river on any pretext.

Three Main Divisions.

Those who first settled in Kentucky crossed the mountain ranges on its eastern border. The state falls from a height of about 2,000 feet in the eastern part to 300 feet along the Mississippi river at its western edge. The part west of the Tennessee river is low and broken only by creek and river valleys. The central portion is mainly rolling. The eastern part is mostly hilly or mountainous. These natural divisions have brought about variety in both products and people. The entire state, however, has a mild climate and even temperature.

Kentucky is first in many things, such as caves and caverns, cannel coal, native asphalt, race horses and hemp. It always has ranked high in tobacco, coal and distilled spirits.

In mineral wealth Kentucky has rich bituminous coal beds as well as cannel or gas coal. It has a consistent production of oil and gas, the oil of very high grade. Near the Green river are rock asphalt beds. Kentucky iron is mined near Cumberland Gap, and in Trigg, Lyon and Caldwell counties in the west. Other minerals include cement limestone, Kentucky marble, sandstones, clays, barytes and phosphates.

Rich in Forests.

Like all of the older states, much of Kentucky's forest land has been cleared and turned to agriculture and livestock. Along the Allegheny slopes, however, there is a great quantity of fine timber, most of it hardwood, such as oak, hickory, black walnut, blue ash, maple, elm, beech, and others.

Most of the people in Kentucky depend on agriculture. The leading farm products are corn, tobacco, hay and wheat. For many years, Kentucky produced all the hemp grown in the United States. Truck farms and orchards are frequent along the Ohio river, especially near such markets as Louisville and Cincinnati. The state's best known crop is tobacco, grown in several areas.

Kentucky raises more cattle than many western states and has approximately a half-million milk cows and an equal number of beef cattle. It is famed as a state where thoroughbred horses are bred, Kentucky horses have made three-fourths of all the winnings on the American turf.

Work horses, mules, sheep and hogs bring the state's livestock total up to where it competes with most other states.

Industrial Development.

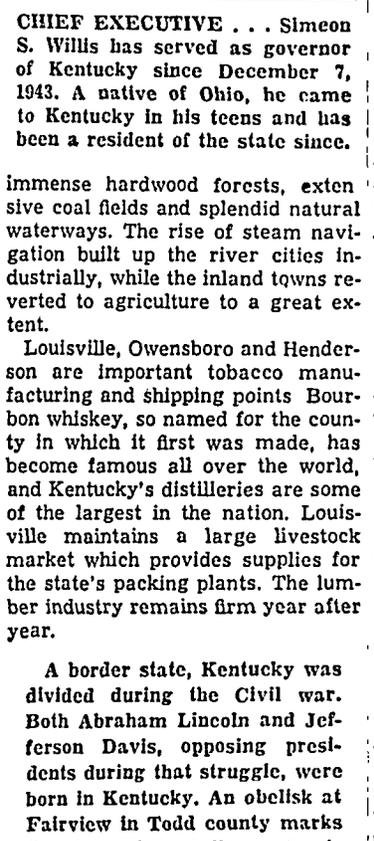
For half a century after Kentucky's admission as a state, it progressed rapidly in industry. It had immense hardwood forests, extensive coal fields and splendid natural waterways. The rise of steam navigation built up the river cities industrially, while the inland towns reverted to agriculture to a great extent.

Louisville, Owensboro and Henderson are important tobacco manufacturing and shipping points. Bourbon whiskey, so named for the county in which it first was made, has become famous all over the world, and Kentucky's distilleries are some of the largest in the nation. Louisville maintains a large livestock market which provides supplies for the state's packing plants. The lumber industry remains firm year after year.

A border state, Kentucky was divided during the Civil war. Both Abraham Lincoln and Jefferson Davis, opposing presidents during that struggle, were born in Kentucky. An obelisk at Fairview in Todd county marks the place where Jefferson Davis was born in 1808. Abraham Lincoln national park, comprising over 110 acres, is at Hodgenville. Inside a granite building is the log cabin said to be that in which Lincoln was born.

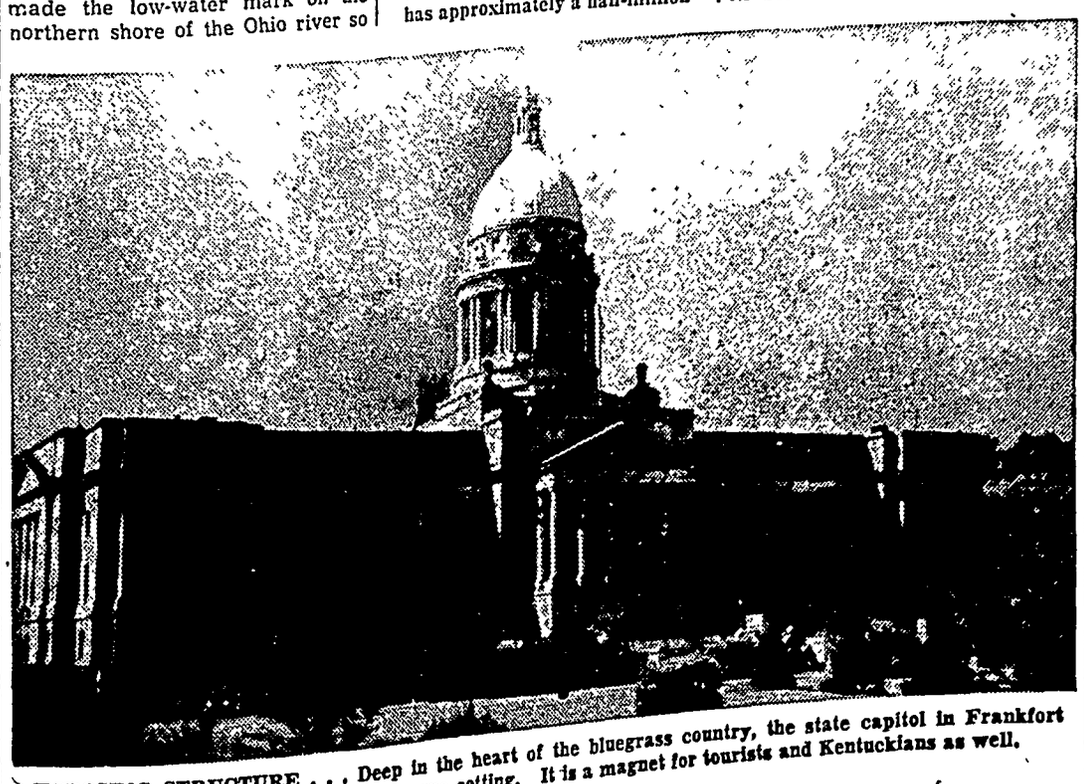
Fields and forest, lakes and streams provide field hunting of all kinds, with a wide variety of birds in their native haunts and the waters are full of fish. Flights of ducks and geese from the northland are sure to come over Kentucky, where feed is abundant and shelter at hand. There are still wild turkeys and ruffled grouse in the state.

There is a magnetic charm in Kentucky's bluegrass pastures, its fields, its fine old homes, its roads, parks and streams. Stephen Foster found it when he wrote "My Old Kentucky Home." It never has changed and perhaps it never will. The sky, the water and landscape blend into a way of life that makes every mansion or cabin a home. And Kentuckians are a breed of people, as thoroughbred as their horses, who have maintained a high degree of honor, of trustworthiness, along with a love of beauty and a natural hospitality. Kentucky feels like "home" the minute you enter its borders!



CHIEF EXECUTIVE . . . Simeon S. Willis has served as governor of Kentucky since December 7, 1943. A native of Ohio, he came to Kentucky in his teens and has been a resident of the state since.

THEY'RE OFF! . . . Kentucky's famous race track, Churchill Downs, is the site for the annual Kentucky Derby, the world's classic in horse racing. The state itself is famed as a breeding ground for thoroughbred horses, Kentucky-bred horses having accounted for three-fourths of all winnings on the American turf.



IMPOSING STRUCTURE . . . Deep in the heart of the bluegrass country, the state capitol in Frankfort is an imposing structure in a picturesque setting. It is a magnet for tourists and Kentuckians as well.

The Washington MERRY-GO-ROUND

DREW PEARSON

Ancient Political Practice

WASHINGTON.—To drop in at the soft-carpeted lounge for delegates at the United Nations, no one would ever dream a "cold war" was raging between two bitter groups of capitalistic-communistic nations. In fact, the lounge looks more like the cloakroom of the house of representatives.

Ambassador Gromyko arrived early—and smiling! Deputy Foreign Minister Vishinsky arrived close behind and began shaking hands with folks. It looked just like Sam Rayburn and Joe Martin calling each other names on the floor of congress, and then walking off arm-in-arm.

Soviet Delegate Kudriatsov, the triple-chinned Kremlinite who organized the Canadian spy ring, dropped his professional dourness, chatted engagingly with the correspondent of the Herald Tribune, a paper Vishinsky had bitterly accused of "war-mongering."

Turning on the charm, Gromyko began canvassing Latin-American delegates for votes. He even went in for backslapping, playfully nudged sad-eyed Czechoslovakian Foreign Minister Jan Masaryk, who, stuck between the East and the West, was in no mood to be nudged.

Ascetic, dagger-wearing delegates from the Kingdom of Yemen joined in the old-fashioned game of logrolling, their gold-trimmed robes flaring up to reveal snappy two-colored American shoes as their wearers went from delegate to delegate.

Ablest at logrolling, however, is the British delegation, largest at the U. N. The British have one man assigned to each foreign delegation, know how everyone is going to vote on every issue. Least inhibited and most effective of the logrollers is Australia's Dr. Herbert Evatt, who strides around, necktie askew, buttonholing and trading, effectively jockeying his tiny country, with a population less than that of New York City, into a major role in global strategy.

Note—When logrolling isn't called for, the Russians shut up like clams, won't even accept an invitation for lunch. When invited to lunch, Russian delegates always say they never eat before 3:30 p. m., then blandly lunch together at a single table at 1 o'clock.

* * *

The Unbelieving Germans

The Germans have it all figured out why meatless Tuesdays are back again in the U. S. They have two reasons: 1. We are hoarding food for war with Russia; 2. We are trying to force up prices.

This is the report brought back from Germany by Sen. Harry Cain of Washington, who left the conducted tour of his fellow senators and took off on his own in a borrowed jeep. Cain mingled and talked with the common people, scratching notes on the back of an envelope. Here are some of his notes:

"City people grubbing for potatoes . . . cows pulling plows . . . grass growing in Hitler's super-highway."

Cain found that the average German refused to believe reports of the vast amount of food America is shipping overseas. He preferred to accept the line handed out by the Communists. Two favorite Nazi jokes were:

"Yes, much food is coming from America—through the radio."

"America is sending us 50 ships. Forty-eight are loaded with fragenbotens (denazification forms), and two are loaded with grapefruit juice."

Note—That's why newsreel photos were taken of the Friendship Train to be shown in European theaters. That's also why two Friendship Trains will be run through France and Italy.

* * *

White House Hazing

The old Washington adage that too much publicity is worse than none is making life a little too tough for young Clark Clifford, President Truman's able special counsel and speech writer.

Clifford differs from such erstwhile brain trusters as Tommy Corcoran, Ben Cohen and the late Harry Hopkins in that he never has been afflicted with a "passion for anonymity." A gregarious, likable individual who enjoys being around people, Clifford is too considerate to brush off reporters who want to write about him. Result: He is constantly being ribbed by colleagues inside the White House.

But there were no laughs when the latest magazine thesis on Clifford, a Saturday Evening Post article titled "Truman's One-Man Brain Trust," hit the newsstands. Instead, the article was received in tight-lipped silence, chiefly by the President, who seemed plenty irked by certain backhanded references to himself.

Among other things, Author Leigh White declared that "much of Clifford's authority stems from the President's own limitations," and that Truman "would be the first man to admit, in candor, that his job is too big for him."

White's palliating comment that the job also had been too big for Roosevelt did little to soothe Truman's feelings.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

By LOUIE D. NEWTON, D. D.

SCRIPTURE: Revelation 1-7; Acts 16:16-40; I Peter 4:12-19; 5:6, 7.
DEVOTIONAL READING: Revelation 3:7-13.

Courageous Loyalty

Lesson for December 14, 1947

OPEN your Bible to Revelation, and read the first seven chapters. Then you will be ready for Acts 16:16-40, and I Peter 4:12-19, and 5:6, 7. These Scriptures form the basis of a study for Sunday on Loyalty Under Persecution.

Dr. Newton

Christians are not promised an easy time, but they are assured sufficient grace for every time of need. This lesson, if carefully pondered, will fortify one's faith and send us forth renewed in courage and Christian poise for these days of discipleship.

* * *

How a Song Helped

"HUMBLE yourselves therefore under the mighty hand of God, that he may exalt you in due time; casting all your care upon him, for he careth for you," I Peter 5:6, 7. That is a splendid watchword for every boy and girl.

Now, turn to Acts 16:16-30, and see how Paul and Silas, locked in the inner dungeon at midnight, could pray and sing. That is what happens to the Christian who sincerely trusts in God—who acts on the promise that God really cares for his trusting children.

A memory verse suggested for Sunday is found in Proverbs 17:22, and it goes like this: "A cheerful heart is a good medicine."

Have you watched some Christian in affliction—how he or she could bless every passerby? It was because that person possessed the "cheerful heart." And each of us may have that precious possession, if we remember Mark 11:22, "Have faith in God."

* * *

Happy Behind Prison Bars

PAUL and Silas are pictured as happy in that dark dungeon. There is a statement to challenge every cynic, every doubting Thomas. Only the grace of God can make men happy under persecution. Paul declares in Romans 1:16, "I am not ashamed of the Gospel." Aye, he was not ashamed to preach the Gospel to the little damsel on the streets of Jerusalem, nor was he ashamed to go to the prison for the sake of the Gospel.

Best of all, Paul and Silas were sustained in their sorrowful plight by the consciousness that God was with them—that he always keeps his word.

I venture the prediction that the fortitude of Paul and Silas in that night of persecution did more to impress the Christian religion upon Jerusalem than any sermon even the eloquent Paul ever uttered. We, too, can witness for Christ as we face difficult situations.

* * *

Courageous Loyalty

LOOK now at Revelation 2:8-11, and 3:14-22, for the example of the church at Smyrna, burdened by tribulation and poverty, but "rich" in the promise that a crown of life awaited them.

It was far more difficult to be a Christian in the first century than it is in the twentieth century. By which I mean that the early Christians were few in number and without any backing of public opinion. They were despised as the lowly followers of the crucified carpenter of Nazareth. Today, Christians are acknowledged as the best citizens in every community.

Even so, there are tests for us—tests that will be too much for human courage and loyalty. If we are true to the teachings of Jesus as they relate to everyday life, we shall need that same enduement which the Christians at Smyrna possessed, else our discipleship will shame the name of our Lord.

* * *

The Blood of the Lamb

THE lesson concludes with that dramatic passage in Revelation 7:9-17, in which we behold the great white-robed throng about the throne of God, singing, "Blessing and glory and wisdom and thanksgiving and honor and power and might be unto our God forever and ever. Amen."

Who were they? "These are they which came out of great tribulation, and have washed their robes and made them white in the blood of the Lamb."

Loyalty under persecution is dependent absolutely upon the life-giving power of the blood of the Lamb.

"Fear not, I am with thee, O be not dismayed
For I am thy God, and will still give thee aid."

Simple Home Course In Touch Typewriting

Teach yourself to TYPE

THE typewriter is an obedient servant! You can control it with your fingertips if you are steady and firm and know how to handle it.

The typewriter can help you get a good job, simplify your notes at school, prepare lengthy reports for business or club meetings. If you are a hunt-and-peck typist, you can teach yourself touch-typewriting at home.

Next come the mechanics of turning out a professional-looking piece of work—centering, spacing, punctuation and so forth. All easy to master once you are a touch-typist.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try *Doan's Pills. Doan's* help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. *Ask your neighbor!*

Defendants.

IN EQUITY NO. 11,572

ORIGINAL NOTICE

TO THE ABOVE NAMED DEFENDANTS

You and each of you are hereby notified that the petition of the above named plaintiffs is now on file in the Office of the Clerk of the District Court of Hancock County, Iowa, at the Court House in Garner, Iowa, in which the plaintiffs allege that they are the absolute unqualified owners in fee simple of the following described real property situated in Hancock County, Iowa, to-wit

That part of Tracts No. 1 and No. 2 of the Auditor's Sub-Division of the West Half (W½) of the North East Quarter (NE¼) of Section Thirty one (31), Township Ninety-five (95) North, Range Twenty-three (23), West of the Fifth P M., Hancock County, Iowa, more particularly described as follows: Commencing at a point 514½ feet east of the Northwest corner of the North East Quarter (NE¼) of Section Thirty-one (31), thence South to a point 474 feet South and 500 feet West of the Northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31), thence east to the the right of way of the C. R. I & P. Ry., formerly the right of way of the B. C. R. & N Ry., thence in a northeasterly direction along the right of way line of the C. R. I. & P. Ry. to point directly east of the point of beginning; thence west to the point of beginning excepting therefrom a tract of land described as follows Commencing at a point 588 feet East of the northwest corner of the North East Quarter (NE¼) of said Section Thirty-one (31), thence south 200 feet; thence east 66 feet, thence North 200 feet, thence west 66 feet to the point of beginning.

subject only to a contract of sale to Art Knoke, dated January 29, 1947 and recorded in Book 56 of Farm Land Deed Records of Hancock County, Iowa, page 134, in the office of the County Recorder of Hancock County, Iowa, and in said petition the plaintiffs allege that they are credibly informed and believe that you make some claim adverse to the title of thes plaintiffs in said property.

These plaintiffs further pray in their petition that the title to the above described real property be quieted, established, and confirmed in these plaintiffs by the Court, subject to said contract of sale, and that the defendants above named, together with all unknown claimants and all persons unknown claiming any right, title or interest in the above described real property, and all the heirs, spouses, successors, assigns, grantees, legatees, devisees, and beneficiaries of each and all of the above named defendants be forever barred and estopped from having, asserting, or claiming any right, title, and interest in above described real property, adverse to these plaitiffs in said property, and pray further that the Court grant such other further equitable relief as may seem just.

You are further notified that no personal judgment will be asked against any of you and no costs will be assessed to any defendant who does not appear.

For further particulars, see petition now on file as aforesaid.

You are further notified that unless you appear before said Court at the Courthouse at Garner, Hancock County, Iowa, before the 31st day of December, A. D., 1947, your default will be entered and judgment and decree rendered against you for the relief demanded in the petition, and the title to the real property of the plaintiffs above named will be quieted, established, and confirmed in them, subject to the contract of sale to said Art Knoke, and you and each of you will be forever barred and estopped from having or claiming any title or interest to that of the plaintiffs.

OBITUARY OF MRS. MILTON ALDEN

Alice Barbara Alden was born on the 6th of October 1892 in Franklin County near Latimer. She was brought to Holy Baptism in the Evangelical and Reformed Church at Marion Center. After due instruction during her childhood years she was received as a member by confirmation.

On the 6th day of May 1915 she was united in marriage to Milton Lloyd Alden. Four sons and one daughter were born to this union. One of the sons, Orval preceded his mother in death when he brought the supreme sacrifice for his country while serving with the armed forces overseas in the last war.

Mr. and Mrs. Alden were engaged in farming throughout the years of their married life. During the first years the family lived near Latimer, in 1922 they moved to Sheffield, in 1938 to Osage and since 1944 they have lived in their present home 6 miles east and 1½ mile south of Klemme.

After a short illness Mrs. Alden died Monday evening, Dec. 8th 1947 at the age of 55 years 2 months and 2 days.

Surviving her and mourning her death are her husband, Milten Lloyd Alden; her children Alvin, Dougherty; Warren of Tucson, Arizona, George, Sheffield;one sister, Esther (Mrs. Ralph Springer) Thornton; and five grand children.

Services were conducted at the Alden home Friday afternoon by Rev. Calvin Grosshuesch of Klemme. Allen Barz sang two solos accompanied by Miss Iris Rosendahl on the piano. "Abide With Me" and "The Lord Is My Shepherd".

Burial was made in the Hampton cemetery.

T. C. Nelson, John Hippen, Orville Maben And E. I. Brooker are Re-elected

All officers of the Farmers Mutual Fire and Lightning Insurance Association were held over for another year. T. C. Nelson was re-elected President; John Hieppen, Kanawha, vice-president, E. I. Brooker, Forest City, treasurer; and Orville Maben, secretary. The election took place at the annual directors and stockholdrs meeting held at the I. O. O. F. hall on Thursday afternoon, Dec. 4.

Directors re-elected for a 3 year term were: President Nelson, Secretary Maben, and Han. Co. Rep. Penn Eckels.

According to information furnished by Secretary Maben the association has a total of $18,-710,574 of insurance in force, which represents a gain of $1,-692,877 over the previous year. Mr. Maben states that the association was founded 59 years ago and has had a steady growth since its organization.

Because of ice highways and bad weather the attendance of members at the annual meeting was considerably smaller than last year.

Mrs. Dulmes Entertained Bridge Club Thursday

Mrs. A. H. Dulmes was hostess to the U-Delt-Em bridge club at her home Thursday afternoon, with Mrs. Wm Fuss, Mrs. Ray Jorgenson, jr. and Mrs. Sumner Trumbell, guests.

Mrs. Ed. Jacobs won the high score. After the games the hostess served a nice lunch.

Traffic News

KNOW YOUR TRAFFIC LAWS

Don't Drive Unlighted Tractors Or Wagons On Roads Or Highways After Dark

DEPARTMENT OF PUBLIC SAFETY WARNS

The Department of Public Safety calls attention to the hazards to highway traffic by farmers driving tractors and wagons on the roads after dark without lights.

Several accidents have occurred in the past few week involving unlighted farm vehicles at night. The Commissioner warns farmers " to correct this unsafe practice and purchase a $2.00 lantern to save lives and property damage; and to keep from becoming involved with the law"

The State law provides that "EVERY VEHICLE upon the highway within this state be lighted from a half-hour after sunset to a half-hour before sunrise, or at any time when there is not sufficient light to render clearly discernible, persons and vehicles on the highway at a distance of 500 feet. In addition; all vehicles, including animal drawn vehicles, shall be equipped with a least one lighted lamp or lantern exhibiting a white light visible from a distance of 500 feet to the front of such vehicle and a lamp or lantern exhibiting a red light visible from a distance of 500 feet to the rear".

A red reflector, as approved by the Department of Public Safety, may be used on the rear of such vehicle When a vehicle is preceding at a slow rate of speed, such as to impede or block normal traffic the driver should use the highway shoulder and give way to the right as much as possible.

MISS COOBS INITIATED INTO SOCIAL ORGANIZATION

Miss Peggy Coobs, daughter of Benn J. Coobs and Mrs. Coobs, was initiated into the Theta Alpha Chi sorority on Saturday evening, December 6, during ceremonies held in the Grand Ball Room of Hotel Kirkwood in Des Moines.

Miss Coobs is enrolled for the secretarial course at the Capital City Commercial College and was one of six girls to be taken into the Theta Alpha Chi social organization. Following the ceremonies, the new initiates were honored guests at a formal banquet and dance.

Youth Fellowship To Present Play Sunday Evening

The Youth Fellowship members of the Klemme Methodist Church will present "Why The Chimes Rang", on Sunday evening at 8 00 o'clock The public is invited to attend.

HELLO, FOLKS!

Mr. and Mrs. Robert Risser, Des Moines, are the parents of a baby daughter born Thursday, December 11 at the Lutheran hospital in Des Moines. They have a son, Bobbie, 11 years old. Mrs. Risser is a daughter of Mr. and Mrs. P M. Wilson, formerly of Klemme.

Mr. and Mrs. Harold Rockow of near Garner are the parents of a 9½ lb. baby boy born at the Garner nursing home on December 11th. Mrs. Rockow is the former Norma Wille of Klemme.

NOTICE!

CHRISTMAS EDITION GOES IN MAILS TUESDAY

The Christmas and New Year edition of the Klemme Times will be published one day early so that delivery can be made to all our readers on the day before in each instance.

The two editions will be Printed on Tuesday and will be placed in the mail to go out on the rural and star routes on Wednesday mornings.

The correspondents to the Klemme Times are asked to mail their news items to us on Friday (December 19 and December 26) so that the copy will reach our office not later than Saturday in each case.

—Editor

KLEMME COUPLE WILL OBSERVE 59TH ANNIVERSARY SATURDAY

Mr. and Mrs. Edw. J. Schaefer of Klemme, will observe their 59th wedding anniversary on Saturday, December 20th.

They have not planned anything special for the day but no doubt many of their neighbors and friends will call on them or send them cards. Our congratulations!

Jolly Workers Club Meets

The Jolly Workers club met at the home of Mrs. C. A Bachman Wednesday, December 10th Sixteen members answered roll call by giving some entertainment for the Christmas program.

An exchange of gifts was enjoyed by all and each member found out who their mystery friend was for the year. We all decided to send our club member Mrs. Ausborn Xmas cards and handkerchiefs. Mrs. Cliff Montgomery was a guest and showed the gift she had received from their family in Holland.

A lovely dinner was served at noon with all the members bringing part of the dinner.

The January meeting will be at the home of Irene Waddingham with Dorothy Helps as co-hostess. The meeting will be January 14th

PAIGE PATTERSON WAS FIVE YEARS OLD THURSDAY, HAD PARTY

Mrs. Wesley Patterson entertained a group of young children at her home Thursday after school to help her daughter, Paige, celebrate her 5th birthday.

The little children enjoyed playing games after which Mrs. Patterson served a nice lunch A feature attraction was a nice birthday cake with five candles on it.

Paige received many nice gifts from her little friends.

Avery Sunbeams Met

The Avery Sunbeams had their annual Christmas party Saturday, December 13th at the home of their assistant leader, Mrs. Leonard Kaduce. All 11 members were present. The social committe had many Christmas games which were enjoyed by all. The group also sang Christmas songs. Mrs. Arnold handed out the expense account books and also the program books. We had a grab bag so every one received a nice gift. A delicious lunch was served by the hostess.

KLEMME SHAMROCKS UPSET KANAWHA BULLDOGS WINNING STREAK

The Klemme Shamrocks scored an upset against the powerful Kanawha Bulldogs here on Thursday night 29-25. The Shamrocks were the agressors nearly all the way and held an 18 to 10 advantage at the half way mark. Kanawha started closing the gap in the last four minutes of play when the Shamrocks bogged down but recovered their stride in time to win. Robert Baack scored 9 points in the Shamrock attack, while Goodnow of Kanawha also had 9 to lead his team.

The Little Shamrocks lost their tilt in a close game to the Bull Pups 21-28.

Garner Here Tuesday Night

The game which the Garner Cardinals was to have played here Dec 4 was postponed to Dec. 23. This should be a good game.

Shamrock Squad Will Hit The Road This Week

The Klemme High School Shamrocks will "hit the road" this week when they will play a double header at Crystal Lake this Thursday evening.

Vagabonds Easily Win Over Argos Club Of Mason City

The Klemme Vagabonds continued their winning streak on Monday night when they defeated a supposedly fast Mason City Y M. C. A. team, the Argos Club, 53 to 23. However, the Argos club were without the services of two regulars and will return to Klemme later in the season when they hope to upset the Vagabonds.

The Vagabonds are looking for games with some of the faster north Iowa Clubs.

Kanawha Here Friday

The Kanawha town team will play the Vagabonds here on Friday night of this week. A preliminary game starts at 7:30 o'clock.

POSTMASTER KLUCKHOHN PLEASED WITH COOPERATION OF PATRONS

Acting Postmaster Franklin Kluckhohn says he is well pleased with the cooperation patrons of the post office have given since the publication in The Times last week on how to help the post office during the rush, by sorting your own outgoing mail and tying into packages. He reports that many are helping in that way.

In case you missed the item last week, it is suggested that in mailing cards, etc. that first turn the envelopes so the stamps are all in the same corner; next tie all Klemme mail into one package, rural mail in another, in the state in one package, out of the state in the oher. Then hand your package of sorted cards or letters to the post office workers instead of dropping into the letter box.

Will Meet Kiddies On Main St. At 2:00 P.M.

"CHRISTIAN CHRISTMAS" RELIEF DRIVE

Plans for distributing all food which is collected in the "Christian Christmas" European Relief Drive Dec. 22, 23, and 24, have been completed.

Arrangements have been made by the state committee on distribution whereby all persons who wish to designate their church preference for the distribution of their donation in Europe may do so. Forms will be supplied at the time of the drive which can be filled out by the doners.

The church groups which are cooperating with the Farm Bureau in the distribution are:

Christian Rural Overseas program, Church World Service, American Friends Service, War Relief Service (Catholic) and Lutheran World Service. Included under these relief agencies are all denominations, Protestant and Catholic.

Whatever amount of donations that are designated to be distributed through a specific agency will be turned over in full to the agency specified.

Where no designations made, the distribution will be handled by the state committee, and will be routed proportionately through the various church agencies that are cooperating.

All donations of clothing will be handled through the church of the Brethern or the Church World Service. Both of these groups are equipped to handle donations of clothing. Donations of this nature will be sent directly from the county to one of these two agencies.

Hancock County Farm Bureau President Jack Dethmers has announced the completion of a plan for the drive which will get under way on December 22 and which will be completed on the day before Christmas.

The goal for this country is one carload of corn, or its equivalent in cash. Each farm family is asked to donate four bushels of corn or its equivalent. All corn that is collected will be sold in the county, through the county Farm Bureau. The cash will then be turned over to the state committee, and will be used to buy food and clothing on a volume basis.

Collection Booths For "Christian Christmas" Relief Drive

Kanawha, Fred Knutson's office; Corwith, Town Hall; Woden, - Community Hall; Crytal Lake, has not been selected; Britt; Memorial Building; Garner, City Hall; Klemme, North door Etchen Garage and Goodell in the Community Hall.

HENRY WESSELS SURPRISED BY RELATIVES

The Henry Wessels home in Klemme was the scene of a surprise party on Wednesday evening when the following relatives and friends came to help Mr. Wessels celebrate his birthday:

Mr. and Mrs. Dick Wessels; Mr. and Mrs. Fred Weide and children of Meservey; Mr. and Mrs. Fred Steenhard of Sheffield; Mr. and Mrs. Luke E. Wessels and sons of Thornton; Mr. and Mrs. Virgil Nolte and Ben Nolte of Belmond; Julius Nolte of Mason City; Henry Buscik, jr. and Carole Reinsmoen of Clear Lake.

The evening was spent informally and a nice lunch was served. Mr. Wessels was the recipient of some nice gifts.

WITH TREATS FOR ALL GOOD BOYS AND GIRLS OF THE COMMUNITY

Is Expected To Arrive In Klemme Promptly At 2:00 O'clock

The Editor of The Klemme Times just received a radio message from Santa Claus at the North Pole which said:

Dear Editor: Tell all the little kiddies around Klemme that I expect to arrive in your town promptly at 2 o'clock, Saturday afternoon of this week, December 20th. I will be on Main Street and will have treats for all good little boys and girls. I am traveling by airplane this year and will land at some farmer's field near Klemme who will bring me to town in his bob sled. Watch for me in Klemme. Signed Santa Claus, North Pole.

Last year Santa Claus arrived in town the day before Christmas to hand out treats and to ask the boys and girls of this community what they wanted him to bring for Christmas. Santa says there are more boys and girls to see this year, so he is getting an earlier start to be sure to see them all. And that is one reason he is coming in his airplane as he can travel much faster. However, he will make his usual Christmas eve rounds with his reindeer and a sled full of things for all good boys and girls.

Santa Claus wants to be sure that all of the boys and girls will be in Klemme Saturday afternoon, and he invites you to bring your little friends, too.

SATURDAY CLUB ENJOYED EXCHANGE OF CHRISTMAS GIFTS

The Saturday Bridge Club met at the home of Mrs. E. C. Buntenbach Saturday where the ladies enjoyed an exchange of Christmas gifts. Bridge was played with Larry Wicks winning high score and Mrs. Orville Bridges won second high.

A Christmas tree had been set up and decorated for the occasion. A nice lunch was served by the hostess.

CHRISTMAS PARTY AT THE METHODIST CHURCH THIS THURSDAY EVENING

A Christmass party will be held at the Klemme Methodist Church this Thursday evening, December 18th for all members of the church. There will be a gift exchange and all who come are requested to bring a 75c gift. Also bring something for a pot luck lunch. There will be a short program and games will be played. All are welcome.

SCHOOL VACATION BEGINS DEC. 24; SCHOOL OPENS ON JAN. 5

Supt. A. L. Kingery announces that the Klemme Public Schools will close at 2:30 o'clock Wednesday afternoon, December 24 for the annual Christmas vacation. This will give the teachers ample time to reach their own homes for Christmas eve.

School will again open on Monday, January 5th.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

By LOUIE D. NEWTON, D. D.

SCRIPTURE Revelation 8-15; Isaiah 9:2-7; Luke 2:1-20.
DEVOTIONAL READING: Luke 2:8-20.

The Prince of Peace

Lesson for December 21, 1947

IT IS Christmas now that we are all thinking about, and our lesson for Sunday helps us to rightly approach this blessed season of joy and thanksgiving. It is suggested that we read Revelation 8-15, Isaiah 9:2-7, and Luke 2:1-20.

Dr. Newton

"For unto us a Child is born, unto us a Son is given; and the government shall be upon his shoulder; and his name shall be called Wonderful, Counsellor, the Mighty God, The Everlasting Father, The Prince of Peace," Isaiah 9:6.

Thus Isaiah sings of the coming Saviour, and in countless hearts this glad refrain will sound and resound as we come on in these waiting hours for Christmas Eve. It is the season of giving, because God made the Best Gift.

* * *

The Christmas Story

WE NEVER truly observe Christmas until we live again in the message of John 3:16: "For God so loved the world that he gave his only begotten Son, that whosoever believeth on him should not perish, but have everlasting life."

The Christmas story is the story of God's love. There is not enough goodness in man to produce the Christmas spirit — the true Christmas spirit. Only God could so love, and only God can create within our hearts the proper attitudes to worthily celebrate the birth of the Saviour.

Wisdom is fled from us if we drop down into the lowlands of commercializing the Christmas season by seeking gain for ourselves.

* * *

The Greatest Gift

THE gift of Jesus is the greatest gift for the reason that it represents divine giving. Jesus was not forced to give himself. "God commendeth his love towards us in that while we were yet sinners, Christ died for us." The gift was but an expression of the love that lay behind the gift.

If God so loved and gave, let us, by his indwelling Spirit, seek so to love and give. Boys and girls will thus find the answer to their desire to make suitable gifts to parents, and parents to children. Friends will thus find the answer to the often perplexing problem of what to buy for exchange with someone whom you suspect will buy something for you.

Perhaps it would be a wholesome thing if we could be delivered from the tyranny of "exchanging things" at Christmas, and be free to give as our hearts prompt us.

* * *

The Prince of Peace

THE bold prophecy in Revelation 11:15, which reads: "The kingdom of the world is become the Kingdom of our Lord, and of his Christ; and he shall reign for ever and ever," is the lifting thought of this lesson. That is Christmas fulfilled!

How this prophecy challenges our present world of fear and suspicion! Instead of the hysteria which has characterized our nation for months, we should have been strong in the gentleness of God — strong enough to dismiss the thought of pillage by another —gentle enough to drive Communism from the earth.

For let us well remember that the program of the Prince of Peace is not one day out of the year. It is an enduring program of progress among all men of goodwill.

* * *

The Song of Triumph

IN VAIN shall we observe another Christmas season if we allow it to come and go without joining in the song of triumph which the angels would ever teach us. There is hope for this bedarkened world. There is a song for every heart. There is a light for every home. There is a gift for every life.

"Glory to God in the highest,
And on earth peace."

It is, then, the high and holy task of every Sunday school teacher, every parent, every Christian, to sing this song of triumph. Only through personal faith in the Lord Jesus Christ can burdened, frightened souls catch the cadence of the choiring angels. But we have the promise of God that every seeking soul may have this peace, this poise, this victory.

Permit me, please, to wish for you, and each of you, the blessed experience of the inward happiness of Christmas with Christ.

(Copyright by the International Council of Religious Education on behalf of 40 Protestant denominations. Released by WNU Features.)

do any good to tell him
s were bad all over, that
d pick up; that, after all,
ly out of law school a
. It didn't do any good,
was like this, to tell him
He glared at the people sitting on the benches around them as though they were directly responsible.

"Let me tell you," he said, "you've got to be somebody to starve to death in this town. Do you think they'll let anyone starve? No! You've got to have background. You've got to have a college diploma and a law certificate and an office to hang them up in, and then, okay, you can go ahead and starve."

The woman on the next bench was eyeing Ted nervously. Judy stood up. "Let's walk a bit," she suggested.

She slipped an arm through his and walked lightly beside him, a slim girl in a simple dark dress. Her brown eyes were troubled, as Ted hurried her along. He couldn't stay depressed long—not when she was with him. When they were together, he was soon the real Ted. And that couldn't help but make a success. That was why it was important that they. . . .

She slipped an arm through his and walked lightly beside him, a slim girl in a simple dark dress.

Ted freed his arm and tried to drop it around her. Judy stepped aside. Ted looked surprised and drew her into the shadow of a tree.

"Hiya, Judy!" He was smiling at her now.

". . . it's getting late," she said. "I have to call Lloyd."

"Lloyd? Who's Lloyd?"

She looked at him furiously. "We've only been talking about him for the last . . .!"

"Gosh, honey!" Ted ran his hands back over her hair. "You're so swell."

"Ted, now pl. . .!" Judy wrenched her mouth to one side and then closed it quickly. When he let go of her she hung on to his lapels.

Ted spoke through her hair. "You were saying something about some guy named Lloyd?"

JUDY waited until she could feel solid ground again beneath her. "Don't joke about it, Ted, please. The man wants to marry me."

"He does?" Ted shook his head in wonder. "You don't say so?"

This was more like it. This was Ted. Judy sighed. If she could only keep him like that.

"I don't suppose I want to marry you?" Ted said. "I suppose my intentions aren't honorable?"

He was still smiling, but it was very much on the surface. "I suppose, if there weren't a darn good reason, we wouldn't have married long ago?"

Two years, to be exact. Two years that could have been among the happiest in their lives.

"Tell me," Judy said. She tried to keep her tone light. "Just for the record. What was that wonderful reason again?"

Ted turned away, wearily. "Let's skip that for once," he said.

She was as tired of the subject as he was. They had been over and over it countless times without getting any place. . . . Yes, Ted said, he knew all about it. Two could live as cheaply as one, sure. And Judy could keep her job. Sure. Okay, he said, he didn't think she could support him in the manner in which he had become accustomed. And so, until the time he could handle that end of it decently himself. . . .

Judy knew it was useless, but still she persisted. She had used the same phrases so often, she knew them by heart. . . . "Don't you see, darling, we'd at least have each other. . . . Those other things aren't important. . . . We'd at least. . . ."

"Let's not discuss it," Ted said. "We'll just have to wait."

"Why should we wait?" She clenched her hands angrily. "We don't know how long it'll be. I want to settle it—right now!

He turned back to her slowly. "I see. Before you speak to your friend, Mr. Richards?"

She had forgotten about that, but now she met his gaze fully. "Yes, before I speak to him."

"It's always good to have a guy in reserve, isn't it?" Ted said.

She gulped in some air. All right, my boy! O. K.! She waved at him airily. "So nice to have known you," she said, and walked away.

"What was so nice about it?" Ted called after her.

Oh, it was pretty nice, Theodore, don't kid yourself. But Judy didn't glance back. She crossed the drive and went on down the street.

Back in the park there, she knew, he was miserable. And that made her miserable, too. But they couldn't go on like that indefinitely. There was no other way.

Besides, it wouldn't last long. She knew his moods perfectly. Let's see now. She looked at her watch. Two minutes for despair, then the next two for thought . . . and then, in about two or three more. . . .

She slowed down. She wasn't so sure now. They'd fought before and sometimes hadn't made up for days. But then he didn't have much to worry about. He could just let it slide. He could let everything slide. This time. . . .

She was near panic when she reached the corner—and then she heard heavy footsteps behind her. She caught a glimpse of Ted as she rounded the building. And his wild, frightened face was enough. The only thing that troubled her now was where they would live—uptown or out in the suburbs.

As for her conscience, that didn't trouble her at all. Consciences, sometimes, were pretty much of a bore. And as for Lloyd Richards—well, she wouldn't even have to call him. Lloyd knew her answer. She had given it to him that afternoon.

Make Extra Gifts By Baking Goodies In Home Kitchens

Cookies make a wonderful holiday gift! Wrapped as glamorously as these, they'll solve many a last-minute gift dilemma. Set a box under the tree as an extra gift, or take a box of them to your neighbor.

These are extra-wonderful days in the kitchen, for there's a hustle and bustle of activity, warmth and cheer, mysterious smells of something good and the swish of gay and cheery wrapping paper and ribbons.

Yes, we're getting ready for Christmas. But it's not just the holiday feast we're preparing for, since kitchens also may be put to work to make those wonderful home-made presents every homemaker appreciates so much.

Of particular interest are cookies and candies. You'll want to make some of your own for the holidays, so why not whip together an extra batch and give some to neighbors and friends? There's no better way of expressing warmth and cheer than something made by deft hands and a heart-load of good wishes.

Here's a taste-tempting cookie you'll want to include in your cookie collection:

Henrecies.
(Makes 2½ dozen 2-inch cookies)

½ cup butter or substitute
½ cup brown sugar
2 egg yolks
1 teaspoon vanilla
2 cups cake flour
1 teaspoon baking powder
1 cup ground nut meats
½ cup whole bran

Blend butter and sugar; add beaten egg yolks and flavoring. Sift flour, baking powder; add nut meats. Combine with first mixture. Chill. Form dough into egg-shaped balls. Roll in whole bran which has been crushed slightly. Place on greased baking sheet. Bake in a moderately hot (400 degree) oven for 10 minutes. Note: Whole bran may be added to the cookie dough instead of rolling cookies in whole bran.

Chocolate Drops.
(Makes 2½ dozen 2-inch cookies)

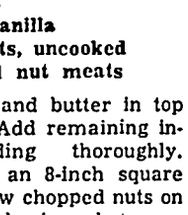
¼ cup butter or substitute
¾ cup brown sugar
1 egg, beaten
1½ squares chocolate
3 tablespoons water
¼ cup sour milk
1 cup whole bran
1 cup flour
1 teaspoon baking powder
½ teaspoon soda
¼ teaspoon salt
½ cup chopped nut meats

Cream butter and sugar, add egg, melted chocolate and water. Beat well, then add sour milk and whole bran. Sift flour with baking powder, soda and salt and add to first mixture with the nut meats. Drop from teaspoon onto a greased baking sheet. Bake in a moderate (375 degree) oven for 15 minutes.

Date Favorites.

¾ cup butter or substitute
1½ cups sugar
½ teaspoon soda
2 tablespoons water
1 cup buttermilk
3 cups flour
1 teaspoon salt
1 teaspoon baking powder
1 cup nuts, chopped
1 cup dates, chopped
Powdered sugar

Cream butter and sugar. Mix soda with water and add to the butter-milk. Add flour sifted with salt and baking powder. Fold in nuts and dates. Pour into a shallow, greased pan and bake 20 minutes at 350 degrees. Cut into narrow slices while still warm and roll in powdered sugar.



***Ice Box Cookies.**

1 cup brown sugar
½ cup butter
1 egg, unbeaten
1½ cups flour
½ teaspoon cream of tartar
½ teaspoon soda
½ cup pecans, cut fine
½ teaspoon vanilla

Cream sugar and butter well together. Add the egg, flour, cream of tartar and soda. Mix well and fold in nuts and vanilla. Make into rolls about 2 inches in diameter and wrap each in waxed paper. Let stand in refrigerator for 24 hours. Then unwrap rolls and slice about ⅛ inch thick. Bake on an ungreased cookie sheet in a moderate oven (350 degrees) for about 8 minutes, or until golden brown.

Fudge Squares.
(Makes 36)

2 squares unsweetened chocolate
⅓ cup butter or substitute
¼ cup light corn syrup
⅔ cup sugar
½ teaspoon salt
1½ teaspoons vanilla
2 cups quick oats, uncooked
¼ cup chopped nut meats

Melt chocolate and butter in top of double boiler. Add remaining ingredients, blending thoroughly. Pack firmly into an 8-inch square pan Sprinkle a few chopped nuts on top if desired. Bake in a hot oven (425 degrees) for 12 minutes. When cool, turn out of pan and cut in squares. Store in refrigerator if warm.

Of Yuletide sweets, there are none tastier than home-made candies. With just a few ingredients and tested recipes you can concoct some delectable treats and gift-wrap them for Christmas presents.

Brazil Nut Patties.

½ cup syrup
½ cup sugar
½ cup water
½ pound brazil nut meats

Combine ingredients. Cook to 290 degrees or the crack stage. Pour carefully over brazil nuts arranged over a marble slab. Loosen patties before they become too hard to prevent them from cracking.

Maple Creams.

1 cup maple sugar
1 cup light brown sugar
¼ cup water
½ teaspoon almond extract
½ pound nut meats

Cook the sugars and water to 240 degrees or the soft ball stage. Add the almond extract and cool to lukewarm. Then beat until creamy. Knead until smooth, form into small balls and place a nut meat in each ball.

Stuffed Marshmallows.

1 box marshmallows
¼ pound nuts (whole meats)

Lay the marshmallows out on a table and, with a sharp knife, make a gash into the center of each. Push a nut meat (English walnut, pecan, hickory or peanut) into this opening, and press marshmallow closed with fingers. They may be dipped in chocolate if desired.

50,000 Youngsters Select Ideal Father and Mother

NEW YORK. — The ideal father has the daring of Roy Rogers, the generosity of Santa Claus and the protectiveness of singer Jack Smith, according to 50,000 children.

The ideal mother has the "soft robustness" of actress Linda Darnell, the "sultry mystery" of Paulette Goddard and the power of Queen Elizabeth

LYNN SAYS:

Serve Hors d'ouevres With Hot Vegetable Juice

Cheese spears are easy to make, nice to nibble with hot tomato juice. Spear a cube of American cheese on a toothpick, with a walnut half and a slice of sweet pickle.

Pineapple spears go well with hot cider. Spear a cube of pineapple, then a cube of sharp cheddar cheese and top with a cherry.

Marinate asparagus tips and roll in thin slices of cooked ham. Chill.

Some mixtures can be formed into balls and speared with a toothpick: Mash anchovy paste with cream cheese, and season with worcestershire sauce and cayenne pepper.

Celery Balls: One cup of minced celery, 3 ounces of cream cheese, with salt and pepper. Roll in chopped parsley.

Green Balls: One-half cup grated swiss cheese, ½ cup minced ham, ½ teaspoon prepared mustard, 1 egg yolk (raw) and salt. Roll in minced chives or parsley.

Some Helpful Ideas For Homemade Rugs

LOOKING for a hobby this winter? Why not take up rug-making. It's one of the most rewarding things you can do and without costly equipment or material!

There are many types to choose from. Hooked, braided, knitted, crocheted, tufted, woven. All of them can add an individual note to your home.

Send for our booklet No. 94 which describes in detail the methods for each type of rug. How to make a loom yourself, sample patterns and otherwise helpful suggestions.

Household Hints
By Mary Jane

When making one crust pie—set the two eggs you expect to use for meringue out of the ice box, so they will be room temperature long before you beat them. They will stand up much higher this way.

You will never need to remind your children to brush their teeth, if you buy them the flavor they love, and each is the proud possessor of his own private bottle or tube, and it will give their teeth and gums just what they need.

I've rebelled at going to the cities and "Standing in line" for economy; instead, I shop in Klemme stores for everything I can buy here, as their merchandise is complete as yesterday and new as tomorrow—and their honest advertising assures customers full value in every purchase.

Methodist Missionary Ladies Met

The Methodist Missionary ladies met last Wednesday afternoon at the home of Mrs. E. J. Arnold with 28 present.

Devotions were given by Mrs. Roy Arnold; Lesson on India was given by Mrs. R. A. Jorgenson, and Mrs. R. W. Elder had charge of the questions and answers. After which she read an interesting poem "The Day After Christmas." A delicious lunch including home made ice-cream, cakes and coffee was served by Mrs. E. J. Arnold, assisted by Mrs. Lee Ridder.

LEGION FEATHER PARTY TO BE HELD MONDAY EVE., DECEMBER 22

The Klemme Legion invites the entire community to attend their pre-Christmas feather party to be held at the Community Hall on Monday evening, Dec. 22 beginning at about 8:00 p. m.

Free coffee and doughnuts will be served thru-out the evening and everybody will have a lot of fun.

225 ATTENDED HANCOCK COUNTY 4-H BANQUET

225 4-H members and leaders attended the Hancock County 4H banquet held in the Garner High School Gymnasium on Saturday.

The theme of the banquet was, "Forward With 4-H". The Erin Eager 4-H, Madison Livewires, Garfield Willing Workers, Ell Tip Toppers, Liberty Busy Bees clubs made the decorations and decorated the tables with the 4-H emblems as center pieces and green and white candles which lighted the tables. Delwyn Stromer from Liberty Go-Getters club and James Boehnke, from the Concord Yanks were responsible for getting the tables and chairs for the banquet.

The county presidents of the girls and boys organizations, Phyllis Jurgensen of the Boone-Magor Pals and Maynard Dorow of the Concord Yanks were the toastmasters of the evening.

The program included the invocation by Delwyn Stromer, group singing lead by Ruby Schram accompanied on the piano by Gloria Greiman; introduction of guests, Phyllis Jurgesen; accordian solo, Iris Rosendahl; "What 4-H Has Done For Me", Maynard Dorow; vocal numbers Ailene Oxley; speaker, George Boehnke, Assistant State Boys Leader; piano solo, Eugene Smith.

Individual awards were presented to Ardis Bailey for having the best county girls 4-H longtime record book and to Mercedes Formanek and Beverly Haberkamp for their improvement record books.

The Madison Livewires received a certificate for being a standard club in 1947.

The boys individual awards included the Wilson Animal award to David Smith; the Chicago Producers award to Eldon Schutjer and David Smith with Baby Beef and to Roger Christiansen with Swine; the Kraft Cheese Dairy award to Dale Huling; the Iowa horse and Mule Ass'n., award to Alvin Meyer Jr.; Swift & Co. award to Charles Skogerbee with Poultry; Community Service award to Charles Bird; Soil Cons. award to Charles Bird; Graduating Certificates to Glenn Wille, Elwin Weaver, and Donald Greiman; Pioneer Hybrid Corn Co. awards to Maynard Dorow, Winton Dorow, David Smith and Eldon Schutjer; Poland China Ass'n. recognition to Lyle Goll; Judging Team, Paul Zrostlik, Maynard Dorow, and Ronald Bredlow; Dairy Judging Team, Dale Huling, Milton Friedow, and Maynard Dorow; Co. Dairy Demonstration Team, Maynard Dorow, Harold Puggel and Jim Boehnke.

Each leader and assistant leader for both boys' and girls' clubs in the county were presented with a mechanical pencil for their services throughout the past year and the coming year. County Director, Paul Henderson and County Extension Home Economist Elsie Mae VanWert presented the awards and recognized the leaders.

Sunday School Class Held Party

The Fifty-Fifty class met on Monday evening at the Clifford Montgomery home. A short business meeting was held followed by a program. Mrs. Finders read the Christmas Story. A reading was given by Mrs. Roy Arnold and Christmas carols were sung.

Lunch was served by Mrs. Montgomery with Mrs. Ray Jorgenson, jr. as co-hostess.

The next meeting will be held in January at the John Chambers home.

BURIED ALIVE

During a recent snow storm, a flock of choice sheep were buried beneath six foot of snow. It took Art Weinreich, the owner living near Pierson, and a neighbor, Willie Florke, two and a half hours to recover the sheep. The animals had moved around and had dug tunnels under the big drift. One ewe was trampled to death and two had been lodged in the water in the creek but are now recovering.

FRUIT?

Walter C. Johnson of Hamburg has displayed in the window of the Reporter office some fruit that no one has indentified. Sometime ago, Mr. Johnson planted a pear tree but it was destroyed by rabbits. The sprouts later came up from below the graft with a nicely rounded fruit, brown in color with the same texture as a pear. At one time, Walter had a tree on his place that bore pear and quince.

Teaching Calf To Eat Grain Is Easily Done

Teach dairy calves to eat grain at an early age. Put grain before them when they are a week to 10 days old, advises Lyle Jackson, Iowa State College dairyman.

The right kind of grain mixture is important in getting the young calves started, Jackson says. A good growing ration is best. An ideal grain mixture is 300 pounds of rolled oats, 300 pounds of bran and 100 pounds of high protein feed such as linseed oilmeal, soybean oilmeal or cracked soybeans.

Roughages can be added to the dairy calves' ration by putting a good-quality mixed hay before them when they are a week old. Legume hay can be fed, but a mixed hay is usually better, Jackson says.

HELICOPTER

Santa Claus came by helicopter to visit Storm Lake kiddies last week.

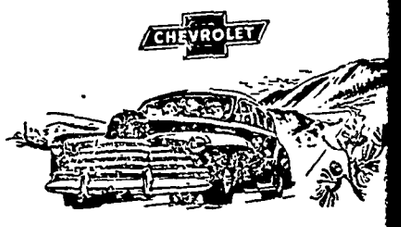
The more you drive . . . the more you like it.
Every mile gives added proof of
BIG-CAR QUALITY AT LOWEST COST

As more and more Chevrolet owners are discovering, years of service mean nothing to a Chevrolet! This car has extra strength in every part—built-in ruggedness and reliability—the excellence that endures. It will serve you for scores of thousands of miles, and the longer you drive it the stronger your appreciation of its value—for it possesses Big-Car durability and dependability unequaled in its field.
One look will tell you that Chevrolet out-styles all other cars in its field. It brings you smarter design—smarter colors—smarter upholstery and appointments! It alone offers a luxurious Body by Fisher at lowest prices.
You can't beat a Chevrolet for all-round performance with economy. And Chevrolet's world's-champion Valve-in-Head Thrift-Master Engine, unique in its price range, wrings the last ounce of energy out of every gallon of fuel.



You'll enjoy maximum riding-smoothness and road-steadiness, too, because only Chevrolet, of all cars in its field, brings you the firm, easy, balanced movement of the Unitized Knee-Action Ride.

The demand for new Chevrolets surpasses all previous records. That means it's wise to safeguard your transportation by bringing your present car to us for skilled service, now and at regular intervals, pending delivery of your new car. See us for dependable, car-saving service.

SMALL WORLD

In Philadelphia, Dr. Joseph Vanderveer visited with a patient, Dalton Galloway, a returned missionary. It turned out that when Mr. Galloway was a boy of 13, he had undergone an operation on a kitchen table in Renwick, Iowa. The doctor who wielded the knife was Dr. Vanderveer's father, a former Renwick physician.

"A Very Merry Christmas— and More Power to you,"
says Reddy Kilowatt, your dependable electric servant.

SPARKLING Christmas tree lights . . . traditional carols over your radio . . . the friendly glow of holiday lights in your home — all of them made possible by electricity, are Reddy Kilowatt's low-cost contributions of good cheer to this holiday season.

More year-around happiness will be brought to countless new customers during the coming years through the current expansion program of the business-managed electric companies.

Our part in this five-billion dollar privately financed construction program is progressing as rapidly as new engines, generators, turbines, wire, transformers, cable, poles and other equipment becomes available. It took a global war to slow down this program. We are now busy making up for lost time.

We join Reddy Kilowatt in wishing you and your family a happy, festive holiday season.

CENTRAL STATES ELECTRIC COMPANY

Tariffs Have Their Ups and Downs

Geneva Trade Agreements To Affect World Commerce

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON. — Recently there have been rumblings from congress reminiscent of the old Smooth-Hawley days. It was the warning from Senator Milliken (Rep., Colo.) and Representative Knutsen (Rep., Minn.) that the reciprocal trade agreements act would have a lot of strings attached to it when it comes up for renewal next year.

If that means that tariffs are raised again, history will be repeating itself.

As the amusing illustration in this column reveals, the gentlemen have been busy building up and tearing down the tariff wall ever since 1913. What will the next section of the wall—built after 1940—look like?

The reciprocal trade agreements drawn up at the recent Geneva conference which resulted in a number of slashes in important duties and inspired the Knutsen and Millikin statements brought forth an even louder blast from the American Tariff league. At the present writing, however, there does not appear to be anywhere near the strength of sentiment in favor of building up the tariff wall that there was when the Smoot-Hawley act raised it to an all-time high (47 per cent) in 1930.

Baukhage

From the time of the Civil war the tariff wall had grown almost every time congress acted.

Then came Woodrow Wilson who demanded that the country be set free from conditions he thought "made monopoly not only possible, but easy and natural." The Underwood law which brought the import duties down from 37 per cent to 27 per cent, was his answer. Under Harding they went up about 35 per cent, reaching an all-time high under Hoover.

It has been an exciting contest. Although Cordell Hull as secretary of state managed, with Roosevelt prestige, to pull them down again, they were still 1 per cent higher than the Fordney-McCumber act raised them under Harding. Under the agreements negotiated by Secretary Hull, our exports increased, but foreign competition for various reasons did not take advantage of the situation to any great extent. There was no avalanche of "cheap foreign goods" to contend with.

The Democrats in the pre-Wilson era always were banging away on this issue and there were many colorful debates. The low tariff advocates had to resort to all sorts of means to get a hearing because they were backed by no special interests. Their "client" was the vague and anonymous American consumer.

The high-tariff pleaders were able to present their cases armed with the best legal talent available, whole libraries of statistics and a thorough knowledge of the particular industries they represented. And they had another great advantage in the number and geographically diverse industries fighting for protection for their particular product.

Enough special interests needed enough help from other special interests so that log rolling was easy—there was usually a majority for everybody's gismo. That is why the only practical way trade agreements can be reached at all is to have them negotiated like any other international agreement, through the state department, which has no regional strings to tie it down.

Right now the consumer is being heard from in no uncertain terms, and any argument for lower prices wins a hearing.

That is evidenced by the speed with which congress tackled the anti-inflation suggestions presented both by the President in his message of November 17 calling for a 10-point program and those offered by Senator Flanders of Vermont and other Republicans.

Despite considerable influential opposition, the Democrats took for granted that at least four out of the President's ten points had a good chance to be adopted. In fact one, authority to ration certain foods, already had been suggested—by a Republican—Senator Flanders.

None of these points involves tariff cuts, however, and those cuts already made under the Geneva agreement are still largely academic because most foreign countries aren't in a position now to produce for export to any great extent.

Next session we can expect them to be debated.

So far there have been almost as many complaints from supporters of the reciprocal trade agreements act as from its opponents. Its most enthusiastic backers charged that it had not been pushed hard enough, that the state department had not used all of the power which it had for fear of arousing the animosity which would cause its repeal.

At present, those favoring a freer flow of trade are in a better position to urge their cause because it is evident that we cannot continue to give supplies to Europe under a relief program or to lend money for the purchase of our goods unless we encourage Europeans to sell to us. Otherwise, they'll land right back where they are now. Even if they build up their industries so they are able to produce goods, unless they can sell some of those goods they won't have the dollars to pay back what they owe and buy our goods.

That is why warnings that strings may be attached to the act have an ominous sound. "Strings" would mean either limitation on the amounts by which tariffs can be lowered through reciprocal trade agreements, or removal of authority to make reductions without the approval of congress of the particular item involved. That would start log rolling again, put an end to our foreign trade and have us back taking in each other's washing for a living.

World's Prosperity Hangs in Balance

What happens to the as-yet-unbuilt section of the wall of the drawing will affect the entire set-up of world trade. It can make all the work of the international conference on world trade and employment go for nothing and destroy any benefits derived from a successful European relief plan.

The 62 nations now gathered at the trade conference in Cuba represent countries doing about 95 per cent of the world's trade, and the interesting thing is that although Russia and most of her satellites refused to attend, two of the countries under the influence of Moscow—Finland and Czechoslovakia—did turn up.

Thereby hangs a tale. It is believed by some keen observers that despite all efforts to kill the European recovery plan, the Soviet Union knows very well that, if it works, it may be to her selfish interests to get on the bandwagon, at least to the extent of lifting the iron curtain high enough to get some of the much-needed goods from Western Europe under it. And the way that could be managed would be to have some of the Soviet's "friendly countries" in on any advantageous trade deals that might be made. Western Europeans say that this would be the most effective way to break down the Communist grip on these countries.

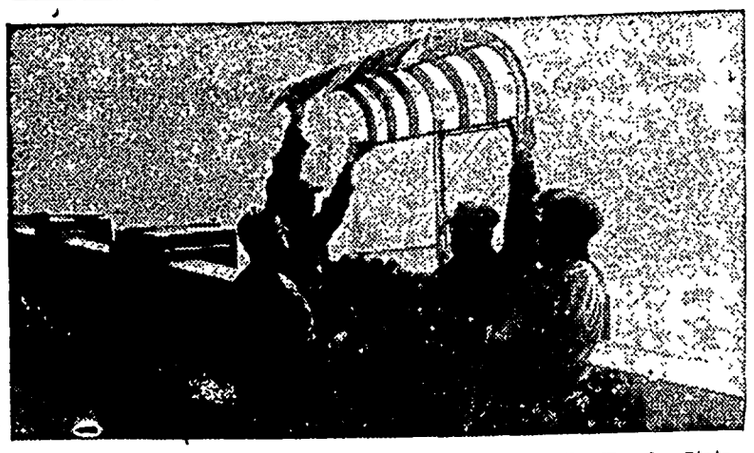
Meanwhile it is realized in Washington that this country cannot carry out its far-flung foreign policy unless that policy is sold harder than Communist propaganda is selling its brand of bortsch.

Good salesmanship begins at home. And a lot of salesmanship is needed right here. I rode down on the trolley with a very intelligent secretary to a congressman who said to me: "I wish I knew what the Marshall plan was all about."

President Urges Savings Bonds

Speaking of salesmanship, the President is believed to have given the green light on an intensified sale of one of the important anti-inflation measures recommended in his speech when he said:

"Another effective weapon against inflation is increased savings by the public. Every dollar that is saved instead of spent is a dollar fighting against inflation. In order to encourage additional savings, the government should intensify its vigorous efforts to sell savings bonds."



BARRING THE WAY . . . The observation tower of the Empire State building will not be used henceforth as a point of departure for the hereafter by people who want to leave this vale of tears. Workmen are shown installing a $10,000 stainless steel parapet fence about the 86th floor tower.

NEWS REVIEW

Laborites Keep Power; Ask Oil, Coal Ration

LABOR TEST:
Clean Slate

In Great Britain the Labor party had been worried over the outcome of the by-election in the southern town of Gravesend.

Richard Acland, a rich baronet, was carrying the Labor party's banner against Frank Taylor, an ex-furnace stoker, the Conservative candidate. A seat in parliament was not the only thing at stake. The election was of major importance as a test of strength between the two parties.

It was a hard fought battle, and Acland, the Laborite, was elected to Parliament by a majority of 1,675 votes—a clear cut defeat for the Conservatives. The British people, the Labor party announced, retained their confidence in their government.

Nevertheless, the 1,675-vote margin of victory was considerably smaller than the 7,056-vote Labor party margin that had been piled up in the same district in 1945. Labor was still in the driver's seat, but clearly had lost something of its original strength. However, the party had kept its slate clean; it had not lost a single by-election since it first was swept into power.

Perhaps one reason for the Labor party's continued popularity was that, despite all else, it was doing a good job of distributing equally what food and other goods were available in Britain. The food rations of the poorer people were approximately the same as those of the rich, and that fact continued to carry a lot of weight with the mass of voters.

OIL RATION:
Anti-Inflation

When President Truman, in his celebrated "10 points against inflation" address to congress, asked for limited authority to impose ration and price controls on basic commodities, it was taken for granted that they were food commodities alone.

First indication that this might not be a correct interpretation of Mr. Truman's proposal came when the department of interior asked congress for power to fix price controls and rationing on coal and oil as part of the anti-inflation program.

Oscar L. Chapman, undersecretary of the interior, told the house banking and currency committee that grave shortages and price advances were threatened in the two basic fuels.

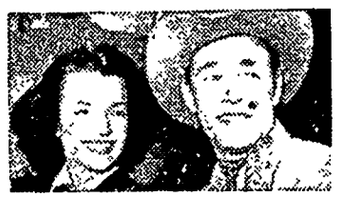
There was no way of telling, he said, whether such controls actually would have to be imposed, but he insisted that the government should have authority to do so, just in case.

It is not probable that congress will give the government power to control oil and coal, but the incident serves to reflect the current point of view of the administration that a return to wartime rationing and price controls is the quickest and most effective way to buck inflation.

President Truman disclosed the policy first in his speech at the opening of the special session of congress. The interior department's request for control of coal and oil probably was a planned follow-up.

? Current Events ?

The following five questions were rejected by 32 radio quiz shows because they didn't have enough refrigerators to go around. If you can answer them, take the correct answers, plus $350, to your nearest electrical appliance dealer and you will receive a brand-new refrigerator.



1. It was clearly a case of "They went thataway" when the above pictured horse opera hero and his leading lady announced that they would be married New Year's eve. Who are they?

2. Within the space of one week crisis-ridden France had three different premiers. Their names?

3. What three titles did King George of England confer upon Lt. Philip Mountbatten before his marriage to Princess Elizabeth?

4. Gen. Omar Bradley will replace Gen. Dwight Eisenhower as army chief of staff. Who will replace General Bradley as head of Veterans' administration?

5. At a recent meeting in New York the subject of oncology was discussed. Would you say oncology is the study of (a) shells, (b) tumors, (c) fossils, (d) snails?

ANSWERS

1. Roy Rogers and Dale Evans.
2. Paul Ramadier, Leon Blum, Robert Schuman.
3. Duke of Edinburgh, Earl of Merioneth, Baron Greenwich.
4. Carl R. Gray, vice president of the Chicago and Northwestern railway
5. (b) Tumors.

POSTMASTER:
Hannegan Out

Robert E. Hannegan has eased himself out of the public political eye.

Little more than a month after he had quit his job as Democratic national chairman — because of ill health—he turned in his resignation as postmaster general.

To replace Hannegan as head of the nation's post office, President Truman named 62-year-old Jesse M. Donaldson, first assistant postmaster general, who has had 42 years in the postal service. It was the first time a president ever had dipped into the ranks of postal "career men" to fill the top job in the department.

Donaldson

Donaldson is one of the men who came up the hard way. His career with the service began with his appointment as a city letter carrier in Shelbyville, Ill., in 1908.

Hannegan, meanwhile, had no intentions of going into retirement. He has purchased a substantial interest in the St. Louis Cardinals.

WORKIN' ON THE RAILROAD

Car Shortage Passes Peak

About the only good thing that can be said concerning the railroad freight car shortage is that the worst is probably over, but the present inadequacy will hang on for a long time.

Despite investigations, programs and promises for several years, there are actually about 41,000 fewer freight cars now than there were at the end of the war.

Attempts to place the blame for the situation seem to be futile. American railroads have had 100,000 cars on order for some time. Car builders have declared that steel was not available. A program formulated in February of this year called for an output of 7,000 new cars monthly by June and 10,000 by September.

The quota was not met; and, although the steel industry says that it has supplied the necessary steel, car builders contend that the shortage still has not been completely cured.

There was one sign, however, that might indicate a turning of the tide. In September the railroads reported 7,182 new installations, which was 668 more cars than were retired during that month. Small as it was, it was the first net gain in 25 months.

Col. J. Monroe Johnson, director of the office of defense transportation, said he is proceeding under a White House directive to obtain a rate of 15,000 cars monthly by July, 1948, almost double the present output. He said he had commitments from the Iron and Steel institute for a 22 per cent increase in steel allotments for new car production.

The car shortage has slowed down the country's economy. At the peak of loadings in October the average daily shortage was 39,430 cars. Currently it is about 33,000.

Despite these shortages, the railroads are handling more carloads of revenue freight than they have since August, 1930, when the number of available cars was 500,000 greater than now.

CHRISTMAS QUIZ

COMET has what connection with Santa?

HEROD issued what order in regard to children at the time the baby Christ was born?

RAPHAEL is famous for what type of paintings?

IRVING BERLIN wrote what famous Christmas carol?

SCROOGE was the villain and hero in what Christmas story?

TWELFTH Day, or Twelfth-tide, in some countries is celebrated as what special day?

MASS OF CHRIST is the literal meaning of what word?

ADESTE FIDELES has an English name, what is it?

SAINT NICHOLAS is the patron saint of what country?

ANSWERS:

(C)—Comet was one of Santa's reindeer.

(H)—Herod ordered all children under two years of age killed.

(R)—Rapael's paintings of Madonnas are outstanding.

(I)—White Christmas.

(S) — In Charles Dickens' "A Christmas Carol."

(T)—Twelfth Day in some countries and by some churches is observed as Christmas.

(M)—It is the literal meaning of "Christmas."

(A)—The English title for Adeste Fideles is "Oh Come All Ye Faithful."

(S)—St. Nicholas, or San Nicholaas, is the patron saint of Russia.

'Real Santa Claus' Answers Final Call

Thousands of children will miss their "real Santa Claus" this year. During the past 12 years he has handled four and a half million of their letters and packages. He cannot be with them this year. He has answered his Master's call.

Last April, death claimed Oscar L. Phillips, postmaster of Santa Claus, Ind. He was very real to the children of America. He answered their letters and saw that their requests were complied with. He had the local American Legion as his helpers.

But the children of America will not be neglected this year. Walter Van Winkle, a friendly man who worked with Santa Phillips, has taken over as "acting chief Santa Claus of Santa Claus, Ind." Santa Van Winkle and his many helpers started work in October, working 20 hours a day, day after day, in order that good little boys and girls would be happy, even though their Santa of former years has been promoted to a more important duty.

Silent Night! Holy Night!

More than a hundred years ago, Father Josef Mohr, pastor of the little Church of Arnsdorf in Austria, was returning home late the night before Christmas Eve He loitered for a moment on a hill overlooking his home village.

It was a beautiful starlit night, and he was impressed with the exquisite stillness that covered the scene below him. His peaceful reflections brought to mind the silent holy night when Christ was born in Bethlehem. Inspired, he wrote "Silent Night—Holy Night." Impressed with the beauty of the poem, his friend, Franz Gruber, put it to music and on Christmas Eve, while Franz played, Father Mohr sang "Silent Night" to his congregation.

From that night on, the beautiful strains of "Silent Night" have filled the air throughout the world at Christmastide.

Firecrackers Used At Christmas Time

In some southern communities firecrackers and other fireworks are used at Christmas time. Firecrackers had their origin in the Orient, probably in China. During the 14th century they were introduced into Italy and used on Saints' days, at Christmas and other religious festivals. The custom spread to Spain, France and other Latin countries.

ENCHANTING WILDERNESS . . . Everglades National park forms an almost limitless expanse of wilderness unlike anything else in the world. Typical are these scenes: (1) An air view of East river rookeries shows some of the natural waterways to be adapted to public boat transportation; (2) Typical Everglades scene, with savannah and water in foreground and a hammock or tree island in background. Tall trees on the skyline are the Wright or saw cabbage palm, a rare tree; (3) A lagoon where Spanish moss drapes native trees provides a favorite nook for bass fishermen; (4) This American crocodile, which lives in salt and brackish waters, is among the many rare creatures protected in the park.

LAND OF ROMANCE AND MYSTERY

Vast Subtropical Wonderland Embraced in Everglades Park

WNU Features.

Two million acres of enchanting land and water embracing the only bit of real tropics within the confines of the United States form the vast Florida Everglades, which was dedicated December 5 as the nation's newest national park.

Formal dedication of Everglades National park will permit preservation forever of a part of the United States unlike any other. The unique beauty of the vast swampland, with its trees, flowers, birds, animals, fishes, vistas of sea and sky in a combination unlike anything else in the world, will be preserved intact.

The park, 26th in the string of national parks, contains 1,226,000 acres of land and water, with the boundaries to be extended later to more than 2,200,000 acres.

Third Largest Park.

In size, Everglades is the third largest national park. Yellowstone ranks as the largest, followed by Mount McKinley in Alaska

While Yellowstone contains more and greater geysers than all the rest of the world and Grand Canyon park is heralded as the world's outstanding example of erosion, Everglades park is expected to gain renown for its biological gardens.

The park will offer a treat to the scientist and biologist as well as to the sportsman and nature lover.

Living marine formations and some 600 varieties of fish may be viewed in the hundreds of miles of waterways, mangrove keys, rivers and lakes, which stud the Everglades.

Some of the finest angling is to be had in its waters and the adjacent Gulf of Mexico. Shark river is noted for its tarpon.

There are alligators, crocodiles, black bears, panthers, white-tailed deer and wildcats for the zoologist to observe, and bird lovers will find flocks of winter migratory birds as well as such native species as the egret, now making its last stand on the American continent; the eagle, heron and pelican, which make it their year-around home.

Noted for Orchids.

The wild orchid grows in abundance. Sometimes the stalks reach as high as five feet and are covered with delicate blooms. Park enthusiasts believe the orchid of the Everglades some day may rival the bear of Yellowstone as a tourist attraction.

Everglades park forms an almost limitless expanse of wilderness, a flat but far from monotonous vastness of romantic and mysterious legend. Land areas edging its waterways or forming islands in its mirrored surfaces have weird names—hammocks, savannahs, cays, mangrove swamps, sloughs and 'glades.

Hammocks are tree-like islands in the Everglades prairies, consisting of dense, jungle-like growth of broadleafed trees, palms, vines, ferns and airplants. Many of the trees are of West Indies origin.

Habitat of Spoonbills.

Savannahs are tall grasslands with here and there a clump of trees, gnarled-kneed cypress perhaps or the native palmetto whose creamy white flowers are favorites with honey bees.

Over these savannahs, roseate spoonbills used to rise in flocks so dense that the whole earth was tinged pink by sunlight streaming through their pink feathers, tipped with flame color A few roseate spoonbills still stalk on their stiltlike legs, probing the shallow water with the spoon-shaped ends of their long bills.

At mating time, the male offers the female a stick. If she refuses to accept it, the courtship ends. If she takes the stick in her beak, both birds shake the stick together, then use it to start a nest.

Cays are low islands or reefs, of which there are thousands in the the confines of the Everglades. From time immemorial some of them have been used as bird rookeries. Bird refuge men in the park have been protecting the nurseries of roseate spoonbills, bald eagles and the other winged inhabitants from predators.

Maze of Mangroves.

The land-building mangrove swamps with their tortuous roots are a familiar sight throughout Florida coastal regions, but the giant mangrove forest between pristine Cape Sable beaches and Ten Thousand islands is unique in all America.

Its mangrove trees grow to a height of almost 100 feet, standing on arching roots like a sheer wall against the Gulf of Mexico. They grow in close formation in an area of about 80 miles, on a labyrinth of islands which only the most skilled native boatmen can penetrate without getting lost.

Sumps are marshes and, like the sloughs, make favorite feeding grounds for the birds. These lowlying lands, none more than five feet above sea level, are set like jewels in a breathtaking backdrop of sky and water.

Indians Tread Trails.

Historically, the Everglades were the last home of a vanished race, the Caloosa Indians, Florida's aborigines. Before Columbus discovered America, the Caloosas roamed over Florida south of Lake Okeechobee.

With picks made of shells because they had no flint or iron, the Caloosas dug canals among the Ten Thousand islands. Some, bulkheaded with palm boles, are still visible. Their "inland waterway" enabled the Caloosas to journey by canoe around the tip of the peninsula from the mouth of the Caloosahatchie on the west coast to Biscayne bay, where Miami now stands.

Seminole Indians now live on the fringe of the park area. With their native knowledge of the mysterious stretches, they are expected to be good guides for visitors flocking to the region.

Land of Legends.

Legends abound in this vast land of mystery. One tale concerns a redbearded "emperor" who ruled in this region many years ago. Accused of slaying three men in Georgia, he fled to the Ten Thousand islands with his wife and son. Other fugitives came to work on his sugar cane plantation. He paid them off with bullets.

A sheriff from Key West boasted that he would capture the killer, invaded his territory, was captured himself and forced to work in the cane fields a month before being shipped home.

After a reign of 30 years, the "emperor" forced a companion to murder a man and woman who lived on a nearby key. His subjects rebelled, organized a posse and shot him to death.

Open Throughout Year.

The park, which will be open the year around, will front for about 10 miles along Tamiami trail, which crosses the Everglades from Miami to Naples on the Gulf coast. Principal points of entrance are expected to be established somewhere on Tamiami trail and on the west coast.

Although the proposal for establishing Everglades National park first was broached in 1928 by Ernest F. Coe, Miami landscape architect, it was only last spring that Florida's great park became assured. In its first appropriation bill, the 1947 Florida legislature appropriated the two million dollars needed to make Everglades National park a reality.

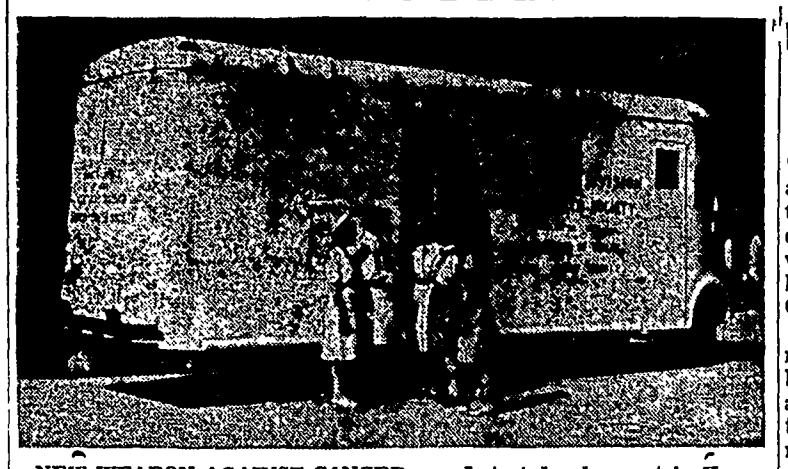
A magnet for tourists and nature lovers, the park will rank as one of Florida's main attractions. Florida expects a million visitors a year to spend 40 million dollars in the park.

"Through preserving the natural heritage of this region, the park will be a counterbalance of present and future generations to the tinsel and superficial aspects of race tracks, night clubs and less substantial phases of the Florida picture," according to August Burghard, chairman of the Everglades Park commission.

Grateful Woman Pays Blood Debt 89 Times

WATERTOWN, MASS.—Mrs. Mildred Phelps, 41, is paying a debt in blood.

During the past six years Mrs. Phelps has donated her blood 89 times and she plans to continue the practice. She explains that her husband, who has been seriously ill for years, has received 150 blood transfusions and she wants to replace as much as possible.



NEW WEAPON AGAINST CANCER . . . Latest development in Kentucky's campaign against cancer is acquisition of this mobile detection bus. Dr. Ellis Duncan, medical director, and nurse are shown here welcoming three girls referred to them for examination.

ON HEALTH FRONT

Mobile Detection Bus to Aid Kentucky's Fight on Cancer

WNU Features.

The farmer's wife with the lump in her breast, the village store clerk whose voice has dwindled to a hoarse whisper—no longer need they go without examination for months and live in the fear that they may have cancer.

A new weapon, forged by the Kentucky division of American Cancer society with the aid of General Electric X-Ray corporation, has made it possible for people in outlying areas, where doctors and x-ray facilities are few, to receive first-class medical examination for cancer without the cost and difficulty of traveling great distances. This weapon is the first mobile cancer detection bus ever to be equipped with x-ray apparatus.

Modeled after buses now used for x-ray surveys of apparently healthy persons in TB campaigns, the cancer bus, known officially as the "Cancer Mobile," will carry x-ray into the by-ways of Kentucky, acting as an "extension arm" of the state's widespread network of 16 cancer clinics.

Aid Rural Areas.

The unit, however, will not be used for mass survey work as this would be economically impossible. But it will permit bringing detection facilities to thousands who otherwise might succumb to the nation's No. 2 killer.

Primary purpose of the unit is to provide free examination for suspected cases among those unable to pay. In addition, doctors who do not have x-ray facilities also may use the apparatus in the bus for their private patients.

Kentucky physicians are supporting the unit enthusiastically and have volunteered their services without charge for the examination of indigents

The unit was purchased for the Kentucky cancer group by young women of the Louisville Junior league, who also have offered to go out with the unit in teams to take case histories and assist in handling patients. Only cost to the cancer society is for services of the medical director, Dr. Ellis Duncan, and his technician.

To insure fullest utilization of the bus and other diagnostic facilities, the cancer organization has under way an intensive program of education. This is designed to increase the public's awareness of warning symptoms and to stress the importance of routine periodic medical examinations.

Stress Lay Education.

The bus will go only to counties which extend a formal invitation through their county medical societies. After arrangements have been made to have the unit come to a particular county, members of the medical society and other groups will be asked to volunteer assistance at the diagnostic clinic to be held in the bus.

While the unit is in the county, educational programs on cancer control will be presented to lay groups.

Acquisition of the bus is the latest of many steps taken by Kentucky in its battle against this dread disease. The first state to have 100 per cent organization of all counties for fundraising, Kentucky also is credited with sponsoring frequent cancer detection and treatment clinics and with promoting an educational program reaching down to grade school children.

Because of the large proportion of volunteer work done, administrative costs of the Kentucky cancer program have been held down to only 3 per cent.

The bus is of sturdy construction, designed specifically for the complete coverage of the state over roads of all types. It is equipped with fluorescent lighting, ventilating fan, electric heater, shockproof cables, vibration dampers for the x-ray tube, lead-lined partitions to protect personnel against radiation, work benches and water storage tanks.

Honest Citizens Outdo Honesty

VIROQUA, WIS. — Even honesty can be outdone, a recent incident here indicates.

Berlie Moore, Vernon county employee, was on his way to the bank with a roll of bills bound with a rubber band when the band suddenly snapped and the money whirled down the street.

Passersby rounded up the bills and returned them to Moore. He counted the roll and it totaled $1,150. He had started out with $1,147.

Rural Blood Bank Follows Pattern Of Pioneer Days

FAIRPLAY, COLO. — In an attempt to guard against sudden emergencies in which outside help might come too late, residents of Park county are organizing their own "walking blood bank."

In a modern application of the rural neighbor-help-neighbor tradition which dates back to pioneer days, residents of the scattered, frequently isolated communities of the county will have their blood typed and recorded to qualify them for service as potential donors.

Demand for blood is not great enough to warrant a regular bank with typed blood kept on hand in sterile containers. Yet in distant corners of the county, particularly when roads are snow-blocked in winter time, sudden emergencies frequently arise.

Then it's too late to get blood from Denver; too late to call for volunteers and type their blood. But if prospective donors — neighbors, friends and relatives—are already typed, a card index provides the key to a "walking blood bank" on which a doctor can draw quickly.

Promoting the project are Dr. Robert Patterson of Fairplay, who learned the value of blood transfusions while in military service; the American Legion post and county commissioners. The Belle Bonfils memorial blood bank of Denver and the state health department are cooperating in the venture.

Among the county's 2,500 residents, about 1,000 are of donor age and about 500 of them are expected to qualify as prospective donors.

Farmers Prefer Old Threshing Machine

ROCHESTER, MINN. — Modern machinery, in the form of the heavily-puffing, steady-powered steam threshing rigs of today, holds no lure for a group of progressive farmers in this rich farming community.

Instead, they prefer to stick to a 31-year-old steam thresher which, they insist, will stack up for speed and performance against any of the present-day models.

Christopher Groen, engineer who has worked on the rig for 10 years, says the hazards which largely brought about new methods of threshing do not exist "when you stay on the job and tend to your business"

The old-time outfit is owned by a cooperative unit organized 31 years ago. W. C. Dickinson, present chairman, has been a member of the group for 30 years.

Woman Invades Blacksmith Field

BIRNAMWOOD, WIS. — Invading a field traditionally reserved for men, Mrs. Edwin Mierkey is an active partner in a husband and wife traveling blacksmith team.

She is not just an ornamental attraction taken along to add glamour around the portable forge, but a hard-working, practical partner for her husband in his work of horse-shoeing, welding and harness repairing.

Mierkey, who puts on from 18 to 24 shoes every working day, does the calking, fitting, nailing and clinching, while his wife hands him the right tool at the right time. She also keeps a steady fire in the forge without wasting coal or burning the shoes.

Mrs. Mierkey never does the actual horse-shoeing, but she feels confident that she could if anything should happen to her husband.

Hunting Wild Animals With Helicopter, Siren

An expedition now preparing to visit Africa to record the habits and sounds of wild animals in motion pictures and on recording machines has equipped its helicopter with a novel weapon of defense, a high-pitched siren called a Shriek-Gun, says Collier's.

Its sound has no effect on the men if they plug up their ears, but will terrify and drive away any beast that attempts to attack the craft when it is poised near the ground.

COMMON SENSE.. proved thousands upon thousands of times! ALL-VEGETABLE LAXATIVE

Mr. and Mrs. Hanson of Thornton, parents of Miss Oda Hanson, have moved into a house in the south part of town, formerly occupied by the Walter Bachman family. Mr. Bachman has built a small house near the Bernard Smid residence, where the Bachmans now reside.

Mr. and Mrs. Marvin Isvik entertained to dinner Friday evening Mr. and Mrs. C. A. Larsen and Mr. and Mrs. R. A. Jorgenson. The occasion was to celebrate Mrs. Larsen's birthday. Mrs. Isvik had baked and decorated a birthday cake for the event.

Ell Township Farm Bureau Meets

Federal Income Tax reports was the main discussion of the evening at the Ell Township Farm Bureau meeting was held Thursday evening, December 11 at School No. 4. Miss Louise Beyer, attorney, was the main speaker of the evening.

An interesting Christmas program was presented by Miss Hueneman and the pupils of District No. 4.

Chas. F. Jackson was present to discuss the Farm Bureau membership drive which is to be held the week of January 5.

The "Christian Christmas" European Relief Drive to be held in Hancock County Dec. 22, 23, and 24 was explained by the County Extension Home Economist, Elsie Mae VanWert.

A Christmas grab bag for all attending the annual Christmas party climaxed the evening program.

Phone your news to 12.

Klemme School News

KINDERGARTEN NEWS

We have been making Christmas decorations and putting them up in our room. We decorated our Christmas tree on Thursday.

Paige Patterson treated us on her birthday Thursday to frost sticks and JoAnn Helps treated us to candy bars on Friday.

FIRST AND SECOND GRADE NEWS

—Teacher, Miss Halfwassen

The second grade have started in their third new Readers The name of the book is, "Have You Read."

Those receiving a hundred in Spelling for the week are:

1st Grade

Cozette Lau
Mardell Stadtlander
Marlin Stadtlander
Judith Gilpin
Virginia Kudje
Jerry Janssen
Myrna Barz
Harlan Lee Back
Roger Meints
La Vohn Isvik
Jerry Lee LaFavre

2nd Grade

Jeanne Barz
Gordon Johnson
Sandra Medin
Marcella Nuehring
Rosalie Rosendahl

The children decorated the Christmas tree Thursday morning.

THIRD AND FOURTH GRADE NEWS

—Teacher, Miss Tanner

Several have been absent from our room because of sickness.

The fourth grade have been studying about the Sahara Desert and the Nile River in Geography. They drew pictures of the kind of homes the people have there.

The third grade dramatized the story of "White Satin" last week.

The fourth grade have new dictionary work books.

We have been singing Christmas carols and songs in music

We made holly wreaths and have a lovely Christmas tree. We also drew names for a gift exchange and are making gifts to give for Christmas.

FIFTH AND SIXTH GRADE NEWS

We have been making Christmas decorations for our room. Yesterday we decorated our Christmas tree.

Today for Art we made snow scenes and also celebrated Cecil Jacob's birthday.

Our fifth grade is studying much harder in spelling and will soon out shine the sixth grade if they don't watch out.

We have new dictionary work books. We are learning that Mr. Dictionary has a lot to show us that we never knew before. Both fifth and sixth grades are using the same and we are working together in class.

Last week we robbed the school can pile and covered them with white paper to make Santa Clauses. We used cotton for his whiskers and red crepe paper for his hat.

The fifth, sixth, seventh and eighth grade boys played a basket ball game Monday night for the opening game. The 5th and 8th played. the 6th and 7th The 5th and 8th were defeated.

FRESHMAN CLASS NEWS

By Audra Jones

In our classes this week we have been doing mostly routine work, although in Algebra we have been working overtime on solving equations.

In Home Economics we've been making floor plans showing the arrangement of furniture in an ideal kitchen.

In English we have been writing autobiographies and also stories of personal experiences.

Friday morning we listened to an interesting talk on dental care given by Miss Beyer from Garner. We also received our dental cards for the year.

JUNIOR CLASS NEWS

We are all anxiously waiting for the dear old Christmas bells to ring again so that we may have a week's vacation from school.

We're sorry to have been the losers in the basket ball game with Belmond. Better luck next time, boys! At any rate we won the game with Kanawha.

In English we have been studying how to make clear, correct sentences. That is not as easily done. as it may sound Today we are having several debates in class.

Typing is very disgusting when the typewriter makes mistakes. Now is it the machine or the one who uses it? I wonder. That should give us something to think about.

Sociology and Economics are the same as usual. Friday we had a comprehensive composition over unit 9 in Sociology.

Marion Anderson

SENIOR CLASS NEWS

Literature has been quite interesting to us as we have been studying about magazine and folk literature. We had a test Friday and by the looks of the grades most of us must have been at the game Thursday night. Our notebooks also were due so we really had to work.

We are really covering our book in History. We are now on the chapter Expansion to the Southwest and Northwest. We find that there is a lot we have to remember in History.

Our main topic of discussion has been Population Problems and the Race of Tomorrow in Sociology this week.

Next week is the week we have all been scared to face in bookkeeping, as it is then we start the Walker Practice Set. This will take us about two and a half weeks. Then our semester test will be looking us in the face.

Algebra II is getting harder as we are trying to solve the quadriatics problems and completing their squares. We must learn the quadriatic formula whick takes quite a bit of concentration.

Miss Beyer was here Friday morning to encourage us to get our dental cards signed and back for the students day at Britt in the near future.

Will Spend Winter In Florida

Mr. and Mrs. Bill Johnson left Saturday for Charles City to visit over the week end with their daughter Effie and family and on Monday they left in their car and trailer house for the south. Mr. and Mrs. Johnson will again spend the winter in Florida.

KLEMME BOYS RETURN HOME FROM FOUR MONTHS TRIP

Roger Ridder and Dean Roths returned home Wednesday evening from a four months auto trip through fifteen states and into Canada. The trip covered over seven thousand miles. They left here August 14th, their first stop was in the Black Hills and then they spent a week in Yellowstone Park. From Yellowstone they went to Spokane, Okanogan and Seattle, Washington. The boys spent two months picking apples and seeing many points of intesest in this picturesque state.

The next stop was Los Angeles, California, where they spent three weeks visiting and sightseeing. Enroute to Los Angeles they took the Redwood Highway and saw miles of the oldest and largest trees in the world. In Los Angeles it was their privilege to witness the official opening of Santa Claus Lane. Many of the best known film and radio stars were on brilliantly lighted floats and on the last float in the parade, a big beautiful sleigh on which Santa Claus was riding, was the comedian, Jack Benny.

After leaving Los Angeles the boys went to De Ridder, Louisiana and visited several days with Paul Stille. From there they drove to Chicago, Ill. and spent two days at the Walter Beaty home.

Roger and Dean made their trip in a 1923 Nash and considering the age of the car they had a minimum of engine and tire trouble. They had a most enjoyable time and had many interesting experiences, and saw some of the most beautiful scenery in the world and drove through hundreds of towns and cities.

WILL HAVE COMMUNITY SINGING AND PROGRAM AT COMMUNITY HALL

Christmas Trees Will Be Burned, Treats Will Be Given All Who Attend

As a holiday event the Klemme American Legion and Auxiliary are planning to hold a Twelth Night Celebration at the Community Hall on Monday evening, January 5th beginning at 8:00 o'clock.

Bring Your Christmas Trees

Everbody in the community, farmers and towns-people and their families are invited and are asked to bring their Christmas trees to the parking lot where a huge bon-fire will consume the trees and singing will be enjoyed.

Program At Hall

The two organizations are planning a fine program to be given at the Community Hall after which they will treat the crowd. All are invited.

MRS. TOM ROTHS FELL ON ICY STREET AND FRACTURED RIGHT ARM

While crossing the intersection from the Wellemeyer building to the Roths Cafe Friday forenoon, Mrs. Tom Roths slipped on the icy street and in the fall fractured her right arm above the wrist. Mrs. Roths now has her arm in a cast and sling. Mrs. Geo. Buseman is assisting with work at the Roths Cafe while Mrs. Roths is recuperating.

• At Christmastime we greet good friends. If 'neath our roof you've rested, come again and be refreshed. If you have never crossed our threshold, visit us in the months ahead. To one and all we say,

MERRY CHRISTMAS!

The Publishers

A Visit From St. Nicholas

'Twas the night before Christmas when all through the house
Not a creature was stirring, not even a mouse.
The stockings were hung by the chimney with care,
In hopes that Saint Nickolas soon would be there.

The children were nestled all snug in their beds,
While visions of sugar-plums danced in their heads,
And Mamma in her kerchief and I in my cap,
Had just settled down for a long winter's nap.

When out on the lawn there arose such a clatter,
I sprang from my bed to see what was the matter.
Away to the window I flew like a flash,
Tore open the shutters and threw up the sash.

The moon on the breast of the new-fallen snow,
Gave a luster of objects below,
When, what to my wondering eyes should appear,
But a miniature sleigh, and eight tiny reindeer;

With a little old driver, so lively and quick,
I knew in a moment it must be St. Nick.
More rapid than eagles his coursers they came,
And he whistled, and shouted, and called them by name

"Now, Dasher! now, Dancer! now, Prancer! and Vixen!
On, Comet! on, Cupid! on, Donner! and Blitzen!
To the top of the porch, to the top of the wall!
Now dash away, dash away, dash away all!"

As dry leaves that before the wild hurricane fly,
When they meet with an obstacle, mount to the sky,
So up to the housetop the coursers they flew
With the sleigh full of toys, and St. Nickolas, too.

And then in a twinkle, I heard on the roof
The prancing and pawing of each little hoof.
As I drew in my head and was turning around,
Down the chimney St. Nickolas came with a bound.

He was dressed all in fur, from his head to his foot,
And his clothes were all tarnished with ashes and soot;
A bundle of toys he had flung on his back,
And he looked like a peddler just opening his pack.

His eyes how they twinkled! his dimples how merry!
His cheeks were like roses, his nose like a cherry.
His drool little mouth was drawn up like a bow
And the beard on his chin was as white as snow.

The stump of a pipe he held tight in his teeth,
And the smoke, it encircled his head like a wreath.
He had a broad face and a little round belly
That shook, when he laughed, like a bowl full of jelly.

He was chubby and plump, a right jolly old elf,
And I laughed when I saw him, in spite of myself.
A wink of his eye, and a twist of his head,
Soon gave me to know I had nothing to dread;

He spoke not a word, but went straight to his work,
And filled all the stockings, then turned with a jerk
And laying his finger aside of his nose,

And giving a nod, up the chimney he rose.
He sprang to his sleigh, to his team gave a whistle,
And away they all flew like the down on a thistle.
But I heard him exclaim ere he drove out of sight,
"Happy Christmas to all and to all a good night."

THANKS, JOHN, WE GOT THE NICE BASKET OF FRUIT

About this time of the year the Editor starts looking for a basket of fruit from way down south in sunny Texas. This year we were not dissappointed as Wednesday a basket of grape fruit and oranges arrived express, shipped to us by John Neuberger at Brownsville, Texas. He also sent a basket of fruit to his parents, Mr. and Mrs. John Neuberger.

Methodist Choir Sang Carols To Shut-Ins

The Choir of the Klemme Methodist Church made its annual tour on Thursday evening, singing Christmas carols to the shut-ins. The trip was made in a bob-sled which John Clements pulled around town with an "iron horse," or better known as a tractor.

After their trip the choir enjoyed an oyster stew at the church.

SORRY, NO COLORED PAPER

For several years it has been customary for The Times to print the Christmas and New Year editions on colored paper. This year colored paper is not available and even the white print paper is a critical item. We are sorry that the two special editions are printed on white this year, but there was no other course to follow.

—The Publishers.

AVERY THEATRE WILL HAVE NEW YEAR EVE PARTY

The Avery Theatre will hold a New Year's Eve Party on Wednesday, Dec. 31. The midnight picture is "Calender Girl". There will be favors, noisemakers and surprises for everyone.

Mr Kingsbury invites all to the theatre for an evening of fun There will be no show on Christmas Eve but there will be a special Matinee on Christmas Day at 3:30 p. m.

Work Circle Christmas Patry

The Work Circle of the Methodist Church held their annual Christmas party in the church parlors on Thursday afternoon, with over forty present. Mrs. Vern Bisom and Mrs. Patterson had a nice program planned, of Christmas Carol singing, and a couple of games. Then Mrs. Orville Bridges and Mrs. Sumner Trumbell had charge of the gift packages, which had to be matched with Christmas cards in order to claim the package. Mrs. Sherwood and Mrs. Missman had a lighted Christmas tree, while Mrs. Pavey and Mary Swanson served the pot luck lunch All enjoyed the afternoon.

Missal Gets Appointment For New County Assessor

TIMES WILL BE OUT ONE DAY EARLY NEXT WEEK

As the New Year Day falls on Thursday this year, the Times will be published one day early next week and the paper will be in the hands of the subscribers on Wednesday, 31.

This issue will be the annual New Year's greeting edition and all advertising copy as well as news must be in this office not later than Friday night, December 26 Classified advertising will be taken until Monday noon.

Two Directors Of Hancock County Cooperative Oil Present Resignations

Recently two directors of the Hancock County Cooperative Oil Association presented their resignations to the board of directors, both upon the advise of their doctors.

The directors are Chas Grau, who was a charter member of the firm and helped organize the cooperative, and who must resign due to ill health. His vacancy will be filled by Allen Hallett of Miller.

G. A. Goll, Klemme, another charter member, also was forced to resign due to ill health and he will be replaced on the board by Carl Wille of Klemme.

Pre-Christmas Family Dinner

Mr. and Mrs. J. W. Waddingham entertained their children and their families at a pre-Christmas dinner Sunday, Dec. 21st.

Those present were Mr. and Mrs. Tony Tebben and family of Corwith; Mr. and Mrs. Roy Waddingham and family of Forest City; Mr. and Mrs. Harm Dirks and family of Garner; Mr. and Mrs. Martin Karsjens and family of Klemme; Mr. and Mrs. John Waddingham and family of Klemme and Mr. and Mrs. Virgil Waddingham and family of Meservey.

KLEMME METHODIST CHURCH

Christmas Program

Dec. 24th, 7:30 P. M.

21. Benediction, by Rev. H. E. Harvey.
22. Doxology.

COUNTY AUDITOR FRED C. MISSAL RESIGNED FROM OFFICE

Will Take Over Position Of Assessor Of Hancock County

Fred C. Missal, County Auditor, handed his resignation to the Board of Supervisors at their Monday meeting. His resignation will take effect Jan. 2, 1948.

Mr. Missal resigned at this time in order to take over the position of Hancock County Assessor.

The Board appointed Maynard Schoneman, who has been a deputy auditor for the past year, to succeed Mr. Missal as County Auditor for the unexpired term which runs until January 1, 1949. Mr. Schoneman served with the U. S. Army overseas.

EAST-WEST KLEMME ROAD SLATED FOR IMPROVEMENT

The east-west county road running through Klemme was put on the calendar for improvement by the Board of Supervisors Monday. The road will be widened to 90 feet and will be a standard farm to market road and will later be turned over to the State for maintenance and future improvement.

Home For The Holidays

Bob Hartzell, who underwent an operation at the Veterans hospital at Des Moines, and who will return there January 14th, is spending the holidays at the Lester Stille home west of Klemme. Bob is getting along fine.

The following were Sunday dinner guests of Mr. and Mrs. Henry Busse: Mr. and Mrs. Frank Sandry, Mr. and Mrs. Harmen Trampel and two children and Mrs. J. M. Deen of Harlan, Iowa. Mrs. Deen and Mrs. Busse are sisters.

BRIDE OF KLEMME YOUTH

Miss Frances Lenora Graff, daughter of Mr. and Mrs. L. O. Graff of Kreole, Miss., and John W. Schwichtenberg, son of Mr. and Mrs. David Schwichtenberg of Klemme, were married on December 21 in the Dauphin May Baptist church at Mobile, Alabama.

Miss Graff was employed in the Merchants National Bank at Mobile, Ala., before her marriage.

The couple will arrive in Klemme about Jan. 15 and will live on the farm where Mr. Schwichtenberg has been working with his brother.

Universal Training Due for Big Play

Backers Say UMT Needed To Bolster Foreign Policy

By BAUKHAGE
News Analyst and Commentator.

(This is the first of two articles on the drive for universal military training which is to be launched soon and what is back of that drive. The first article deals with the potential effect of military training on our foreign policy, the next with the program itself.)

WASHINGTON.—As the foreign ministers' conference plodded along in London, American delegate Marshall probably frequently found himself reaching for one document to support his cause, that wasn't there. If it had been he would have had concrete proof to place before the world that America is not engaging in the well-known game of bluff.

That is why, shortly after the second session of the 80th congress opens in January, you will see and hear a lot more about universal military training than you ever did before. The President, as requested by the American Legion, is expected to proclaim a UMT week, (January 6 through 12), and although there will be no active propaganda on the part of the government departments because the administration, especially the war department, is going to lean over backwards to avoid the charge of trying to influence congress, they will do whatever they can within their prescribed limits.

But there will be a concerted pro-UMT drive from many private organizations. The American Legion is concentrating on that one issue and its commander, James F. O'Neil, has publicly stated he is going to give his whole time to it.

Baukhage

The VFW and other veterans' organizations will fall in line. More important perhaps, will be the active participation of the powerful national security committee headed by former Justice of the Supreme Court Owen J. Roberts. This committee, formed about two months ago, is an offshot of an earlier citizens' committee headed by Justice Roberts which unsuccessfully urged passage of a universal military training bill through the last session of congress. Like the earlier group, the purpose of this national security committee, composed of veterans' groups like the Legion and VFW as well as the national chamber of commerce, Rotary clubs and the League of Women Voters, is to coordinate efforts to get universal training enacted into law.

The interesting thing about the renewed drive for military training, as the men who have negotiated American foreign policy interpret it, is that UMT's military function is secondary. Let me explain it this way:

Granted that the Kremlin policy is a long-range plan of active aggression whose most immediate goal is to get control over as many nations or as much disputed territory as possible, and absorption of control over Germany as its chief goal.

Granted that communism in Europe at this writing is on the defensive and will be even more so if the European recovery plan succeeds. Meanwhile, the Russians will take every step short of war.

Granted that Russia does not wish to fight a war at present. Russia knows we know that. But Russia knows that we not only do not want war, she also knows WE COULD NOT FIGHT ONE, not only because we have only a handful of troops on the continent (a force greatly outnumbered by the Red army) but because we are woefully unprepared.

Therefore, the Russians know they can go much further in their "cold war" than they otherwise could. They can play their obstructionist game in the foreign ministers' conference and in the United Nations, carry on active propaganda against us along the periphery of their satellites and even ACTIVELY AID armed forces within nonsatellite border states as they are doing in Greece.

The Russians feel they can take this course because they believe that the American people themselves will not back any threat to their (Soviet) aggression, nor, they think, will America support any step to strengthen the military machine of the United States.

That is the reason the hand of our policy makers would be greatly strengthened if universal military training were established here because it would show that America is really backing its diplomats.

Of course, the argument that a strong military organization prevents war because it reduces the chance of attack is an old one. But under the peculiar international situation which exists today, it is probably more nearly true than ever before in history.

Whether or not a bill authorizing universal military training is passed at the coming session depends on whether the people believe this — whether it changes the thinking of enough members of congress so that a favorable majority can be obtained.

No one will make a guess now as to what the chances are, but the "situation" mentioned above already has effected some changes of viewpoints.

The sources of support for UMT will draw heavily from administration regulars unless popular opposition gives them the election year jitters.

UMT Gathers Strong Support

Naturally Chan Gurney of South Dakota, chairman of the senate armed services committee, and Chairman Walter G. Andrews of New York of the house committee of the same name, whose sub-committee under Representative Harry Towe of New Jersey produced the bill which is now pending before the house, are enthusiastic supporters of the measure. And it is expected that friends of would-be presidential candidate Dewey will fall in line since universal military training is one of the major issues which the New York governor has endorsed.

If this assumption is correct Senator Ives and Republican House Majority Leader Halleck could be included. Senator Saltonstall of Massachusetts has expressed his approval. Candidate Stassen and his friends, though not at this writing committed, are emphatically friendly. Governor Warren, another avowed candidate, took the trouble to fly East to address sympathetically the Roberts national security committee at length when it was formed. There are many other prominent suporters.

STASSEN DEWEY
They favor UMT

Senator Taft is definitely opposed to universal military training, which he groups with other "controls" which are objectionable to him.

Opposition may be considered strong from the extreme right and the extreme left. It is hardly likely that Representative Vito Marcantonio, who has the support of Communists in New York, would vote for UMT.

Outside of congress, the church organizations and a large army of mothers are opposed. The only way their view can be changed, UMT supporters say, is to convince them that our boys will be safer trained than untrained, that in every war we have had to have a trained citizen army in the end. Twice while we waited to train it, thousands died, and some went into service without proper preparation.

CRACKSHOT CHRISTMAS GREETING . . . Ernie and Dot Lind, Western-Winchester exhibition shooters, took about two and a half minutes to punch out this Christmas greeting card. They needed 220 bull's-eyes for their "Merry Christmas."

NEWS REVIEW

Inflation Worry Grows; CIO Seeks Pay Raises

INFLATION
What's to Be Done?

Administration pressure to force the adoption of President Truman's proposed anti-inflation panacea involving wage and price controls was increasing steadily.

Latest in a procession of cabinet members testifying before congressional committees in favor of price controls was Clinton P. Anderson, secretary of agriculture.

He bluntly warned the house banking and currency committee that unless rising meat costs are halted price controls on that commodity would be necessary by early spring. Describing meat and grain as foodstuffs in which early shortages can be foreseen, Anderson pointed out the likelihood that early 1948 would see fantastically high prices of meat.

There was a profusion of thinking on the inflation problem which so far had done little except to promote widespread disagreement and uncertainty among the people.

The administration, congress as a body and private citizens remained at odds concerning what should be done. Robert S. Nathan, former government economist, called for an immediate 20 to 25 per cent rollback in prices and predicted a "bust" next year if the situation remains uncontrolled.

Secretary of the Treasury John Snyder issued a direct challenge to congress to come up with some workable idea of its own to combat rising costs of living.

Earl Bunting, president of the National Association of Manufacturers, epitomized the attitude of private business and industry in general by calling for greater production per man per day, reduced taxes and a curb on exports.

What it amounted to was this: You either were in favor of price and wage controls or against them. You pay your money and you take your choice; but in any event, with inflation a predominant condition of the economy, you pay your money.

WAGE DRIVE:
Third Round

Since there apparently is no way of eliminating inflation in the foreseeable future, the CIO decided, the best thing American labor can do is to string along with it.

That was the philosophy behind CIO President Philip Murray's announcement that the labor organization would seek general wage increases for its six million workers in basic industries.

It presaged a new series of labor difficulties which probably will reach a crucial peak next March and April. More than that, it was the development most feared by economists frantically trying to combat inflation—official launching of the third general round of wage demands since the war.

Murray, seeking to justify the decision, claimed that since the war workers had suffered a net loss of 18 per cent in the purchasing power of their weekly earnings despite wage increases.

He added, in a tone of disillusionment, that the CIO's move for another pay raise grew out of his and other CIO leaders' moral certainty that congress would do nothing to halt inflation and its continuing and dangerous impact on the American worker. He hoped, he said, that "it won't be necessary to have strikes."

The decision was not entirely unexpected. Secretary of Labor Lewis Schwellenbach had seen it in the cards earlier when he predicted such a development and warned that pressure for general wage increases was mounting with rising prices.

Schwellenbach

Meanwhile, congress, dissatisfied with President Truman's 10-point anti-inflation program, continued working on cost-of-living problems with two cabinet officers under orders to draft specific bills to fight inflation.

LEAGUE:
For Politics

Ever since the Taft-Hartley act outlawed the spending of labor union funds for political purposes, the unions have been busy setting up special agencies through which they can apply political pressure in 1948.

Most recent such political league has been organized by the International Association of Machinists (IAM); it is called the machinists' non-partisan political league, and will "aid working people exercise their right to vote more effectively," according to Harvey W. Brown, IAM president.

In 1948 it will "concentrate on replacing the pro-employer Taft-Hartley congress with one composed of those who will consider the interests of all groups in our country rather than the narrow interests of a single group."

Other leagues of similar political bent are the CIO political action committee, the AFL labor's educational and political league, the railroad unions' railway labor's political league and the communication workers' group.

WARFARE:
Plastic Tanks

Tanks, as we know them, may be for the memory only in a few more years if the prediction of Maj. Gen. James M. Gavin is sound.

In the event of another war tanks made largely of plastic and light enough to be flown from one front to another will play a decisive role, the military expert said in a copyrighted article in the Armored Cavalry Journal.

Gavin, who commanded the parachute assault troops in the Normandy invasion, said the heavy tank of World War II is so outdated it "belongs in the Smithsonian institution."

"Either we develop the means that will enable us to fly everything we need for combat or another nation will," he asserted. "If another does—well, we've had it."

TURN FOR THE BETTER

Teacher Crisis Eases in U.S.

"The present school year marks the beginning of a turn for the better in education in the United States."

That high note of optimism was sounded in a progress report issued by the citizens' federal committee on education through the U. S. office of education which asserted that a five-year downward trend in education has been reversed.

Titled "Citizens Look at Education," the report is the first pamphlet issued by the 27-member group formed in April, 1946, to carry the teacher crisis to the country.

"There is abundant evidence that the ominous deterioration of our educational system has been arrested. The drift of teachers to other fields has been slowed. The public has become aroused to the dangers threatening our schools," was the committee's conclusion.

At the same time, however, the report warned that upward progress must continue, and that to consider the educational crisis as a thing of the past would be premature.

Among the accomplishments listed for the past year were:

1. The largest teachers' salary increases which ever have been granted in a 12-month period — an average increase of about $300 or about 13 per cent.

2. An increase in maximum salary scales in many centers, regarded as highly significant in making the profession economically attractive as a lifetime career.

3. A number of states have liberalized retirement allowances and sick-leave provisions and reduced the teaching load.

But the committee did not minimize the fact that there were problems still to be solved. For one thing, the rise in cost of living has more than eaten up the advance in teachers' salaries, and workers in many fields still earn more, on the average, than teachers.

Another obstacle to be overcome is the immense need for teachers, caused in part by the increased birth rate, which will exist for at least 6 to 10 years.

By WENDELL BROOKS

The over-stuffed lady in the purple dress had fingered every necktie on the counter, and had Rusty McGonegal — the clerk — pull some two dozen boxes of assorted neckwear out from behind the counter, had asked Rusty a dozen times whether or not he thought green would go well with blue and, finally, had turned away from the tie bar, sucking on her underlip and mumbling something about not wanting to buy anything she wasn't just sure of, and that three dollars was more than she wanted to spend on Henry anyway.

Rusty sighed. He forced a smile as he waited on the next customer. All this, and heaven, too, he thought. As if he didn't have enough on his mind already—enough meaning one particularly cute bit of femininity that was jockeying the number one elevator at the large loop department store. Miss Annabelle Toodles. Brunette. Five foot two. But it wasn't only the person of Miss Toodles that Rusty was thinking about. No, it was the fact she had, only the day before, purchased a red and white polka dot tie from him.

"I want a tie that will look well with brown hair," she'd said, dimpling. "Brown hair and brown eyes."

Rusty's eyes bulged out. The polka dot tie!

And Rusty had red hair. Red hair and blue eyes. And here all the time he'd thought. . . .

To top it all off, the floor manager had just made the rounds announcing they would remain open until 9 o'clock. Nine o'clock on the night before Christmas to accommodate last minute shoppers. It was too much. Nine o'clock and he'd made a date the week before with Annabelle. They were going to take in an early show and wind up the evening dancing at the Aragon. But if she were more interested in brown hair and brown eyes, if she'd sold out to hosiery — well, he didn't care if the store stayed open until midnight. Serve her right. She'd have to work, too.

"No, lady, these are all the ties we have. No, we haven't got any special numbers tucked away anywhere I assure you." Rusty felt like yelling that if the woman couldn't find a single tie she liked out of the some 500 laid out in front of her she was . . . well, he didn't know what she was but he was fed up. Life had suddenly become meaningless. And time dragged on.

He wondered how Annabelle would act. But he didn't have time to think about that because Annabelle was suddenly standing right in front of him, smiling.

"I took a break. Wasn't it mean of that old manager to make us stay open when we had a date?"

Rusty kept his eyes down on the showcase. "Mmm hm," he mumbled. She was talking like there was nothing at all wrong. Just as if she'd never even thought of another man in the world.

"Well, I've got to dash back. See you at nine."

"Mmm hm."

Women. They were all alike. He looked up sullenly at the retreating figure of the slim brunette. His eyes wandered up past her trim waist to her hair. Why . . . Rusty's eyes bulged out. The polka dot tie! There it was, neatly tied in a bow on the back of her head, holding the locks of her hair in place. And all the time he'd thought. . . .

"Yes, sir," he grinned as he slipped a tie into a gift box for a fellow standing at the counter. "That tie will wear you for years. I know you're going to like it. And . . . Merry Christmas!"

Many Ways of Saying "Merry Christmas"

In France they say "Joyeux Noel"; in Russia they say "Rozhdestvom Khristovym," and in the U. S. it's "Merry Christmas."

Language is but the instrument for expressing universal feeling on Christmas Day. And wherever Christian civilization has left its mark, there the Yuletide greeting is on everyone's lips.

Metronome in Prison to Beat Convicts' Grapevine

Some prisons throughout the world have metronomes operating in the corridors outside the solitary confinement cells so that the convicts in them will be prevented, by the constant ticking, from communicating with one another by means of tapped-out messages.

If you are looking for ways to stretch your Christmas budget—here's good news! Make a list of all the smokers you know and give them either of these two popular gift items featured by your local dealer — a carton of flavorful Camel Cigarettes or a pound tin of mild, mellow Prince Albert Smoking Tobacco. Both gifts come **ready to give.** The Camel carton comes in a colorful holiday dress, containing 200 mild, rich-tasting cigarettes. And Prince Albert—the National Joy Smoke—is offered in the popular full pound container. Even a card is unnecessary for these gifts—space is provided for a personalized Christmas greeting. You'll be "tickled pink" when you see the hearty reception your friends will give holiday-wrapped Camels and Prince Albert!—Adv.

trepid was the sui- found itself looking el of a gun held by in Joplin, Mo. Realiz- up, the quail decided it flew straight against the gun and dropped at with a broken neck.

Firemen in Camden, N. J., spent an hour looking for the source of smoke that poured through the home of Mrs. Marie Baugher. They finally found it—a bird's nest under the

roof. A sparrow had carried home a lighted cigaret. And just to prove that smoking in bed isn't restricted to sparrows, a pigeon in Washington started a fire in an apartment building the same way.

To Err Is Human.

NOT TO BE OUTDONE BY ANIMALS, HUMAN BEINGS HAD SOME FANCY FREAK SQUEAKS THEMSELVES IN 1947. FOR EXAMPLE:

Stanley Morrison of Newburyport, Conn., was surprised to run into his father one day—at a grade crossing. When Stanley's truck crashed into a passenger train at the crossing, the engineer hurriedly climbed down from his cab to inspect the damage. He was Stanley's dad.

A Hot Seat.

As Fireman Horace LeBouf was diligently engaged in carrying Mrs. Catherine Markowski down a ladder from a burning building in Detroit last March, they passed a first floor window. Flames shooting out of the window caught Fireman LeBouf in the seat of his pants. He yelped, spanked himself frantically and let go of Mrs. Markowski, who understandably fell to the ground. Fireman LeBouf lost his balance and landed smack on the lady he had been saving. Mrs. Markowski was bruised. Fireman LeBouf apologetic.

A speedboat on which Miss Georgia Brooks of Chicago was riding during a holiday outing on Lake Geneva, Wis., swerved so sharply it threw Miss Brooks into the water. Apparently contrite, the boat swerved again, hit the struggling swimmer, tossed her 10 feet in the air and caught her neatly on its prow.

When Mason Nurick's car was stolen in Hollywood, he borrowed a neighbor's to drive to the police station and report the loss. En route home, his borrowed car was smacked from behind. Nurick got out to check up on the damage, recognized the car which had hit him as his own, held the driver for police.

Lucky Is Right.

Horseshoes may bring luck to some people, but not to 7-year-old Larry Young of Chicago. Larry was conked on the head by a flying shoe while playing with other youngsters. The only luck he could see in it was that the horse wasn't in the shoe.

Fishermen Katsumi Nishitawa and Woodrow Wakatsuki would have broken all records for a catch off Santa Monica, Calif., one day last summer had it not been for one thing. They hauled in so many mackerel the weight of the fish sank the boat.

And in Seattle, John Angel drove into a service station, ordered a change of oil, stepped out, discovered too late that he was eight feet aloft on a grease rack.

Patrolman Dennis Callivan of Chicago weighs more than 300 pounds, and it is difficult for him to be inconspicuous. So passersby were understandably perplexed when one minute he was there as big as life, patroling his beat, and the next minute — whoosh, he had disappeared! He had fallen into an open manhole —a king-sized manhole, that is.

No Longer Funny.

A lot of comedians make a lot of gags about false teeth biting their owners, but it just isn't funny to Walter Springer of Ann Arbor, Mich. Springer was carrying his teeth in his shirt pocket one day when his automobile collided with another car. The impact threw him forward against the steering wheel, and his own teeth bit the man that feeds them.

World's champion freak faller of the year, so far as distance is concerned, was Charles Wilfred Arter, pitboy in a mine in South Yorkshire, England. Charlie fell down a 1,554-foot shaft and escaped with only a broken leg. Halfway down the shaft he overtook an elevator cage which was going down almost as fast as he was. He landed gently on its roof and rode cozily the rest of the way down.

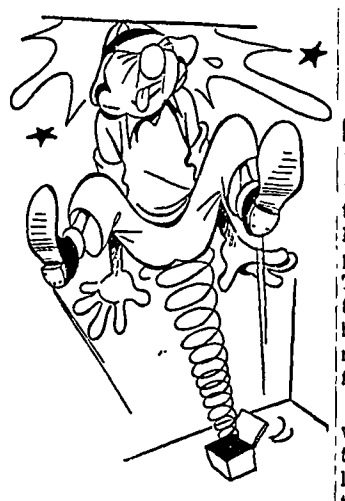
Out On A Limb.

Nearly everyone finds himself out on a limb now and then, and so did Victor Kerklo of Chester, Pa., one day last July. Victor solved the dilemma swiftly by — yes, you've guessed it—sawing off the limb between himself and the tree. The 20-foot drop convinced him there must be an easier way.

In Indianapolis the police department proudly sent forth its brand new white safety car. A few blocks down the street it smacked into a halted line of traffic and started cars bumping each other all along the line. The crestfallen caution car was taken back to police headquarters. It's safer there.

In San Francisco, Safety Leader Henry North launched the Green Cross safety drive with an impassioned plea for more care and fewer accidents. Finishing his talk to great applause, North smilingly waved his thanks as he bowed and backed toward his chair on the platform. He sat down—but not on the chair. Instead, he landed kerplunk on the floor, with the chair atop him. No safety talk ever ended with a more appreciative audience.

Leroy Thurman was helping open a case of compressed bedsprings in Oklahoma City when the springs



was catapulted against the ceiling and went to the hospital, where bed springs behave themselves.

A Good Line.

In another mishap, Mrs. Anne McGinnis fell from a fourth-floor fire escape, struck a clothes line at the third-floor level, was flipped through a window and landed in the second-floor bathroom of a startled neighbor.

Mrs. Lee Marksbury of Centralia, Mo., crawled uninjured from the wreckage of her car after it had turned over five times. She took a look at the debris, fainted and suffered a cut over the eye as she fell.

Out in Washington, the Gray brothers — Luther of Ephrata and Homer of Yakima—met for the first time in six years, shook hands so hard Luther's arm was fractured.

In Lille, France, Yvon Dherire, a tile setter, slipped off a roof, fell six stories and landed snugly in a baby buggy from which an observant

mother had frantically snatched her child. Dherire was unhurt. The mother fainted and broke an ankle. The baby was utterly fascinated.

This Must Be the End.

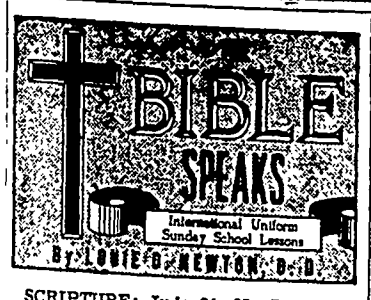
And in Chicago Miss Elinor Jones, petite young secretary, scoffed at masculine warnings in her office that the new long skirts were a tripping hazard, proudly sallied forth with the "new look," tripped and fell, cut her face. Next morning she dutifully reported the accident to her employer — National Safety council!

Color Will Supplant School Room Number

COLORADO SPRINGS, COLO. — Children who enroll in Palmer grade school, now under construction, won't have to remember their classroom numbers, but they may have trouble if they're color blind.

A modern color scheme provides for painting classroom doors the same color as the room. The various rooms are painted in contrasting colors.

"The child who is too small to read names or numbers will associate the color of the door with the room," Architect Edward L. Bunts explains.



SCRIPTURE: Jude 24, 25; Revelation 16-22; Matthew 2.
DEVOTIONAL READING: Psalm 145:1-13.

God's Eternal Rule

Lesson for December 28, 1947

THE last Sunday of another year brings us to a very fitting lesson, based on passages of Scripture found in Jude 24, 25, Revelation 16-22, and Matthew 2. The devotional reading is Psalm 145:1-13.

Dr. Newton

"Now unto him that is able to keep you from falling, and to present you faultless before the presence of his glory with exceeding joy, to the only wise God our Saviour, be glory and majesty, dominion and power, both now and ever. Amen," Jude 24, 25.

With this benediction, let us pause at the rapidly ebbing shoreline of the departing year, asking the meaning of God's goodness and mercy as reflected in the Christmas season and through all the days of our earthly pilgrimage.

As the Wise Men brought their gifts to the Divine Babe in Bethlehem, let us today wisely appraise his gifts to us during the past year, and examine our hearts to see if we are duly grateful.

* * *

Rich Gifts for Jesus

READ again the second chapter of Matthew, particularly the section which describes how the Wise Men brought their gifts — rare and precious gifts—to the Son of God. They were rich gifts, meaning that they were costly. We dare not bring anything to Jesus that does not represent a measure of sacrifice.

Contemplating the days ahead, what shall be the test of our gifts to Jesus? Shall we give him our left-over time? Shall we be satisfied to bring him a pittance of material gifts? Or shall our gifts, like the gifts of the Wise Men, be the first fruits of all his increase? He asks for our love, our loyalty, our glad and sincere devotion.

* * *

The Long Look

NOW we come to the heart of Sunday's lesson in Revelation 21:3: "He shall dwell with them, and they shall be his peoples." God's eternal rule will be gladly acknowledged and received if all place their hands in his hand at the gate of another year.

Nineteen forty-eight holds many question marks. People are afraid. They are confused. And here comes the message of Sunday's lesson — "He shall dwell with them, and they shall be his peoples."

The world is passing away, the lust thereof, but they that put their trust in God shall abide forever and ever. God's eternal rule has been vindicated in history. It will be vindicated again and again in the coming year wherever his people cast themselves in unwavering faith into his care and keeping.

We shall do well to read again and again the chapters in Revelation, 16-22, and see how all who walked with God were victorious, and how all who forgot him and forsook his ways, were destroyed.

Do we not see the clear application for our day and generation? The nations that forget God do die.

* * *

God's Eternal Rule

LET us turn now to the verse in Psalm 145, which reads: "Thy Kingdom is an everlasting kingdom, and Thy dominion endureth throughout all generations."

Every thoughtful person is today wistfully searching for certitude — for the assurance that behind these dark clouds that lower over our frightened world the sun still shines. Better, that the sun shall break through these clouds.

Our lesson gives that very assurance. This is our Father's world. He lives! He reigns! And he waits to reveal himself to us in wisdom and power. He will not force himself upon us. We must open the door to him. He stands and knocks.

Is that not enough to bring us to our knees in the fervent prayer, "Thy Kingdom come. Thy will be done in earth as it is done in heaven."

Beginning in the home, and spreading into every area of life, may the truth of Sunday's lesson become the watchword of America and of all lands as we enter upon the New Year. Thus panoplied; we shall be strong and prepared to meet and master every problem at hand and ahead.

"Our God our help in ages past,
Our hope for years to come.
Our shelter from the stormy blast,
And our eternal home."

FIRST AND SECOND GRADE NEWS

—Teacher, Miss Halfwassen

Our room is filled with excitement, waiting for Christmas. Our room is decorated very pretty. We have a fireplace and a tree with bubble lights. We surely enjoy them.

Thursday afternoon we had lots of fun. We invited our mothers to a Christmas Tea Party. We sang Christmas carols accompanied by Iris Rosendahl on the piano. During the program the mothers and pupils were served. Mrs. Kudje poured for the mothers and Mrs. Harvey Barz poured for the children.

Everyone enjoyed themselves immensely.

FRESHMAN NEWS

Reported by Ruth Lacey

School has been swinging along merrily for the Freshman. Most of us have been counting the days until Christmas vacation.

Algebra is getting harder as it goes along. We are now learning how to multiply and divide signed number. We had a test Thursday. We have not received our papers yet so we don't know our grades. Hope they are good!

English is also getting harder for some of us. We are on the unit of punctuation simple sentances.

Home Economics is rather interesting. We have had quite a few labortories on luncheon and supper. Thursday we helped with Miss Halfwassen's tea.

Science is getting easier believe it or not. We are studying the importance of industry. Every Friday we have reports from the Popular Science magazine. They are quite interesting also.

SOPHMORE NEWS

—By Luella Priebe

The manual training class has been kept rather busy the past week finishing various articles. Don is making a big shelf, Merlyn, Eugene, Willis and Merlin are making gun racks. Dorance is making a hall tree, Marvin and Calvin are making wall plaques, and Virgil is making a shelf.

The Home Economics class has been trying out different ways of fixing salads, potatoes and bread. Ruth and Gloria are racking their brains for an idea for a centerpiece for the faculty dinner.

Biology is rather interesting now. We are studying about conservation of forest and wildlife.

We are reviewing punctuation of sentences in English. We first finished studying vocations.

We have had several new theorems in Geometry to struggle with.

JUNIOR CLASS NEWS

—By Phyllis Boland

A test which proved rather difficult for most of us was given in Algebra III. We have now entered a chapter on exponents and adricals and we all hope that this chapter will not be as difficult as the last one.

Our aim in English has been to build clear, correct sentences and making them sound pleasing and forceful.

Typing has been a series of paragraphs which have to be typed perfectly. We are finding in our speed tests that accuracy is valued as highly as speed. Mr. Patterson has informed us that the remainder of this semester we will work on accuracy.

Christmas vacation will be here soon, to the great relief of teachers and pupils. However, January 5th will find us back at school doing the old routine. So until then, have a grand time during vacation.

A Note From The Seniors

—By LaVonne Beier

The Senior class is getting more and more restless with the approaching of Christmas and another vacation which we feel we have all earned.

English class has been very interesting lately. We have been working on a section called "Our National Literature". It is very helpful to us but rather deep and hard to understand.

In history we are working in our notebooks on the expansion of the United States to the west and the Mexican War. This, along with "small" quizes Mr. Kingery has gotten into the habit of springing on us, has kept us pretty busy.

The Speech class has been very busy learning their parts in a play called, "The Little Shepherd Who Was Left Behind," which they will present to the high school at a Christmas party on Dec. 24th' Those who are not in the play have been studying speeches of presentation and farewell.

"Does anybody have an ink eraser?" is a question which can be heard floating through the Bookkeeping class these days. We are now working on our Practice Set in which we have to keep a set of books for a grocery store for one month. This set is supposed to keep us busy until the first week after Christmas vacation but some of the class have already finished.

Those who take Algebra III had a test Wednesday over the chapter on imaginaries. They are now beginning a unit on Exponents.

The Sociology class is studying about Mental Deficiency. Many of the class members are now discovering why their grades aren't so high.

Merry Christmas, everybody!

Killing Off Rats Is One Way To Cut Down Waste Of Grain And Other Food

Farmers and city folks who are out to rid themselves of rats this winter are matching wits with some wily creatures, Harold Gunderson, Iowa State College entomologist said this week.

It takes a well-balanced program to get them off your place and keep them off. Yet rat control this year not only is patriotic, but pays off in dollars and cents.

Rats are destroying untold amounts of grain and other stored food—food that is costly and is badly needed if the United States is to meet its commitments abroad.

Rat Appetite Big

One of the easiest methods of stretching our food supplies is to eliminate waste, Gunderson pointed out, and a big waste in America can be charged up to the appetites of millions of rats. Twenty rats will eat and ruin 1 ton of grain in a year—200 rats will do the job in 30 days. Kill the rats and ship the ton of grain to Europe.

As long as the temperture remains above freezing rats can be killed by poisoning, the Iowa State College entomologist said. That's the most effective way. When the weather gets cold, bait such as ground meat freezes and the rats won't eat it. If this happens you can mix poison with cereal to make a semi-drfy bait.

Gassing Rats

Calcium cyanide can be used effectively for gassing rats in warm weather. In cold weather carbon monoxide is better. Use gas only where it can be confined in burrows or under tight floors. Gas won't work in a corncrib. Remember, too, that it is dangerous to all animals and to the man who does the gassing.

Traps are all right, but rats soon catch on to traps, and learn to leave them alone. Shooting helps, but again, the rats don't take long to learn to stay out of the way of a rifleman. Dogs can be effective against small rat populations.

Using Antu

One good method is to use Antu as a "Tracking powder." The poison can be bought ready mixed, or pure Antu can be purchased and mixed with talc or flour to form a 5 or 10 percent dust. Blow or sprinkle the dust in rat burrows. There it gets on the bodies of the rats and they are poisoned as they lick it off.

Gunderson warned, however, that even in controlled experiments only 50 percent of the rats are killed in this manner. The rest become resistant to the poison, and as new generations are born they also quickly become immune. This immunity last for 30 days or more unless they are again touched with the poison and again made immune.

Destroy Rat Harbors

All of the poisoning, trapping, gassing and shooting won't be much help anyway, unless rat harbors are destroyed, Gunderson declares. Old piles of lumber and junk must be cleaned up. Buildings need to be made "rat-tight",. and doors kept closed if rats are to be kept away.

Use repellents such as creosote and sulfur to keep rats away from some areas. One pound of sulfur per 100 bushels corn as it is cribbed will prevent rat damage if there are only a few rats. However, Nothing will keep a hungry rat from eating—so don't expect creosote to do the whole job. Kill off the bulk of the rats first.

Children May Help In Holiday Preparations

Let's not let the "material trappings" of Christmas festivities "get us down" is the timely bit of advice offered by Mrs. Alma H. Jones, child development and family relationships specialist of Iowa State College.

Never, she points out, should the actual preparations for Christmas prevent us from giving what is most important of all to our families— our best selves.

The children at Christmas may be initiated into the joys of giving as well as receiving. Let them in on the plans and preparations, Mrs. Jones suggests. There are too many parents who with mistaken pleasure work hard to plan the whole Christmas themselves and then spring a great surprise on the children. A child misses much of the greatest enjoyment if he doesn't share in "making Christmas" himself.

If you're one of the mothers who find the holiday preparations so strenuous you're "glad when it's all over," you may find this year that the children's help is indeed valuable.

PICK HEALTHY GILTS FOR STRONG LITTERS

Watch out for the flu when selecting gilts for spring farrowing, E. L. Quaife, extension swine specialist at Iowa State College, warns hog raisers.

He points out that this is the time of year when flu is most prevalent. Gilts sick with flu should not be bred until they are well restored to health, even though this makes them farrow later than is normally desired. Flu at breeding time can result in disaster next spring, Quaife warns.

While it is always advisable to pick well developed gilts for breeding, shorter rations and higher expenses will force the use of smaller, less mature females this year. Quaife thinks it is best to breed these smaller gilts late. This, plus good rations throughout the gestation period, will help the young sows to develop and will have them in shape and will have them in shape to produce strong, healthy litters by farrowing time. Too, late breeding allows for farrowing on pasture under favorable conditions.

In general, later breeding is advised this year. Warm, sunny weather will help save more pigs. Quaife further points out that late-farrowed pigs can be fed more of the 1948 corn crop. They also will make better use of grain-saving pasture.

Rats eat between 10 and 20 million dollars worth of corn, small grain and other feed in Iowa each year. You help support these rats if you haven't started a general rat clean-up campaign.

LOST PACKARD

Former Governor of Iowa, Dan Turner and Mrs. Turner figured in an automobile fire that destroyed their 1941 Packard convertable recently. They were enroute to Iowa City for Thanksgiving when the engine caught fire. Mr. and Mrs. Turner were barely able to remove their personal belongings before the flames drove them away.

SAVED DOG

At Storm Lake, war veteran Elmer Scott saw a dog which had fallen through the ice into the lake. Scott inched his way out on the thin ice, about 500 feet, and pulled the dog out. The rescue was in vain; the dog died from schock and exposure soon after.

NO OTHER OATS IS EQUAL TO CLINTON

Best In Yield, Stiffness Of Straw and Resistance To Disease

Clinton is still the highest yielding, stiffest strawed and most disease-resistant oat variety available in quantity anywhere in the United States or Canada, according to community oat trials completed this year by Iowa State College agronomists.

Ed Dyas, extension agronomist, points out that other varieties may average a little higher in a few outlying plots and in some small districts, but in every section of Iowa where enough trials were made to give a reasonably accurate rating Clinton was on top.

Benton Second

Close behind Clinton was Benton and Marion. Benton was second to Clinton in stiffness of straw, yield and disease-resistance. Marion was best adapted to soils of lower fertility where lodging isn't likely to occur. Dyas says the trials showed that Tama, Boone, Control and Vicland—any selections involving Victoria—should be discarded. They are susceptible to the new blight, and getting rid of them is the most practical control of disease.

In the 51 community oat trials the 10 varieties that were believed to be the best for demonstration comparisons were tested. Five of the relatively new selections; Clinton, Shelby, Benton, Mindo and Bonda—were compared with Marion, Tama, Boone, Gopher and Iowa 105.

Shelby, a new Iowa selection of which there is no seed available, was second in the trials. Then came Mindo, a shorter and earlier Minnesota variety, followed very closely by Benton. Dyas pointed out that Mindo and Benton are so close in yield that there is no practical difference. Marion and Bonda finished the list of the top six.

Old Varieties Low

The six top varieties averaged 67 bushels per acre in the 51 plots. Clinton alone averaged 72 bushels. Gopher, Iowa 105, Tama and Boone averaged 50 bushels. Dyas points out that a 17-bushel increase can be credited to new var Clinton yielded 22 bushels than the old varieties.

None of the so-called "ton-like" oats are better Clinton, he says. Some earlier and shorter and taller, but all of them were carded in favor of Clinton.

Neither are any of the dian varieties equal to Cl Ajax has been the best Can variety but it is susceptib crown rust, the common of smut and is not as high ing or stiff-strawed as Cl In trials at Ames and at wha, Ajax has averaged lighter in test weight per el. Dyas pointed out that quite a difference in fe value.

TO GREET YOU AT Christmas

REVERDY MACE

Your Register & Tribune Carrier

One man — one of many — created a character who in child-like faith and all-embracing love will live through the centuries as the symbol of Christmas.

The man was Charles Dickens; his character was Tiny Tim. And in the words of Tiny Tim, oft-repeated, we'd like to say:

"A MERRY CHRISTMAS, GOD BLESS US EVERY ONE"

Larson's Hiway Service

Carold Larson, Prop.

NCOCK COUNTY BOARD PROCEEDINGS

ADJOURNED SEPTEMBER MEETING

Garner, Iowa
November 3, 1947

Hancock County, Iowa, Board Supervisors met in session on the captioned date pursuant to journment with F. J. Schoun, J. Chambers and Geo. Th. Gerdes, sent.

The minutes of the last meeting re read and approved as read.

WHEREAS, C. F. Merten, County Engineer, has to report that ... Construction Company of ... Moines, have completed their ntract for the placing of steel on ...ock County bridges to his en- satisfaction and there is due said contract a final estimate the sum of $172.44.

NOW AND IT IS THEREFORE SOLVED by the Board of Supervisors of Hancock County, Iowa, the report of the engineer be and the same is hereby approved the final estimate ordered paid by law directed.

In the matter of Roy D. Clark et for the establishment and con- ction of a new drainage dis- ct in Section 27, 28, 33 and 34 in nship 96, Range 26. Wm. Hen- chen is hereby appointed, engineer make an investigation and sur- on the feasibility and neces- of such establishment and con- uction.

BE IT RESOLVED by the Board Supervisors, in and for Hancock unty, Iowa, that the agreement Robert L. Goethe, relative to flow water on the Southeast ner of the SE¼ of Section 21, wnship Township as set out in a ter to the Hancock County, Iowa rd of Supervisors, dated Oct. 1947, which letter is made a t of this resolution, be and the is approved to the extent t every reasonable effort will be de to provide culvert space to e care of additional overflow , which would accumulate due the raising of the grade on the t-West Road referred to in the attached hereto.

The foregoing resolution was ed and read by Supervisor , who moved its adoption. nded by Supervisor Schoun, upon the chairman placed the on of its adoption and upon ll the vote thereon is F. J n, Geo. Th. Gerdes, and John bers, aye. Nays, None. upon the chairman declared resolution duly adopted.

WHEREAS, Wm. Henschen has report that Roy I. Schaefer of ne and Concrete Products ration of Humbolt have com- d their contract for labor and ial respectively and there is on said contracts a final esti- in the sum of $141.83, due I. Schaefer and a final esti- in the sum of $259.06, due rete Products Corporation.

NOW AND IT IS THEREFORE OLVED by the Board of Sup- rs in and for Hancock Coun- Iowa, acting for and in behalf Drainage District No. 8, that report of the engineer be and ame is hereby approved and 8th day of December A. D. at the hour of 11 o'clock A. M. the date and hour fixed for final ing thereon.

the county Auidtor be and he is by directed to cause notice of h hearing to be published in the t News Tribune, a newspaper lished in Britt, Iowa, as direct- by law.

WHEREAS there are outstand- warrants and defecits on the owing named reclassified drain- districts in Hancock County, a, for minor repairs to said dis- s and it is deemed for the best rests of the tax payers in said ricts that a levy be made at time to provide funds for the ment of such defecits and out- ding warrants and

WHEREAS such sums are less an 10 percent of the original cost said districts and laterals ned.

NOW AND IT IS THEREFORE OLVED by the Board of Sup- rs in and for Hancock Coun- Iowa, acting for and in be- f the following numbered districts that there be the percentages of the orig- assessment on said districts, opposite each numbered dis- as follows

District	Per Cent
15	5
29	5
38	5
39	2
41	8
43	2
47	3
53	5
76	3
97	2
106	5
116	2

AND IT FURTHER RESOLVED the levies hereinbefore set out be extended against all tracts, lots, parcels, highways and rail- ads in the district according to original classification of the districts before numbered districts when so extended to be col- lected with the regular tax of 1947 be collected in 1948 as by law provided.

In the matter of a cleanout of ditches in Drainage Dis- No. 3 and 4, Hancock Coun- Iowa, petitioned for by E. E. Bonor et al.

WHEREAS Wm. Henschen was appointed engineer as command- by Chapter 455 Code of Iowa, A. D. 1946 and laws amendatory thereto and said engineer did on November 4, A. D. 1946, make a survey, investigation, report on the feasibility and establishment of the cleanout petition- filed by E. E. Bonor et al in Drainage District 3 and 4, Han- County, Iowa, and said en- did file his report on Nov- ber 3rd A. D., 1947, which re- shows that he has investi- and surveyed the lands in District No. 3 and 4, that the open ditches are with silt to the extent that telephone lines are partially fully submerged and does the drainage originally and recommends that the petitioned for be made as the prayer of the pet- with, and will be conducive to the welfare, and con- the benefit to be de- be greater than the cost

AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of the following numbered drainage districts in Hancock County, Iowa, that there be levied against each district lateral the amount set opposite numbered district.

Drainage District

Lat 7	100

BE IT RESOLVED, that the levies hereinbefore set out be extended against all tracts, lots, parcels, highways and railways in the district according to original classification of the districts before numbered districts when so extended to be collected with the regular tax of 1947 payable in 1948 as by law provided.

In the matter of a cleanout of ditches in Drainage District No. 3 and 4, Hancock County, Iowa, petitioned for by E. E. Bonor et al.

WHEREAS Wm. Henschen was appointed engineer as commanded by Chapter 455 Code of Iowa, A. D. 1946 and laws amendatory thereto and said engineer did on November 4, A. D. 1946, make a survey, investigation, report on the feasibility and establishment of the cleanout petition- filed by E. E. Bonor et al in Drainage District 3 and 4, Hancock County, Iowa, and said engineer did file his report on November 3rd A. D., 1947, which report states that he has made a survey and investigation of the lands in the district petitioned for by Ben V Greiman, et al and finds that the proposed establishment and construction thereof will be conducive to public health, welfare, convenience and utility and the benefits to be derived are greater than the cost thereof and recommends that said district be established.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of the proposed drainage improvement petitioned for by Ben V Greiman et al, that the report of the engineer be and the same is hereby approved as a tentative plan and may be amended at any time before final action thereon and said report of the engineer and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 2 30 P M on the 12th day of January A D 1948

BE IT FURTHER RESOLVED that the county auditor be and he is hereby directed to cause notice of hearing on the report of the engineer and plan of said improvement to be published in the Garner Leader and Signal, a newspaper of general circulation published in Garner, Iowa advising all owners, occupants, lienholders and encumbrancers of record in the watershed of the proposed improvement, of the pendency and prayer of the petitioners, the favorable report of the engineer thereon, the approval by the Board of Supervisors of the report of the engineer as a tentative plan and that all objections to such establishment and claims for damages shall be in writing and must be filed with the county auditor at or before the time set for hearing thereon.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption, was seconded by Supervisor Gerdes, whereupon the chairman, John Chambers, in the chair, placed the motion of its adoption and upon roll call, the vote thereon is F J Schoun, George Th Gerdes, and John Chambers aye Nays None Whereupon the chairman declared the resolution duly adopted

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the county auditor be and he is hereby directed and authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim, all as by law provided.

REGULAR NOVEMBER MEETING
Garner, Iowa
November 10, 1947

The Hancock County, Iowa, Board of Supervisors, met in session on above captioned date pursuant to adjournment with Supervisors F J. Schoun and Geo. Th. Gerdes present. Absent John Chambers.

In the absence of the chairman, F. J Schoun was appointed chairman pro-tem.

The minutes of the last meeting were read and approved as read.

On motion and second the report of Weed Commissioner Ray Hunsley, is approved.

On motion and second the bond of Schram Brothers, contractors, is approved.

This being the 10th day of November A. D., 1947, a date heretofore fixed for a hearing on the final estimate and engineers report recommending acceptance of the contract with Clarence Stone, Contractor, on the labor on the construction of Drainage District No. 138, Hancock County, Iowa, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised, said hearing was held as scheduled. There being no objections on file oral or written-

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors, acting for and in behalf of DD No. 138, Hancock County, Iowa, that the report of the engineer be approved and the final estimate in the sum of $1420.26 is hereby ordered paid.

WHEREAS, there are deficits and outstanding warrants on the following named reclassified drainage districts and laterals thereof in payment of repairs and

WHEREAS it is deemed for the best interests of the taxpayers in said district that a levy be made at this time to reimburse said districts for outstanding warrants and deficits.

BE AND IT IS THEREFORE RESOLVED by the Hancock County, Iowa, Board of Supervisors acting for and in behalf of the following named reclassified drainage districts and laterals thereof, that there be and is hereby levied the sums set opposite each named district and lateral as follows:

Drainage District No. 3 and 4

Lateral No. 6	$135.00
Lateral No. 10	625.00
Drainage District No. 10	
Laterals No. 10	$410 00
Lateral No. 2B	270.00
Lateral No. 7	150.00

Drainage District No. 1 and 2 South Main, $68,000.00.

BE IT FURTHER RESOLVED that the levies hereinafter set out be extended against all lands, tracts, parcels, highways and railways in the watershed of the hereinbefore mentioned district in accordance with the reclassification of said districts and when so extended to be collected with the regular tax of 1947, payable in 1948, all a provided for by law.

WHEREAS, there is in the hands of the County Treasurer, Roy D. McMillin, $101,592.96 in the Hancock Memorial Hospital Fund and it is deemed advisable that said money be invested in United States Treasury Obligation Certificates.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the County Treasurer be and he is hereby authorized and ordered to invest $100,000 in United States Treasury Obligation Certificates.

On motion and second the board adjourned to Wednesday, November 19, at 9 o'clock A. M.

1ST ADJOURNED NOVEMBER MEETING

Garner, Iowa
November 19, 1947

The Hancock County, Iowa Board of Supervisors met in session on above captioned date pursuant to adjournment with F. J. Schoun, John Chambers and George Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

On motion and second Improvement Certificates No. 13, 14 and 15 on Drainage District No. 8 are approved.

WHEREAS, Wm. Henschen, Engineer has to report that Concrete Products Corporation of Humbolt have completed their contract for material on DD No. 146 to his entire satisfaction and there is due on said contract a final estimate in the sum of $359.09.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of Drainage District No. 146, that the report of the engineer be and the same is hereby tentativly approved and final hearing on said report and final estimate will be held at the Courthouse in Garner, Iowa, at 10:30 A. M. on the 15th day of December A. D., 1947.

The county auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune a newspaper of general circulation published in Britt, Iowa.

WHEREAS, C. F. Merten, Engineer, Wm. Boehnke and Walter Kahl were heretofore appointed commissioners to view, classify and assess benefits in the watershed of Drainage District No. 144 Hancock County and all lands as shown in the reports of C. F. Merten, Engineer dated September 23, 1946 and July 2, 1947, and assess benefits all in accordance with Chapter 455 Code of Iowa A. D., 1946, and laws amendatory thereto.

WHEREAS, said commissioners did qualify as by law directed and did view said lands and did assess benefits, as by law directed and did file their report on the 19th day of November A. D., 1947, which report sets out in detail the assessment against each tract and parcel of land and railwys and highways in the district as directed by law.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 144, and all added lands Hancock County, Iowa, that the report of the Commissioners heretofore appointed to classify land and assess benefits in the watershed of DD No. 144, Hancock County, Iowa, is tentatively approved and a hearing thereon will be held at the Courthouse in Garner, Iowa, at 1:30 P. M. on the 31st day of December A. D., 1947, at which time taxpayers in said district will appear and show cause why said classification and assessment designated, shall not be accepted and assessment taxed against the lands in the watershed of DD No. 144, Hancock County, Iowa. All objections to such classification and assessment of benefits shall be in writing and filed in the office of the County Auditor at or before the time set for the hearing thereon.

The county auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune a newspaper of general circulation published at Britt, Iowa, setting out the names of the owners of lands in Drainage District No. 144 and added lands, Hancock County, Iowa, together with the description of real estate and the designated assessment, each tract, parcel of land, high way and railway in the district is charged with

The foregoing resolution was offered and read by Supervisor F. J Schoun, who moved its adoption was seconded by Supervisor Geo. Th Gerdes, whereupon John Chambers, Chairman in the chair, placed the motion on its adoption and upon roll call the vote thereon is F J Schoun, George Th. Gerdes, and John Chambers aye. Nays, None. Whereupon the chairman declared the resolution duly adopted

On motion and second the board adjourned to December 3, A. D. 1947, at 9 o'clock A. M.

2ND ADJOURNED NOVEMBER MEETING

Garner, Iowa
December 3, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with J. A. Chambers, F. J. Schoun and George Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

BE IT RESOLVED, by the Board of Supervisors in and for Hancock County, Iowa, that the claims for text books as submitted in the report of County Superintendent Chas. Whitney, are hereby approved and the county auditor be and he is hereby directed to cause warrants to be drawn in payment thereof.

WHEREAS, Wm. Henschen, Engineer, has to report that Nielsen Bros, of Onawa, Iowa, and Omaha, Nebr., have completed their contract for Section 2 of their contract for ditch excavation on Drainage District No. 8, to his entire satisfaction and WHEREAS there is due on said contract a final estimate in the sum of $2,790.56 on said contract.

BE AND IT IS THEREFORE RESOLVED, by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of Drainage District No. 8, that the report of the engineer be and the same is tentatively approved and the 31st day of December A. D. 1947, at the hour of 1 P. M. at the Courthouse in Garner, Iowa, is hereby fixed as a time and place for hearing thereon.

The county auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune, a newspaper published in Britt, Iowa, as by law directed.

WHEREAS, C. F. Merten, Engineer, has filed his report recommending a letting on bridge lumber to be used in the construction of new bridges and the repair of existing bridges during 1948 and it is deemed for the best interests of the taxpayers in Hancock County, Iowa, that such a letting be held at this time.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that a letting on bridge lumber be held at the Courthouse in Garner, Iowa, at 1:30 P. M. on the 22nd day of December A. D., 1947.

The county auditor be and he is hereby directed to cause notice of such letting to be published in the Kanawha Reporter, which notice shall state the time and place of letting, the approximate and kind of material to be purchased and that the board reserves the right to waive technicalities and to reject any or all bids and such other incidental information as may be deemed advisable for full information to bidders.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the county auditor be and he is hereby authorized and ordered to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

CHRISTMAS
1947
Same Old Wish

Year after year we have been wishing our friends a Merry Christmas each year hoping to make our message a little warmer, a little more personal.

It is with some such thought as this that we now add this "Merry Christmas" to the many that have gone before, with the hope that it will find you abundantly blessed with everything that the magic wand of Christmas can bestow.

Since 1892

St. Nicholas WISHES A MERRY YULETIDE TO ALL

Of Course you believe in Santy!... But even if you don't right now, the chances are ten to one that at one time in your career — the short pants or long curls stage — there was no doubt in your mind that there was a Santa Claus. You not only believed in him but you were in awe of him!

Santa Claus was a short roly-poly gentleman habitually clad in red with flowing white beard. He drove through the world Christmas Eve in a heavily-laden sleigh drawn by eight dashing reindeer.

It's a beautiful old myth — as much a part of the joyous Christmas season as is our annual wish for a Merry Yuletide for you and yours!

Time To Be Happy!

Christmastide is the one time in the year when we should all be as happy as a boy with a bright new sled. So let's light up our faces and our hearts when we light up our trees, and here's wishing for you and your family the happiest Christmas you've ever had.

LOST COW

Herbert Green, Pottawattamie county farmer, lost five cows in forty-five minutes recently when they ate some second-growth hegari sorghum. He probably would have lost all 45 head if he had not noticed the cattle becoming sick shortly after they had been turned into pasture. The rest were driven out. A veterinarian saved five more.

OLD PONY

Donald Ray Bills, 10, of Exira, is getting an early start on his hobby of collecting miniature horses. He now has 32, ranging in size from a 11-inch white pottery horse from Mexico to a tiny hand-carved Italion steed. But the favorite is his live pony, "Dick", who belonged to his father before and is now 32 years of age, probably the oldest pony in the county.

KLEMME LOCAL NEWS

Send in your news item and advertising copy early for the next issue of The Times.

Advertise with a Times want ad.

Fernon Griggs of near Miller, was in Klemme on business Monday afternoon.

Mr. and Mrs. E. M. Schlei of Fenton spent Sunday visiting with Klemme relatives.

Mrs. Henry Voetberg of Garner, was shopping in Klemme Friday.

Mr. and Mrs. Paul Grange of Mason City were visiting with Klemme relatives and friends Friday evening.

Mrs. W. C. Keraus has been assisting at the Post Office during the past week while the holiday mailing rush was on.

Miss Helen Albers, who is teaching at Dumont this year, came Friday to spend the Christmas vacation with her parents, Mr and Mrs. George Albers.

A Watch Night Program will be given at the Klemme Methodist Church on New Year's Eve from 9:00 to 12:01. Games, food and worship.

Mrs. J. N. Day went to Mason City Saturday evening and visited until Monday at the Dorance Day home.

Mr. and Mrs. Clifford Montgomery and children enjoyed a pre-Christmas dinner and gift exchange at the Welker home in Clear Lake Sunday.

Saturday evening the Court House officials held a dinner and Christmas Party at Hull's Cafe. Needless to say, they had a very enjoyable time.

Mr. and Mrs. Art Hanson and family and "Bud" Polsdofer of Garner and Mr and Mrs. Art Polsdofer and family of Klemme were visitors at the Glenn Bier home near Goodell Sunday evening.

Dr. and Mrs. A. H. Dulmes and Dick and Gertrude Grosshuesch were guests Friday evening at a Christmas Party at the Dr. Hamilton home in Garner.

Dr and Mrs. D. P. Anderson and Neva Ann left Friday on a trip to California where they are visiting relatives and friends over the holidays.

Mr. and Mrs. Clark Jennings and family of Estherville, Ia., stopped over at the Lee Jennings home Friday for dinner enroute to Miami, Florida where they will spend Christmas.

Keith Stille of the U. S. Navy and wife returned to Norfolk, Va. last Wednesday after visiting over the week end with Klemme relatives and friends. Keith has re-inlisted in the Navy.

KLEMME LOCAL NEWS

Mr. and Mrs. Harold Quintus of near Garner flew to Rapid City, South Dakota last week and visited with the Paul Stromer family. Dick Baman, of Klemme, who was visiting there also, returned home with them in their plane.

Lee Jennings' brothe, Graham of Donnellson, Iowa, lost his implement business by fire last week. Besides a large stock of parts, he also lost nine Farmall tractors and four International Trucks. A nearby residence was totally destroyed in the fire estimated at a loss of over $50,000.

Mr. and Mrs. Wm. Reuben and Della, Mr. andMrs. Bill Mewes, and Gary Lee and Barnard Tofty of Kanawha were dinner guests of Mr. and Mrs. George Albers and Helen on Sunday. The event being the baptism of Gary Lee Mewes, great grandson of Mr. and Mrs. Geo Albers.

Mrs. Lee Jennings' parents, Mr. and Mrs. R. M. Van Winkle arrived in Klemme Saturday from Rochester, Minn. They will visit here until Tuesday when they will accompany Mr. and Mrs. Jennings to Spencer where all will be Christmas guests in the home of Mr. and Mrs. Rollie Fingerson Other guests will be Mr. and Mrs. Wayne Van Winkle and family of Aberdeen, South Dakota.

AROUND IOWA

COSTLY CIGARETTE

While driving through Osceola recently, Gerald Adamson dropped a cigarette, leaned over to pick it up. His car swerved and ran into the parked car of Ronald Bead, resulting in damage to Adamson's car of $150. What is worse, the car he hit was the ony one parked on the street.

HIGH-FLYING GRANDMA

Mrs. J. C. Johnson, Shelby county's oldest resident, celebrated her 95th birthday recently by enjoying her first airplane ride. She enjoyed the trip thoroughly, hopes to "go again next year."

BUILT HIS OWN

High prices hold no fear for farmer Paul McVinua of Battle Creek. Needing a new tractor, he made his own by combining the engine of a John Deere Combine, a Chevrolet transmission and a Model T rear end.

INFLATION DANGER THREAT TO NATION

Longer Work Week Will Help Situation, Iowa State Economist Says

Increased inflation dangers are the big threat for Iowa and the United States at present.

While crop and price prospects for early 1948 are good, further inflation could quickly reverse the outlook for both agriculture and industry, reports Iowa State College farm economist Francis Kutish

Causes

The inflation tendencies result from the rise in total expenditures for business and the consumers during summer and fall of 1947 and the failure of production to keep pace. The consequence was a marked rise in prices.

Correction of this condition is not clearly in sight, according to Kutish. Industry can boost its output only slowly. There is little unemployment, so extra workers cannot be put on the job. Nor is there extra steel or other critical raw materials with which to push output. However, a longer work week would help this situation somewhat, he points out.

Farmers

Farmers are in a similar position. This year's corn crop was small. And, while wheat and vegetable oil supplies have been big, demands for both are also big. Farmers can't step up livestock production on short feed supplies.

If further inflation comes, grain and livestock prices will probably shoot up most because they are staples in our diets. But, as history shows, the products that go up the most are the ones that are hit the hardest when, and if, a collapse comes. That is the real danger the country faces if it doesn't do everything possible to hold down the inflation spiral, Kutish says.

HOME MADE TRUCK

Clarinda built a new "auxilary" fire truck recently for use in fighting out of town fires, or others beyond fire hydrants. City manager McCabe directed construction of the truck, which consists of a large tank on an ordinary pickup, with a small pump on the rear for pressure.

IS 101

At Sibley, last month, Hans Rohlfsen celebrated his 101st birthday. Mr. Rohlfsen is still sprightly and last summer put in and tended a sizable garden. All of his children, for the first time in 10 years, gathered at Sibley for the occasion.

KILLED

Hunting accidents are the bad news of the week in Iowa. At Belle Plaine, Harold Vandivier, 15, killed himself as he clubbed a wounded rabbit with his shotgun, the weapon discharging into his body At Lorville, businessman John Murphy was hit in the chest by a shotgun charge, intended for a covey of quail flushed by his hunting companion. Near Sioux City, Dean Sandquist of Villisca was hit by flying shotgun pellets which had been aimed at a rabbit.

RECKLESS FLYING

For flying his light plane low over a school house so that he could look in the second story windows at his cousins, and later "cracking up" in an attempted landing nearby, Duaine P. Keller, 20, of Melvin was fined $50 and costs by Justice George Patterson last week Keller, with 12 hours of flying time to his credit, told the officials that he was a "crazy fool" There was no argument.

FATHER

At Maquoketa, a new-photographer Keith Francis waited in the police station, to get a picture of the first parking violator when Maquoketa's new parking meters went into operation. The first person to come in with a "summons" was S. N Francis, the photographer's father.

Card Of Thanks

I wish to take this way of expressing my thanks to all my friends who sent me cards, and letters and who visited with me at the Veterans hospital in Des Moines. Bob Hartzell. (1tp)

We would like to take this means of thanking those members of the Ladies Aid of the Evangelical and Reformed Church and our neighbors for making us very happy by coming to our house to sing Christmas Carols, on Saturday afternoon, Mr. and Mrs. Geo. Albers.

CAN STOP CANNIBALISM BY DEBEAKING LAYERS

Cannibalism in chickens takes an exceptionally heavy toll in Iowa poultry flocks during the winter when the birds are housed, says Dr. C. D. Lee, extension poultry veterinarian at Iowa State College.

Flock owners find that this condition, which is a vice and not a disease, occurs in all breeds. However, it is generally reported more frequently in the lighter breeds.

For years poultrymen have been looking for ways to prevent cannibalism. It has been recommended to increase the amount of oats or oat hulls in the ration. Flock owners have tried mixing 1 to 3 percent salt with the feed or up to 1 percent in the drinking water and mechanical devices All of these have given results in some instances but have not been uniformaly successful, Dr. Lee says.

He points out that one way to control cannibalism is to pare off the ends of the upper beak of the birds. This can be done when the chickens are culled at housing time or shortly after they are housed.

Debeaking can be done by several methods. An electric debeaker that removes about one-fourth of the upper beak is on the market. It uses an electrically heated knife and cauterizes as well as cuts. A heavy pair of shears, tin snips or a pair of serrated shears will work, Dr. Lee says.

He warns not to take off more than one-fourth inch or just enough to start bleeding. Serrated shears are better than the ordinary types as they leave a tearing rather than a clean cut.

Dr. Lee points out that reports from experience outside Iowa show that debeaking does not cause less feed consumption, resulting in low egg production. However, he recommends feeding grain in troughs as it is hard for the debeaked birds to pick grain from the floor.

GRIND SLOWLY

Henry Fowler, Charlton, has been notified that the government is forwarding his medal and citation for the Purple Heart. The mills of the war department grind slowly. Fowler was wounded in World War I.

HORSES SHOT

Near Hull, two horses belonging to John Schoep were badly wounded in the legs, apparently by pheasant hunters. The injuries apparently were several days old by the time the animals came back to the farm yard. Both animals may be lost.

Iowa Farm Bureau Resolution On Special Session Of The Iowa Legislature

There have been persistant reports that a special session of the Iowa Legislature would be called for the purpose of reducing the Iowa Net Income Tax. We, official voting delegates representing 100 organized County Farm Bureaus, are speaking for a membership of over 126,000 farm families, are unanimously opposed to the calling of a special session of the Legislature and the reducing of the Iowa Net Income Tax, for the reasons that:

1. The Iowa Net Income Tax is the most fair and equitable tax collected in the State of Iowa because it is based upon "Ability to pay."

2. The reduction of the income tax at a time when income is high contributes to an inflationary spiral.

3 The reduction of the income tax at a time when incomes are high and the increasing of the tax, as has been proposed, at a time when incomes are low results in further depressing our economy during deflationary periods.

4 The full collection of the Iowa Income Tax is one guarantee that much needed funds for the betterment of our schools and roads will be available for these vitally needed programs.

5. The Net Income Tax should be collected in full to the end that these funds may be used to help make the necessary repairs and improvements in our state institutions.

You can help your home town by buying that Christmas Gift in Klemme.

The FICTION Corner

QUICK CHANGE

By FRANK L. PARKE

THERE were three people on the Sullivan Square platform; the old woman, Rorty, and the girl. Three south-bound trains had stopped and still the girl waited. So Rorty waited too. He would have waited all day, as long as she was there, but he had an idea it wouldn't be necessary. Rorty was tough, leather-skinned, hard-headed; you wouldn't have thought it to look at him, but he had what amounted to an extra sense, delicate little feelers of perception, like invisible antennae sprouting up from the round brick-hard skull. He could tell when something was coming. Perhaps that was what had made him a good cop and, climbing from the ranks, a good detective; that and his amiable willingness to shoot it out on any and all occasions. Rorty was a mighty good man with a gun.

He was conscious of the weight of it now, sheathed beneath his coat.

This Week's Best Fiction

Something was coming; sure, McHugh was coming. Any minute now. Rorty knew it. They knew that McHugh had written to her, but they hadn't known what he had said. Now it was obvious: He had arranged to meet her here, on a certain El train at a certain time.

It was three o'clock in the afternoon and Rorty had been trailing the girl most of the day. He was going to bring McHugh in by himself, dead, as the saying goes, or alive. Most likely dead, or near it. Rorty had a notion McHugh would use his gun before he'd let anyone take him; well, that was fine with Rorty. Let McHugh's hand move and he would see Rorty's hand move, but quicker, and that would be about the last thing he would see. Take no chances with a killer, most of all a young one.

So Rorty stood there with his screwy extra sense thrumming like a violin string, listening to the rumble of the approaching train. He had been pretending to be in difficulties with a gum-vending machine on the platform. Now he gave it a couple of last jerks. His eyes slanted and he saw the girl stop her nervous pacing and stare at the train coming in. He saw that and he noticed too, though absently, the old woman who was the third person on the platform. She was feeding peanuts to the pigeons that always whirl and pout and parade around Sullivan Square. She was a tiny little thing, in drab black clothes, and she was smiling at the pigeons milling at her feet, strutting up for what she had to give them.

The train rattled in and stopped with hiss and shudder of air. It didn't bother the pigeons; they were used to the El. The middle door of the first car opened and Rorty grinned and turned and took three quick steps toward the door of the car opposite him. But the pigeons weren't used to Rorty and they were closer than he'd thought; at his sudden approach they leaped into the air with clattering wings, a whirling cloud. Rorty dodged and smacked squarely into the old woman. He weighed two hundred pounds; she went down. He hadn't hurt her, but by the time he'd gone through the automatic reaction of picking her up and seeing that she was all right, the doors were closed and the train was on its way.

"Thank you," the old woman said, but Rorty wasn't there to hear it. He was taking the steps four at a time to get to the street for a cab. "Gotta catch that train at the next station!" he bawled. "Step on it!"

Rorty dodged and smacked squarely into the woman . . . the doors closed and the train was on its way.

The driver nodded. "Okay, boss." He yanked the wheels and slapped her through low to high. A light held them. "You wanna see the paper?" he asked, like a good tip-wise hackster. He fumbled for it in the bucket seat to pass it back to Rorty.

"Dickens with it," Rorty complained, trying to get a look at the train above. "Step on this can, will you?" Then he referred to the pigeons in picturesque speech.

THE girl found a seat and the young man held a strap in front of her. Both faces were young; alike too in that they were strained, white and empty. She moved to where there was more space and he followed and dropped down beside her

"You shouldn't have come, Mart. You shouldn't have taken the chance."

"I had to see you," he said. "Maybe the last time. They won't take me, Kit. I'm better dead than in the pen again."

The pupils of her eyes seemed to swell as she peered at him.

"Did you—do it, Mart?"

"The murder? Kit, you know. You know I've been straight since I got out. I've been sticking to the job. I've been getting good pay. I was in line for a raise when this—"

"But the police!"

"It's a mistake. I swear it but I can't prove it. I was living in this cheap joint saving money so you could come on soon. Someone tricked this rich guy in there and killed him I knew they'd look up my record and pin it on me, just like they did, so I beat it first. It's just luck, just crummy luck.

"I've been going straight, Kit. I even been going to church. I even told one of the curates all about us. He said when you came on we could be married right, in church, I mean." He looked at her quickly. "Did you tell anybody?"

"I had to," she said. "I told Ma. She would have known soon anyway. She wasn't against you, Mart, in—in spite of getting mixed up in that trouble. She said she felt you'd be a good man if you ever got a chance. Oh, Mart, what are we going to do?"

"I'll get to Canada," he said. "I'll get there. Unless they—they catch up with me. They aren't taking me, Kit. I can't help it, baby; I'm not letting them take me. I got a gun here and I'll—"

"Oh no, Mart! No, no, no!"

Rorty missed it at City Square, but he got it at Friend street. He knew they hadn't left the train; he would have seen them. He caught it, all right, but not alone. "First pigeons," Rorty muttered under his breath with a few other words, "and now these lugs." He meant about fifty high school boys and girls. They were talking, laughing and pushing, and Rorty was jammed with them into the car where apparently they all wanted to stay. McHugh wasn't much older than any of these, Rorty thought grimly; well, too bad, too bad; product of environment, they called it; polite way of saying slums. He could see McHugh and the girl up in the car ahead, that wasn't crowded. Plenty of space, Rorty thought, if McHugh went for it. Tough in front of the girl, but what could you do?

Rorty shoved his way forward, inch by inch. He didn't need that extra sense now, he could see what he was going after, but still it was plucking at his nerves. Maybe it means you're going to get it this time, Rorty. Maybe, maybe. "Doggone it," Rorty grunted, "out of my way, will you!" He was jammed between a kid and a fat man, and the fat man was trying to read his paper, and the front page was literally pushed into Rorty's face. He couldn't help seeing it.

"McHugh Boy Innocent . . . Murderer Confesses . . . McHugh Exonerated . . . Flight Attributed to Panic . . ."

The train pulled into Boylston street while Rorty was still reading. He shouldered past the fat man, went out the door and walked down the platform. He put his arm in an open window and tapped McHugh on the shoulder and said quickly:

"You're okay, we don't want you. Hey, leave that gun alone now; throw it away. Don't get scared so quick after this." As the train jolted ahead he shouted from the platform, "Buy a paper!"

"What did he mean?" Kit gasped.

"Gee—gee, I don't know. Gee, I—I— Say, he said, get a paper. I haven't any change. You got any pennies?"

"No," Kit said. She smiled: The first time in a week, it must have been. "You want to know why? See, Ma knew I was going to meet you. She wanted to have one good look at you, she said. She promised she'd act like she didn't know me, so I told her where. She said it'd look better if she was doing something, and I gave her my last few cents to buy peanuts for the pigeons."

This Home-Mixed Cough Syrup Is Most Effective

Cough medicines usually contain a large quantity of plain syrup—a good ingredient, but one which you can easily make at home. Take 2 cups of granulated sugar and 1 cup of water, and stir a few moments until dissolved. Or use corn syrup or liquid honey, instead of sugar syrup.

Then get from any druggist 2½ ounces of Pinex, pour it into a pint bottle, and fill up with your syrup. This gives you a full pint of wonderful medicine for coughs due to colds. It makes a real saving because it gives you about four times as much for your money. Never spoils. Tastes fine.

This is actually a surprisingly effective, quick-acting cough relief. Swiftly, you feel it taking hold. It loosens the phlegm, soothes the irritated membranes and makes breathing easy. You've never seen anything better for quick and pleasing results.

Pinex is a special compound of proven ingredients, in concentrated form, a most reliable soothing agent for throat and bronchial irritations. Money refunded if it doesn't please you in every way.

Pinex Is Dependable!

NEWS that makes folks sleep all night!

Thousands now sleep undisturbed because of the news that their being awakened night after night *might be from bladder irritation, not the kidneys* Let's hope so! That's a condition Foley Pills usually allay within 24 hours. Since bladder irritation is so prevalent and Foley Pills so potent. Foley Pills must benefit you within 24 hours or DOUBLE YOUR MONEY BACK. Make 24-hour test Get Foley Pills from druggist. Full satisfaction or DOUBLE YOUR MONEY BACK.

Champion Farmer MORRIS BUERMAN
Prefers
Firestone
CHAMPION GROUND GRIPS
Because They
OUT CLEAN
OUT PULL
OUT LAST
ANY OTHER TRACTOR TIRE

CHAMPION FARMER BUERMAN uses Firestone Champion Ground Grips on his tractors, because he knows they clean up to 100% more effectively, pull up to 62% more, last up to 91% longer, and roll smoother over highways.

This superiority is based on patent rights which permit only Firestone to build tractor tires with connected curved traction bars. Curved bars are stronger . . . like a curved roof. They're braced . . . like a corner fence post. They cut into the soil with the cleaving, cleaning action of a plowshare. The tapered openings between the bars throw out mud and trash. Connected bars don't bend, wipe and wear like the bars on broken center tires. And because the bars are connected, the tire rolls along in smooth, continuous contact with the highway.

Be sure to specify Firestone Champion Ground Grips when you order your new tractor . . . or when you buy replacement tires for your present equipment. They'll *pull* more . . . *last* longer . . . and they'll *cost* no more than ordinary tires.

Listen to the Voice of Firestone every Monday evening over NBC

Copyright, 1947, The Firestone Tire & Rubber Co.

FIFTY TONS OF CHERRIES! That is the average annual harvest of Champion Farmer Morris Buerman, Sodus, New York. His apple trees annually bear 12,000 bushels, and his peach trees, 1200 bushels. As "The Voice of Cherry Growers" on a series of radio broadcasts, Champion Farmer Buerman contributed much to increase the market demand for cherries, and to encourage growers to improve production methods and produce better quality fruit. The National Cherry Growers Association is an outgrowth of his local association in which he has been extremely active. As a leader in production, as well as in marketing methods, Champion Farmer Buerman naturally prefers Firestone Tires for his equipment.

KLEMME LOCAL NEWS

Awalt Grosshuesch arrived Friday from Cedar Falls for the holiday vacation.

Mr. and Mrs. Fred Kothenbeutel have returned home after spending a couple of weeks on their wedding trip visiting in Minnesota.

The Klemme young men and women attending the colleges throughout the state began arriving home Friday for the Christmas vacation.

Mr. and Mrs. Harry Schuster and family moved into the Koerner residence, which was vacated by the Sport Bridges family.

Mrs. Walter Gast and baby son, Wayne Edwin, of Ventura, have been staying at the parental, Henry Jost home since their dismissal from the nursing home.

Rev. Calvin Grosshuesch drove to Cedar Falls Friday to get his son, Ewald and some other young people attending college and who are home now for the Christmas vacation.

E. C. Buntenbach announces that he will not hold a sale on Christmas week at his sales pavilion in Garner. The regular New Year week sale will be held on Saturday, January 3rd. Mr. Buntenbach always holds a sale each Thursday, but this year both Christmas and New Year days fall on Thursday, therefore the change in dates.

SANTA CLAUS CAME TO TOWN SATURDAY AND TREATED KIDDIES

Santa Claus kept his promise and came to Klemme Saturday afternoon and arrived promptly at 2.00 o'clock. He landed in his airplane near Klemme and came to town in a pick-up truck. He intended to come in a big sled but the roads were icy and the farmer, in who's pasture he landed his plane, did not have shoes on his horses, so he brought Santa to town in his truck.

Anyway, several hundred kiddies were on hand to greet him and old Santa had a treat for all of them. He took their order for toys and promised to be back on Christmas eve to make his usual rounds.

Santa said he would be back again next year to treat all the good boys and girls of the Klemme community.

RELATIVES AND FRIENDS HONOR MR. AND MRS. WM. JURGEMEYER

Observed Their 35th Wedding Anniversary Dec. 18th

About one hundred and fifty friends, neighbors and relatives gathered at the St. Paus Lutheran Church basement on Thursday evening, December 18th, 1947 to honor Mr. and Mrs. Wm. Jurgemeyer who were observing their 35th wedding anniversary.

Rev. Kupke, pastor was in charge of a short but inspirational program which was followed by a mock wedding. The characters were Mrs. Menno Albers, bride; Mrs. Orris Lundy, groom; Mrs. Howard Baack, best man; Mrs. Les Hartbeck, bride's maid; Mrs. Paul Goll, groom's mother; Mrs. Aug. Josten, minister; Marjorie Baack, flower girl; LaVohn Josten, ring bearer and Beulah Goll, pianist.

A lovely lunch was served later in the evening, which had been provided by the guests. Mr. and Mrs. Jurgemeyer were presented with a platform rocker and a three-tiered decorated wedding cake by their children and the guests presented them with a purse of silver.

The young people sang some Christmas carols during the evening.

Mr. and Mrs. Jurgemeyer are the parents of four children: Alfred, living near Klemme; Mrs. Earl Bachman of Ventura; Louis of Garner and Everett at home. They also have four grandchildren.

Mr. and Mrs. Jurgemeyer have farmed north and east of Klemme for a great number of years.

Main Street Sanded

Friday afternoon the city sanded intersections, crossings and the middle of the pavement on Main Street to reduce the hazzard of slipping and make it easier traveling both for cars and pedestrians.

Etchen Twins Celebrate 21st Birthday Dec. 14th

Sunday, December 14th was the 21st birthday of the Etchen twins, Carol and Merle and in honor of the occasion, their parents, Mr. and Mrs. Albert Etchen served a goose dinner to the following friends and relatives, Mr. and Mrs. Carl Swanson and sons, Norman and Eugene of Britt; Mr. and Mrs. Henry Klinge and Nellie of Garner; Mr. and Mrs. Elmer Kuehlers and Connie of Ventura; Mrs. Henry Katter and daughters, LaVon and Rachael; Bob Greiman and Mrs. Daisy Lemke. The time was spent in singing Christmas carols with Mrs. Albert Etchen at the piano and Mrs. Carl Swanson and Mrs. Elmer Kuehlers leading.

December 31, 1947, Last Day To Sign Applications Under 1946 ACP Program

All farmers who have not yet signed an application requesting payment for conservation practices carried out under the 1946 Agricultural Conservation program should do so immediately. December 31, 1947, is the deadline date. This annoucement was made today by Alfred V. Josten, chairman of the Hancock County AAA committee.

The local committeeman has pointed out that this announcement in no way relates to the current 1947 program. "It applies, rather," he said, "to those few cases where producers complied in every respect with the program in effect last year and as yet haven't signed a request for payment for the conservation work that has been completed. Although we have tried to directly contact all cooperators who failed to fill out an application, it's still possible that some non-signers might have been overlooked. If any farmer has reason to believe that an application was not properly signed he should contact the county office.

HANCOCK COUNTY DIA ELECTS OFFICERS

V. A. Cook was re-elected as president, Jack Dethmers, vice president, and Adala W. Bailey secretary-treasurer of the Hancock County Improvement Association for the coming year at the annual meeting of the association held December 15 at Garner.

The Hancock County DIA was organized in 1946 and has sponsored enrollment in the Combination Blue Cross-Iowa medical Service Surgical Health plans.

Rural Blue Cross enrollments have been carried on through the county health improvement associations in 71 of the 74 counties served by the Des Moines Blue Cross Plan. In these counties 94 Blue Cross member hospitals are sponsoring and guaranteeing the services of the plan. Some of these counties have the combination plan offered by the Hancock County H. I. A.

Blue Cross is the not-for-profit plan which makes it possible for employed persons to budget for hospital care on a group basis. It is the hospitals' own plan and they sponsor and guarantee the services. The Iowa Medical Service Surgical Plan is sponsored by the medical doctors. There are 91 Blue Cross Plans in the United States, Canada and Puerto Rico with a total membership of 30,000,000 persons. These Plans are set up on a service protection rather than an indemnity basis. There are no dollar limitations on hospital care services except room accommodations, X-ray service and administration of anesthesia. There are over a half million members of Blue Cross in Iowa, or one person in five of the State's population.

The next reopening for Blue Cross members by the Hancock County Health Improvement Association will probably be in September 1948. This will depend on the interest shown by people in the county. If interested be sure to leave your name with the secretary at the Farm Bureau office.

Mr. and Mrs. Cecil Smith and the latter's sister from Grove City, Minn., were visitors at the J. W. Waddingham home Saturday.

CHRISTMAS PLAY PRESENTED BY YOUTH FELLOWSHIP CLASS SUNDAY EVE

A large crowd attended the Youth Fellowship play, "Why The Chimes Rang," at the Klemme Methodist Church Sunday evening. The play was well presented and the class had worked hard to make it a success. The play was directed by Mrs. Ernest Lewis, assisted by Miss Marie Blank.

After the play the young people went for a sleigh ride and then returned to the church where a hot lunch awainted them.

Mrs. Lewis, Miss Blank and Claude White, the latter class sponsor, wish to thank W. F. Pavey, Mr. Gast and others who assisted them.

NOTICE OF PROBATE OF WILL IN DISTRICT COURT

STATE OF IOWA ss.
Hancock, County
No. 3113 November Term, 1947

TO WHOM IT MAY CONCERN:

YOU ARE HEREBY NOTIFIED That an instrument of writing purporting to be the last Will and Testament of Otto Pringnitz, Deceased, dated April 14, 1943, having been this day filed, opened and read, Tuesday the 30th day of December, 1947, is fixed for hearing proof of same at the Court House in Garner, Hancock County, Iowa, before the District Court of said County, or the Clerk of said Court, and at 2 00 o'clock P M., of the day above mentioned all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner, Iowa, December 18, 1947.

RUTH HUGHES
Clerk of District Court
(Published December 24, 1947.)

Mrs. Melvin Neuberger and Mrs. M. L. Harson are both confined to their homes with virus pneumonia.

IOWA'S CORN YIELD SET AT 331,363,000

The final estimate on Iowa's 1947 corn crop is 331,363,000 bushels or 32 bushels an acre.

This was the poorest crop since 1936 and was 48 per cent poorer than the all-time record year of 1946 when the yield totaled 643,638,000 bushels and averaged 57 bushels to the acre.

The December 1947 figure is sharply under last month when the outlook was for 35 bushels an acre and a 347,340,000 bushel yield.

The 1947 soybean production estimate is 26,310,000 bushels or about 27 per cent less than 1946 production of 36,604,000 bushels.

The Iowa crop and livestock reporting service, in reporting the figures, said the tonnage of feed, grain and forage crops produced in Iowa this year was 19,488,000 tons or 32 per cent under the 1946 high.

00.00 Given In Hancock For "Christian Christmas"

The Hancock County Farm reau's "Christian Christmas" ropean Relief Drive netted r $3600.00 cash and a large ntity of clothing according Jack Dethmers, County Farm reau president.

These donations will be sent the Iowa Farm Bureau Fedtion office at Des Moines ere they will be distributed ough various church and ief organizations. Many have signated the church or relief ncy that is to be credited h their donation. A number C. A. R. E. packages have n designated to go to certain ropean families.

nyone still interested in doing may do so by mailing ir donations to the Farm reau office.

mer Klemme People Flew To Denmark To Spend Xmas

Mr. A. "Chris" Andreason of r Miller and his sister- in- , Mrs. Martin Jensen of near ge, both former residents of Klemme community, left plane about a week ago for mark where they will spend istmas with relatives.

r, Andreason, who came n Denmark 45 years ago and never been back there since spend 3 months visiting h his sister and his step- er, 76 year old Lutheran ister.

rs. Martin Jensen came to country 32 years ago. Both t by plane from Minneapolis LaGuardia Field, N. Y. and there took another plane Copenhagen, Denmark.

HELLO, FOLKS!

r. and Mrs. Donald Turgaof State Center are the d parents of a baby boy December 20th at State er. They also have one r boy in their family.

r. and Mrs. Alvin Larson the parents of a baby girl December 24. She weigh- 10 lbs. and 8 oz. The Lar- have two other children, boys in their family.

Farm Bureau Calendar Of Coming Events

January 5:

County Women's Committee meeting with Township Music Chairman as guests and Max Exner, Extension Music Specialist as guest speaker.

January 6:

Avery and Ell Townships Leader Training School on the "Pressure Sauce Pan Meals" at the home of Mrs. Clark Lackore at 1 00 p. m.

January 5:

Membership Kick-Off meeting, Garner.

January 7, 8, and 9:

Check-Up meetings on membership drive.

January 8

Liberty 4-H boys meeting at Ronald Bredlows home, 8:00 p. m.

Center School Has Christmas Program

Miss Lydia Pearson and her pupils of Avery Center school gave a Christmas program at the school house on Monday evening, December 22, to which the parents and friends were invited. The room had been beautifully decorated for the occasion. After the entertainment coffee, sandwiches, cookies and home made candy was enjoyed by all.

Birthday Party Held

The following were entertained at the Elmer Beier home on Sunday evening in honor of his birthday: Mr. and Mrs. Erwin Blank and Gary; Mr. and Mrs. Virgil Stille and Donna; Mr. and Mrs. Francis Buseman; Mr. and Mrs. Elmer Schaefer and Wavel; Mrs. Wm. Langlitz and Forest; LaVerne Velau and Leland Hummel. The evening was spent informally after which a nice lunch was served and Elmer was presented with gifts.

Demonstrations To Be Given In Hancock County

Do you want to learn to use that pressure sauce pan you received for Christmas, or perhaps you have had it in your kitchen but haven't had time to sit down and read the directions for using it? If so, we want you to know that there is to be an opportunity for you to attend meetings during the months of January on "Pressure Saucepan Meals". These lessons will be given to leaders in your community by the County Extension Home Economist, Elsie Mae VanWert, and "Follow-up" meetings will be held by these leaders in your community. So if you are interested in new ways of using your pressure sauce pan or learning how the pressure sauce pan works it will pay you to inquire about these meetings coming up and watch your papers for announcements of these meetings.

STRANGLED

While trying to take some medicine, little Myrna Sue Greenlee, 2 years old, of Sigourney, strangled on a sulpha tablet which she was trying to wash down with a drink of water. The tablet went into the wind-pipe and the child died before the doctor could arrive.

... and may the Year 1948

be streamlined to your wants and chock-full of blessings!

Thanks a million for your patronage during the year 1947.

Beautiful Christmas Trees At Farm Home North Of Klemme

Mr. and Mrs. Vic Hueneman, who live on their farm on Highway 69 north of Klemme deserve a bouquet for the beautiful Christmas display they had in their yard and which attracted the attention of hundreds of motorists as they drove by the Hueneman farm at night. The The Huenemans had decorated and lighted two trees in their front yard which were very beautiful. There is nothing prettier than an outdoor lighted Christmas tree.

Christmas Tree Attracted Visitors From Several Towns

The Des Moines Sunday Register of Dec. 21 ran a feature article and illustration of the mechanical Christmas tree which Mr. Tom Blank of Klemme had made several years ago and which has been an attraction at the Blank home at Christmas time.

This year people from Belmond, Clarion, Meservey, Garner and a number of other North Iowa towns, called at the Blank home to see the beautiful tree.

FRED NEUHRINGS ENTERTAINED AT POST-CHRISTMAS DINNER AND PARTY

Mr. and Mrs. Fred Neuhring and daughter, Charlotte, entertained a number of relatives at a post-Christmas dinner and party at their home Saturday evening, December 27th.

Those present were Mr. and Mrs. Eldon Hagen; Mrs. Clara Barz and Allan; Mr. and Mrs. Raymond Barz and Leland; Mr. and Mrs. Evert Barz and children of Waterloo; Mr. and Mrs. Geo. Thieman; Mr. and Mrs. Maurice Murray and twins; Mrs. Murray of Mason City; Mr. and Mrs. Irwin Neuhring and family; Mr. and Mrs. Earl Neuhring and family; Harlan Neuhring and his lady friend from Britt; and Grandpa and Grandma George Born.

Mr. and Mrs. W. F. Pavey entertained to dinner Christmas day Mr. and Mrs. Wayne Pavey and Carol Ann of Webster City and John Clements and family.

BELMOND BRONCS IN RETURN GAME HERE FRIDAY NIGHT

Belmond, one of the strongest teams in North Iowa, will come to Klemme for a return game on Friday evening of this week.

In an early season game the Brancs handed the Shamrocks a defeat of 12 points. The Shamrocks are pointing up to avenge that defeat Friday night in a double header beginning at 7:30 o'clock.

Klemme Vagabonds Nipped In Game At Belmond

The Klemme Vagabonds lost to the Belmond Independnt team at Belmond Friday evening 33 to 29.

The Belmond team will play a return game on the Klemme court on Wednesday evening, January 7th. This should be an outstanding game as both teams are evenly matched.

DAUGHTER OF FORMER KLEMME COUPLE WILL MARRY JANUARY 3RD

Mr. and Mrs. Howard Wiles of Waukesha, Wis, have sent out invitations to the marriage of their daughter Marjorie Mae to Dr. Ward Everett Brown. The ceremony will take place at the Methodist Church in Waukesha on Saturday afternoon, Jan. 3.

Mr and Mrs. Wiles are both former Klemme residents.

Novella Bredbenner Attending Convention At Chicago

Novella Bredbenner is in Chicago this week attending the National Convention of the Beta Beta Beta which is being held in conjunction with meetings of the American Association for the Advancement of Science. Miss Bredbenner was recently initiated into Beta Beta Beta, an international honorary biological fraternity She is one of three students from Iowa State Teachers college attending the convention

Call For Post Master Exams For Klemme

Farm Sale

MRS. BEN NIEMAN WILL HAVE FARM SALE JAN. 7

Mrs. Ben Nieman is this week advertising her farm sale which will be held next week Wednesday, January 7th at the farm 1½ miles west of Klemme.

Mrs. Nieman is quitting farming and will move to Clear Lake. She has listed 2 head of horses, 33 head of cattle, hay and feed and a large amount of good farm machinery and some household goods. B. A. Reemstma will auctioneer the sale which will be clerked by the First National Bank of Klemme.

EMERGENCY FARM LABOR PROGRAM ENDS

The Emergency Farm Labor Program conducted by the Iowa Extension Service in cooperation with the United States Department of Agriculture, terminates Dec 31, 1947 according to the word received last week by the county extension director Paul Henderson.

A joint statement by Director H H Kildee of the Iowa Agricultural Extension Service and J. R Pefferle, Chairman of the Iowa Employment Security Agency, pointed out that "The Emergency Farm Labor Program authorized by Public Law 40, 80th Congress, will terminate Dec. 31, 1947, as part of the Iowa Agricultural Extension Service in cooperation with the United States Department of Agriculture".

Beginning Jan. 1, 1948, the Iowa State Employment Service, in cooperation with the U. S. Employment Service, Department of Labor, will resume the work of recruitment and placement of farm labor in Iowa.

During the war years of 1943-47 the United State Department of Agriculture was empowered by Congress to carry out a program to insure an edequate supply of agricultural workers. A close cooperation was maintained between the Extension Service and the State Employment Service to maintain this labor supply for war production work.

Both farmers employers and farm workers, who had been filing their labor wants with County Extension offices and local Farm Labor Placement Centers, should contact the offices of the Iowa State Employment Service for labor placements after Jan. 1, Henderson pointed out.

W. S. C. S. Meets January 7th

The Methodist W. S. C. S. meets January 7th. Mrs. Vern Bisom has the lesson and Rev. Harvey will lead the devotions. Installation of officers will be held. Lunch will be served by the hostesses.

New Year's Eve Dance Will Be Held For Married Couples

Married couples of the community are invited to attend the New Year's Eve dance at the Klemme Community Hall. Those in charge extend a cordial invitation to all.

BROKE LEG

At Manilla last week, Mrs. Charley Pauley, farm women, fell and broke a leg on the basement stairs of her home. She was unable to reach the telephone and lay unattended until the children came home from school.

EXAMINATION FOR POSTMASTER FOR KLEMME OFFICE

An open competitive examination to fill the vacancy in the position of postmaster in Klemme has been announced by the United States Civil Service Commission at the request of the Postmaster General.

In order to be eligible for examination, an applicant must be a citizen of, or owe allegiance to the United States, must have actually resided within the delivery of this post office, or within the city or town in which the office is located, for at least one year immediately preceding the date fixed for close of receipt of applications, must be in good physical condition, and within the prescribed limits. Both men and women are admitted.

Applications must be on file with the United States Civil Service Commission at Washington not later than January 15th The necessary application blanks may be procured at the local post office from Acting Postmaster, Franklin Kluckhohn.

The salary for the postmaster at Klemme is $2700 per year.

MR. AND MRS. VERNER STROMER RETURN FROM TRIP THROUGH SOUTH

Mr. and Mrs. Verner Stromer returned last week from a 12 daya combined business and pleasure trip through the south. They visited at a large kennel at Chanute, Kansas and with friends at Pryor, Oklahoma on the way going. Several days was also spent in Houston, Texas where they transacted their business. From there they drove to Brownsville, Texas where they visited with cousins of Mrs. Stromer who operate a large fruit orchard there They also visited with Mr. and Mrs. John Neuberger who moved there from here several years ago. Some time was spent in Old Mexico which proved both fascinating and unusual.

On their return trip they visited several other large kennels in Texas including one with friends south of San Antonio who also operate a large cattle ranch, specializing in Brahma cattle. They motored back through Louisiana, Arkansas, and Missouri which was very scenic, especially through the Ozark Mountains.

Mr. and Mrs. Alford of Webster City, parents of Mrs. Stromer, stayed at the Stromer home while Mr. and Mrs. Stromer were away.

UMT Puts New Face on Old Army

Universal Training Program Called Modern, Democratic

By BAUKHAGE
News Analyst and Commentator.

(Why should universal military training be necessary at all? How does the present plan differ from the "draft"? This is the second in a series of articles on this pertinent subject.)

WASHINGTON.—What is universal military training?

The more I learn about it, the more I am convinced that most of the people—both UMT's supporters and opponents—have very little idea of what it really is.

I'm more interested in the people who oppose UMT because I think they are doing themselves and their children a great injustice by allowing their thinking to remain out of focus.

I'd be willing to bet that nine-tenths of the general public who discuss the question are looking past the object of discussion, their ideas focused on something which no longer exists. They have not examined what is actually in front of them, and therefore are arguing from a completely wrong hypothesis. Old ideas stick.

Baukhage

In other words, many people do not realize what UMT is NOT. It is NOT anything like the military service (conscription) which some of us knew from personal contact in the past, and others knew from hearsay. UMT, as proposed in the national security training act, is totally different in many essential principles from the "draft" under the selective service system.

First why is it necessary? Let me quote the reasons given by the house of representatives armed services committee, as digested in the November issue of the Army Information Digest (which article should be read in its entirety for a real grasp of the subject):

1. The United States has traditionally depended heavily upon the civilian reserve components. In every major war, the regular forces have constituted less than 10 per cent of the total strength. These wars have been fought by citizen soldiers, directed and organized by a small nucleus of professionals.

2. In the past, geographical isolation has provided adequate time for training and equipping large numbers of Americans — fresh from civil life and unskilled in the art of war — before it was necessary to send them into battle. In any future emergency, however, no such cushion of time can be expected. There must be sufficient trained forces in being on any future emergency day.

3. The regular forces today constitute no more than the traditional nucleus of professional military skills. Furthermore, they are spread thinly over a large area of the world, engaged in occupation duties. In the circumstances, the size and degree of readiness of the reserve components become matters of the most vital concern. For if these reserve components are not adequate, the overall military strength of the United States is a hollow shell.

4. The reserve components are far below their authorized strengths and are without hope of filling their quotas by voluntary means alone. These authorized strengths represent the barest minimum estimate of manpower requirements.

5. The national guard is at approximately 16 per cent of its authorized strength, the organized units of the organized reserve corps at 14 per cent, and the unassigned reserve pool at 35 per cent (summer of 1947). The 1,200,000 members of the unassigned reserve pool are merely names on paper, untrained and unorganized.

6. UMT would build up the reserve components to their authorized strengths, and would achieve a stability and an increased efficiency of our ready forces that do not now obtain. The alternative would be a regular army of about 4,500,000.

7. Consideration was given the claim that future warfare would be of the pushbutton variety requiring "only a handful of scientists." This claim is a dangerous illusion. If there is another war, it will be more "total" than the last, and will involve a greater number of human beings without any hope of distinguishing the combatant from the noncombatant. The war in all probability will come into the cities and the homes of the people of the United States. In such event, the survival or recovery of the nation might well depend on the presence of well-disciplined and able-bodied men in every community.

The foregoing, then, were some of the reasons which guided the armed services committee of the house to vote out a national security training act. The act would set up four agencies:

NATIONAL SECURITY TRAINING CORPS, consisting of all young men to be trained. Although these young men, legally, would have military status, they would not be members of the armed forces, would be subject to no duty other than training and would become members of the military establishment only in a national emergency.

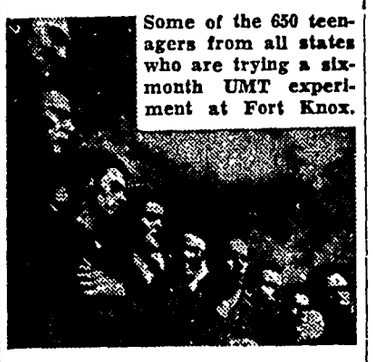
NATIONAL SECURITY TRAINING COMMISSION, which would set the policies, standards, substance and character of the training program. The commission would consist of three paid members appointed by the President — two members, including the chairman, to be civilians, and one to be from the armed forces.

GENERAL ADVISORY BOARD, which would provide the commission with the best technical advice on the moral, religious and educational phases of the program. The board of 10 to 25 members would be composed largely of civilians, serving part time (with pay), but would include at least three members of the armed forces. It would have no policy-making authority.

SELECTIVE TRAINING SYSTEM, similar to the selective service system of World War II, which would register, examine, classify, assign, defer, deliver and maintain records of men registered under UMT.

As you note, although military training (in the modern sense which is more than ever training in many valuable civilian skills) is the basis of the national security corps, it is devoid of many factors which have made universal service in the past traditionally objectionable to the American people.

In these days, any military training insofar as it involves killing is objectionable to the balanced personality. But, since we have not



Some of the 650 teenagers from all states who are trying a six-month UMT experiment at Fort Knox.

eliminated the predatory forces in the world, have not even isolated them, certain measures of self-protection like UMT are necessary.

What are the features of military training which stick in the craw of the average free American?

Probably the first (the thing that used to overwhelm me at certain moments in my early months in the army) is the lack of freedom. No longer was I a free man whose liberty could be curtailed only after a jury trial and the judgment of my peers. Suddenly, I was confronted by the Articles of War, the court martial system, and in some cases (although I personally never suffered much from it even in wartime) the petty tyranny of a superior in rank.

But the trainee under the proposed national security training act is not subject to the Articles of War at all during the first phase of his training and only conditionally during the additional six months of service, depending on which option he may elect.

LEADERSHIP CHAMPIONS . . . Pat Wall, 18, (left) of Savannah, Ga., and Le Roy Donnay, 20, of Glencoe, Minn., were named national leadership champions at the 1947 national 4-H club congress in Chicago. In addition to the trophies with which they are shown, each received a $200 scholarship.

NEWS REVIEW

Defense Pact Ratified; Inflation Bill Offered

This is, as Sen. Arthur Vandenberg (Rep., Mich.) told his fellow senators, "a significant moment to demonstrate the solidarity of this hemisphere."

And with the knowledge of that certain fact uppermost in their minds members of the U. S. senate voted 72 to 1 to ratify the Inter-American defense treaty agreed to by 21 American republics at the Rio conference last summer.

The hemispheric agreement for mutual defense of nations in the Americas embodies three main points:

1. In case of armed attack from outside the hemisphere, all nations have the automatic right to meet the attack with military force.

2. If attack occurs inside the hemisphere, American nations may go voluntarily to the aid of the victim, with consultations to follow.

3. If attacks occur both inside the hemisphere and outside the security region immediate consultations will be called.

Virtually unanimous approval of the treaty by the senate was a good indication that congress was fully

aware of the cardinal principle of successful foreign relations that commitments abroad are worse than useless unless the nation forms strong and lasting alliances to support those commitments. The hemispheric treaty had in it the makings of a good foreign policy.

Meanwhile, President Truman had some thoughts on how inter-American defense could be advanced from theory to the realm of actuality. He proposed to congress that the Panama canal be converted into a sea-level waterway (see map), and that a unified command be established in the Atlantic area with Adm. H. P. Blandy in authority over army, navy and air forces from Iceland and Greenland to the Caribbean.

CHALLENGE: *Accepted*

Republican leaders had issued a direct challenge to the administration to offer a bill incorporating President Truman's ration-and-control recommendations for combating inflation, and the measure which the administration finally proposed was neither more nor less than anyone had expected.

Handed to the senate judiciary committee by Averell Harriman, secretary of commerce, the specific bill called for expansive powers to ration food, gasoline, steel and other scarce commodities.

Theoretically it was a bill to allocate materials to essential users, control business inventories and continue export controls; but administration spokesmen admitted that the allocation powers provided for would authorize the government to impose consumer rationing and even to buy up entire grain crops if it saw the necessity for such action.

And through the welter of the administration-Republican melee over what to do and how to do it there came at least two charges of "socialization" from top U. S. businessmen leveled at the government's avowed program.

FODDER *Spuds for Cattle*

A New Jersey cattleman, Eugene K. Denton, has a theory that might go a long way toward easing the grain shortage.

His idea is to feed cattle raw potatoes instead of grain.

Experimenting with 20 yearlings purchased especially for the purpose, Denton fed them on a special diet, based on ground potatoes, salt and molasses, for 25 days. The steers, which averaged 667½ pounds when the experiment began, showed an average gain per steer of 1.4 pounds a day or 25¼ pounds per steer for the test period.

Prof. William Ljundahl of Rutgers university department of animal husbandry called the experiments a success.

Denton made public this simple formula: To every 100 pounds of freshly sliced potatoes add one handful of regular salt and one gallon of molasses water. The molasses water is prepared by adding one pint of molasses to one full pail of water.

LANDON: *Big Medicine*

Alf M. Landon, the Kansas budget-balancer who might have been president of the United States if Franklin D. Roosevelt hadn't defeated him by a landslide in 1936, has come out publicly in favor of Gen. Dwight Eisenhower for President in 1948.

Landon was known to have joined forces with Roy Roberts of the Kansas City Star to push the Eisenhower bandwagon. In Chicago to address a Kiwanis meeting, Landon said, "The Kansas delegation to the Republican national convention will be for Eisenhower." That, coming from the shrewd former governor of Kansas, was strong political medicine.

"I don't think any of the politicians in my state will get out of line on that. I think I know what the general's social, economic and political views are. He hasn't said anything to me about the presidency directly or indirectly but it's my guess he will make his views known when he leaves the army and they will be all right."

Meanwhile, it was announced that Eisenhower was scheduled to take over his scheduled position as president of Columbia university next June 7—just about two weeks before the Republican national convention is supposed to convene.

PROFITABLE DUST BOWL

Idaho Cashes in on Phosphate

Out in Idaho they have a "dust bowl" that not only is not worrying the good people of that state but stands to bring them in a lot of money.

They're even planning for its expansion, for in that dusty, sagebrush-covered expanse of land lies 60 per cent of the known American supply of phosphate rock, source of phosphorous, one of the three primary plant foods.

Experts say that the dusty treasure which Idaho is shipping here and there in an ever-widening range holds the key to a new and broader agricultural economy in the entire intermountain and Pacific West.

In ages past the Rocky mountain area of southeastern Idaho, northeastern Utah and southwestern Wyoming was a tropical playground for countless prehistoric monsters. In passing on to whatever reward was in store for them, these monsters bequeathed themselves to posterity in the form of rock phosphate, some six billion tons of which are estimated to be underground in that Idaho-Utah-Wyoming sector.

Prior to 1934 use of phosphate in the West was negligible. The rich, volcanic soil was in little need of fortification. Also, the limited supplies of the commercially manufactured fertilizer were being used almost exclusively in the eastern and southern states.

Then, during World War II, one Idaho landholder, J. R. Simplot, became worried because he could not obtain sufficient fertilizer for his vast farm lands. So in the spring of 1944 he began construction of his own superphosphate plant in Pocatello.

Originally designed to turn out 60,000 tons annually, Simplot's plant has been expanded to the point where now it is producing 200,000 tons a year of "18 per cent" superphosphate.

The "18 per cent" means that when the phosphate rock has been pulverized to dust and treated with sulphuric acid, 18 per cent of the phosphoric acid in the rock is made available for use by growing plants.

AROUND THE CLOCK

He Still Has Time on His Hands After Half Century at Trade

WNU Features.

ELGIN, ILL.—Somewhere in the United States there may exist an untutored and unknown genius of Job-like patience who, after months of painstaking effort, could put together a watch that would run.

But the odds are just about one-million-to-one that it would fall far short of the performance demanded of fine watches today, in the opinion of William H. Samelius, director of Elgin Watchmakers college.

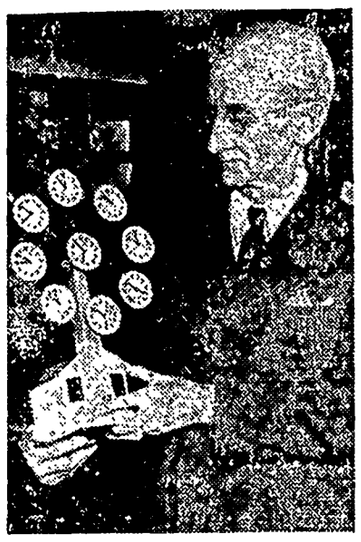
Samelius ought to know. He has made watches for more than 50 years. Now teaching others the profession at the Elgin school, he received his first introduction into the lore from his father, who at one time was the royal watchmaker of Sweden. Samelius came to America as a lad in 1881. Today he is still active in the profession, an honorary member of at least eight state horological associations and the dean of American fine watchmakers.

Always ready to talk about his life's work, Samelius explained some of the reasons why making a watch is not the easiest thing in the world. "Our students learn that the best watches must be within a limited tolerance of time, fast or slow, before they are released from the factory," he says. "They learn to maintain tolerances of 0001 of an inch to fit parts into precision watch movements. They master all the individual manufacturing operations necessary to restore a watch to its timekeeping ability."

An idea of how small these tolerances are can be gained from the fact that one-ten thousandth of an inch is the size of a human hair after it has been split the long way 30 times. Samelius' students also work with roller jewels that are so small that 4,666,000 weigh a pound. Some of the screws used in watch manufacture are so tiny that 20,000 of them just barely fill an ordinary sewing thimble. Despite their size, each screw has a perfect thread and its head is perfectly slotted.

Some of Samelius' students become proficient in the watchmaking art in a period of from 11 to 14 months.

Although he has been in the watchmaking business for more than half a century, Samelius still manages to keep posted on latest developments in the field. He admits that making watches today is considerably easier than it was 50 years ago. He attributes this in part to innovations in repair equipment and parts.



DEAN OF WATCHMAKERS . . . William H. Samelius, director of Elgin Watchmakers college, is shown here inspecting a clock made by William Geoghagen, one of his students. Driven by an electric motor, the nine-dialed clock shows the time in Bombay, London, Hawaii, San Francisco, Yokohama, Shanghai, New York, Moscow—and Elgin!

Honesty Still Pays, Jailed Youth Learns

ST. LOUIS, MO.—In jail because police caught him breaking into a building, Robert Tolliver, 18, has received a $5 reward for honesty.

When a class from Fontbonne college had inspected the jail, one of the students lost the mechanism from her watch, a family heirloom. She informed Warden E. E. Hensley of the loss, leaving $5 for the finder.

Tolliver found the mechanism in a box of trash, turning it over to Warden Hensley.

"Had Tolliver hocked the works, he wouldn't have received more than $1," the warden said. "By being honest he gets $5."

It Took Seven Years, But He Got Big Fish

NEHALEM, ORE.—After spending seven of his 79 summers hopefully rowing up and down the Nehalem river in quest of a salmon, Charles L. Judd finally hooked his fish.

His patience was rewarded when the catch proved to be a 30-pound Chinook. A battle lasting for an hour and a half was required, however, before Judd finally landed the fish.

Almost too weary to hold the fish up for a picture, Judd said, "My family thought I couldn't catch a salmon, so I had to show them."

This Street Removes Porch Steps at Night

BALTIMORE, MD. — Fountain street, near the Baltimore docks, takes in its steps at night and often turns them up during the day.

It is a street of red brick row houses, many of which have two white wooden steps leading up to the front door. They are Fountain street's version of the white marble steps for which Baltimore is noted. Families often sit out on them in the evening for rest and gossip with the neighbors.

Residents disagree as to how the custom of turning the steps up against the wall during the day and taking them in at night started.

Mechanical Picker Dooms Husking Bee To Romantic Past

AUDUBON, IOWA.—The familiar thud of corn against the wagon bang boards is being relegated to the romantic past on Iowa farmlands as the machine age muscles in on old-fashioned corn husking bee and corn husking contests.

Romanticists notwithstanding, man can't compete with the machine when it comes to picking corn, and as a result those popular pastimes of the past are being discarded.

A two-row corn picker can harvest 500 to 800 bushels a day while a man, working alone, can pick only 80 to 100 bushels. Mechanical corn pickers are becoming increasingly available to do the harvesting job in the tall corn state.

The number of machines has tripled since 1939, when there were 20,029 mechanical corn pickers to harvest nine million acres of corn. Now, it is estimated, there are more than 60,000 pickers, an average of one machine for every 158 acres of corn.

Despite the invasion of mechanical pickers, Elmer G. Carlson, king of the nation's corn huskers in 1935 and now owner of a hybrid seed corn company here, doesn't believe the corn husking contest is gone forever.

"Corn husking is a farm sport and mechanical pickers do not detract from the glamor of the old-time contests," Carlson contends.

He believes husking contests would be as popular as ever. His brother, Varl, whom he dethroned as national champion, agrees that the national contests should be revived.

But even the former national champions have given way to the machine age. Both use mechanical pickers in their own cornfields!

Space Is Relative

HAMILTON, MONT.—All of Montana isn't wide open spaces. A lawsuit has been filed to clear title to a strip of land two and a half inches wide and 140 feet long. The sliver lies between a theater and a store.

Women Can Vote— If They Tell Age

LINCOLN, NEB.—One of woman's age-old prerogatives will fall by the wayside when Nebraska women register to vote.

The state attorney general has ruled that it won't be enough to say "legal age." Registering women will have to say exactly how old they are.

Frederick Wagener, Lancaster county attorney, requested the official opinion after some women declined to give their exact age.

Farm Wife Launches Country Store

SHELLSBURG, IOWA.—Marking a rebirth of the country store in Benton county, Hobby Harbor has been launched as a typical old-time mercantile business establishment by a farmer's wife in her farm home near here.

Mrs. Opal Gardemann, a former school teacher, who wanted to start the venture "in a small way," thought $500 worth of merchandise would be enough to stock the store. Now her stock inventory is about $5,000, and she already has made plans to remodel the farm home to provide additional merchandise space.

Farm families in the vicinity and motorists attracted by the sign tacked to a telephone pole near the entrance to the Gardemann farm are amazed to find they can buy radios, washing machines, and countless items that are hard to get.

Get FAST UP and DOWN Relief

Miserable with coughs from colds or smoking . . . stuffy nose? Here's relief—*fast up* and *down!* Famous medication goes *down* to ease tickle, soothe irritated membranes. Menthol vapors *up* to bring cool comfort. Smith Brothers are richer in menthol—*plus exclusive medication.* Look for "Trade" and "Mark" on orange box. STILL ONLY 5¢

SMITH BROTHERS MENTHOL COUGH DROPS MEDICATED

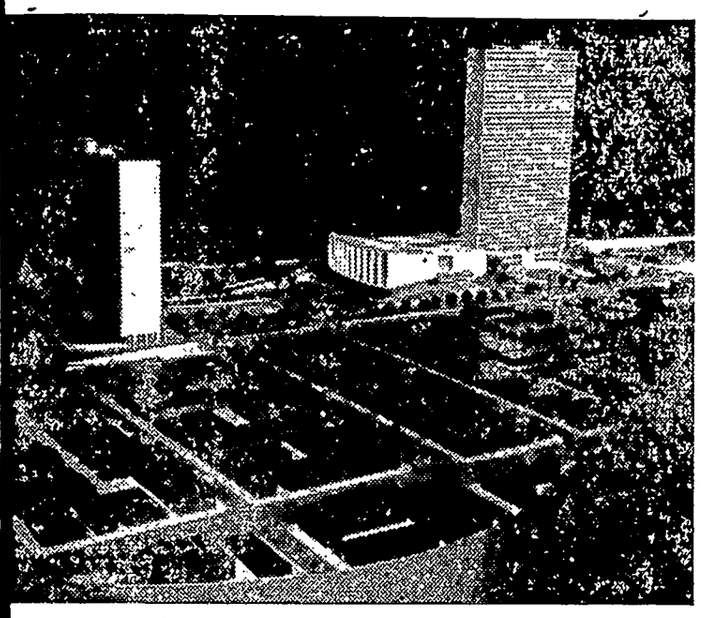
WNU—N 52

Spoken like an American

You bet you can say it . . . You're an American . . . and the American Bill of Rights guarantees the right of trial by jury. But Freedom doesn't work unless you work at it . . . Vote, serve on juries, be active in community affairs, know what's going on and *do* something about it.

Freedom is everybody's job

CORN KING . . . Walter J. Harpel, 45, of Shannondale, Ind., crowned 1947 Corn King of North America, is shown with the 10-year exhibit of Indiana certified yellow dent hybrid 844-D corn that won him the grand championship at the International Livestock Exposition in Chicago. Harpel's recipe for growing top-flight corn is "good soil management that builds up the soil's organic matter supply, good seed, plenty of fertilizer and hard work."



WORLD CAPITAL—CITY OF GLASS . . . Glass will be the main motif of the projected United Nations buildings in New York, shown here in a model. Most startling innovation is the use of double-paned glass sheets which provide for about a foot of space between inner and outer windows so that solar heat can be isolated, making it simple to keep buildings cool in summer. Coolness will be a vital prerequisite of any building housing some of the hot U. N. debates.

REMEMBER TOM MIX? . . . Dedication of a marker to Tom Mix, famed movie cowboy idol, drew crowds (including these three buckaroos) to the spot along the Florence-Tucson highway in Arizona where Mix was killed in an auto accident seven years ago. The seven-foot marker of malpai stone is topped by a silhouette of Tony, the star's wonder horse, and contains a bronze plaque.

ST ARCHBISHOP OF WASHINGTON . . . The Rt. Rev. Msgr. Patrick A. O'Boyle (left), named by Pope Pius XII to be the first archbishop of Washington, D. C., is congratulated by Francis Cardinal Spellman on his new status. Monsignor O'Boyle, native of Scranton, Pa., is now executive director of Catholic charities of the archdiocese of New York. Washington formerly was a part of the archdiocese of Baltimore.

NEW FOOD SAVER . . . James A. Stillwell is the head of a subcommittee of the President's cabinet food committee to take over the food saving drive where Charles Luckman left off. The 1948 program will stress food conservation in the American home.

PUPPY LOVE . . . Softhearted Mrs. John Jacob Astor of the New York Astors carried her Mexican hairless Chihuahua dog inside her mink coat when she ventured out with him on a cold night. There was enough mink fur to keep them both warm.

TOLD OF PANIC . . . Alexis C. Ladas, Greek language announcer for the U. S. "Voice of America" broadcasts, is shown as he told of a wave of bank runs and panic buying in Moscow and other large Russian cities as a result of a rumor that the ruble was to be devaluated.

ZIONIST LEADER . . . Chaim Weizmann, noted Jewish scientist and president of the World Zionist organization, was hailed as the first president of the new Judean state in Palestine created by U. N. partition of the Holy Land.

PENN STATE BEST . . . Coach Bob Higgins of Penn State is shown with the Lambert trophy and plaque symbolizing selection of the school's football team as the outstanding one in the East. Experts chose Penn State over Penn, Army, Columbia and Rutgers.

Sportlight

by GRANTLAND RICE

ON A GRAY fall day, back in the long-forgotten year of 1895, a young kid sat in the stands watching Vanderbilt and Georgia meet. The coach of the Georgia team was another young fellow out of Cornell by the name of Glenn Scoby Warner, later known as Pop.

Here, 52 years ago, was the real beginning of one of the great coaches of all time, Cornell — Georgia — the Carlisle Indians — Pittsburgh — Stanford and Temple. Pop has been a friend of mine for too many years to mention—30 — 40 — what difference does it make? The years roll by faster than Man O' War could ever run. Pop Warner has been football's greatest inventor of plays, including the single and double wing on offense, still just as popular as the T.

Warner

Pop had a fine team at Georgia — record-breaking teams at Carlisle, Pittsburgh and Stanford where his football knowledge and his iron personality dominated the scene.

He was the only coach who had—not exactly the fear — but the complete respect of Jim Thorpe, a football genius no one else could handle. This is easy to understand, for Pop discovered Jim Thorpe when he was an Indian stripling at Carlisle, just 15 years old. Thorpe then weighed 141 pounds.

Pop still isn't quite sure whether his best team was at Carlisle, Pittsburgh or Stanford. The answer is, he had great teams at all three places.

Look over the men he has coached: Thorpe, Galac, Guyon, Metoxen, Hauser, Little Bear, Mt. Pleasant, Hudson, Peck, Ernie Nevers, entirely too many to mention here . . . at least 50 in the upper brackets of the game. His two greatest were Thorpe and Nevers — Thorpe the genius—Nevers the 60-minute man — Thorpe the greatest —Nevers the most valuable.

Carlisle Was Tops

"The Indians," Pop wrote me 30 years ago, "are the only true amateurs. They play football for fun. They are no good in the rain—for it isn't any fun. At different hotels they are more popular than any white team for they are quiet, well-behaved, never any trouble. No silver or towels ever missing. They are the gentlemen of our profession. But they play only when they feel like playing—only when it is fun."

I still think Pop's all-Carlisle team, with Thorpe, Galac, Guyon and Mt. Pleasant in the backfield would beat the pick from Pittsburgh or Stanford, Harvard, Notre Dame, Yale, Michigan, Army or anywhere else.

Pop Warner belonged to the old iron-man school of coaching. There was never anything soft about Pop. To him, football was something more than a matter of plays—where he is still one of the masters. It was a game of condition—of discipline—of concentration—of giving all you have.

He was no easy task master. He gave the country a lesson that it needed. The primrose trail had no part in his philosophy.

It would be difficult to say what coach has had the greatest influence on college football — Pop Warner or Knute Rockne. Not so far back are Hurry-Up Yost and Percy Haughton, or Walter Camp.

Originator of Plays

Pop undoubtedly was the inventive genius. His, single and double wing attack still have a big place in any football offensive. It is a much stronger attack than the T for many teams, which many coaches have overlooked

Pop's word was a double bond. Some 25 years ago we left on a trip to Syracuse with Walter Camp. Pop was coaching Pittsburgh. Chick Meehan was coaching Syracuse. We all had breakfast together.

"I'm sorry, Pop," Meehan said, "but I haven't had the chance to scout you this season. What are you using today?" "I'm using only five plays, Chick," Pop said. "Here they are." Pop diagrammed each play. "If we use another play call a penalty and I'll back you up."

Pop only used the five plays throughout the game

Football was simpler then — and to my mind more the way college football should be. There was trust and faith between coaches and teams where today there is too much suspicion, distrust and lack of faith. Too many coaches and teams are breaking rules in regard to their playing personnel — and everybody knows it.

In the way of gate receipts, public excitement, thrills and the rest of it—the modern game is supreme.

It is now a better game to watch despite its unlimited substitutions, where from 35 to 45 men make a team on the field.

But through all the changes, variations and shifts, Pop Warner's single and double wing still remain among the most effective offensive football knows.

THE HOME TOWN REPORTER IN WASHINGTON

WALTER SHEAD, WNU Correspondent

Vicious Circle

"NO, I don't believe I want it at that price."

Thousands of you folks in the Home Towns of the country are giving that answer in the retail stores oftener and oftener as the spiral of prices rises and consumer resistance grows.

The result is that while dollar volume of retail sales is up from 5 to 10 per cent above a year ago, actual quantity unit sales have dropped from 5 to 15 per cent in the same period.

And the administration and congressional leadership in Washington fiddles and faddles and chants in

unison that the only answer is "more production." On the other hand the labor and farm leadership sing the old song of higher wages for work and higher prices for produce.

We have the highest production, the highest wages and the highest farm prices in the nation's history. So it would seem to be apparent to the most obtuse mind that more of the same is not the answer to certain more spirals in prices, inflation and subsequent depression.

Certainly high production and high wages are desirous But today's prices and wages have been accomplished by artificial monopolistic methods by both industry and labor. The only tenable excuse for high profits is high production at small profit per unit of sales. The only tenable excuse for high wages is high output per man We have neither in the present setup of industry and labor, nor in subsidized farm prices.

Unless congress and business, labor and agriculture can quit blaming each other and get together and forget greed and intolerance for common sense, it doesn't take a fortune teller to predict what will happen. Joe Stalin is waiting for it.

• • •

J. Frederick Richardson, official coordinator of information for the house of representatives, has made a comparison of communism and fascism for use of congress. The only difference is that in communism no right of private property exists. Rulers of the state take whatever they want. In fascism the dictators own the owners. Right of private property exists as an implement of the state. In all other instances communism and fascism are identical. This column has pointed out frequently both are equally evil and this country should fight against growth of either. Monopoly is fascism.

• • •

Threat to Farm Vote

Hearings by the house ways and means committee on the question of taxing patronage refunds of farm and other cooperatives have ended and the matter is squarely up to congress Your Home Town Reporter is convinced cooperatives offer no threat to the American way of life for they are thoroughly democratic. Whether they hurt other small business is another question.

• • •

The office of small business of the department of commerce, which at one time gave evidence of being helpful to small businessmen, has labored mightily and brought forth a mouse in a new booklet entitled "The Small Businessman and His Bank." It says in effect that if you are a good moral risk and have adequate collateral you can get a loan from your bank. Or did you already know that?

• • •

Added Coverage Needed

Forty cents an hour for a 40-hour week is the present minimum wage. The senate of the last congress upped the figure to 65 cents. The house took no action. It will come up again in the next session. But unless coverage is extended nobody will get a raise Twenty million out of 60 million employed are now covered, but these already are getting more than the new figure of 65 cents except about a million in tobacco, lumber and textiles. So, unless coverage is extended to some of those 40 million not now covered, a higher minimum wage would be ineffective for about 95 per cent of those to whom it applies.

• • •

Miscellaneous Memos

Rural Electric administration says that while 61 per cent of the farms in the country have electricity, only 25 per cent have running water. That means more than four million farm homes are potential plumbing customers. . . . Veterans' administration reports that 120,000 former G.I.s are taking correspondence courses to complete their educations. . . . Presidential Press Secy. Charles Ross writes sonnets in his spare time.

Household Hints

If a small amount of vaseline is rubbed on the hinge of a new umbrella before using, it helps prevent rusting.

—•—

Dip hooks to be used on walls or doors in paint. This helps to prevent rusting and gives a more finished appearance to the room.

—•—

When baking bread and the crust becomes burnt, use a small grater and rub it lightly over the burnt crust. You'll be surprised with how easily it is removed.

—•—

Turn the broom from time to time when sweeping so the bristles wear evenly.

—•—

Improvise a sleeve board by taking the kitchen rolling pin and wrap it with several clean towels. This forms a firm padded surface to slip into the sleeve and iron over.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

PSORIASIS
—is it a SKIN DISEASE?

● After years of research, many noted medical scientists have reached an opinion that Psoriasis results from certain internal disorders. A number of physicians have for the last five years been reporting satisfactory treatment of this malady with a new formula called LIPAN—taken *internally*. Lipan, a combination of glandular substances and vitamins, attacks what is now believed to be the *internal* cause of Psoriasis, and tends to aid in the digestion and assimilation of foods. Lipan is harmless, non-habit forming, and can be taken with confidence by both young and old. Physician inquiries are invited. Ask your druggist for Lipan or write us direct for free booklet. Or, order a month's supply of Lipan—bottle containing 180 tablets—at once, enclosing check or money order for $8.50.

Spirt & Co. Dept. D, Waterbury, Conn.

IF PETER PAIN HAS YOU ALL TIED UP WITH
CHEST COLD

● Rub in Ben-Gay, quick! Gently warming Ben-Gay brings speedy, welcome relief from chest-cold discomfort. You see, Ben-Gay contains up to 2½ times more methyl salicylate and menthol—two pain-relieving agents known to all doctors—than five other widely offered rub-ins. Insist on genuine Ben-Gay, the original Baume Analgésique.

Also for Pain due to RHEUMATISM, MUSCLE ACHE, and STRAINS.
Ask for Mild Ben-Gay for Children.

John Etchen, Prop.

FOURTH STRAIGHT YEAR FOR CATTLE PRICE RISE

This year's steady climb of cattle prices has echoed price trends of the past four years.

Looking back over weekly average prices of stocker and feeder cattle at the Kansas City market, R. C. Bently, Iowa College farm economist and radio station WOI market system analyst, finds that price trends have shown an almost steady rise from January 1943.

The Dec. 12, 1947, price was $23.19 — an all-time high for Kansas City. It was also an increase of almost $12.00 over the Dec. 1,1943, average. A year later, on Dec. 1, 1944, prices were again back within a dime of the $11.35 average for '43 they had climbed to a little over $13 and on Dec. 1, '46' were crowding the $18 mark.

Lowpoint for stockers and feeders during the 4 years was in mid- July 1944 when the weekly Kansas City price dipped to $10 40.

During the year just ending, prices climbed steadily from $17.15 last January to $21.75 in mid-May. Then they dropped until mid-July, when they went sharply, reaaching $22.40 by August 1st. Weekly averages fluctuated sharply throughout the next 2 months, then smoothed out and started building to the Dec. 12 peak.

As to future fluctuations, Bentley says the trend seems to be upward.

Turkey Steaks Presage Full Year-Round Market

There's a new development in the poultry industry that promises to be a real booster for the turkey business — and that's the turkey steak.

Turkey breeders have been experimenting with the turkey steak idea for several years, and recently the steaks have been showing up in restaurants and meat markets. Turkey men say that the idea shows promise of becoming a big industry. They believe it can mean a year-round market for turkeys, not just the usual holiday market demand.

The process of turning turkeys into steaks is fairly simple. There are two processes being used. In one process the bird is boned, rolled up, frozen, and then sliced the same way a boned ham is cut.

By the other method, the wings and legs are removed, the rest of the bird is frozen and sliced lengthwise through the bones. In either case, the birds are dressed, drawn and the tendons removed, to prevent the meat from being stringy. An experienced boner can fix up a bird in as little as five minutes.

On the cooking side, the steaks can be fried in deep fat the same way as chicken or chicken fried steaks. Experienced cooks let the steaks thaw slightly, pound them lightly with a meat hammer, dip into an egg batter and then into flour that's seasoned with salt and pepper. Then they're ready for the skillet.

Washington's Cherry Trees Are Oriental, Not Japanese

The cherry trees which bloom in Washington, D. C., every spring and lure thousands of visitors to the capital city are not Japanese after all. In fact, there is no such thing as a Japanese cherry tree. Actually, horticulturists report, they are the Oriental flowering cherry tree.

Back in 1909, the city of Tokyo sent a "good will" shipment of Oriental flowering cherry trees, especially bred in the imperial horticultural station at Okitsu, Japan, to Washington.

The first tree shipment was found to be blighted, and the trees had to be destroyed. A second was received during the winter of 1911-1912.

About 1,400 cherry trees now bloom in the tidal basin, about half the number originally sent. Many of the original trees have had to be replaced.

The cherry trees have been the core of at least two feuds in festival history. The first came when the construction of the Jefferson Memorial along the tidal basin necessitated removal of some of the trees. Some club women chained themselves to these trees.

Shortly after the outbreak of World War II, the cherry trees again hit the news when vandals cut two of them with an axe, apparently a vengeful retort to Pearl Harbor Day in 1941.

Farm Accidents

The main action in active prevention of farm accidents must be local in nature. The final responsibility is up to each farm family. The most effective over-all accident prevention program would be for each farm father and mother to wage a "one-man" campaign not merely saying, "Be careful, Johnny" or "Look out for the bull, Susie!" but going with the youngster to point out the dangers and explain how to avoid them. It is just as dangerous for children to be around or on a piece of operating farm equipment as around a punch press or a moving locomotive. Practice safe operation of equipment yourself and explain to the children how to avoid danger of injury. When this is done the safety method soon becomes a safety habit, the best guardian against tragedy and human suffering.

'Kept Up With Joneses'

"Keeping up with the Joneses" was a matter of great importance in the culture of the Shasta Indians of California. The importance attached to money among the Shasta Indians, as among other tribes of California, is described in "Shasta Ethnography," by Catherine Holt, former researcher in the department of anthropology. Money was prized and established influence everywhere in California, the author points out. So the Shasta were strongly influenced by their wealthier neighbors. The Shasta were bedazzled by their wealthier neighbors on the lower Klamath river and developed a "wealth and display orientation of culture," according to the author, with a consequent inhibition of other phases of their society.

Colossal, As Usual

An average of 100 million people attended movie theaters weekly in 1946, according to an estimate in the 1947 Film Daily Year Book. This compares with an average of 95 million for the preceding year. Grosses were placed at 1.8 billion dollars—the highest yet. It's estimated that there were 18,765 movie theaters operating in the United States on January 1, 1947. Movie theaters in the world are placed at 83,668. Some 206,000 people are employed in the movie industry, it is estimated—31,000 in Hollywood, 14,000 in distribution and 161,000 in movie theaters.

KLEMME NEWS

Mr. and Mrs. Paul Radics, jr. who visited Christmas day and over the week end at the parental John Etchen home, returned to their home at Detroit Sunday. They made the trip to and from Klemme by plane via Des Moines.

Mrs. Henry Medaus entertained to dinner on Christmas day Mr. and Mrs. Edward Medaus and two daughters, Margaret and Adeline, and Mr. Carl Medaus. The men are nephews of Mrs. Medaus.

Mr. and Mrs. Eldon Hagen were Christmas day guests at the parental Hagen home near Hanlontown.

Mr. and Mrs. Dorance Day and Gary of Mason City; Mr. and Mrs. Bert Mathews and Mrs. Petersen of Clear Lake, were Christmas day guests at the Mrs. Mildred Day home.

Mr. and Mrs. James Fredin, of Fort Dodge, came Wednesday to spend Christmas at the parental Herman Gast home.

Christmas dinner guests at the Elmer Arnold home were Mr and Mrs. Lloyd Lau and Cozette, Mr. and Mrs. Roy Arnold and Bill, Bruce of Ames, and Evelyn of Meservey. Supper guests included Martha and Novella Bredbenner, Leona and Marjorie Lau.

Bill Zabilka was a supper guest Friday evening at the home of his friend, Bruce Arnold.

Mr. and Mrs. E. J. Arnold, Mrs. Roy Arnold, Evelyn and Bruce were Mason City visitors on Saturday. Novella Bredbenner accompanied them at Mason City where she boarded a train to Chicago.

Mrs. E. B. Albro, who has been caring for her daughter, Mrs. M. L. Harson, has returned to her home at Rowan. Miss Shirley Davenport, neice of Mr. Harson, is now caring for Mrs. Harson and the baby.

Mr. and Mrs. James Balzer and Jimmie of Belmond were visiting at the M. L. Harson home Sunday afternoon.

LaVerne Velau left on Friday morning for Waterloo where he will work.

Mr. and Mrs. Verle Keraus of Garner entertained to dinner Saturday evening Mr. and Mrs. Lynford Back and Roxanna; Larry Wicks and Mr. and Mrs. Lyle Wilcox.

Mr. and Mrs. Calvin "Bill" Grosshuesch of Cedar Falls spent Christmas day at the parental, Rev. Grosshuesch home.

Mrs. Swanetta Haefner and son, Dennis, visited over Christmas with relatives at Ackley, Iowa.

After the church program on Christmas eve Mrs. Clara Barz served a nice lunch to Mr. and Mrs. Will Barz and Dr. and Mrs. H. G. Voetberg of Garner; Mr. and Mrs. Martin Hagen and Roy Hagen of Hanlontown; Mrs. Lena Schroeder and Mr. and Mrs. Eldon Hagen.

GOOD BEHAVIOR

Citizens of Anamosa were obivously on their good behavior as they waited for Santa Claus last week. For the first time in 1947, no cases were brought before any of the justice courts for the week preceding Santa's arrival.

Another New Year!

There's a lift of the spirit, a warming of the heart! There's laughter and youth . . . sixty joins hands with twenty, and on this day the old grew young and youth throws off the grasp of time.

On this happy occasion we wish for you the very best that life affords!

JOST D-X SERVICE

Henry Jost, Prop.

GOOD NEWS FOR THE NEW YEAR

IF WE HAD OUR WAY ABOUT IT, 1948 WOULD BE A BIG BUDGET OF GOOD NEWS FOR YOU.

ACCEPT OUR BEST WISHES FOR YOUR HAPPINESS IN THE YEAR TO COME.

DR. W. F. MISSMAN

Physcian & Surgeon

Each year we welcome the New Year, certain it can bring only better things. Under New Year's familiar lights we share memories of struggle, of triumph, of hope.

May all your hopes for 1948 come true! And may you enjoy a very happy New Year.

J. C. THOMAS

Barber Shop

NEW HOPE · BEST WISHES

Time, the one monarch to whom the whole world pays obeisance, poises his scythe to sweep back another year into history's pages.

Few tears mark the death of the old year, but there is gladness at the advent of a new era, which man feels is to prove better and more fruitful than the old one.

May new faith and new courage be your lot in 1948.

The Eyes Have It

Your eyes travel more than 1,000 miles during your lifetime when reading. A slow reader will scan about 300 words a minute, which is about twice as fast as the average person talks and 10 times as fast as one can write At this rate, a man is calculated to read out 92 yards of type in half an hour As nearly everyone reads at least half an hour each day, on an average, he will, therefore, cover 19 miles of reading matter every year, or the respectable journey of 950 miles in 50 years. That, of course, is a very low average, for lots of people read five hours a day, which would bring their total up to 9,500.

Still Timely

Three centuries ago an English poet said, "Put off thy cares with thy clothes: so shall thy rest strengthen thy labor and so shall thy labor strengthen thy rest." His meaning is plain even though a modern suggestion would probably be "Stop worrying when you go to bed, you'll work better if you sleep well and you'll sleep better after working" It's still true today that a comfortable bed, a mind at ease and regular hours of work and sleep are the best ways to be sure of sleeping all night and getting up ready for the day.

Safest Travel

Riding on your local street car trackless trolley coach or b . s is the safest way to travel on t public highway. Records show that 2.9 persons die in private automobile accidents for every 100 million miles traveled Only 0.17 deaths occur over the same mileage in transit vehicles In establishing this record, the country's buses, street cars and trolley coaches traveled more than three billion miles last year

Find Unique Pigments Color Eyes of Hens

Brilliant coloring of autumn leaves and the bright 'reddish-bay" eye color of chickens of most breeds trace to a common source. In a study of eye color of healthy chickens, particularly in relation to "gray eye" which is one of the common names for fowl paralysis, department of agriculture and other scientists have found that carotene and xanthophyll—which color the autumn leaves—are two of the important eye pigments. But the department scientists also found that a gray eye is not a reliable basis on which to cull poultry flocks. There are too many other factors that may cause dull or grayish eyes.

In leaves, the carotene and xanthophyll are not in evidence in summer, but appear in fall when growth stops and the intense green of the chlorophyll no longer masks the reds and yellows. In the eyes of chickens these two pigments are modified. A third pigment, melanin, is black and may dilute the effect of these brighter hues to browns. Red color is intensified by the red of blood in the fine blood vessels of the eye.

Chickens affected by fowl paralysis — lymphomatosis — often have gray eyes. But Norman M. Nelson of the Bureau of Animal Industry, does not regard light or gray color as a reliable symptom of the disease. The color may be hereditary.

Ingenious Housewife Makes Good Use of Cotton Bags

Almost every rural housewife is cotton bag-conscious, but chances are that very few have realized the full potentialities of the material. For many years bags have entered the house as dish cloths, curtains, and slip covers, but now they are being looked upon as dresses in the making. An unlimited number of items for yourself, your home, and your children can be made from this sack material. The white bags can be left plain, or dyed any color and several print bags in the same pattern will make a dress. Boys' sport and dress shirts can also be made from this material.

Besides wearing apparel, numerous other useful and attractive items can be made from bags: all kinds of aprons from the necessary coverall type to dainty tea aprons of print trimmed with deep ruffles of white or pastel-dyed material; luncheon cloths, napkins, and table mats provide unlimited possibilities.

Let the daughters try their hands at making some of their own clothes using the bag material. They are especially good for attractive school dresses. Washed thoroughly, dyed, and made into any of hundreds of possible items, cotton feed bags become indispensable around the home.

Cause Rabies

The dog and cat, generally accepted as pets, are responsible for dread rabies disease, according to two San Francisco investigators, writing in the Journal of the American Medical association. Rabies, a major public health problem, is one of the most feared and notorious of diseases because it is invariably fatal once it has developed, state the authors. Usually the disease is transmitted by the bite of a dog or cat infected with rabies. However, a few authentic cases have been reported of rabies developing after a hand, on which there was a scratch, had been licked by an infected animal. "If rabies is to be prevented in man following exposure," write the investigators, "it is imperative to achieve an immunity sufficient to stop the multiplication of the virus in the nervous system. . . . Local treatment cannot be fully depended on, and since it takes several weeks for rabies to develop in man, the physician will decide to administer postinfectional vaccination as a safeguard."

Arterial Surgery

Dr. Norman E. Freeman (University of California medical school) reports in The Annals of Surgery that damaged arteries can easily be repaired. He simply cuts away the damaged part and sutures healthy tissue crosswise rather than longitudinally. He performed the operation over and over again while he was a lieutenant colonel in the army medical corps at DeWitt general hospital, Auburn. His patients were soldiers whose arteries had been injured in battle. In most of the cases a false opening was present between the artery and the vein, a condition which is known as an arterio-venous fistula. One patient had a damaged abdominal aorta, a major trunk of the arterial system. Surgical restoration of this patient's artery was the second successful one ever reported. Ordinarily damage to the abdominal aorta results in bleeding to death before surgery can be attempted.

Egyptian Varnish

The ancient Egyptians made a varnish by pressing the oil from flaxseed and then melting amber into the oil until it was compatible for their purpose. While the varnish was still in hot fluid condition, they applied it to their coffins. They were unaware of the use of volatile thinners which could have enabled them to apply their varnish cold. Also, the Egyptians used coatings for their fabrics to make them glossy and beautiful.

Large Farms Increase

More than half the farmland of the nation is in units of larger than 500 acres. Only a third were in this category in 1920. Farms over 1,000 acres now account for about 40 per cent of the farm land, compared with less than one-fourth 25 years ago. The number of 110 to 180 acre farms decreased by over 110,000 during the war. The census would show an even more pronounced trend toward larger farms if the very small units—those farms under 10 acres, most of which are little more than a rural residence of city workers—were not included in the total. The number of farms under 10 acres has increased 300,000 since World War I and nearly 90,000 in the last five years

Record Crop Output

American farmers produced the biggest crop in all history in 1946 on the smallest acreage required for harvests in recent years. Crop output last year was 7 per cent above the 1945 production and 2 per cent higher than the previous record for 1942, according to the department of agriculture. Yet the harvested acreage of 52 crops totaled less than 346 million acres. This was smaller than in any of the preceding three years and below the 1929-32 level. A number of factors contributed to producing this record farm output. One was the use of mixed fertilizers containing nitrogen, phosphorus and potash which boosted crop yields per acre. Another was improved varieties of seeds.

Clean Paint Brush

To keep a brush in good shape, clean paint or enamel from it after each use. Work it out in mineral spirits or turpentine. Do not press the brush down endwise as this will force it out of shape. Work the solvent well into the heel. To remove paint clinging to the bristles, lay the brush flat on a board and scrape the bristles with a blunt putty knife. Work again in the solvent and scrub out the loose paint with a stubby one inch brush. Rinse again in thinner and spin to remove all liquid. Then transfer the brush to clean thinner and rinse out as much as possible. Save the dirty thinner. When it stands, the pigment will settle to the bottom and the thinner can be poured off and used again for cleaning. After the brush has been cleaned, suspend it in raw linseed oil by hanging it from the handle. Again, it's best to wrap it before suspending it. When the brush is to be used again, remove the wrapper and spin to remove the linseed oil. Then rinse in paint thinner.

B. A. REEMTSMA, Auctioneer

FIRST NATIONAL BANK, Klemme, Clerk.

Flock Finishes

Flock finishes, a relatively recent development in the paint, varnish and lacquer field, are used both for architechural purposes for sound deadening and insulation, as well as in product finishing for highly novel decorative effects. In the product finishing field, flock finishes are used to simulate not only suede, but also other types of leather, embroideries, upholstery and fabric, and may be applied successfully to wood, metal, glass, cloth, paper, plastic and other surfaces. Flock itself is a by-product of the textile industry and consists of fibres of various lengths. The surface to be flocked is prepared by coating it with an adhesive which, while still wet and sticky, is coated with flock which is blown upon it with a special spray gun, or sometimes applied by hand with a sifter in finishing some types of products.

Inquiry Reveals Butter Vitamin Varies During Year

Butter, often considered a splendid food source of vitamin A, varies considerably in its vitamin and carotene content during the year, recent studies at the Pennsylvania State college show. The vitamin A content was found to be lowest during spring months and highest in October.

In the course of the two-year study, more than 140 samples of five nationally advertised brands of butter were purchased on the retail market and one brand purchased at a local creamery for the study. The average yearly vitamin potency of the six brands of butter was found to be 15,640 international units per pound. With few exceptions, the vitamin A content of butter was found to exceed the carotene content in terms of both weight of material present and international unit equivalent, at all seasons of the year.

Results of the lengthy study showed that the average vitamin A content of the butters January to June inclusive was .526 mg. per 100 mg. of butter while this average during July to December was 857 mg.

1947 with its joys and sorrows
will soon be part of the past,
and 1948 will soon be here!
We join in the celebration to ring out
the old year and ring in the new,
and now voice the hope that 1948 will be
crowded with many golden hours for you.

Edmund Ethel Byrnes

Foresee Big Population Increase in California

By 1960, California's population may be nearly double its 1940 size, already having scored a record 34 per cent increase since Pearl Harbor according to a report formulated by the California Reconstruction and Reemployment commission. Maximum anticipated population of California in January, 1960, is 13.5 million, double the 6.9 million 1940 population and 4.2 million more than the current 9.3 million estimated population of the state.

Biggest factor in California's current and expected population increase is migration to the state from other parts of the country. An estimated 1.8 million people already have moved to California since 1940, and if state predictions are correct, as many as 700,000 more people will become California residents before the decade is ended.

Authors of the forecast do not expect it to be mathematically exact because of the unpredictable forces acting on population. Social, economic, and biological factors were considered, however, and predictions stated in terms of anticipated minimums and maximums annually for the next 15 years. California population growth varies largely with economic conditions according to researchers. "Contrary to popular belief," they report, "the settlement of newcomers in California has almost invariably been larger during periods of widespread prosperity" than during depressions.

Proper Clothes Hanger Preserves Shape of Clothes

The humble clothes hanger plays a greater part in the care of clothing than many people realize. Knitted garments, of course, should be folded away in a drawer or box, but nearly every other garment in the family wardrobe is best stored on a suitable hanger.

Suitability of the hanger to the garment is the important thing, and hangers of several different types are needed to serve most wardrobes. Heavy garments, such as winter coats, require heavy hangers which can hold their shape under the extra weight. A man's coat should be placed on a hanger which is wide enough to support the entire shoulder. For dresses and blouses, padded hangers with enough width to reach across the shoulder to both sleeve seams are desirable. Women's clothes with heavy shoulder pads slip about on the hanger if it is too narrow or insufficiently padded.

Waxing Linoleum

Linoleum in kitchens—especially light colored linoleum—can be well protected with properly applied wax. First, clean the surface of the linoleum thoroughly with soap and water to remove all traces of greasy film, or dirt, and dry thoroughly. Then promptly, before doing any cooking, apply a thin coat of paste floor wax. A non-rubbing type of wax may be used if desired. When the wax coating is dry and hard, apply another thin coat of wax. For polishing paste wax, an electric polisher or a polishing weight are worth while conveniences. Proper waxing and polishing can greatly ease the cleaning of linoleum.

Report on First Native Outbreak of Q Fever

A group of investigators who made a study of an epidemic of Q fever in Amarillo, Tex., in March, 1946, report that "it represents the first sizable outbreak of this disease acquired naturally in the United States." They state that Q fever, a rickettsial infection originally discovered in Queensland, Australia, in 1935, is caused by a virus-like organism, called rickettsia burneti, which belongs to the same family responsible for typhus and Rocky Mountain spotted fever.

The Amarillo outbreak of Q fever occurred in stock handlers and in slaughterhouse workers. There were 55 cases among 136 employees of three establishments, an attack rate of 40 per cent. There was wide variation in the severity of illness, ranging from mild influenza-like attacks to grave illnesses with 2 deaths. The investigations revealed that cattle were probably the source of human infections in this particular outbreak. Moreover, the disease primarily affected those engaged in killing the animals and handling the freshly killed meat.

The onset of the disease usually was characterized by headache, chilly sensations, general malaise and, sometimes, nausea or vomiting. "Frequently," state the investigators, "there was a latent period of from one to three days following the onset, and in some instances the patient returned to work or continued to work while feeling ill."

American Working Man Fares Better Than Others

The American industrial worker, with a wealth of power tools and mechanical devices at his command, produces more goods, earns more money and maintains a higher standard of living than any other worker in the world.

An American newspaper columnist, on a tour of industrial areas in England recently, found that a British automobile worker receives $24.54 for an average work week of 47.6 hours in contrast to "an American auto worker who would earn $64.87 for the same number of hours," he reported.

It would take 62 weeks for an English auto employee to earn the price of his country's cheapest car, an undersized, low-powered job, which sells for $1,536. A U. S. worker would earn the price in 24 weeks. In contrast to the American scene, where workers' automobiles fill factory parking lots, the U. S. visitor reported that British workers rely on public transportation and bicycles to get to and from work. "Only one vehicle is available for every 15 persons in England," he said, "as compared with one for every five persons in America."

Pioneer in Fertilizer

The science of modern soil chemistry and the principles of plant feeding were discovered by Justus von Liebig in a makeshift laboratory near Giessen, Germany, in 1840, according to the Middle West Soil Improvement committee. His experiments proved that plants get carbon, hydrogen and oxygen from the air, but must depend on the soil for nitrogen, phosphorus, potash and other elements. Liebig learned that while the supply of elements from the air is inexhaustible, the plant food resources of the soil are limited. They must be replaced if fertility is to be maintained. On the basis of his studies Liebig prepared artificial manures containing mineral substances. These were the forerunners of modern commercial fertilizer. With them he carried on extensive experiments on a 10-acre plot near his laboratory. Liebig's discovery paved the way for research by agronomists today and for the establishment of the modern fertilizer industry.

Expenditure for Fertilizer

Farmers spend five times as much for hired help each year as they do for plant food. Their outlay for feed is 4½ times as great as for fertilizer. For livestock it is 2½ times as much and for gasoline and other operating costs for motor vehicles it is twice as much. In 1945, farmers spent $440,000,000 for fertilizer, according to the department of agriculture. That year they spent $2,210,000,000 for hired labor; $2,009,000,000 for feed; $1,071,000,00 for livestock; and $87,000,000 for motor fuel for cars, trucks, etc. Small as the relative amount spent for plant food, says the Middle West Soil Improvement committee, records indicate that every dollar spent for such improvement returns several in increased values of crops marketed.

Handy Apron

One of the latest clothing developments is what might be called a two-in-one apron, which is made to give your knees protection when doing kneeling jobs and also to give you a spacious pocket in which you can carry anything from a packet of seed on up to a mess of turnip greens. The apron has a big pocket which is buttoned instead of sewed on. When you're ready to do a kneeling job, you simply unbutton the big pocket and turn it inside out and over the knees. Then you're protected from dirt and dampness. When the job is finished, fold up the pocket, button it, and you have a handy place to tuck away gloves, seed packets, markers, or any other small things that may get lost.

Reduced 'Breathing' of Apples Prolongs Storage Life

If you choke apples and reduce their breathing during the winter while they are in storage, they will keep longer and much better. Like human beings, apples breathe in oxygen and give off carbon dioxide. Scientific tests have shown that if the concentration of the carbon dioxide is increased and that of the oxygen decreased, the breathing process of the apple is slowed to a minimum and its storage life is greatly lengthened.

This new development in apple storage can be adapted to home use by using a 50-gallon steel drum with a removable head. A hole is dug back in a bank or down into the ground, if no bank is available, and the drum placed in the hole.

This is your refrigerator, as the temperature of the soil rarely rises above 50 degrees F. Then the apples are placed in the drum and the lid replaced. Two ¼-inch holes are drilled in the lid and with the drum full of apples and the two ¼-inch holes in the lid, the exact desired concentrations of oxygen and carbon dioxide are maintained. There is no danger of freezing of the apples, as the heat of respiration will keep the temperature in the barrel above the freezing point. By picking the apples while they are still quite firm and storing them at once with a minimum of bruising, the home fruit grower can keep his apples in good condition from one to two months longer than the particular variety ususally keeps under home storage conditions.

Prepare Garden Plot by Spading in Easy Stages

If you want your garden plot to be well prepared, spade it. Spading is not hard work if done a little at a time. A space 30x50 feet can be spaded in a leisurely way in eight hours. One hour a day for eight days, and the job is done.

Systematic spading makes the job easier, and more complete. Here is one way to do it: Set a definite task for your first day's work, say a strip six feet wide, running the shortest dimension of the garden. At one end dig a ditch, say one foot wide and the depth of the spade, removing all soil from it. Pile this soil near the opposite end of the strip.

Now begin to spade with the blade not parallel to the trench, but at right angles to it. This enables you to lift the soil more easily and deposit it in the trench. The spade should be driven down, not on a slant, but perpendicularly to its full depth. Take a small slice of the soil, so your back is not strained. Lift it up, turn the spade over, so that the top soil falls underneath the bottom soil on top. In filling the first trench, you have opened a second

Cleaning Lampshades

Skimmilk is a good cleaner for paper lampshades, both those of unfinished paper and those with a shellac, varnish or waxlike finish. Rarely use water on paper shades because it softens and may break or damage the paper. Milk, on the other hand, does not penetrate paper readily because of its casein content. It slips over the surface carrying soil with it. The casein in milk is a rather gelatinous material that picks up and absorbs dirt. The first step in cleaning the shade is to dust inside and out with a soft clean cloth, soft brush or hand vacuum cleaner. Then sponge the surface very lightly with a cloth dipped in milk, using about a fourth cupful for a large shade. Support the shade by placing it on a table and hold it by the top wires, turning as you clean in order not to bend the paper. Use a fresh cloth and fresh milk as either shows soil. The milk should not stand on the shade or moisten the glue. If the milk seems to be softening the paper, allow the shade to dry before continuing.

Extinct Birds

A previously unknown extinct bird genus, related to the blackbirds and orioles, has been discovered among fossil specimens taken from the La Brea pits of Los Angeles. An upper and lower bill of the bird are the only parts found, but these indicate that the bird was of an entirely different type from any previously described. The fossil specimens were found by a new sifting process developed by Los Angeles County Museum scientists for the recovery of small fossils from the matrix of the La Brea asphalt pits. Pandanaris, as the fossil bird is called, resembled a large blackbird and was of about the same size. The bird lived more than 40,000 years ago, in the same period as the great sloths and other prehistoric beasts recovered from the La Brea pits.

Harm Farm Crops

Need for continuing studies into the harmful effects of waste gases from factories on farm crops, shrubbery and trees is seen by scientists of the New Jersey Agricultural Experiment station. A report by the experiment station to the legislature mentioned publicly for the first time that damage to New Jersey crops has been caused by fluorine gas. Fluorine is involved in the manufacture of fissionable materials for the release of atomic energy, in the production of fertilizers, of refrigerants, of high octane gas for aviation and in other industrial processes.

KLEMME LOCAL NEWS

Mr. and Mrs. C. G Waterman entertained to dinner on Christmas Day Mr. and Mrs. Lyle Wilcox of Ames; Mrs. Rosa Mitchell of Swea City; Mrs. Mary Waterman and Mrs. Antonio Keraus.

Mr. and Mrs. Evert Barz and children of Waterloo came on Wednesday to spend Christmas with relatives. They were dinner guests on Christmas day at the home of Mrs. Barz's parents at Crystal Lake.

Gordon Baack, who is a student at the School for the Deaf at Council Bluffs, arrived in Klemme Saturday to spend his two weeks of holiday vacation with his mother, Mrs. August Baack and son, Dorance and with other relatives and friends. Gordon is making wonderful progress at the school and likes it there very much. This is his second year at the school.

Mr. and Mrs. Clifford Montgomery and family were dinner guests on Christmas day at the Clarence Bachman home southwest of Klemme.

Mr. and Mrs. Tom Roths and sons, Junior and Bobby, were dinner guests Christmas day at the home of Mr. and Mrs. Ernest Helps at Garner.

Christmas Day dinner guests at the Edd Schoenwetter home at Garner were Mr. and Mrs. Merle Schoenwetter and son, Dennis; Mr. and Mrs. Russell Hansen and family of near Kanawha; Mr. and Mrs. Forest Cutshall; Mr. and Mrs. Elwood Geary; Wayne Schoenwetter and Marie Nedved of Garner.

Mr. and Mrs. A. L. Kingery entertained to dinner on Christmas Day Mr. and Mrs. Lloyd Paris and Mr. and Mrs. John Whitesell and son, Douglas of Armstrong.

Dr. and Mrs. A. H. Dulmes and Dick drove to Grundy Center Wednesday evening to spend Christmas at the Mrs. Mary Mutch home.

Begin the story of Barbara Hutton — the "Millon Dollar Baby." In the American Weekly, the great magazine of real-life stories distributed with SUNDAY'S CHICAGO HERALD-AMERICAN.

Mr. and Mrs. Edw. Schaefer entertained to dinner Christmas day Mr. and Mrs. Harold Ridder of Nora Springs; Roy Schaefer and family; Elmer Schaefer and family; and Emery Weaver and family.

Mary MacWelles, a sister-in-law of Mrs. Wm. Fuss came on Sunday for a visit at the Fuss home She has been in Minnesota visiting and is on her way to her home at Lansing, Mich.

Mr and Mrs. Harvey Hubbard entertained to dinner Christmas day Alfred McNutt and family of Chaska, Minn. and Geo. Christie and family.

Mr. and Mrs. Herb Stille came from Montana and are visiting at the Irvin Priebe home and with other Klemme relatives. They are on their way to De Ridder, La. for a visit with the former's parents, Mr. and Mrs. H. J. Stille.

Mr. and Mrs . Vern Bisom spent Christmas day with her mother, Mrs. Mabel Maixner at Des Moines. Mr. Bisom returned home, while Mrs. Bisom and children remained there until Sunday.

Mr and Mrs. Wm. Lacey entertained Mr. and Mrs. Ernest Hansen and family of Hampton to a 6:30 o'clock dinner at their home Christmas Day.

Phone your news to 12.

★ Step outside, . . . and let's peer into the future for a moment. We see, for certain, a much more hopeful year than —a year of promise and of destiny. We believe you see this, too.

It is our hope that the New Year will open for you a pathway to your most cherished desires.

KOERNER DAIRY

Klemme - Iowa

★ As Father Time closes the book on 1947, places it on the shelf with its predecessors and gingerly turns the fly leaf of 1948, we pause for a moment to express the hope that the New Year will shower all its blessings on you, that health, happiness and prospesity will be yours in unbounded measure Drop in and see us any time.

Campaign Waged Against Foot and Mouth Disease

Foot and mouth disease, which recently broke out in Mexico, is spread chiefly by animals and it is highly infectious, according to the department of agriculture. Every effort is being made by the two governments to prevent the spread of the plague to other parts of Mexico and into the United States.

A quarantine is now in effect against importation of cattle, sheep, goats and swine, or the meat of these animals, into the United States, but department officers report that it is difficult to guard the 1,900 mile international border line.

Manpower and equipment have been put in readiness in each state to eradicate the disease promptly in case it should gain entrance to the United States.

Second most common carrier of infection is persons who visit infected premises. The third source of danger comprises infected vehicles and products of various kinds, including garbage cans which contain fresh meat.

The most widespread outbreak of foot-and-mouth disease in the United States occurred from October, 1914, to May, 1916. It affected more than 172,000 animals in 22 states and the District of Columbia Altogether 3,556 herds were involved and the probable sources of infection were determined in more than three-fourths of the cases.

Tests Reveal Development Of 'Natural' Ear for Music

A "natural" ear for music can be developed, it is indicated by research conducted at Northwestern university.

Tests conducted on a group of non-music students by Ruth F. Wyatt, assistant professor of the physics and psychology of music at Northwestern, showed they had acquired better musical pitch discrimination through training than was possessed naturally by a group of music students.

The experiments were conducted to test the theory of many experts that faulty pitch discrimination was largely hereditary and permanently fixed in early childhood.

Since pitch discrimination involves comparison of tones sounded in succession, with a brief time interval between, the varied program of training stressed procedures which fostered the use of latent ability to retain clear, auditory images of notes heard.

Among testing devices employed was an apparatus with 14 steel tuning bars of slightly different pitch, all within a range of one-quarter note.

Before training, both music students and non-music students groups ranked "low average" on pitch discrimination. After training, the non-music group's average rose to "good" while the average of the music group rose to "excellent."

Rainfall Gauge

A new rain gauge, designed for professional or individual home use, has been placed on the market by V. V. Phillips, government meteorologist at Wichita, Kas. The device is the product of more than 20 years' experience as a meteorologist in measuring amounts of rainfall, and was conceived as a result of many requests from weatherwise people. Manufactured of aluminum with a glass tube that will measure more than four inches of rainfall, the gauge has been engineered from the same principle as the large devices used by the government.

Better Dairying

Dairying is a stable farm enterprise that offers a good income for those who operate efficiently It lends itself well to grassland farming—a type of farming which is in keeping with good soil conservation practices. Grassland crops properly utilized make excellent feed for dairy cattle. Milk cows are the most efficient animals for converting roughages into essential human food. Dairy farming provides a steady monthly cash income, which makes for better farm living. It also gives steady employment for labor throughout the year.

'Foreign' Shoes

Did you know that the shoes you are wearing may be "foreign" born? Some 75 million hides and skins are imported yearly by the United States to maintain production of leather and keep 140 million Americans in shoes. This situation makes the United States the largest buyer of hides and skins, since about 60 million dollars are spent in foreign markets for these products. Actually, the industry tans more than 125 million hides and skins each year, and another 10 million dollars are spent on foreign tanning materials.

Pineapple Hints

Here's a hint about crushed versus sliced pineapple. The flavor of crushed or grated fruit often is better than that of the sliced. This is because it's made of the outside trimmings from the slices. This outer flesh is the sweetest and most highly flavored. Crushed pineapple is lower in price and can be used in place of sliced pineapple in many dishes. Frozen pineapple is becoming more available also, and it's packed in a sugar syrup. Frozen pineapple seems to have more of the fresh flavor.

KLEMME LOCAL NEWS

Mr. and Mrs. W. C. Keraus of Klemme, and Mr. and Mrs. Otho Keraus of Osage, spent Christmas eve at the Verle Keraus home in Garner.

Mr. and Mrs. Otho Keraus of Osage visited over Christmas with Klemme and Garner relativs and friends.

Frank Kluckhohn and son, Franklin, and Graydon Baack were dinner guests Christmas day at the Lynford Baack home northwest of Klemme.

Mr. and Mrs. Ralph Elder were guests on Christmas day at the John Waddingham home.

Mr. and Mrs. Otto Lemke drove to Des Moines to spend Christmas day at the home of their son, Wayne and family. Sharon and Larry accompanied their grandparents to Klemme for a few days visit.

Mr. and Mrs. R. A. Jorgenson entertained to dinner on Christmas day Mr. and Mrs. Ted Davis of Council Bluffs; Mr and Mrs. Joe Liebendorfer and Grandma Starboard of Hampon; Midshipman Dick Liebendorfer of the U. S Naval Academy at Annapolis, Md , Mr and Mrs. Lyle Liebendorfer and Grandma Liebendorfer of Mason City; Mr. and Mrs. Robt. Liebendorfer and son Jon of Clear Lake; Mrs. Kiethe of Preston, Minn., and Mr. and Mrs. Ray Jorgenson, jr. and Judy of Klemme.

Mr. and Mrs. Ted Davis of Council Bluffs came Thursday to spend Christmas and the week end visiting at the R. A. Jorgenson home. Mr. Davis is a brother of Mrs. Jorgenson.

Dr and Mrs. W. F. Missman were dinner guests on Christman day at the home of the latter's sister, Mrs. Hamstreet, at Mason City.

Mr. and Mrs. Russell Hansen of near Kanawha entertained to dinner Sunday Mr. and Mrs. Edd Schoenwetter of Garner, Wayne Schoenwetter and Mr. and Mrs. Elwood Geary.

The following were dinner guests at the Dwight Hummel home Christmas day: Mr. and Mrs. Clarence Johnson, Mr and Mrs. Ernest Pregundy of Renwick; Mr. and Mrs. Oliver Potter and family of Mason City; Mr. and Mrs. Stuart Heivilin and family; Mr. Arthur Johnson, and Mr. and Mrs. A. J. Kudje and family all of Klemme

Mrs. Maude Hummel, Miss Marie Perkins, and Mr. and Mrs. Hugh Hummel and family were dinner guests at the Dwight Hummel home Dec. 21.

Miss Janice Hummel was visiting at the Oliver Potter home at Mason City until Tuesday evening.

Mr. and Mrs. Dwight Hummel Janice and Joyce, were visitors at the Oliver Potter home in Mason City Sunday evening.

Mr. and Mrs. Harry Carpenter returned home December 21 from Rochester, Minn., where Mr Carpenter was a patient in the hospital.

Mr. and Mrs Earl Beiber, of Marion, spent Christmas and the week end visiting at the parental Geo. Thieman home.

Mr. and Mrs Jim Fatland of Clear Lake spent Christmas at the parental, Wm. Velau home.

Shop in Klemme and save.

CARELESS SHOOTIN'

There is too much careless shooting going on. At Reinbeck, Roy Wood, 21, was struck in the chest by a bullet which glanced off and landed in his overshoes, after penetrating his overhalls, four thickness of a leather coat and leaving a black-and-blue mark on his abromen. The bullet was from a high-powered rifle, probably fired a mile or more away.

You wouldn't be thinking of painting the town red, now, would you? Anyway, there's reason aplenty for feeling happy and carefree and confident as the New Year of 1948 approaches. May this New Year bring happiness to you and yours.

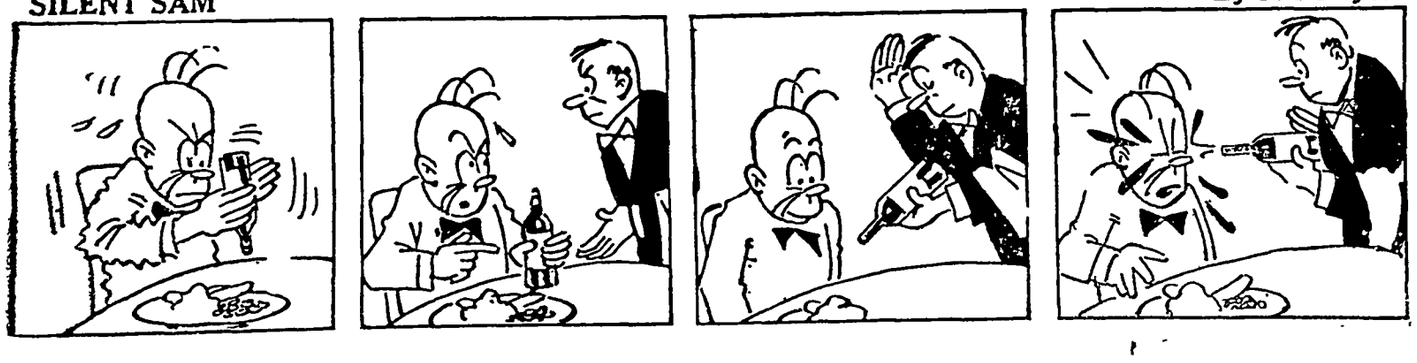
SILENT SAM — By Jeff Hayes



Letters for Special Delivery

Mr. Samuel Goldwyn,
Hollywood, Calif.

Dear Sam: You are the movie fans choice for president. Your recent statement that the double feature is driving a lot of people from the movie houses does it. That this should come from a movie magnate floors me, although the papers say you have long held that the bargain-basement-second-helping nicolette was doing the business no good.

—•—

Well, you are right as rain, Sam, and I don't mean that new scientific rain. The double feature too often is just a substitute for sleeping pills, and it is not much good for that, as the pills are easier to take. The whole theory of one good picture and one stinkeroo is boring the customers, causing widespread cries of "How can Hollywood do this to me?" and developing an "include me out" attitude toward magic lantern shows.

—•—

Did Barnum give two shows a night, one with elephants and one with mice? Would the legit theater ever get anywhere by producing "Oklahoma" and "Uncle Tom's Cabin" on the same night program? Would baseball draw more customers to the Yankee stadium if the customers had to sit through a game between the married and single men before the main dish? Would horse racing be more popular if they put on bicycle sprints and a clambake?

—•—

If it is a good idea to dish up Ingrid Bergman, Kate Hepburn or Myrna Loy on the same program with Squarehead Whoozis in one of those cold storage Westerns or terrible interludes which Hollywood has come to think of as comedy "shorts," it is a good idea to serve fish cakes with a breast of pheasant, force every buyer of a distinguished novel to buy a book about mushroom growing at home and make everybody at a Miss America contest first sit through a demonstration in sweater knitting.

—•—

I like movies, Sam, but I don't like limburger on the same program. No more than pigs feet with ice cream. I can get my sleep easier than that. And I can keep my disposition better if I give up trying to find out what time the main feature goes on but always getting to the movie just as the "smelly" is starting. Keep fighting, Sam. A big part of the movie public is with you. The other folks are just quantity buyers and folks who are hiding from the police.

Yours, Elmer.

What Can Ail the Kiddies?

"FOSSTON, MINN. — Two boys, aged 8 and 10, armed with six rifles and 10,000 rounds of ammunition which they stole from a sporting goods store, terrorized this town recently. They fired on homes, automobiles, gas stations and a tourist camp, holding off a sheriff's posse for hours and twice eluding it. The children had a record of a previous arrest for overturning 26 tombstones in a cemetery."—News Item.

—•—

Golly, how do you suppose children ever get ideas like that? No coaching, please!

—•—

It baffles us. Surely the national idolatry of cheap, tawdry, self advertising characters parading all over the national scene wouldn't have anything to do with it. Kids wouldn't be influenced, would they, by the fact that those who flaunt rules of decent behavior are glamourized?

—•—

Naw! Let's not be silly. Whenever you read of mere babies slugging, leering, shooting and throat-slitting these days it is simply due to the fact mommer allowed them to sit in a draft when infants. Popper refused Junior a Rolls Royce for Christmas And the milk was short of vitamins. Next case, Mr. Psychiatrist! And will you take the stand, too, Mr Balonus-Balonus?

• • •

VANISHING AMERICANISMS

"Where is the five-and-ten-cent department?"

—•—

"We aim to please."

—•—

"This store invites complaints of incivility."

—•—

"Here's twenty dollars—buy Junior a bicycle."

• • •

Those European countries act as if they were scared stiff they would do something to get back on their own feet.

CAN YOU REMEMBER—

Away back when any bright kid could answer the question "What are the important countries of Europe?"

—•—

Back when you could tell the winner of a war from the loser?

THE BIBLE SPEAKS
International Uniform Sunday School Lessons
By LOUIE D. NEWTON, D. D.

SCRIPTURE: John 20:30, 31; Acts 16:11-15; I Timothy 4:16; I John 5:1-5.
DEVOTIONAL READING: Hebrews 2:1-4.

Beliefs That Matter

Lesson for January 4, 1948

THE first three months of 1948 will reintroduce us to some of the great Christian teachings in regard to God, Man, Salvation and Christian Living. While many of us have studied these great teachings again and again, we shall be greatly profited in the lessons of this quarter, looking at life in today's changing world in the light of these timeless truths.

Dr. Newton

"And many other signs truly did Jesus in the presence of his disciples, which are not written in this Book; but these are written, that ye might believe that Jesus is the Christ, the Son of God; and that believing ye might have life through his name," John 20:30, 31. "Take heed unto thyself, and unto the doctrine; continue in them; for in doing this thou shalt both save thyself, and them that hear thee," I Timothy 4:16.

• • •

The Story of Lydia

SEE how the above truths are borne out in the story of Lydia, Acts 16:11-15. Here was a prosperous business woman, making an honorable living, "whose heart the Lord opened." Paul taught her the way of salvation. She and her household were baptized, she took Paul and his helpers into her home, and became a tower of strength as the Gospel was being spread throughout Europe.

Lydia was not attracted to Paul by his eloquent preaching, but by the story of God's love which Paul faithfully gave. And when she had been saved, she began immediately to translate her faith into works.

• • •

Proving Our Beliefs

JUNIOR boys and girls will like this story about Lydia because it is practical. We can see a woman opening her home to the preachers of God. We can see her in her place of business, inviting her customers to come and hear Paul preach. She was a living sermon.

Every junior boy and girl in every Sunday school in the United States can render the same vital service during 1948. There are literally millions of boys and girls in this country who have never been to Sunday school. They do not know anything about a Sunday school, but they would like to know.

You can start a movement in your community that will solve problems that the mayor and police cannot solve. They will thank you for your help, and God will bless you in time and eternity. Invite that neighbor boy or girl to Sunday school.

• • •

Belief Makes a Difference

YOU are what you believe. Ask the football or basketball coach. Ask the man who teaches people to fly planes in your community. You are what you believe. "Every one who believes that Jesus is the Christ is a child of God," I John 5:1.

And it matters greatly what you believe. You can go wrong very easily by believing what is false about God, just as you can go wrong very easily in flying a plane by failing to believe the right thing about the laws of physics.

• • •

Beliefs That Matter

JESUS is the Christ, the Son of God. That is the number one belief that matters. It was so on the day when Jesus announced, "On this rock I will build my church," Matthew 16:18. It is absolutely basic in every relationship of life.

I meet with business and professional men every day, in widely varying walks of life, who tell me that they are sustained by this belief. During the recent war, men lived in this basic relief. In these trying days at hand and ahead, belief in Jesus as the Son of God is the norm. We cannot face these difficult days without this anchor. And all this quarter we shall be studying, Sunday after Sunday, this great truth and those that grow out of this fundamental concept.

What a privilege to teach this great truth! The Sunday school teachers of our country are the most important single group we have. By their voluntary service, they are pointing our people to the one sure road that leads to the City of God. My prayer is that they shall daily seek to qualify under the formula of I Timothy 4:16. "Take heed unto thyself, and unto the doctrine; continue in them; for in doing this thou shalt both save thyself, and them that hear thee."

(Copyright by the International Council of Religious Education on behalf of 40 Protestant denominations. Released by WNU Features.)

THERE'S a great difference in dogs. So if you are going to own a dog, give time and thought to what kind of a dog it should be. If you have lots of room — fields, woods, lawns — the working class dog is for you. Collies and Belgian Sheepdogs are included here and they have proven their value in herding sheep and cattle.

The German Shepherd dog is another breed outstanding for herding ability and an excellent watch dog to boot. Working dogs are a dignified, powerful, serious lot, yet they will smother you with affection if treated right. Other breeds of dogs, as classified by the American Kennel club—their health, diet and training—are discussed in our booklet No. 78.

* * *

Send 25c in coin for "How to Raise and Train Your Dog" to Weekly Newspaper Service, 243 West 17th Street, New York, New York. Print name, address with zone, booklet title and No. 78.

Correct

"I've had a worrying time with the insurance people. They ask such awkward questions. They even wanted to know the state of my mind."

"How absurd! I suppose you left that blank."

For Harmony

"What's the matter, Jodkins?" demanded the bootshop manager. "Can't you help the customer?"

"No, sir!" replied the assistant. "He's trying to find two shoes that squeak in the same key!"

Aimed Right

"Jimmy!" his mother exclaimed. "How dare you kick your little brother in the stomach?"

"It's his own fault, Ma. He turned around."

Doing nothing is the most tiresome thing in the world, because you can't stop and rest.

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.

DOAN'S PILLS

Greet the New Year With a Buffet Supper!

(See recipes below.)

Welcome the New Year

Do you like to fix big platters of ood and set a large table? If you o, then this is the time to have a east. Invite some of your friends ith whom you'd like to welcome he new year, and serve them a nack buffet style.

Naturally, this can be on the eve f the New Year itself, or at any time in the afternoon or early evening of the day itself. You'll have fun, too, because there's the feeling of turning a clean page in our life, and it's only natural you hould want to start out such n occasion with your friends.

Your menu does not need to be xpensive. Select one of these enus and work it out with your ens and dishes.

Menu I.
Savory Meat Pie
Lettuce with Russian Dressing
Cloverleaf Rolls Beverage
Peach Gelatin

The meat pie is savory and tempt- ng for the cooler weather, and men- olk will like its meatiness. The des- ert is especially lovely but easy o make; in fact, why not make oth of these things ahead of time?

Savory Meat Pie.
(Serves 6)

1 pound beef chuck
1 pound lamb shoulder
Flour for dredging
Lard for browning
12 small onions
4 carrots
4 potatoes
1 cup string beans
1 teaspoon Worcestershire sauce
2 cups meat stock

Have meat cut in one-ince cubes. redge with flour and brown in hot rd. Season with salt and pepper nd place in casserole. Also pile egetables into casserole. Add 4 ablespoons flour to fat in pan where eat was browned, and stir until ickened. Add 2 cups meat stock nd let cook until thick. Pour this ver the meat and vegetables and ook in a moderate oven (350 de- rees) for 20 minutes. Remove from ven and top with a biscuit crust. eturn to a hot oven (400 degrees) or another 20 minutes and bake ntil crust is well browned. If you ant a nice glaze on the crust, rush with beaten egg before bak- ng.

Peach Gelatin.
(Serves 6)

4 or 5 canned cling peach halves
1 package raspberry-flavored gelatin
1 cup hot water
1 cup peach syrup

Arrange peach halves, smooth ide down, in bottom of a large ound mold or pan. Dissolve gelatin n hot water; add peach syrup and tir to blend Pour sufficient gelatin ixture over peaches to cover. Chill. hill remaining gelatin until con- ealed but not firm. Whip until very ight and thick. Pour over plain gel- tin. Chill until firm. Unmold. Serve ith table cream, soft custard or hipped cream.

Russian Dressing.
(Makes 1¼ cups)

1 cup olive or salad oil
¼ cup vinegar
½ teaspoon salt
Few grains cayenne
¼ teaspoon white pepper
2 tablespoons chopped parsley
2 teaspoons prepared horse- radish

LYNN CHAMBERS' MENU

Platter of Cold Sliced Turkey, Beef or Ham
with Assorted Cheese
Potatoes Au Gratin
Molded Vegetable Slaw
Spiced Pears Crisp Celery
Plum Pudding Hard Sauce
Beverage

Combine, beat or shake thoroughly before using. Pour over crisp wedges of lettuce.

With the price of tender cuts of meat so high, you may feel you'd like to have a beef cut for New Years because of its traditional place on the menu, but would rather forego roast beef itself.

Then why not plan a menu of this kind?

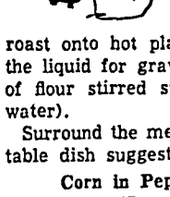
Menu II.
Danish Pot Roast
Brown Gravy
Boiled Potatoes
Celery Pickles Olives
Corn in Pepper Rings
Luxury Cake

The combination of seasonings will make this beef roast very inter- esting and pleasing.

Danish Pot Roast.
(Serves 6 to 8)

3½ pounds chuck roast of beef
Flour for dredging
Lard for browning
2 tablespoons brown sugar
½ cup vinegar
Salt and pepper

Dredge meat with flour and brown on all sides in hot lard. Season with salt and pepper, sprinkle with brown sugar and add vinegar. Add. 1 cup hot water. Cover tightly and cook slowly until done. Remove pot roast onto hot platter and thicken the liquid for gravy (3 tablespoons of flour stirred smooth in ½ cup water).



Surround the meat with the vege- table dish suggested in the menu:

Corn in Pepper Rings.
(Serves 6)

2 cups cooked whole kernel corn
1 green pepper
Butter
Salt and pepper

Heat the corn with butter, salt and pepper. Cut green pepper into six rings and place around the meat. When ready to serve, spoon corn into rings.

Luxury Cake.
(Serves 6)

1 quart vanilla ice cream
½ cup chopped pecan meats
1 cup hot chocolate sauce
6 squares sponge cake

Split cake in two; place a slice of vanilla ice cream between the cake. Put another bit of ice cream on top of cake and pour hot sauce over it. Sprinkle nutmeats just before serv- ing the cake.

Hot Chocolate Sauce: Melt 1 square bitter chocolate in double boiler, add 1 tablespoon of butter and 1½ cups sugar. Add 6 table- spoons hot water slowly and blend. Add ¾ cup rich milk and stir well; boil 10 minutes, watching carefully. Cook to soft ball stage, remove from fire and add a pinch of salt and 1 teaspoon vanilla. Cool slightly, then beat until creamy. Keep warm in top of double boiler.

Released by WNU Features.

LYNN SAYS:

Tested Cooking Hints Save You Time

Green peppers taste best in salad when shredded or slivered finely rather than chopped.

When you make cream puffs, drop the dough into muffin tins instead of on a cookie pan to insure high puffs.

Using two spoons instead of a fork when turning a roast in a pan will save the juices because there is no pricking of the surface.

When scalding milk in a pan, grease the bottom of the pan with butter or a mild flavored fat to pre- vent scorching or browning.

To prevent poached eggs from spreading, stir the water vigorously in one direction and drop the eggs in the middle of the whirl.

Save making an icing by sprin- kling chocolate chips over a cake after removing from oven. Let stand in warm oven for a few minutes and then spread. Sprinkle with nuts, if desired.

THE FICTION CORNER

PET PEST

By ROBERT DENNIS

THE footsteps came down the city room and halted at the door of Clint Lipton's office. Penny Alder felt eyes on her, boring down through the barrage of typewriter keys she was sending up. Something about Clint Lipton put a chip on her shoulder——

"Miss Alder—" the voice was too polite to belong to her pet pest, "—is Clint comin' back today?"

She looked up at the old man who stood in the door of Clint's room, a shiny serge suit bagging around his lean, stooped figure like a piece of wilted lettuce. She nodded. An assistant society editor had troubles enough. Let Clint Lipton take care of the sports department and his own pests. Old Hughey Lawler was his problem——

The old fellow touched the yel- lowed, saw-brimmed straw hat clamped down over his thin fringe of white hair.

"I've got some news about The Kid for Clint to write up," he said, as he crossed the narrow aisle.

"Oh," Penny replied helplessly. If it was about The Kid old Hughey would stand and gab forever——.

"'Course I've got to give it to Clint. I've been keepin' Clint right up to date on The Kid—" He swal- lowed at something.

"So he's told me." With dull fas- cination she watched the old fel- low's Adam's apple climb up and down the stretch of turkey-like neck above the over-size collar. Clint also had said—that the next time old Hughey tried to fold his ears back, he was going to——

"Did I ever show you the picture The Kid sent me when be was trainin' out on the Coast?" Hughey pushed a post-card portrait under her nose — a while-you-wait photo- graph of a young fellow in sailor blues, his hat cocked at an angle over one belligerent eye.

"A fine lookin' boy, Miss Alder."

She'd seen the face before. Her glance strayed in through the open door of Clint's office to where a shaft of late afternoon sunshine spotlighted a photograph tacked on the wall—a bare-torsoed kid in fight- ing pose.

She'd always looked down her short straight nose at those pictures of Clint's brawn and beef friends— the guys with tin ears and bent noses, the guys heaving forward passes—the tough he-guys.

And Clint Lipton—with his head of wild rusty hair, and that habitual frown wedged between his deep-set gray eyes—was part of his muscle menagerie, as far as she was con- cerned.

"—My grandson, Miss Alder—" You'd have thought the scrappy kid in the sailor suit was an admiral, from the pride in old Hughey's voice. "You ask Clint if The Kid wasn't on his way of being welter- weight champ—before he wanted to enlist——"

"I'll bet he was." Penny's com- ment dropped like a pebble into the deep pool of Hughey Lawler's pride. He gushed words.

Penny Alder actually was glad to see Clint's rust-colored head appear. She almost welcomed his deep frown when he spotted her caller. Old Hughey turned to Clint.

"I've got something for you to write up, Clint——"

Clint's nod toward his office was about as friendly as an umpire's thumb. "I can only give you a min- ute——"

"Sure—" The old fellow turned.

Penny found the Lipton frown aimed at her. "You're a pal," he

"You haven't got your hat on," said Clint gruffly. "I suppose that means it's another 'no date.'"

accused, "you know that old guy gets me down."

She looked up at him, and that chip was on her shoulder.

"For holding him," he scowled, "you're going to break down and go out to dinner—and places—with me tonight."

"Is that a pass or—a penalty?"

"Take your choise—only get your hat on." He wheeled away.

Penny stared after the back of his sun-burned neck. Why could he an- noy her more than any other man she'd ever known? His very vital- ity; the way that shaft of late sun put sparks in his rusty hair—every- thing about him bothered her.

"Let's have it fast, Hughey," Clint said, "I've got a date——"

That's what he thought. She closed her typewriter desk with a bang. She looked in again——

Clint's frown was concentrated on that latest picture of The Kid. He reached for a yellow telegram old Hughey held out.

"I come to tell you first, Clint," the old fellow's shoulders slumped, "because The Kid would want it written up on your page—where his friends could see it. He ain't comin' back, Clint."

Penny didn't get it at first—and then her chest went all tight for that old man in there. The way he stood —the tone of his voice—said that everything he'd been living for had been wiped out by a telegram sent to "the next of kin."

Clint kept frowning.

"You know what to say about The Kid, Clint," old Hughey prompted. "Tell 'em about that sweet left of his, and how nobody ever got past it."

The old fellow talked on and on. Clint listened, his face deadpan.

Penny Alder listened, too. She was still at her desk when Clint and Hughey Lawler came out.

"That picture—" the old fellow said anxiously, "—I wouldn't want to lose it——"

"I'll get it back to you." Clint was letting him go without even one word of sympathy.

"Sure — well — thanks. I guess I won't be comin' around any more, Clint. I mean, there won't be any more news about The Kid——"

Clint glowered as Hughey Lawler slowly started away—then, sudden- ly, he strode after him.

"You can't just walk out on your friends like that, Hughey." He gripped the old fellow's arm hard. "Drop around—anytime you feel like talking about The Kid——"

Penny doubted her ears, but the smile the old boy gave Clint was real enough. "Sure—I will, Clint."

Clint Lipton turned and came back—to halt at her desk.

"You haven't got your hat on—" his voice was gruff. "I suppose that means it's another 'no date.'"

"I—" she began, her eyes search- ing his.

"O. K.—go on, say it. So I gave him the brush-off by hanging out the welcome sign——"

She'd never tried to look beyond that scowl he always wore. Like The Kid's left—it wasn't easy to get past his guard——

"You really like old Hughey Law- ler," she said abruptly.

"Sure—if I didn't like the old pest I wouldn't let him bother me, would I? . . . But you wouldn't understand. You never give a guy a chance to see if you can like him——"

For a moment Penny matched frowns with her pet pest. She could feel his puzzled eyes follow her as she stood slowly, and moved toward the coat rack. He was right—she hadn't been able to understand why she'd let him bother her—but it was becoming clear. She must have liked the real Clint Lipton all along — even when she was carrying a chip on her shoulder for a tough guy who didn't exist——

When Penny Alder turned she was smiling—and had her hat on.

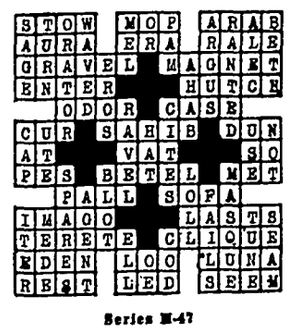
Answer to Puzzle Number 46



Series M-47

REA Setup Gives Impetus To Farm Electrification

Half of all United States farms have been electrified since the REA program was started.

In announcing the basic allot- ments for REA loans in the states, the department of agriculture com- pared the number of unelectrified farms in each state with the total number of farms in the state to give the percentage of unelectrified farms. The eight states having the highest proportion of electrified farms were Connecticut with 98.5 per cent, followed by Rhode Island, Massachusetts, New Jersey, Wash- ington, New York, Idaho and Ore- gon, all of which were more than 92 per cent electrified.

At the other end of the list were North Dakota, with only a little more than 15 per cent of the farms electrified, preceded by South Da- kota, Mississippi, Nebraska, Ten- nessee, New Mexico, Montana and Kansas, which had nearly 42 per cent electrified.

The other 32 states ranged be- tween the 42 per cent and 92 per cent limits. For the country as a whole, the July, 1947, figures show 61 per cent of all farms electrified as compared with 54.3 per cent a year earlier. Nearly 400,000 farms were electrified during the 1947 fis- cal year, the largest increase on record for any year since the pro- gram started. In 1935 less than 11 per cent of U. S. farms had electric service.

2. Pyrenees.
3. 125 pounds of hay and 7 pounds of bran. It drinks 50 gal- ons of water.
4. Endor.
5. A Geneva cross.

Ingenious Burglar Alarm In Jap Temple of 1697

Few modern burglar alarms are as ingenious as the one in the Chioin temple in Kyoto, Japan, which was built in the structure when it was erected as a military headquarters in 1697. When the alarm is set, reverberations caused by an intruder walking across the wooden floor produce sounds like the twittering of birds in the rafters. Therefore, he is not aware that his presence is known until he is captured.

Older folks say it's common sense . .

ALL-VEGETABLE LAXATIVE

● In NR (Nature's Remedy) Tablets, there are *no* chemicals, *no* minerals, *no* phenol derivatives. NR Tablets are different—*act* different. *Purely vege- table*—a combination of 10 vegetable ingredients formulated over 50 years ago. Uncoated or candy coated, their action is dependable, thorough, yet gentle, as millions of NR's have proved. Get a 25¢ box. Use as directed!

FROM HOSPITAL

Tiny Marian Groff, of Remsen, seven months old, recently was brought back from Rochester following her thir operation. A throat ailment was given the child difficulty in swallowing. Doctors predict that the child will recover completely.

WOLF

The C. A. Stow family of near Merril had the wolf at their door recently. Mr. Stow shot it and collected a bounty from the county auditor's office. One of the children was the first to see the animal enter the yard while the family was at breakfast and Mr. Stow's rifle brought it down with the first shot.

RESCUED CAGER

Manning fireman rendered quite a service to the Manning high school basketball team last week. They went to a fire, put up a ladder and hauled out Merlin Restermudt, prep cager, from the smoke-filled upstairs room where he was trapped.

TRAILER FIRE

Two infants of Mr. and Mrs. Edward Biretz of Waterloo were killed when a fire swept the familey's trailer-home recently. The mother had left the trailer to go to a nearby filling station when the trailer caught fire. Eugene, 20 months, and Catherine, 7 months, received mortal burns.

Smooth SAILING

Have you been waiting for that "ship" to come in?
It's coming in now, loaded to the gunwales with good wishes from all of us for your health and happiness for 1948.

"Ring out the old, ring in the new,
Ring, happy bells, across the snow;
The year is going, let him go;
Ring out the false, ring in the true."

—Alfred Tennyson

As the glad bells peal out at the stroke of midnight to mark the passing of the old year and the arrival of the new, we pause for a moment to express our appreciation for the confidence, friendship and good will which have been extended to us during the past year and to extend our best wishes for a bright and happy New Year.
